

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

THE

ECONOMIST,

WEEKLY COMMERCIAL TIME

Bankers' Gazette, and Railway Monitor:

A POLITICAL, LITERARY, AND GENERAL NEWSPAPER.

"If we make ourselves too little for the sphere of our duty—if, on the contrary, we do not stretch and expand our minds to the compass of their object—be well assured that everything about us will dwindle by degrees, until at length our concerns are shrunk to the dimensions of our minds. It is not a predilection to mean, sordid, home-bred cares that will avert the consequences of a false estimation of our interest, or prevent the shameful dilapidation into which a great empire must fall by mean reparation upon mighty ruins."—BURKE.

The Political Economist.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d.*

In accordance with the suggestions of many subscribers, it is intended to publish the series of articles on the "Money Market for Men of Business" separately, carefully revised, and with a Preface.

THE ADVANTAGES THAT WOULD ACCRUE FROM AN OWNERSHIP OF THE RAILWAYS BY THE STATE.

THE Act of 1844 upon Railways has served a very useful purpose, if not the purpose for which it was proposed. The fact that it will come into operation in 1865 has *advertised* the subject to which it relates. Had it not been for its aid, we might have written articles without number upon the purchase of the railways by the State, but no one would have considered them or read them. But now the discussion, commenced by us four weeks ago, has been taken up in many quarters, and there is a much greater agreement in our views than we expected. A thing so disliked on principle in England as an increase of State action,—an idea so new as the acquisition of the railways by Government,—will need, and ought to need, much discussion before it can be received. There are two great divisions of the subject:—First, would it be advantageous if the Government *could* become sole proprietor of the railways? Secondly, if it is advantageous, can they do so consistently with the rights and the interests of the railway shareholders and with the safety of the national finance? The second inquiry is undoubtedly complicated and difficult, but the first, we think, is easy. We believe it is easy to show that the transfer of the railways to the State would be very beneficial, *if only it can be effected.* We naturally ask three questions.

1st. Would the transfer of the railways to the Government increase their utility to the public?

2nd. Would it reduce their expenses, the *cost* of that utility to the public?

3rdly. Would it diminish the *danger* which to some extent is inseparable from railway travelling, but which we must reduce as much as possible?

To all these three questions the answer is favourable to the change under discussion.

The utility to the public would be greatly augmented. It would then, as we showed at length in our previous article, be possible for the Government to try experiments—founded on long-sighted considerations—calculated to secure great though distant benefit. The principle of the postal reform is in its essence applicable to railway reform. That principle consists in the substitution of low uniform rates of carriage for high capricious rates. The reasons why the penny-post reform has produced so considerable an increase of revenue are two:—first, that everybody knew what they would be charged, and next, that nobody was charged very much. If the principles, we do not say of uniformity, but of simplicity and intelligibility, and also the principle of low charges, were simultaneously applied to the railway traffic, as they were to the letter traffic, we should be sure to have similar results. A simple, an easy, a cheap mode of communication will promote communication; a dear, a complex, an *inexplicable* tax on communication will hinder communication. The latter is what we have; the former is what we might have.

We have had lately the greatest instance of the stimulant effect of such changes that the world has ever seen. When Sir Robert Peel began to reform the tariff, it was an incoherent heap of innumerable charges; its charges were high and capricious: now it is a simple tax on few articles; it is cheap and plain. We all know the result—we keep on reducing taxes, and yet the people are so happy that they pay more still. We have shown how possible it is to raise the nominal revenue, and yet to lighten the burden to the consumer. We increase the tax-payer's income till he is much less burdened by what he pays. No such reform is possible when numberless boards of directors settle innumerable rates of traffic. While that remains, the present evils must remain. The *distribution-tax* within the country will continue to be what the *admission-tax* at the Customs used to be: it will continue to be oppressive, perverse, and miscellaneous; it cannot be cheap, natural, and simple.

People forget that the removal of a hindrance to production is a main use of repealing a tax. Would not a cheap and clear railway rate for agricultural produce be a greater benefit to the agricultural interest than any possible reduction of taxation? Probably a few years would convince every one that a low plain traffic charge would be worth a remission of the malt duty ten times over. And it would affect all the agricultural interest, while no one pretends that the repeal of the malt tax would benefit more than a comparative few.

There is no reason to press the argument too far. It is strong enough without pressing. We do not say that a result *equal* to the result of Customs reform or postal reform may be effected: beforehand, the magnitude of such results cannot be known, and it is better not to overrate it; but all argument shows that this new application will achieve the same sort of effects as the former applications.

It must always be remembered that in cases like these the effect of simplicity is to intensify the effect of cheapness, and

Digitized by Google

the effect of cheapness to intensify the effect of uniformity. The two act together, and the two are "more than twice one;" their combined effect is immensely more than the sum total of their separate effects. "Little to pay for locomotion, and "that little *known*;" this is the rule for augmenting the amount of locomotion, and for increasing its yield. The railway companies never will—never can—try this great experiment, and the Government might and could; and this is a great reason why the Government ownership of the railways would be more useful to the public than a private ownership.

But though it is the most conspicuous, and perhaps the most forcible reason, it is not the only reason. The division of *jurisdictions* in the railway kingdom is an inconvenience, like the separation of political states. You often cannot get out of one into the other. If one company own an arc, and another the chord of that arc, and you happen for any other purpose to get on the line of company No. I., you will have to go by its curve; you will never get on to the line—the straight line—of company No. II. The trains will "dodge" you: the train you want to go by in the adverse jurisdiction will have just gone whenever you happen to arrive, and it will be pleasanter to go at once the long way round, than three hours hence to begin the straight journey. Goods are driven about in the same arbitrary and capricious way as persons. Every line tries to keep every man and everything as long as it can, and to get the most out of him, even by compelling him to travel twice the distance that he need. Parliament felt this difficulty acutely some years ago, and gave a power to a court of law—the Court of Common Pleas—to interfere in such cases. But Lord Campbell justly said at the time that no judge could adjust a time table. It could not say when trains should start and when they should not start. The difficulty may be clear; the selfishness of each railway, the animosity of the two railways, may be obvious; but to arrange, fix, and watch over an adequate remedy is beyond the competence of a court of law. Executive administration is not the business of a deciding court, and it would fail if it undertook upon it railway administration. The Court of Common Pleas has never effectually exercised its powers, and never will. The remedy provided by Parliament has failed, but the evil to be remedied remains. As long as there are separate realms with hostile interests in the railway world, all prescriptions will fail. The substitution of asingle owner for this infinity of owners is the sole effectual cure.

Again, the present railways injure the working class of large towns by the construction of their works, but do not benefit it by their administration, at least not equally or as much as they might. A railway has to go through a poor suburb of a big town, through the working-class quarter: it demolishes the houses, already too full; it increases the compression, already too great. But though it pulls down the old dwellings of labourers, it does not take them to new dwellings. Lord Derby presented a resolution to the House of Lords compelling railways near large towns to have a cheap working-class train, night and morning, suitable for daily labour. But with the present management we have no such train. We are not likely to see such a resolution turned into an Act of Parliament in the face of many resisting companies. We are not likely to see such an Act fairly worked by these companies. But the Government, if they owned the railways, might give the working class their share in the benefits of quick locomotion, though it will never get it from others.

These are important considerations in answer to the first question:—Would the suggested transfer of the railways augment their *utility*? There are other considerations which answer the second question:—Would it diminish their cost?

At first sight, it appears absurd to argue that the transfer of a trading undertaking from the hands of the trader into the hands of the Government would diminish its expensiveness. If experience has proved anything, it proves that the work of the trader who is to get the money saved is cheap and saving, and the work of a Government, of persons who do *not* get that money, lavish and dear. But yet we venture to say that the transfer *might* be effected so as to diminish the cost; it would be difficult so to effect it, we admit, but it would be possible.

In the first place, railway companies are now governed by Boards, with many of the defects of Government Boards. They are governed, as we may see by looking at the list, by a most motley, mixed class of persons. A land carrier of goods and people by steam machinery, and this is the business of a railway company, ought to be a special sort of a person, understanding machinery, understanding steam, knowing the people who wish to travel, knowing the goods which ought to be carried. Most railway directors know nothing of the sort. No. I. is likely to be a nobleman, No. II. a merchant, No. III. a capitalist or share dealer: they were not bred to traffic management, and are very much in the hands of those who *were* bred. The reasons why trading management is better than Government management are two,—first, that the trader is almost always educated for his trade; secondly, that he almost always has to live by it. But both these reasons fail here. The railway directors, as a body, do not live by railway direction, any more than they were bred to it. They have to find a fair dividend for their shareholders, but they could themselves commonly live as now if their respective lines failed to pay a dividend. The present mode of railway management may be described as that in which trading management is at its worst,—where the critical elements, the specific knowledge, the special interest of the trader, are both at their minimum.

A Government owner might so arrange that the real managers of the railways had more self-interest in their good working, and more knowledge likely to promote their good working, than the existing directors. The working of a railway is not a matter requiring enormous capital; the original construction of a line is immense and costly,—but the annual outlay for traffic management is not so very great. The total capital expended in railways in the United Kingdom was—

	£
1860	348,130,127
1861	362,327,338
1862	385,218,438

But the working expenditure of all sorts and kinds was only—

	£
1860	13,187,368
1861	13,843,337
1862	14,268,409

The first figures are unmanageable by small concerns. But a few companies of not immoderate size might well be adequate to the last. Such companies might receive concessions for fixed periods, subject to conditions ensuring a gradual but effectual trial of the various experiments by which, as we have shown, the utility of the transfer of railway companies to the Government might be proved. Such companies might be of moderate size, in which the directors were practical men, with real money involved. Limited companies are assuming so large a share in great enterprises, that it is probable they would, as a rule, gain those concessions. But they would not be essential; other partnerships could compete. Such a firm as Peto, Brassey, and Co. might have a good slice of our railway management, if it devoted itself to that and nothing else.

We say, therefore, that a transfer of the railways from private ownership might be so managed as to diminish the working cost. We do not say it *would* be, but it *might* be. We believe, to condense a long article into one phrase, that by a good and skilful handling it might transfer the actual business *to* men like railway contractors *from* men like railway directors: to those who know by experience the two contrasted classes we need not say any more.

Lastly. Would the suggested transfer augment or diminish the danger—the, in some degree, inevitable danger—of the public in railway travelling? The danger is in most cases but slight, looking at the number of persons travelling and the miles they travel over. The same quantity of locomotion could hardly be effected even at much greater cost of time with equal safety. Still there is some danger, and it is most in two cases. First, near great towns, where an intricate net work of railways crosses and recrosses, twines and intertwines. There is some risk here that at some intersecting point some mal-arrangement, some fatal misunderstanding, may happen. Occasionally, as we know, such things do happen. And here the multiplicity of Boards of Directors is a real and serious evil. This network has one government, if not to every thread (though even that is true in some dangerous places), at least to every two or three threads. We have put the lives of the public at the *mercy* of the *understandings* between several Boards of Directors always more or less hostile to one another, seldom working to suit one another exactly, each anxious to make the most of its own line. Where one management would be dangerous, we have

Digitized by Google

incalculably increased our risk by multiplying our managers. A Government ownership would at least get rid of this needless danger and perversely created risk. Secondly, there is some extra danger where a company is too needy to pay a dividend, and where its staff is cut down to the *minimum* required for common occasions, and has, therefore, no reserve for extraordinary emergencies. This too, Government ownership would prevent. The *contracting* firms which would then work our railways, would suit their contract to the nature of the line they took ; they would pay little for a bad line, much for a good line ; they would not, therefore, be tempted to economise, as the companies which have made a bad line, and have to pay a scanty dividend on an ill-expended capital, must be inevitably tempted.

These considerations, therefore, show that a transfer of the ownership of the railways to the Government might be made so as to diminish their danger, economise their cost, and augment their utility. It would be very difficult so to transfer, we know. But when great results are *possible*, we should carefully examine whether they are not also *attainable*. Granting that a State purchase would be exceedingly beneficial, it becomes the plain duty of the Executive Government to *inquire* whether that transfer cannot be effected.

THE PROSPECTS OF FREE TRADE IN AUSTRIA.

It is certain that free-trade principles are making great progress among the ruling classes in Austria, as Dr. Van Hock's able book on the policy of protection, to which we may have again occasion to revert, amply shows ; and there is good reason to hope that we may have a substantial, practical proof of this in the early conclusion of a commercial treaty with Austria, which may, perhaps, do for our trade with that Empire something like what the commercial treaty with Belgium has done for us already. It is satisfactory to know that there has been at least this result to the important Committee over which Mr Forster presided last year, on the commercial transactions of the Foreign Office, that it has certainly stirred up the Government into a much keener sense of its duty to English commerce ; and though of course that can be of little use without an awakening sense among foreigners of the advantages which free commercial intercourse gives, yet it may, and we believe will, make all the difference between availing ourselves at the earliest moment of the dawning light on these subjects abroad, and leaving our own commercial interests to be the last that are fairly pressed on foreign nations as they begin to desire an extension of their trade. At present, while our imports from Austria stick fast at an annual value between 800,000*l* and 1,000,000*l*, and our exports thither—*including* even the foreign and colonial produce, which merely passes through England—are valued at about half as much again, the value of our trade with the Hanse Towns is in imports about 7,000,000*l*, and in exports (including again the foreign and colonial produce) about 17,000,000*l*. Of course, Austria, our trade with whom goes almost entirely through Trieste, is not nearly so favourably situated as the German free ports ; but there can be no doubt that that great Empire has a vast deal to gain from us and a vast deal to give us, which the present shackles on her commerce alone prevent her from gaining and giving.

In the meantime, it is only fair to look at the reasons which have hitherto withheld Austria from embarking even as much as Prussia has done in the sagacious commercial policy of the French Empire. We do not believe these reasons to have been commercial reasons, or to have had so much their root in economical ignorance, as to have arisen from political jealousy of Prussia, or as the Austrian statesmen would naturally put it, a sacrifice of the economical interests of Austria to the higher political interests arising out of the claims of German unity. Prussia has had the great advantage over Austria of having originated the present Zollverein, and being thus the leader in the path of economical simplification. It seems probable that Austria has, ever since 1828, when this Zollverein was commenced, resented this Prussian leadership ; and it is certain that, in heading the Opposition, she has been influenced not so much by any economical considerations, as by the wish to set up an economical policy more likely to unite the minor German States with her and with each other, than the policy advocated by Prussia. Thus, when Prussia concluded her recent treaty of commerce with France, Austria opposed it, not in the interests of protection, but in the interests of German unity. In some respects, we believe,—so at least her statesmen tell us,—she was anxious to initiate a more thorough free-trade policy than Prussia. In others she was certainly much more protectionist, but professed to be so, probably was so, rather for the sake of attracting the smaller States by deferring to their objections to the proposed treaty, and this at the cost of some sacrifice of her own interests, than because the Austrian statesmen really believed the Austrian interests could gain by a policy of protection. All this is very candidly explained in an able article now lying before us in the Vienna *Botschafter* of Christmas-day last. "We confess," says that paper, "that we allowed "ourselves to be guided in our opposition to the Prusso-"French commercial treaty by a regard to great political interests "which had nothing immediately to do with the interests "of Austrian economy. These were the duties which, accord-"ing to our conviction, Austria has to fulfil towards the German "Federation. Not by the transition to free trade, but by holding "fast the protective system of the old Zollverein, Austria, in our "view, was making a sacrifice to the internal economical "unity of Germany and its territorial belongings. Germany "has, according to the Act of Federation, a right to this "unity, and that right takes for Austria the form of a duty. "The Prusso-French treaty of commerce was not to us "objectionable because it pretended to be conceived in the "interests of free trade, and to a certain point, no doubt, was "so ; but for us it was objectionable mainly because it con-"tradicted the fundamental principle of the internal econo-"mical unity of Germany." The moral contract with Germany, persists the *Botschafter*, demanded a great sacrifice from Austria,—the sacrifice of free-trade principles in the separate States to community of political purpose. But Austria did not rejoice in the sacrifice. She was willing to make it for a greater end, not willing to make it for its own sake. "Moreover," it adds, "the Prusso-French commercial "treaty, besides its assaults on the collective interests of "Germany and the spirit of the Act of Confederation, is "guilty of inconsequentialities which contradict its pretence "of being concerned in the interests of free trade. If we treated "incidentally the detailed provisions in the tariff of the "Prusso-French treaty, as new grounds of objection, "it was not because these provisions professed to be made "in the interests of free trade, but because in many of them "the spirit of the free-trade system appears to be not only "denied, but even deliberately mocked." The *Botschafter*, of course, goes on to say that as ungrateful Germany was unwilling to accept the great sacrifices which Austria offered, and knew that she was offering, for the sake of more perfect political unity, she is now absolved from all obligation of the sort expressed or implied, and the best thing Austria can now do, is to consult her own special interests in the matter, which are all on the side of free trade. "Austria," it says, "look-"ing to her own commercial condition, is much more nearly "interested in free trade than the South German States, or "even Prussia," and it ends with a very strong expression of opinion that it is the highest interest of Austria, not only to enter on the path of free-trade reforms, but to do so *as soon as possible*,—a very wise, and, we believe, a very significant opinion.

Of course, we in England cannot take this profession of high political disinterestedness quite in the sense in which it is put forward, though the Austrian statesmen are probably in earnest in what they say. But it may be taken as certain that they mean what they say when they declare themselves now in favour of free trade, and admit that political rather than economical considerations have hitherto biassed them in the opposite direction. There is probably no assignable limit to the benefit which free-trade policy may confer upon Austria. The State is eaten up with gigantic monopolies—like that salt monopoly described in a correspondent's letter, which enhances the legal price of salt tenfold, and leads to a great contraband trade with Turkey—monopolies that at once enhance the cost of the necessaries of life, and, by fettering the energies of men and wasting the productiveness of nature, still more diminish the means of procuring them. If Austria really aspires to the leadership of Germany, she cannot do better than *compete* with Prussia in free-trade policy. The first effect, no doubt, might be to embarrass slightly the labour market by injuring the artificial interests cherished by protection ; but we know well, by our own experience, how small this influence will be—how soon it will disappear in the new start given to industry by allowing

Digitized by Google

foreign products, that Austria needs, to come in unfettered, and removing the embargo on the native productions for which Austria has the greatest natural resources. We feel no kind of doubt that Austria would in a few years do a great deal more for her real influence in Germany, by sacrificing political to economical considerations, than she has done in the last few years by the reverse process for which her statesmen are now so anxious to take credit. They see at last fully the great financial and commercial benefit of letting nature and industry alone: let them rely on it that these benefits will not be only financial and commercial; that if Austria outstrips Prussia in her commercial and industrial progress, she will soon be a match again for Prussia in political influence.

MR CARDWELL'S DESPATCH ON THE FEDERATION OF BRITISH AMERICA.

THE British Government has met the wishes of its American subjects in a spirit of the heartiest sympathy. In a despatch dated the 3rd December, and wisely published by the Government of Canada immediately on its arrival, the Secretary for the Colonies informs the Governor-General that he has received the "resolutions;" that the accord which prevailed among the delegates reflects the highest credit upon the "temper and "judgment" of Canadian statesmen; that Her Majesty's Government accept the resolutions as a "framework" for the Bill to be laid before Parliament; that they wish for a deputation of Canadians to assist them in preparing the clauses, and that they will afford the Bill, when prepared, all the support in their power. The proposal, in fact, is frankly accepted as one conducing directly to the interests of both nations, and one which ought to be carried out with all the rapidity of which circumstances will admit. Only on three points does Mr Cardwell hesitate, and on one of these, after a paragraph so doubtful that he seems to be thinking aloud, he withdraws opposition. He does not like the uncertainty of the relations between the central and the provincial power. His words upon this point are somewhat remarkable:—"The point of "principal importance to the practical well-working of the "scheme, is the accurate determination of the limits "between the authority of the Central and that of the "Local Legislatures, in their relation to each other. It has "not been possible to exclude from the resolutions some "provisions which appear to be less consistent than might, "perhaps, have been desired with the simplicity and unity of "the system. But, upon the whole, it appears to Her "Majesty's Government that precautions have been taken, "which are obviously intended to secure to the Central "Government the means of effective action throughout the "several Provinces, and to guard against those evils which "must inevitably arise if any doubt were permitted to exist "as to the respective limits of Central and Local authority. "They are glad to observe that although large powers of "legislation are intended to be vested in local bodies, yet the "principle of central control has been steadily kept in view. "The importance of this principle cannot be overrated. Its "maintenance is essential to the practical efficiency of the "system, and to its harmonious operation both in the General "Administration and in the Governments of the several "Provinces."

It would not perhaps be advisable to press this point too far, as the right of making criminal laws reserved to the central authority will meet any conceivable form of open rebellion; but Mr Cardwell will do well to inquire whether the French Canadians are really determined not to allow the common Parliament to be absolute, whether they would object, for example, to allow a two-third vote to override every obstacle, the Constitution included. Otherwise, cases may occur in which the Viceroy, backed by a majority of colonists, will be compelled to suspend constitutional provisions, and seek an indemnity, not from the local, but from the Imperial Parliament. On another point Mr Cardwell is more peremptory. The power of pardon, he says, must be reserved to the Viceroy, and not given to the provincial governors. He is afraid, evidently, that a national Act may be nullified in a province by persistent remission of penalties, and the change will doubtless be accepted. The other revision ordered is more important, and reveals a very curious dilemma.

The French Canadians, who live in permanent fear of being improved off the face of the earth by their Saxon fellow-subjects, make it a *sine quâ non* that they should have a disproportionate influence in the Upper House. They, therefore, fixed the number of members for ever, and secured to themselves such a number, that if any one other province votes with them, they can stop any innovation whatever from passing Parliament. That regulation, though inconvenient, being a matter of contract for a well-understood end—the preservation of Catholic ideas—can be endured, but it has another result which its framers did not seek. The Upper House being filled with nominees for life, will one day consist chiefly of old men. Suppose they, being old and rich and timid, should, as a body, resist some democratic measure desired by the Lower House. There will be no means of securing agreement until a certain number of members are dead, a period beyond human patience. The Viceroy having no right to call up more members, there must be either a dead lock, or a revolution effected by force, the precise evils which constitutions are intended to avoid. It will be necessary, therefore, to revise the Upper Chamber, either by introducing an elective element, or removing the limit of numbers, and allowing the Viceroy to create one new French for every one English senator, or by changing the absolute veto into a suspensive one. This difficulty must be quite within the compass of men like MM. Brown, Galt, and Cartier; but it is a substantial one, and should be revised. On all other points the Government is evidently prepared to accept the colonial decision as final; and we may hope, therefore, that the Act of Federation which is to create a new nation on the American continent, which will relieve British America of provincialism, and Great Britain of the charge of providing for colonies too weak to defend themselves, may be presented and passed this session.

THE GROWING NECESSITY FOR LIBERAL WATCHFULNESS IN ASIATIC AFFAIRS.

SIR RUTHERFORD ALCOCK has received six months leave of absence in order to confer with the Foreign Office upon the affairs of Japan. Mr Lay has published a pamphlet to exonerate himself from the charge of having mismanaged the project sanctioned by the Home Government for assuming the guidance and control of the foreign policy of China. The fort of Dalimkote, in Bootan, has been taken by storm, with a loss of only two officers and fifty men. These are three items of intelligence published within the last three weeks, all demi-official, and all pointing towards a state of affairs which seems to demand a careful examination. Unless we are greatly mistaken, there is a growing tendency in the public mind to regard expeditions in Asia with something more than tolerance, with tacit approval if not active approbation. There are several causes at work which may be expected to produce that result, which will produce it, unless the educated public should on consideration declare that it is not the one which they desire to produce.

1. In the first place, there is at this moment a very great impatience of total national inaction, of the kind of quiescent waiting which many able politicians believe to be the best attitude for a country with territories so very wide and resources so very far from their full development as that of Great Britain. That attitude may be wise, we think is in certain crises very wise, but it is one of which a brave and energetic people will always be very impatient, for it involves great expense, and the unconscious or half-conscious suffering produced by great expense without any visible gain. The mass of people do not see quite so far ahead as their leaders, and while one section, therefore, is already beginning to cry for a rapid and extensive reduction of expenditure, another and larger section is rather anxious to see some return for their money, some gain either of territory, or influence, or tangible commercial advantage. Lord Hobart, by no means a bad authority and a strong advocate for economy, expresses both forms of irritation in an article published this week, in which he complains that we won't intervene, and won't retrench, will not enjoy the luxury, and will pay for it. On the whole, the nation, with some reluctance, and perhaps a mental reservation or two, has decided that it will not seek this return for its money in Europe, will not, unless aggravated beyond all bearing, interfere on the European continent even in defence of principles. But it is quite aware that it has come to that resolution on principle, sound or erroneous, and not out of any fear of war, or lack of energy, or want of material means, and it is quite pleased to

Digitized by Google

see its confidence in its own motives justified by successful action in Asia. It feels that while conquering in the furthest corners of a distant continent, it cannot be accused of resigning its influence in the affairs of the world, or of giving undue place to peace doctrines, or of suffering its energies to rust from dislike of active exertion. It is true that Asiatic triumphs are not quite so glorious as European triumphs, but they are very real and sometimes very profitable, especially to Englishmen who turn all their triumphs to one use, that of giving to their energies and their commerce more unrestricted scope. The impulse, therefore, is rather to like a success like that attained before Simonosaki, even though that success enabled a foreign Potentate to commit a horrible act of tyranny, viz., to burn down the Palace and execute all the servants of the Prince who had fought so gallantly and unsuccessfully. There is a disposition, not indeed to approve a war with Bootan, which is to most Englishmen an unknown land, but to assume the necessity of a war, and regard the fact of its occurrence with something very like favour. As a matter of fact, the expedition *was* probably justified, the Bootanese, besides giving a clear *casus belli* in applying coercion to our Envoy, having kidnapped British subjects, but the English people do not know that, and are delighted with the capture of Dalimkote, not because Dalimkote ought to be captured, but because being sore with inaction, they like to hear of a successful stir.

2. A campaign in Asia exactly fulfils the condition which Lord Stanley the other day said we all wanted, viz., a war with *limited liability*. Nobody knows what a war once begun in Europe may produce, how far we may be drawn in, what sacrifices we may have to make, what will be the state of affairs when the war comes to an end. We may have a thousand millions of debt, or France may be all powerful on the Continent, or the Revolution may have upset all existing arrangements, or we may be fighting by the side of allies we dislike, or—in short, we plunge into the unknown. But in Asia we do not plunge into the unknown, we know very accurately what the end must be. A war there may be long or troublesome or costly, or in exceptional cases, like the reconquest of Upper India, very great in scale, but we must win in the end. There is no reasonable probability, no probability that any statesman will take into serious account, of an Asiatic Power defeating Great Britain. That is one well-defined limit. There is little probability of an Asiatic Power obtaining unexpected allies, for the States of that continent care nothing about each other, hear very little about each other, would not, except in the single contingency of a Christian crusade against all faiths but one, under any circumstances assist one another. Europe holds aloof from such alliances, the only two Powers which have an interest in making them thinking it better—one to share the spoil as Russia does, the other to draw a cordon of silence round her colonies as Holland tries to do. This is a second and yet better-defined limit. Above all, it is hard to conceive, indeed impossible to conceive, except by imagining data, which is in politics a stupid and misleading process, of such a condition of affairs, that an Asiatic State would not gladly accept a favourable peace at the hands of its assailant. We can, that is, always get out of an Asiatic war when we like, and that is an almost perfect limit to our liability. The chances are great that we shall win without excessive sacrifices, greater that we shall win somehow, greatest of all that, whether we win or no, we shall get out of the affair easily and with credit. All those are not reasons for going to war, but they tend to make war easy; and while human nature remains as it is, an easy war will be undertaken on less provocation than a difficult one.

3. War in Asia is very profitable. In Europe it is not profitable, especially to Englishmen. We have no boundaries to enlarge, no dependents from whom to exact the price of aid, no enemy whom we are very anxious to dismember. If we could gain territory on this continent, it would be worth nothing, for it would be so filled with a hostile population as simply to embarrass us, or so liable to attack as to increase very greatly our permanent expenditure in defence. We got all there was to get in 1815, and more than was well worth having, and unless over-provoked by the Eastern question, shall continue, we hope, to regard continental territory as absolutely out of calculation, as much so as territory in the moon. But we have never applied this rule to Asia, have rather regarded acquisition of territory as the natural termination of war, have found it when taken very profitable. Moreover, the larger the quantity acquired, the easier the expense is apt to be. Hong Kong costs money, but there is no proof that if we took Chusan it would cost anything, and very great probability that the Empire of China or Japan, if we took either, would in *money* cost nothing at all. Trade, too, can in Asia be really expanded by war. The advantages we have gained in China have not perhaps been worth their cost, as Mr Cobden said, but they open the road to other advantages much more considerable, such as a century of free commerce on the Yang-tse-Kiang, and an expedition like that which opened the Japanese Inland Sea undoubtedly returns a very appreciable interest. It may be questioned whether the trade in silk alone will not repay all costs in a single year, and there is therefore no argument of loss to restrain ambition and the love of excitement, least of all when loss, if it did come, would fall on the Indian and not the English tax-payer. Profit is of course no justification for war, is often an aggravation of the injustice of war, but still, human nature being such as it is, a profitable war will be waged more readily than an unprofitable one.

4. Finally, there is a superstitious feeling in the public mind with respect to our position in Asia which tends strongly to war. We do not wish to exaggerate its influence, but we would ask any candid Englishman whether at the bottom of his heart there is not a half-acknowleged impression that Britain has a *destiny* in Asia, that in conquering in that region she is doing right, or at any rate doing that which it is the will of Providence she should do, and what, therefore, she cannot ultimately help. We have noticed the expression of that feeling in Parliament many times, and we believe that among people less cultivated than members of Parliament, more especially among that large section of our people who are called "Evangelicals," it has a very real and perceptible weight. Doubtless the patent fact that in Asia British dominion appears on the whole beneficial, that we carry with us material civilisation, external order, the means of wealth, and some possibilities of progress, has much to do with this, but there is something more. Our rise to power in Asia has been so rapid and remarkable, attended by incidents so unlike ordinary history—which is slow and rarely dramatic—the fact of this little nation ruling directly one-fifth of the human race, and indirectly nearly half, is so completely outside experience, that minds little versed in history become bewildered, and think they see influences at work which terminate, or seem to terminate, political free will. We should not go to war to carry out our "manifest destiny" in Asia; but the secret idea that we have *a* destiny makes us very much more ready to accept war than we might otherwise be.

For all these reasons there is we think a tendency in the public mind to be satisfied when it hears of war in Asia, and it is therefore incumbent upon those who think little wars as inexpedient in Asia as in Europe to watch every movement in that quarter with the most earnest attention. We could not help, as we showed, battering down the forts of Simonosaki, but we should have helped it if Simonosaki had belonged to France, and we have a painful doubt whether the public cared very much whether we could help it or not, and this little war in Bootan, quite justifiable probably, involves European soldiers and is absolutely without sanction from the nation, which scarcely knowing where Bootan is, still is pleased to hear that "Dalimkote" has been taken. The state of public feeling tends to intensify the activity visible in the Far East, and the ordinary restraints from war being in this case wholly wanting, there is necessity for much greater watchfulness on the part of moderate men than might be necessary either in Europe or America.

THE BANK OF THE NETHERLANDS.

EVERY one who has read Adam Smith's *Inquiry* knows something about the Bank of Amsterdam, an establishment which stopped payment in 1795. With the present state of banking in Holland, however, scarcely any one in this country is fully acquainted. A little information on this subject may therefore prove acceptable to our readers.

The Bank of Amsterdam was simply a bank of deposit, and for this reason did not issue any notes. In fact, no bank in Holland ever issued notes before the year 1814, when the so-called "Bank of the Netherlands" was established by Royal Charter, with a capital of 416,666*l*, divided into 5,000 shares of 83*l* each.

Digitized by Google

Small as this capital was, and though the Dutch Government alone took one thousand shares, a year after the Bank had commenced its operations no more than 200,000*l* had been subscribed, and it lasted another year before the subscriptions amounted to the 416,666*l* required. This disinclination on the part of the public to invest their money in the Bank is easily explained. Bank notes at that time were quite unknown in Holland, and the only knowledge people could get on the subject was rather unfavourable than otherwise. It is to be remembered that in 1814 the Bank of England had not resumed payment in gold. So the notes of the new establishment were not readily taken by the public, and, as a matter of course, capitalists were unwilling to invest their money in a concern which was not trusted by the public. Besides, there is another reason why it was very long before the Bank could issue a large number of notes. At that time no Dutch firm of high standing would have thought of discounting a bill. Discount was considered as the last means by which a man, when hard up, could avoid bankruptcy. Accordingly, the Bank had very little to do, and could only gradually increase its business.

The capital being small and all transactions being conducted in a very prudent way, the Bank succeeded, however, in making some profits. In 1815 a dividend was declared of 5.84 per cent. on 2,445 shares, in 1816 of 6 per cent. on 5,000 shares, and in 1819 10.39 per cent. was paid to the shareholders. Owing to this circumstance the Bank could increase its capital by 416,666*l*, which was at once subscribed by the public. The circulation of notes then amounted (31st of January) to 833,333*l*.

Of course our readers do not want us to trace the history of the Bank in all particulars up to the present date. The few details we gave may be sufficient. The distrust with which the bank notes were received by the public compelled the Directors to be as prudent as possible. Looking more to the future than to high profits at once, they constantly kept a large metallic reserve, very often equal to 100, and very seldom under 70 or 80 per cent. of their cash liabilities. Even in the midst of the crisis of 1857 their proportion never fell below 59 per cent. The following figures may give an account of the progress of the Bank:—

Date.	Capital, including Reserve.	Deposits.	Circulation.	Bullion.
	£	£	£	£
March 31, 1815.....	203,333 ...	905,000 ...	150,000 ...	835,833
— 1825.....	875,000 ...	1,100,833 ...	1,205,000 ...	1,666,666
— 1835.....	891,666 ...	1,425,000 ...	2,022,500 ...	2,145,000
— 1845.....	1,437,500 ...	1,645,833 ...	3,087,500 ...	3,585,833
— 1855.....	1,432,500 ...	1,327,500 ...	7,713,333 ...	8,564,166
May 9, 1864.....	1,533,333 ...	2,620,000 ...	9,941,666 ...	7,196,666

The original charter of the Bank had been given for 25 years, and consequently expired on the 31st of March, 1839. A second charter was then granted, rather similar to the old one, though a little more liberal. So, for instance, the curious restriction which did not allow the Directors to raise the rate of discount beyond 5 per cent. was removed. It was also permitted them by this charter to discount promissory notes and to advance money on foreign stocks, which they had never done before. On the other hand, the Bank was ordered to establish a branch at Rotterdam. It is very odd that this order has never been carried out till this year. It has been constantly deferred, and nobody seems to have made any objection.

This second charter was granted for twenty-five years, and, as the first one, simply by a Royal ordinance, without any interference of Parliament. Very little was said in the newspapers on the subject. Everybody seemed to be perfectly satisfied with the management of the Bank, and nobody wished to adopt any other system than that which existed.

When, however, the Bank Charter expired again, all this had changed a little. A good many people were dissatisfied with the Bank. They taxed the Directors with over-prudence, and with not rendering all those services to the public which they might render. They professed not to know why free competition should be admitted in every department of trade, and not in banking. Indeed, competition had never been excluded even there *in theory;* there existed no law or ordinance preventing any bank or private person from issuing notes. Yet, *practically,* the Bank did possess a monopoly, because all other notes, except their own, were required to be stamped. Now, this monopoly, it was argued, ought to be done away with. So, in order to give fair play to discussion, the Government decided upon having the question settled by Parliament. A Bill was introduced, by which it was proposed that no Company or private individual should henceforth be permitted to issue notes, unless authorised to do so by a special Act. At the same time this permission was proposed to be granted to the Bank of the Netherlands. This Bill was strongly opposed. It was said that such a regulation would practically strengthen the monopoly of the Bank, instead of abolishing it. Still, after a very warm debate, the Bill was passed by both Houses by a large majority. Since then a year has elapsed, and no other permission to issue notes has yet been granted, nor would any one think of making a request for that purpose, because the Dutch Parliament would be sure to refuse. The general feeling in Holland is very much opposed to free competition in this matter.

Nor is it unnatural that this feeling should exist. The Bank of the Netherlands may be charged with over-prudence; it is admitted by all parties that this is about the only fault it ever committed. The large metallic reserve it keeps may be detrimental to the interests of shareholders; but it cannot be denied that in bad times this very reserve always enabled the Bank to give every sort of facilities to trade. To this it must be ascribed in part, that most commercial crises have nowhere made so few victims as in Holland. Every merchant always knew, that however large the drain of bullion might be, there always was money to be had on good security,—either of bills, stocks, or merchandise,—at the Bank. Every reader of this journal knows how the Bank of England managed before and during the crisis of 1847. After having kept the rate of discount as low as 3 and 3½ per cent. till the beginning of 1847, they raised it to 5 per cent. in April, 6 per cent. in August, and 8 per cent. in October, whilst in the beginning of that month no other but 14 days' bills were discounted, and all advances on stocks absolutely refused. This state of things lasted till the Act of 1844 was suspended. Everybody knows that. Well, how did the Bank of Holland act during the same period? It raised its discount to 4 per cent. as early as September, 1845, and in November of that same year to 5½ per cent. This rate was maintained with few alterations till April, 1847, when it was lowered to 4½ per cent., though in November it had to be raised again to 6 per cent. This, however, was the highest rate charged, and during the crisis all sorts of facilities were granted to the public, as usual, still more so than in ordinary times. The same thing happened once more in 1857. The discount was raised before the crisis commenced, and during that year the highest rates were 7 per cent. for bills of exchange and 7½ per cent. for promissory notes. In fact, as long as the Bank has existed, 7½ per cent. has been the highest rate of discount.

We give these details merely to account for the strong feeling which exists in Holland in favour of maintaining the monopoly, not as an argument to prove that this feeling is right.

As to the operations of the Bank, they are very simple:—

1st. The Bank keeps the deposits of the Government. These are nearly all the deposits it receives, for it is not the custom in Holland to keep an account with a bank. Everybody keeps his money in his own safe. This is explained by the circumstance that the Bank allows no interest whatever on deposits, and would probably charge a commission for collecting bills, &c.

2nd. The Bank discounts bills and promissory notes. For the latter, ½ per cent. per annum is charged extra, as a rule.

3rd. The Bank advances money on securities, either of stock or merchandise. For the former the minimum, for the latter the maximum, rate is usually charged.

At the present moment the account of the Bank stands thus:—

Liabilities.	£	Assets.	£
Capital.....	1,333,333	Bills discounted	4,066,956
Reserve	200,000	Loans on merchandise	
Circulation	8,173,113	and stock.....	2,623,989
Deposits	3,255,495	Bullion.....	6,307,406
Sundry accounts.....	259,218	Sundry accounts.....	44,195
		Invested reserve.....	178,613
	13,221,159		13,221,159

The legal proportion between the bullion and the cash liabilities of the Bank is not regulated by Act of Parliament. It is fixed by a Royal ordinance and may be changed any moment, if necessary. It is at present 2 to 5. According to this the Bank might issue now about 12,500,000*l*. Having

Digitized by Google

issued only 8,166,666*l*, the present stock of notes is about 4,833,333*l*, which is called rather a low figure, as in April it amounted to 6,375,000*l*. Still it is a great deal better than two or three months ago, when it fell to 3,333,333*l*. The rate of discount was then raised to 7 per cent. It has since been lowered to 6 per cent. for bills of exchange and 6½ per cent. for promissory notes.

As stated before, the Bank has no branches anywhere. By the law of December, 1863, however, it is bound to have one in Rotterdam (which will be opened on the 1st of January, 1865), and to establish agencies in all the principal places in the country. This measure has been taken in order to avoid the blame that the Bank only serves for Amsterdam, and does nothing for the provinces.

THE REVENUE RETURNS.

NOTHING can look or be more excellent than the revenue returns which we publish. The income tax is behindhand, and it is always behindhand at this season of the year. But the Customs and the Excise exhibit a most remarkable excess above Mr Gladstone's estimate. Mr Gladstone estimated, in round numbers, that the

	£
Customs would yield	21,820,000
Excise —	18,000,000
	39,820,000

And three-quarters of each—not always a good, but sometimes an admissible, mode of reckoning—is :—

	£
Customs	16,365,000
Excise	13,500,000
	29,865,000

This, on this mode of calculation, is the estimate for the three-quarters of the financial year now expired.

And the *reality* is :—

	£
Customs	17,002,000
Excise	14,216,000
	31,218,000

showing an excess of 1,353,000*l* of reality over estimate for *three-quarters* of a year, or about a million and three-quarters from these two sources of revenue only.

As the expenditure is likely to be less next year, and as the actual revenue is far over the estimated revenue, it is certain Mr Gladstone will have a very considerable surplus to deal with. He disposed of 500,000*l* of it last year, it is true, by deferred reductions of taxation, but he will have a very important disposable fund even when this charge is duly placed to the account. Mr Gladstone may, therefore, be congratulated on his success, and the nation on its prospects.

SAVINGS' BANKS RETURN.

THE following return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending December 31, 1864 :—

	Total Amount received by the Commissioners.	Total Amount paid by the Commissioners.
SAVINGS' BANKS :—	£ s d	£ s d
In money and interest credited	20,986 9 9	330,318 2 1

THE COMMERCIAL STATE OF AUSTRIA.

(FROM A CORRESPONDENT AT VIENNA.)

VIENNA, January 1, 1865.

IN all my business experience I have never witnessed such a general prostration of enterprise, such an absence of that elasticity of mind which in England and America may be observed even in the midst of a crisis, as prevails in this great centre of Austrian trade at the present moment. Gloom pervades every branch of industry, poverty is rampant in the agricultural districts of the Empire, dissatisfaction fills every mind, and the natural consequence is an unparalleled stagnation of commerce. Let me try to probe the causes of a state of things which, however melancholy in itself, may be looked upon as a wholesome crisis through which, if correctly understood and treated, this great and beautiful country will arrive at a state of health and prosperity.

The Viennese love to quote the saying of old Frederic that "Austria is so rich in natural resources that her statesmen, however hard they have always tried, have never been able to ruin her," implying thereby that her material interests have never been properly cared for, and that they are sacrificed to objects of political intrigue. Without enlarging on this idea, suffice it to say that the present want of confidence may be primarily attributed to the calamitous condition of the finances of the Empire. The deficit in the Budget this year amounts to some seven millions sterling, nor is there any hope of much reduction in the expenditure as long as the unsatisfactory relations with Prussia and Italy, and the unsettled state of affairs in Hungary, necessitate the maintenance of an armed peace. A consequent increase of taxation, and continuous fluctuations in the value of the inconvertible bank note, no other kind of money being known, inspire a general feeling of uneasiness and distrust, and the existence of numerous State loans obtained on the system of lotteries engender a spirit of gambling most inimical to the steady pursuit of industry. The Ministry of Commerce has been virtually suspended for some months past, partly because it was inconvenient to have a man in the Cabinet who, if he will worthily fill his place, must on many occasions be found unwilling to follow his colleagues in the paths of la haute politique. It is obvious that the want of such a functionary must be prejudicial to the interests of trade, the removal of the innumerable grievances complained of by the commercial and industrial classes being nobody's business. And these grievances are as serious as they are numerous, the maladministration of most of the existing railways, as far as the regulation of the tariff of carriage on goods is concerned, being the most injurious. As an instance, we may mention that the same company carries spirits from Breslau to Trieste for a lower freight than from Vienna to Trieste, and has thereby compelled a large refinery of spirits at Vienna to remove its establishment in part to Breslau. In an evil hour, ten years ago, the Government sold the most important line in the Empire, that between Vienna and Trieste, to a French company, without retaining any power over the management, the nature of which is now found so regardless of the interests of the public as to create a suspicion of underhand political influences being brought to bear on it, with a view of benefiting the trade of Marseilles at the expense of Trieste. Several other companies show themselves as exacting in their rates as the French; and nothing, in the absence of competing lines, can remedy this evil but a rigorous interference of Government. The next great want is the construction of a complete net of cheap railways, particularly so in Hungary, where valuable crops of grain and other produce are quite unsaleable in many localities, from an absolute want of means of transport, except at an outlay which would more than swallow up the whole value of the goods. But, as rails are at double the price here of what they cost in England, and must pay an import duty of five pounds per ton, roads remain unmade because the iron industry must be protected. Another impediment to the development of trade are the exorbitant rates of stamps levied on every species of document, and the inequality of taxation in various parts of the Empire, pressing, as it does, most severely on the industrial districts. The existence of an antiquated law of usury, the evasion of which is a source of prosecutions and lawsuits, may serve as another illustration of the state of commercial legislation here. The salt and tobacco monopolies also prominently figure among the Government contrivances for raising money open to grave objections. In no country on earth is salt so plentifully sup-

Digitized by Google

plied by nature as in Austria; but the poor fisherman of Illyria is not allowed to gather what a beneficent sun dries for him on the sea-shore, and the peasant of Gallicia, when he harrows up a salt spring in his field, must carefully close it with soil, as no salt is allowed to reach an Austrian household except through the Government, which charges for it a price ten times higher than what it could be imported for from foreign countries, the gross produce of the sales being about four millions sterling p. a., leaving a net revenue of about 3,370,000*l.* A curious fact is that considerable quantities are sold by the Government at a low price for export into Turkey, the bulk of which is re-imported by smugglers. The tobacco sold produces about six millions, exactly one-half of which is expended on the manufacturing process and the charges of sale, the net revenue being three millions sterling. Many plans are afloat to make these monopolies sources of a larger revenue, at a smaller sacrifice to the consumer. There are many people who would pay to Government for the salt monopoly 10 per cent. more than the present net revenue, and yet undertake to supply the public at 20 per cent. below the present price. A different system with regard to tobacco would not only give a better revenue, but would enable Hungary to become a California, so well adapted is its rich soil for the growth of excellent tobacco, much sought for in Germany. At present, its cultivation is prohibited, except for Government purposes, or under special license.

Under all these circumstances, the marvel is, not that capital should be scarce and trade languishing, but that the industry and general prosperity of the country should have made such progress during the last twelve years, and, more wonderful still, there can be no earthly doubt that, if the powers that be so will it, the whole aspect of affairs might be rapidly changed, and Austria be put on the high road to good fortune. Give her another Bruck, and the thing would be done.

[TO BE CONTINUED.]

THE REVENUE.

I.—An Abstract of the Gross Produce of the Revenue of the United Kingdom, in the undermentioned periods, ended Dec. 31 1864, compared with the corresponding periods of the preceding year.

Agriculture.

AGRICULTURE AND THE NEW YEAR.

GAME PRESERVING.

THE new year opens with a slight rally in the price of wheat, the best qualities having sold in Mark lane on Monday last at 1s to 2s per quarter above the prices of the previous week. This, however, scarcely indicates any such advance of grain prices as will at all alter the actual position of farmers, who must found their present calculations on a permanently low price for all sorts of grain. Meat, on the other hand, is very dear, as much as 5s 10d to 6s per stone of 8 lbs having been paid in the Metropolitan market during the past month for prime beef; and prime Down and half-bred sheep are still selling at 6s per stone. Part of these high prices is due to the circumstance that from the deficiency of provender during last summer and autumn and the general scarcity of roots, the numbers of cattle and sheep which come to market in really prime condition are comparatively limited, and there can be no doubt that they have been brought to that state by greater outlay than ordinary. All the high rates obtained for meat must not, therefore, be set down to the account of the farmers' profit. Where farmers have made stock-keeping a prominent part of their system of husbandry, and have managed their stock with a wise and liberal economy, especially where the proportion of sheep stock is large, there can be little doubt that the farmers have not done badly during the past year, and that there is a fair prospect before them in the year now commencing. But there is a large number, perhaps the majority of farmers, on strong lands especially, who have hitherto relied mainly on their grain crops, and who cannot readily become large keepers of live stock, both from the character of the soil of their farms and the want of sufficient building accommodation. Indeed, that which has long been pointed out as the only safe method of farming, *i.e.*, to combine stock-keeping and corn-growing as mutual helps in one system, has now become an imperative necessity, and the husbandry

Digitized by Google

which does not or cannot conform to such condition must inevitably be inferior and unprofitable. Such an opinion is very prevalent, and crops up in most of our rural districts. As an instance, the monthly report of the North Riding of Yorkshire, in the *Mark Lane Express*, says:—"On the heavy clay soils the prices obtained for grain are very unremunerative, and, *nolens volens*, if they continue, landlords as well as farmers will participate in the loss. Clay land farms, we are credibly informed, are by no means good to let, and there is much outcry for returns at the ensuing rentals." In that district, too, newly-established ironworks have had the effect of so advancing the wages of labour, that able-bodied men cannot be got for farm work under 15s per week. Now, with various local modifications, these remarks and the state of the labour market are applicable to all our rural districts. How, then, are the inferior and stronger soils to be made reasonably profitable? How are the owners of such property to hold their rentals together? The answer must be that both tenants and landlords must stir themselves. They must look at their actual positions, and adapt themselves to the exigencies of the times. The clay land farmers may not be able to do anything with a breeding flock, but they may feed off some sheep in the summer and autumn months, provided their land has been properly drained, and they may derive good returns from a herd of dairy cows. Much of the strong land now in tillage was once dairy land, and though we do not believe that more than a certain proportion of strong arable land will again be laid down to permanent grass, there can be no doubt that on such soils fully one-half of a farm should be grass land, and that a herd of cows would prove the most profitable kind of stock. Dairy produce has long sold high, and the great difficulty of reverting to dairy husbandry in many districts where it was once generally practised, consists in the unwillingness of the farmers' wives and daughters to engage in dairy work. This will eventually right itself, for if the small dairy farm cannot be restored, farmers holding larger breadths of strong land will find their account in a dairy, and will sooner or later organise some machinery for executing the work. But if farmers are called on by the exigencies of the day to exert themselves and to get out of their old routine, surely landowners can have no excuse for allowing obstructions to all good farming to exist?

Look at the following account of the battue shooting on the estate of the Earl of Stamford, at Bradgate Park, which has been going round the press. The shooting (14 guns) lasted four days with the following results:—"On the first day they killed 770 pheasants; on the second, 2,102; on the third, 1,524; on the fourth, 390—total, 4,696 pheasants. Second day, 1 partridge. First day, 362 hares; second day, 526; third day, 195; fourth day, 195—total, 978 hares. Second day, 1 snipe. First day, 17 various; second day, 5; third day, 340; fourth day, 2,718—total 3,869 rabbits. Aggregate of first day's shooting, 1,746; second day, 2,476; third day, 2,068; fourth day, 3,321—grand total, four days' shooting, 9,611." Now, making the largest possible allowance for the game fed on the park, woods, and other land kept in the owner's own occupation, can it be doubted that an immense proportion of the head of game which could afford such a four days' slaughter has been reared and fed for months on the produce of the tenants' crops? Truly such wholesale slaughter in four aristocratic holidays must convey to the minds of practical farmers a somewhat desponding feeling as to the progress of husbandry and the state of the farmers on Lord Stamford's property.

And it is certain that this system of game-preserving, not for the sake of sport but for mere ostentation by a coarse and vulgar slaughter, is attracting a good deal of attention amongst farmers, more especially since that last turn of the screw, the practical conversion of the rural police into game-watchers.

At the late dinner of the Coventry Christmas cattle fair, Mr Caldecott, himself a landowner and a sportsman, in reference to game and the game laws, said "They wanted clearly and decidedly old English sport, and not the present English butchery. There was not a tenant-farmer there present who would not delight in the old English sport, and there was not a tenant-farmer present *who did not feel in his pocket* the difficulty of the English butcheries. Every Englishman liked to see his landlord or anybody else going over his ground and having a fine day's sport, *providing that he injured nobody.*" Mr Caldecott had before admitted that the great difficulty they had "was four-footed game—hares and rabbits."

This is well enough as indicating a landowner's dislike to battues, but in the actual state of this country "a fine day's sport,"—expect, perhaps, in partridge shooting—cannot be had on cultivated land, without such a preservation of game as must be very injurious to the tenants' crops. A fair amount of sport might be had if the game was entirely under the farmer's control, and nothing short of that will protect the tenants from game damage. As Mr Umbers, a farmer, said at Coventry, a landlord had a right to stock his land with game or rats if he pleased, but in so doing he had "no right to infringe on the property of the tenant-farmer." Mr Burditt thought game should be the property of the tenant, as it is by law. He also said "the present system only tended to create ill feeling between landlords and tenants, and to set class against class."

Mr Caldecott then spoke again, saying, "The case was undoubtedly a hard one, but they must go quietly to work to get the evil remedied. They must try to convince the landlords it was not their interest to have too much game.....A first step against the system would be to take farms on leases, but a great point was to introduce a feeling between landlords and tenants, *that they must both live on the land*; and if they found, as they had already done in this country, that the land would not grow its produce under the present system of high preserving, it must not be practised." He thought the landlords should be induced to give up game-preserving gradually.

This, however, can scarcely be accomplished, for, as Mr Swinnerton said, "he did not understand how they were to meet the system of high game-preserving half-way, while the farmers were having their crops destroyed by wholesale.....The game, in many instances, was so numerous that it did as much mischief to a crop as would a flock of sheep." Several speakers also strongly objected to the employment of the police in protecting game as is the case under the recent Act of Parliament.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 5th inst. The return for the previous week is added:—

DEBTOR.	Jan. 5, 1865. f	c		Dec. 29, 1864. f	c
Capital of the bank	182,500,000	0	.....	182,500,000	0

Sundries	8,268,723	31	.....	5,916,711	18
	1,338,572,487	18	.....	1,270,310,135	86

A decline of 29,898,000f in the metallic reserve, an augmentation of 64,414,000f in the note circulation and of 93,871,000f in the discounts, are the principal features in the Bank return of to-day compared with that of last week. The decline in the stock of coin and bullion, though considerable, is less than might have been expected at this season of the year.

After Thursday last, the Bourse quotations continued to improve in a marked manner up to Monday; but on Tuesday there was a relapse, and yesterday the market was much agitated. The consequence of the rapid rise has placed several speculators—one of these a very large dealer in the *coulisse*—under the impossibility of meeting their engagements, and they have been "executed." To-day the Bourse has been calmer. It is probable that a considerable portion of the large sum (several millions sterling) which the different companies are now paying in coupons, will be carried to it. The following are the quotations—the marked advance in the new Mexican loan will be specially noticed:—

	Dec. 30. f	c		Jan. 5. f	c

At Lyons, as at Paris, a petition praying for an inquiry into the banking system has been signed, and others are being got up in other great towns. One of the newspapers says that the Government is disposed to comply with the prayer. If so, a sudden change has come over its resolutions, for hitherto it has been of opinion that, as it has no intention whatever of disturbing the existing system, a public inquiry would be pernicious rather than useful. Let us hope, however, that the newspaper is well informed. Inquiry would let in light, and light on banks and on currency is much needed in this country, if only to dissipate the illusions which prevail about the possibility of permanently fixing the rate of interest. And if the inquiry should be, as some persons suggest, extended to the operations of the Credit Companies, so much the better. The public would be both pleased and edified by the revelations that would be made.

The result of the sequestration of the Bank of Savoy will in all probability be a prompter amalgamation of that establishment with the Bank of France than would otherwise have been arrived at. The sequestration caused, as will be supposed, considerable agitation at Annecy. There was a run for gold, but as it had been foreseen and provided for, it soon ceased.

An article in the *Constitutionnel*, from the pen of an eminent writer, M. Louis Couture, draws attention to the "new situation" of Mexico. According to M. Couture, this new situation is established, not only by the political and military successes of the Empire, but by the tide of emigration which has already set in, by the construction of railways on an extensive scale, by the formation of companies for the establishment of regular lines of steam communication between the different ports, by the support which the project of a National Bank has obtained from Mexican capitalists, and by the disposition to engage seriously in the peaceful and profitable pursuits of commerce which is generally manifested by the more enlightened part of the population.

The Customs returns for the eleven months ending November of the year 1864 show that the estimated value of the imports was 2,260,360,000f, whilst that of the corresponding period of 1863 was 2,224,994,000f; of 1862, 2,024,213,000f; and of 1861, 2,236,709f; and that the estimated value of the exports was, in the eleven months of 1864, 2,684,646,000f; in those of 1863, 2,399,191,000f; of 1862, 2,012,992,000f; and of 1861, 1,727,462,600f. The imports here referred to are only those that were taken out of bond for consumption; and the exports are those of French production exclusively.

	59 890 966	188,849,674	121,226,347	168,311,291

Turning the totals for the eleven months of 1864 into English money, the results are as follows:—

	£
The imports of gold were	16,473,538
The exports of gold were	12,704,181
Excess of imports	3,769,357
	£
The exports of silver were	11,581,505
The imports of silver were	9,949,625
Excess of exports	1,631,880

Deducting the excess of export of silver from the excess of imports of gold, it appears that in the first eleven months the stock of precious metals increased by 2,137,477*l*. As to the amount sent to the East, it was 1,653,780*l* in gold, and 180,536*l* in silver to Egypt; 4,973,152*l* in silver to British India; in the latter metal, 486,560*l* to China; the total being 7,294,028*l*.

Since the autumn of 1863, negotiations have been going on for a treaty of commerce and navigation between France and the United Kingdom of Sweden and Norway. This treaty is now on the point of being concluded. Sweden and Norway are the only European countries of any note, whose vessels, in direct intercourse with France, are subject in the latter country to the exorbitant tonnage duty of 4f 50c per ton. French vessels are altogether exempt, and other vessels pay only a small duty per ton. In addition to this, cargoes of timber have to pay a differential duty when they arrive in other than French ships. It seems, indeed, very singular that such seafaring nations as the Swedes, and more particularly the Norwegians, should be the very last to avail themselves of the opportunity of getting rid of an exceptional treatment which has had a most injurious effect upon their navigation, and will shortly extinguish it completely, as far as France is concerned, if matters are allowed to go on as they are. The exemption from tonnage dues and differential duty operates as a high premium for French ships, and has called forth a yearly increasing fleet of such ships especially adapted for the northern trade. This fleet would never have sprung into existence, if Sweden and Norway had concluded their treaty with France some years earlier, which would have had the effect of reducing the dues and abolishing the differential duty. It is difficult to account for this delay, as Sweden and Norway have everything to gain—more even than any other country, considering the importance of their mercantile navy—and nothing whatever to lose by a treaty with France. The only explanation of the matter is to be found in the known tenacity of Sweden in upholding a protective tariff. France naturally is unwilling to release Swedish shipping from the tonnage dues, as long as each and every one of the productions of French industry is liable to exorbitant duties in Sweden. The protectionist interest seems to be more powerful there than in any other country, and strong enough to frustrate every effort to deliver the people from the bondage in which they are held by a few manufacturers. Protectionism is now-a-days universally condemned, and the era of freedom is rapidly approaching. Nowhere free trade is more needed than in those isolated and thinly populated countries of the North, where every protected industry assumes the character of a monopoly in proportion as competition is wanting within the country itself. Every protective duty then becomes a proportionate tax levied on the whole community for the sole benefit of manufacturers. It is most astonishing that Sweden should long have borne this taxation, in addition to all other burdens, without being totally ruined years ago. It would seem but natural that frequent financial crises should occur as an unavoidable consequence of such a perverted system, and that the country, where it prevails, should find itself in perpetual want of money needed for legitimate purposes, when nearly all its capital and most of its foreign and domestic credit are employed for manufactures, founded, not upon sound calculations and proper and economical management, but upon profit to be derived from protection,—that is *taxes upon the consumer*. Considering the great advantages England and all countries that have more or less followed her example are deriving from free intercourse with the rest of the world, Sweden and Norway may be congratulated on the prospect of abandoning a commercial policy which is a clog to the steady development of their rich natural resources. As soon as industry and navigation shall be completely liberated from this heavy burden, these countries will rise to a degree of prosperity and pecuniary independence hitherto unknown to them, and the Government that takes a decisive step in this direction will be deserving of the lasting gratitude of the two nations.

The following is the market report:—

FLOUR.—At *Paris*, yesterday, prices were very firm, the quotations were: Six marks, 48f; current month, 49f; four months of January, 50f 50c; and 50f four months of March; 52f 50c and 52f four months of May, the sack of 157 kilogs. Type Paris, 29f 25c current month; 29f 75c to 30f four months of January, the 101 kilogs.

WHEAT.—At *Paris*, yesterday, business was without animation, the quotations were almost the same as last week. Choice red wheat, 26f 50c; red, 26f; first quality, 25f 50c; good sorts, 25f the sack of 120 kilogs.

COTTON.—At *Havre*, in the week ending Friday, the sales were 12,183 bales and piculs, and the arrivals 1,450 bales. The stock was estimated

Digitized by Google

at 52,100 bales. The closing quotations were 5f to 10f higher for United States; 5f for Coconada; 10f to 35f for Surat; 5f for Kurrachee, Tinnevelly, and Bengal; 5f to 10f for Madras; 3f to 5f for China. Low New Orleans was consequently 343f the 50 kilogs; good ordinary Broach, 240f; Tinnevelly, 220f; Madras, 225f; China, 193f; Egypt, 320f. This week, the market has been calm, and yesterday New Orleans was 317f 50c; Pernambuco, 315f; Jumel, 320f; Surat, 120f; Oomrawattee, 235f and 225f; Tinnevelly, 180f; Madras, 205f; Coconada, 207f 50c; Japan, 217f 50c; China, 187f 50c and 182f 50c.

SUGAR.—At *Havre*, in the week ending Friday, business was calm, but prices were firm. The sales were 65 cases French West India, disposable, 51f the 50 kilogs, bonne quatrieme, duty paid; 22 ditto ditto, for delivery, 51f; 430 casks usine, 64f; 564 Havana, 32f 25c to 32f 50c, No. 12, in bond; 240 ditto, old, 32f, No. 12; and 150 ditto, 31f. The arrivals were 450 sacks from Dunkirk. This week, Havana, No. 12, in bond, 35f 25c. At *Nantes*, last week, the sales were 5,000 sacks Reunion, old crop, 54f, bonne quatrieme, duty paid; 2,400 ditto, new crop, 54f 50c; 365 casks French West India, 51f, bonne quatrieme; 40 usine, 61f 75c; 5 ditto ditto, 58f; 25 ditto, 59f; 32 sacks ditto, 62f 50c; 10 French West India, 54f 25c. This week, Reunion, new, 54f 50c, bonne quatrieme; ditto, old, 54f 25c. At *Bordeaux*, last week, there was no business. Prices were nominal. French West India, 52f; Reunion, 54f 75c; Mauritius, 55f 50c; Santiago, 52f; Havana, 32f 50f, No. 14. This week, Havana, for re-exportation, 36f. This week, no sales. At *Marseilles*, last week, sales consisted of 3,000 bales: Reunion, 55f, bonne quatrieme, duty paid; 800 casks Havana, disposable, 34f, in bond; 1,000 ditto Havana, for delivery, 34f; 500 ditto Havana, disposable, 33f, No. 12, bonne quatrieme. This week, no sales.

COFFEE.—At *Havre*, in the week ending Friday, the sales were 2,500 sacks Hayti Port-au-Prince, 81f 75c to 81f 85c the 50 kilogs, in bond; 200 Gonaives, 89f; 3,850 Rio unwashed, disposable or for delivery. 71f to 74f; 8,211 ditto ditto, for delivery, 73f to 77f 50c; 965 Rio washed, for delivery, 93f to 98f; 500 Santos, for delivery, 75f 50c; 2,800 ditto, in bond, floating conditions, 76f; 500 Mysore, 87f in bond. By auction, different sorts damaged were sold. This week, Laguayra, 90f; Rio, 71f in bond; 500 Rio, for delivery, have been sold at prices kept secret. At *Bordeaux*, last week, business was almost null, but prices remained firm. The sales consisted only in 35 cases Santiago, at 104f, in bond. This week, no sales. At *Marseilles*, last week, business was calm, but on the best sorts prices rose. Common sorts were somewhat in decline. The sales were 1,600 sacks Rio, for delivery, 80f; 980 Rio, for delivery. No sales this week,

INDIGO.—At *Havre*, in the week ending Friday, the sales were 1 chest Kurpah, and 4 chests old Bengal, at prices kept secret; 7 ditto Bengal, new, at 10c to 53c above the last estimates; 30 chests ditto, at the estimates. The arrivals were 16 chests and 1 seron. This week, Bengal has been above the estimate At *Bordeaux*, last week, 10 chests Bengal at the last prices, 35 Kurpah went at an abatement of 15c to 25c. This week, Kurpah at prices not stated.

HIDES.—At *Havre*, in the week ending Friday, sales consisted of 625 Buenos Ayres dry ox, 102f 50c the 50 kilogs, duty paid; 2,000 ditto ox and cow, 80f; 1,000 ditto salted saladeros ox, 61f 50c; 2,000 Rio Grande, salted, 55f; 2,200 Pernambuco salted, for delivery, 46f 50c; 200 Valparaiso, salted, dry cow, 70f; 143 ditto salted, cow, 46f 50c; 400 ditto, ditto, ox, 51f 25c to 56f, withdrawn from the last auction. 150 Lima, drysalted, 66f 50c; 150 New Orleans, salted, 40f; 1,050 horse, salted, Montevideo, 42f 50c to 43f; 10 bales kid, La Plata, 13f the dozen. Some sorts, damaged, were sold by auction. The arrivals were 5,380. This week, New Orleans, salted, 39f; Rio Hachaox, dry, 74f; horse, Buenos Ayres, salted, 43f; cow, 95f.

TALLOW.—At *Havre*, in the week ending Friday, the sales were 15 casks New York, 50f 75c the 50 kilogs; 51 ditto, old, 20f 25c to 50f 50c; 50 La Plata, 51f 27c; ditto, inferior, 48f 50c; 110 casks Uruguay, 49f, indifferent quality. No arrivals. This week, La Plata, 50f 75c; Buenos Ayres, 51f. At *Paris*, yesterday, the 100 kilogs were 109f 45c, octroi duty included.

WOOL.—At *Havre*, in the week which ended Friday, business was somewhat animated. 224 bales washed La Plata, 1f 40c to 2f 10c the kilog; 85 bales Monte Video, unwashed, 2f 25c to 2f 40c; 296 bales washed, 2f 50c; 7 bales Entre Kios, unwashed, 2f 20c. The arrivals were 450 bales. This week, no business.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, 63 50c the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 74f; beetroot, first quality, 67f.

COMMERCIAL AND MISCELLANEOUS NEWS.

Mr J. R. Scott, the Registrar of the London coal market, has published the following statistics of imports of coals into the port and district of London, by sea, railway, and canal, during the year 1864:—

By Sea.	Ships.	Tons.
Newcastle	2,716	1,286,353
Seaham	616	149,841
Sunderland	2,072	903,721
Middlesborough	259	77,641
Hartlepool	1,786	509,702
Blyth	35	9,836
Scotch	113	16,804
Welsh	352	92,467
Yorkshire	198	26,640
Duff (part cargo)	...	307
Small coal	74	30,913
Cinders	93	12,478
Total	8,214	3,116,703

Sea-borne.—Imports during 1863.	Ships.	Tons.
1863	9,687	2,335,174
Decrease in 1864	1,473	218,471

By Railway, Canal, and Roads.	Tons	cwt
London and North-Western	961,697	1
Great Northern	703,169	10
Great Western	191,931	0
Midland	137,340	7
Great Eastern	197,855	6
South-Western	20,349	5

Railway, Canal, and Roads.—Imports during 1863.	Tons.
1863	1,791,932
Increase in 1864	567,791

EXPORTS, 1864.

Export list, showing the distribution of coal imported into the port or district of London, by sea, rail, and canal, and afterwards exported coastwise or to foreign parts, or sent beyond the limits of the London district, by rail or inland navigation, during the year 1864:—

1. Railway-borne coal passing in transitu through district		181,490
2. Sea-borne coal exported coastwise or to foreign parts, or to the coast	354,243	
Ditto sent beyond limits by railway	110,690	
Ditto by canal	62,719	
		527,652
3. Railway-borne coal exported coastwise or to foreign parts, or the coast	26,248	
Ditto by rail beyond districts	1,440	
Ditto by canal ditto	2,305	
		29,993
4. Sea-borne coal brought into port and exported in same ships		7,342
Total quantity of coal conveyed beyond the limits of the Coal Duty District during the year 1864		756,467
Ditto during 1863		656,760
Increase in 1864		99,707

The following are the traffic returns of some of the American railways for November:—

	Miles open.	1864. dols.	1863. dols.	Increase. dols.
Atlantic and Great Western	322	381,810	126,517	175,293
Cleveland and Pittsburgh	218	220,062	177,653	42,409
Cleveland and Toledo	208	184,614	138,575	46,039
Pittsburgh Fort Wayne and Chicago	467	743,751	466,300	277,451

Advices from Calcutta announce that on the 22nd of November the Government issued a notification authorising the sovereigns and half-sovereigns of Australia, as well as of England, to be received at all the Treasuries as the equivalent respectively of 10 and 5 rupees. The various agencies of issues of the several circles of Government paper currency in British India were at the same time authorised to issue notes against these coins to the extent of one-fourth of the amount of their issues on bullion generally.

The new joint stock companies brought out during the year just concluded numbered 282, against 263 during the twelve months ending with Dec. 31, 1863. Messrs Spackman and Sons have published the following observations and statistics in reference to last year's new undertakings:—"The capital authorised amounts to 155,887,500*l*, the capital offered to the public to 106,523,000*l*, and the deposits thereon to 12,545,800*l*. These figures, as compared with those for the year 1863, give the following results:—

	Companies.	Capital authorised. £	Capital offered. £	Deposits. £
1864	282	155,887,500	106,523,000	12,545,800
1863	263	100,053,000	78,135,000	8,875,550
Increase over 1863	19	55,834,500	28,388,000	3,670,250
Total for 2 years, '63 and '64	545	255,940,500	184,658,000	21,421,350

The universality of the adoption of the principle of limited liability is again illustrated by the fact that only one of the 282 companies named is unlimited:—

Companies limited	279	153,357,500	103,993,000	12,278,300
Companies in which the liability is limited by special Act of Parliament or Royal Charter	2	2,500,000	2,500,000	237,500
Company unlimited	1	30,000	30,000	30,000
Total	282	155,887,500	106,523,000	12,545,800

In addition to the capital required for new companies, a large amount of new capital has been issued by existing companies during the past year, an account of which is also annexed, amounting to capital offered 35,315,000*l*.

	£
Capital called up	7,844,000
Premiums	3,839,833
	11,683,833

The total for new companies and new issues by old companies will therefore be:—

	Capital Authorised. £	Capital Offered. £	Deposits. £	Premiums. £
New companies	155,887,500	106,523,000	12,545,800	...
New issues by old companies	...	35,315,000	7,844,000	3,839,833
	155,887,500	141,838,000	20,389,800	3,839,833
			24,229,633	

And the amount called up for deposits and premiums is distributed as under:—

	£	£
Banking companies, new	1,585,000	
— — old	8,733,333	
		10,318,333
Financial and Discount, new	2,213,750

Subjoined is an extract from Messrs Glover Brothers' freight report for the past year:—"Although the proportions of British and foreign tonnage in our trade increased and decreased in the same directions as in 1863, the extent of the respective increase and decrease is remarkable. Foreign tonnage decreased 630,988 tons, British tonnage increased nearly double the foreign decrease, viz., 1,226,617 tons. The one decreased 8 per cent., the other increased 8 per cent. The proportion of foreign tonnage in our trade has undergone the following fluctuations:—From 1834 to 1838, it was 28 per cent.; from 1844 to 1848, it was 30 per cent.; from 1854 to 1858, it was 41 per cent.; in 1859, it was 40 per cent.; in 1860, it was 41·83 per cent.; in 1861, it was 40·03 per cent.; in 1862, it was 37·68 per cent.; in 1863, it was 33·71 per cent.; and in 1864, it was 30·19 per cent. During the first ten months of 1860, American vessels entered and cleared at our ports with cargo to the extent of 2,296,011 tons; during the same period, last year, the amount was only 810,313 tons—a reduction of 64 per cent. The Dano-German war so affected the German flag in our trade, that it declined from 1,815,775 tons in the first ten months of 1863 to 1,067,219 tons in the same period of 1864, or 41 per cent. Danish tonnage, during the same period of 1863, was 528,389 tons, and declined in 1864 to 473,922 tons, or 10 per cent. The registered tonnage of sailing vessels belonging to the United Kingdom was rather more than four-and-a-half millions tons at the end of 1863, viz., 4,655,924 tons; in 1853 it was 3,783,092. Steam tonnage under the British flag shows a much larger increase. In 1853, it was 250,112 tons; in 1863, it had become 592,950 tons—an increase of 136 per cent." In reference to the "Contract Coal Charter," the same gentlemen observe:—"Practically, this form of charter takes from the shipowner his lien for freight as a common carrier, and enables the contractor holding it to hypothecate, not only the cargo worth 9s or 10s per ton which is his, but the freight also, often worth three or four times the cargo, which is the shipowner's. To be able to hypothecate what one has to pay is unquestionably a 'new facility,' but the loss and suffering in which this facility has recently involved shipowners should dictate its extinction."

The following returns show the state of the note circulation of the United Kingdom during the four weeks ending Dec. 10, 1864, compared with the previous month:—

	Nov. 12, 1864.	Dec. 10, 1864.	Increase.	Decrease.
	£	£	£	£
Bank of England	20906439	19806138	...	1100301
Private Banks	3211348	3057541	...	153807
Joint Stock Banks	2855423	2754143	...	101280
Total in England	26973210	25618822	...	1354388
Scotland	4444334	4626796	182462	...
Ireland	5956310	5872705	...	83605
United Kingdom	37373854	36118323	...	1255531

And as compared with the month ending the 12th of Dec., 1863, the above returns show a decrease of 1,205,107*l* in the circulation of notes in England, and a decrease of 1,285,523*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks the following is the state of the circulation:—The English private banks are below their fixed issue 1,154,245*l*, the English joint stock banks are below their fixed issue 472,214*l*,—total below fixed issue in England 1,626,459*l*: the Scotch banks are above their fixed issue 1,877,525*l*; the Irish banks are below their fixed issue 481,789*l*. The average stock of bullion held by the Bank of England in both departments during the month ending the 7th Dec. was 13,953,517*l*, being an increase of 676,215*l* as compared with the previous month, and an increase of 742,261*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month ending the 10th:—Gold and silver held by the Scotch banks, 2,513,205*l*; gold and silver held by the Irish banks, 2,180,778*l*; total 4,693,983*l*; being an increase of 115,452*l* as compared with the previous return, and an increase of 44,275*l* when compared with the corresponding period of last year.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 4th day of January, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,968,760	Government Debt	11,015,100
		Other Securities	3,634,908
		Gold Coin and Bullion	13,318,760
		Silver Bullion	...
	27,968,760		27,968,760

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	11,024,397
Rest	3,384,035	Other Securities	21,711,507
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	8,500,269	Notes	7,453,420
		Gold and Silver Coin	614,832
Other Deposits	13,874,977		
Seven Day and other Bills	491,875		
	40,804,156		40,804,156

Dated the 4th January 1865. W. MILLER, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,007,215	Securities	32,852,904
Public Deposits	8,500,269	Coin and Bullion	13,933,592
Private Deposits	13,874,977		
	43,382,451		46,786,496

The balance of Assets above Liabilities being 3,384,035*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£1,196,780
A DECREASE of Public Deposits of	100 856
An INCREASE of Other Deposits of	834,334
An INCREASE of Government Securities of	199,855
An INCREASE of Other Securities of	1,924,966
A DECREASE of Bullion of	167,382
An INCREASE of Rest of	27,181
A DECREASE of Reserve of	1,309,737

The Bank return of this week indicates the extent of the engagements of the mercantile community at this period of the year; the private securities having increased 1,924,966*l*. The addition to the private deposits is relatively small, and the consequent decrease in the reserve reaches 1,309,737*l*.

Digitized by Google

The stock of coin and bullion is 167,382*l* below that held last week.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	20 641,120	21,086,675	20,929 993	21,322,304	21,007,215
Public deposits	6 391,361	4 542,974	8 782 808	11,001,982	8,500,269
Other deposits	9,981,354	18,206 488	14,393,308	13,052,694	13,874,977
Government securities	11,611,800	12,768,618	11 635,818	10,957,189	11,024,397
Other securities	15,481,228	18,156 887	20,887,385	22,432,763	21,711,507
Reserve of notes & coin	7,985 634	10,342,402	9,057,145	8,128,491	8,068,252
Coin and bullion	13,667,384	16,046 017	14,635,555	14,196,754	13,932,593
Bank rate of discount	5 p. c.	2½ p. c.	3 p. c.	7 p. c.	6 p. c.
Price of Consols	91⅛ ⅜	93⅛	93⅛ xd	91	89⅛ xd
Average price of wheat	74s 2d	62s 1d	45s 10d	39s 10d	37s 10d
Exchange on Paris (short)	25 0 5	25 20 27½	25 15 22½	25 25 30	25 15 20
— Amsterdam ditto	11 15½ 16	11 16 17	11 14½ 14⅝	11 16½ 17	11 14⅛ 15½
— Hamburg (3months)	13 5½ 5⅝	13 7½ 8	13 6½ 6⅝	13 7⅛ 8	13 7½ 7⅝

In the corresponding week of 1855, the accession of the Austrian forces to the cause of Turkey was looked for. France and Austria had concluded a treaty with relation chiefly to the Italian provinces. A loan of 500,000,000f had been announced by the French Government.

In 1862, the news received from New York, in the absence of a formal reply to the despatches of our Government, had been more favourably interpreted. The demand for money was active. The altered condition of our American trade, owing to the cessation of the cotton shipments to England, was occasioning the arrival of large imports of bullion in London.

In 1863, the financial report of M. Fould had been published in Paris, stating the ascertained deficit for 1862 at 1,200,000*l*, consequent on the Mexican expedition, and estimating the surplus for 1863 at 4,400,000*l*. A new arrangement had been finally agreed to between the Austrian Government and the National Bank at Vienna, by which the Bank was rendered entirely independent of the State.

In 1864, England had protested against the proposed occupation of Schleswig by Austria and Prussia. The Duke Frederick had been proclaimed at Kiel. The Danish troops had evacuated Rendsburg, which had been entered by 5,000 Saxons under General Hake. King Christian had issued a proclamation to the Danish army, and preparations for hostilities were being made. The Russians had been defeated near Cracow, and a fresh insurgent corps had made its appearance. Warlike preparations were being made in the Danish Principalities. At Lisbon, the Cortes had been opened by the King in person. Affairs in Japan were more pacific. The Federals were going into winter quarters at Chattanooga. Longstreet had defeated the Federals at Bear Station. General Johnstone had been appointed to the command of the Confederate army in Tennessee, and Averill had cut off General Longstreet's communications with Richmond. The substitute system had been abrogated in the Confederate Congress. The money market was much depressed by the Schleswig-Holstein question. The tendency of the stock markets was also unfavourable.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 5,499,864*l*; in 1862, an excess of 49,601*l*; in 1863, a deficiency of 6,494,077*l*; and in 1864, a deficiency of 9,380,159*l*. In 1865, the deficiency is 7,836,530*l*.

Discount and Money Market.—The heavy demand for money evidenced in the returns issued by the Banks of England and France has taken many persons by surprise, and at the same time produced a certain sympathetic effect on the market here. Some additional inquiry has been experienced to-day at the Bank, and in the open market there is a trifle more firmness. So far as our own Bank return is concerned, it is probable that a large amount of the mercantile paper sent in near the 4th of the month had been held back in expectation of a reduction of the discount rate; but the return of the Bank of France is more strikingly instructive, showing, as it does, the facility with which the activity of the discount market is stimulated by a too sudden relapse from the high rates lately current. It remains to be seen whether, with mercantile and financial wants vastly inferior to those experienced in England, the Bank of France will be able to sustain demands on the scale of those made during the past week. In the outside markets in Paris, discounts are impracticable at the Bank rate, and it will therefore appear that applications from abroad are being made in that quarter. During the week the movements in the precious metals have been small; but withdrawals of Governmen for Alexandria continue to be made. This week it is stated that a contract has been signed with the Italian Government for a loan of 6,000,000*l* sterling. Annexed are the current rates for paper of various dates :—

30 to 60 days	5⅞ per cent.
3 months	5⅞ per cent.
4 months	6 per cent.
6 months—Bank bills	6 ¼ per cent.
6 months—Trade ditto	6½ 7 per cent.

Money in the Stock Exchange is worth about 6 per cent. for short periods on Government securities.

Annexed are the rates allowed on deposits :—

Joint Stock Banks	*4½ per cent.
Discount houses at call	4½ per cent.
Do. with seven days' notice	5 per cent.
Do. fourteen days	5¼ per cent.

* At the London and Westminster 3½ per cent. only on sums below 500*l*.

Bullion.—68,000*l* have been carried to the Bank to-day.

The following are the current rates of discount in the principal cities of the Continent :—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	4½	4½
Vienna	6	5½ 6
Berlin	6	5
Frankfort	5	5
Amsterdam	5½	5½
Turin	6	6
Brussels	5	4
Madrid	9	...
Hamburg	...	4
St Petersburg	6½ 3 mths' bills.	...
—	7 6 —	7

The biddings within the limits for 300,000*l* Government bills on India received at the Bank of England on Wednesday, amounted to 710,000*l*. The minimum price was unaltered—1s 11⅛d per rupee on Calcutta and Madras, and 1s 11⅜d on Bombay. The proportions allotted were to Calcutta, 173,300*l*; to Bombay, 120,000*l*; and to Madras, 6,700*l*. Tenders on Calcutta and Madras at 1s 11⅞d receive about 7 per cent.; on Bombay at 2s, about 76 per cent.; and above these prices, in full.

The return of the Bank of France for the present week gives the following results, as compared with that previously published :—

	£
Increase.	
Bills discounted not yet due	3,760,000
Bank notes	2,573,330
Current accounts	766,660
Decrease.	
Cash	1,193,330
Advances	533,330
Treasury balance	1,304,000

English Government Stocks.—A slight additional degree of firmness is to be remarked in the absence of any disquieting news from Canada, and now the disposition is more marked to look for greater ease in the money market from the shortly expected release of the dividends now due. There is not, however, any greater animation, nor any briskness of importance, speculation having been long since diverted to other markets. The closing quotation of Consols is for money, 89⅛ to 89⅜, and for the account, 89⅝ to 89⅞; New 3 per Cents. and Reduced, 88⅝ to 88⅞. India 5 per Cents., 103 to 103½.

Exchequer bills are unaltered, and Indian bonds rule firmer. The quotations are subjoined :—

Exchequer bills, 4 per cent., due March, 1855	par to 5s pm.
Exchequer bills, 3½ per cent., due June, 1865	par to 5s pm.
India bonds, 4 per cent., div. March and Sept.	6s to 11s pm.

Foreign Stocks.—There has been little doing; the holidays and the approach of the next settling, fixed for the 13th inst., interfering with speculative operations. The closing prices of stocks dealt in to-day are subjoined :—7 per Cent. Danubian scrip, ⅛ dis. to par. 7 per Cent. Egyptian, 95½ to 96½; ditto, 1864, 95 to 95½; ditto, scrip, 1 to 1¼ prem. 5 per Cent. Greek, 23½ to 24. 3 per Cent. Mexican, 28 to 28⅛ ex div.; ditto, new, 26⅛ to 26⅜ ex div.; ditto, scrip, 11 to 9

*9th February.

Railways and other Shares.—The amount of business in the railway share markets has been curtailed by the holidays, and comparatively few operations are to be noted. There is little change in prices from those published last week, and, except an improvement in Great Northern and Metropolitan Railway stocks, and a decline of 1 per cent. in London, Chatham, and Dover, the changes are few and only fractional. The tendency of the markets is nevertheless firm, with every appearance of an advance so soon as investors begin to operate.

In Indian, a slight improvement has in a few instances occurred, but without anything of interest.

In colonial securities, Canadian are rather firmer, and the tendency is favourable.

In the shares of the finance and miscellaneous companies, there has been a little more speculation. Those of the General Credit Company have advanced, on a report that Mr Laing has signed a contract with the Italian Government for a loan of 6,000,000*l*; and International Financial Society shares have been dull, owing to the announcement of a dividend at the rate of 7s 6d per share. It seems to be expected that the dividends on many of the new companies will be of smaller amount than last year, on account of the increased competition for business, and also on account of the losses entailed by the recent mercantile failures, and depreciation in the value of securities held.

In banking shares, attention has been chiefly directed to those of the Alliance Bank, and on which, it is rumoured, no dividend will be paid. It is also reported that a considerable sum will be withdrawn from the reserve to meet losses.

Subjoined is our usual list of the closing prices of the principal railway shares on last Friday and this day:—

Foreign Exchanges.—There is little alteration, but on Paris the rate was noted rather higher, and on Holland dull.

Bullion.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold—The imports of gold during the past week have been rather large. They comprise the Essex, from Melbourne, with 84,500*l*; the Parana, from the Brazils, with 30,200*l*; the Shannon, from the West Indies, with 159,200*l*; the Canada, from Boston, with 11,500*l*; the Glasgow, from New York, with 101,000*l*—total, 386,400*l*. The exports during the same period have been:—The Seine, to the West Indies, with 5,000*l*; the Delhi, to Alexandria, with 7,600*l*; the Messageries steamer, to Alexandria, with 90,000*l*—total, 102,600*l*. The Bank of England has received about 107,000*l*, and sovereigns to the amount of 97,000*l* have been withdrawn for transmission to Egypt. The shipments of gold from Melbourne to England, reported by the Overland Mail, are very small, and only make a total of 145,500*l*. The following statement of the imports of gold from Australia and America during the past seven years may be of interest to our friends:—From Australia, in 1858, 9,725,108*l*; 1859, 9,830,944*l*; 1860, 6,659,590*l*; 1861, 6,474,451*l*; 1862, 6,310,500*l*; 1863, 5,164,752*l*; 1864, 2,426,400*l*. From America, in 1858, 5,304,896*l*; 1859, 14,560,062*l*; 1860, 8,677,294*l*; 1861, 83,450*l*; 1862, 9,865,610*l*; 1863, 7,874,179*l*; 1864, 7,465,103*l*. The exports of gold to the West Indies and China during the same period is also shown:—From London, in 1858, 168,305*l*; 1859, 788,270*l*; 1860, 1,612,900*l*; 1861, 591,392*l*; 1862, 971,582*l*; 1863, 3,104,000*l*; 1864, 1,255,208*l*. From the Mediterranean, in 1858, 165,230*l*; 1859, 142,144*l*; 1860, 765,138*l*; 1861, 367,788*l*; 1862, 139,172*l*; 1863, 147,400*l*; 1864, 4,450,210*l*.

Silver.—The Shannon has brought 221,000*l* from the West Indies; a large portion of this consisted of Doré silver, which was sold at 61⅛d per oz standard, and the fine bars were placed at 61¼d per oz standard; and we quote this price, with a somewhat quiet market. The Delhi has taken 29,600*l* to Madras. Bar silver has had many fluctuations during the past year, obtaining its highest price of 5s 2½d per oz standard on the 14th January, and the lowest of 5s 0⅜d per oz standard on the 19th of October.

Mexican Dollars.—The Shannon has brought 120,000*l*. The market for this coin is very weak, and from a total absence of business we can scarcely give any quotation as to price. The variations in price during 1864 were from 64½d per oz on the 13th of July, to 59⅜d on the 25th of October.

Exchange on India for 60 days' sight drafts by the banks may be quoted 1s 11⅞d to 2s for Calcutta and Madras, and 2s to 2s 0⅛d Bombay. The Council drafts were sold yesterday at a slight reduction for Bombay, but at a rise for Calcutta and Madras; Bombay receiving about 74 per cent. at 2s, and Calcutta and Madras 7 per cent. at 1s 11⅞d.

India Government loan notes are about the same, 5¼ per Cents. being 108 to 110, 5 per Cents. 101 to 102, and 4 per Cents. 89 to 91.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto gold, fine, 77s 9½d per oz std; ditto gold, refinable, 77s 11½d per oz std, last price; Spanish doubloons, 74s 6d to 75s per oz nominal; South American ditto, 73s 6d to 73s 9d per oz; United States gold coin, 76s 3d to 76s 3½d per oz, last price. Silver—Bar silver, 5s 1⅝d per oz std; bar silver, containing 5 grains gold, 5s 1¼d per oz std; Mexican dollars, 5s 0⅜d per oz, last price, nominal. Quicksilver, 8*l* per bottle; discount 3 per cent.

Mercantile Changes.—The retirement of Mr A. J. Allen from the firm of Messrs Nichols, Allen, and Allen, is notified, as well as the entry into the firm of Messrs David Sutow and Co., of Idol lane.

Messrs Cutler, Palmer, and Co., of Mark lane, announce the retirement of their senior partner Mr Cutler, and the entry of Mr John Treacher and Mr James Robertson Turnbull into the firm. Mr Frederick Frank Egerton Cutler and Mr R. Gray Cobham have also joined the house as partners.

Failures and Mercantile Embarrassments.—The *Levant Herald* announces the failure of Mr P. Vuccino, with liabilities estimated at about 46,000*l*.

Digitized by Google

A meeting of the creditors of Messrs Grundler, Ormond, and Co,. was held on Saturday last, and a resolution was adopted to wind up the estate under a deed of assignment. The cause of the failure was attributed to losses and unavoidable misfortune. The dividend is expected to be about 7s in in the pound.

The liquidation of the old estate of Messrs Simpson and Co. having been satisfactorily arranged, Messrs Simpson Brothers and Co., with the assistance of their friends, will carry on the business.

Vice-Chancellor Wood proposes on the 23rd inst. to make a call of 2s 6d per share on the contributories of the Athenæum Life Assurance Society.

Vice-Chancellor Kindersley is to hear a petition for the winding up of the Universal Mercantile Association (Limited), on the 13th inst.

The official liquidator of the Central Darjeeling Tea Company (Limited) has given notice that claims are to be sent in by the 1st of May, the 8th of that month having been appointed by the Master of the Rolls for adjudicating upon them.

A sitting is to take place in the Bankruptcy Court on the 1st July, for the purpose of making a call of 1*l* per share on the contributories of the Union Discount Company (Limited).

PUBLIC COMPANIES.—The directors of the Société Généralé de l'Empire Ottoman have decided on distributing out of the profits already realised, the sum of 4s 9d per share. This distribution will be made in London, at the agency of the Imperial Ottoman Bank, on and after the 15th inst.

A half-yearly general meeting of the proprietors of the Colonial Bank was held on Wednesday, the 4th inst., when the report of the directors was adopted. An ordinary dividend of 6 per cent., and an extraordinary dividend of 1 per cent. for the half-year, was declared.

The first ordinary general meeting of the Warront Finance Company will be held at the London Tavern, on Tuesday, the 24th inst.

The meeting of the Financial Corporation (Limited) is fixed for the 23rd inst., when the report of the directors will be presented and a dividend declared.

A report of the Directors of the Peel River Land and Mineral Company has been issued, in anticipation of the meeting to be held on the 13th inst. The net income from the 1st January, 1863, to the 30th June, 1864, is stated at 13,013*l*, out of which an interim dividend of 1½ per cent. has been paid. It is now proposed to pay a further dividend of 1 per cent. free of income tax.

The Directors of the Ocean Marine Insurance Company have called a meeting of the shareholders for the 20th inst. The dividend proposed is 5s per share with a bonus of 20s. 30,000*l* is to be carried to the reserve fund. The Directors propose the payment of 5s per share as interest in July next.

The dividend to be proposed at the meeting of the International Financial Society is 7s 6d per share, making with the 2s 6d paid in July, a total dividend at the rate of 10 per cent. for the year. 5,000*l* is to be added to the reserve fund, and 20,000*l* carried to new account.

The Directors of the National Discount Company at their meeting of the 18th inst. propose to recommend a dividend at the increased rate of 20 per cent. per annum, and to carry forward the balance of profit to new account for the next half-year.

The Directors of the Union Bank of Australia have resolved upon a dividend of 2*l* 5s per share for the past half-year, being at the rate of 18 per cent. per annum.

The prospectus of the Nowgong Tea Company of Assam (Limited) is issued. The object is to purchase and develop thirteen tea estates, already in profitable cultivation, in the province of Assam. The property comprises 12,000 acres of freehold land, held direct from the Government, of which 2,182 acres are planted, the plants on 240 acres being three years old, and on 902 acres two years old. The purchase-money is 163,000*l*, payable by annual instalments, with interest at 5 per cent., extending over a period of six years. The capital is 250,000*l*, in 25,000 shares of 10*l* each, with a first issue of 18,000 shares.

MISCELLANEOUS.—The following are the statements of remittances relating to the Venezuela and New Granada debts.—**Debt of Venezuela**—Messrs Baring Brothers and Co. have received advices from their agents at La Guayra announcing that the recent order of General Cuzman Blanco for the resumption of the 55 per cent. of Customs has been received by the Caraccas Government, pending the decision of the Federal Court as to certain alleged claims of Government creditors, and that the Messrs Baring's agents had been required to refund a sum of 18,443 dols. 45c in pagares received at Puerto Cabello on account of the duties.

The General Credit and Finance Company of London (Limited) are in receipt of advice from their agents, Messrs H. L. Boulton and Co., dated La Guayra, Dec. 9, 1864, of duties collected as follows, on account of the Venezuela 6 per Cent. loan, 1864:—

	dols.	c
Per statement No. 11, from La Guayra	1,346	37
— No. 12, from ditto	3,929	49
— No. 19, from Puerto Cabello	855	36
Total	6,131	22

NEW GRANADA DEBT.

Messrs Baring Brothers have received by the present mail the following remittances, on account of New Granada dividends, viz:—

	£	s	d
Custom House of Santa Martha	1,971	14	2
— Cartagena	642	0	0
— Sabanilla	408	11	6
Total	3,022	5	8

The numbers of a certain amount of the Egyptian bonds of both issues of the loan of 1862 have been drawn, and are advertised for payment at par on the 1st March proximo.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is nearly 3-10ths per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 425 per mark, and the short exchange on London is 13.4⅞ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 1-10th per cent. dearer in Hamburg than in London.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Although the supply of English wheat on sale at Mark lane to-day was small, there was decidedly less activity in the trade than on Monday, but holders were firm, and that day's improvement in the quotations was supported. In foreign wheat only a moderate business was transacted, yet prices ruled firm. Barley and oats, if of good and fine quality, sold steadily, at full quotations; but inferior parcels were dull, and rather lower in price. Beans and peas were in slow request, at late rates. The flour trade was steady, and prices ruled firm. Last week's import consists of 530 quarters of wheat; 3,780 barley; 20,470 oats; and 623 sacks of flour.

At Liverpool, this morning, wheat was in limited request, at late rates. For flour, the trade was firm, but maize sold heavily, at barely late rates. In wheat, at Wakefield, only a moderate business was transacted, but at full prices.

Influenced by unfavourable accounts from America, the Liverpool cotton market has been very dull this week, and although there has been no great pressure to sell, yet the supply offering being greater than the demand required, has caused prices to recede from $\frac{3}{4}$d to 1$\frac{1}{2}$d per lb. The total sales of the week reach 17,000 bales, of which 2,000 have been taken by speculators, 4,000 bales by exporters, leaving 11,000 to the trade. The stock has increased 46,000 bales. To-day the market remains very quiet, and the sales only amount to 3,000 bales. Prices again easier.

The subjoined remarks and statistics, having reference to the Liverpool cotton market, are from Messrs Ellison and Haywood's annual report for last year:—The fluctuations in prices throughout the year have been almost incessant, not a week passing without some change transpiring in the value of one or more of the various descriptions of cotton; but there are four grand movements which stand out prominently from the rest,—first, a gradual decline from January to April; second, a steady advance to the close of July; third, a rapid fall to the middle of October; and, finally, a considerable rebound to the end of December. These extreme variations are set forth in the following table, which gives also the fluctuations in yarn and cloth:—

Advices from Bombay are to December 30. The cotton trade during the fortnight preceding that date was in a more healthy state, and an advance took place in prices. Dhollera, for delivery in April and May, sold at 600 rupees per candy. The arrivals of *new* cotton were chiefly confined to Compta produce, which had arrived, for the most part, in good condition. Subjoined are Messrs Nicol and Co.'s statements of prices and exports:—

Current Prices of Cotton at Bombay, Dec. 13.

	Market Value. Per candy, 784 lbs. rs	C.F.I. Exchange 2s 1d per R. d
Broach and Jumbooseer	440	15.67
Surat	455	16.15

Grand total	871,425½	868,665

The Mincing lane markets during the week have been quiet. In some articles, but chiefly in coffee and rice, there has been a fair amount of activity, and as regards the above-mentioned articles, prices have ruled firm. Tea, however, is dull, and at the public sales held on Tuesday and Wednesday, a considerable fall took place in the quotations. Raw sugar is less firm, and prices have declined in some instances 6d per cwt. Other articles rule stationary in value. Our latest advices from China state the season's export of tea to Great Britain at 89,750,000 lbs; and of silk at 25,875 bales.

The rice trade, last year, opened with a fair amount of activity, but it was subsequently characterised by a long period of depression. During the closing weeks, however, the demand for Bengal produce ruled somewhat active, and the prices realised were more satisfactory. The following table, from Messrs Jackson and Till's circular, shows the imports and deliveries in each of the last three years:—

	1864. tons	1863. tons	1862. tons
Imports.			
Bengal	16,477	25,430	52,665

Considering the high price of money, the year just concluded was very satisfactory as regards the wool trade. In home-grown produce, the principal feature seems to have been an increased demand for long-stapled descriptions, and such changed hands at high prices. Colonial wools—owing partly to the increased importation and partly to the high rates for accommodation—were decidedly lower in price than in the previous year; nevertheless, home manufacturers purchased freely at the public sales, and for export to France and Germany quite an average business was transacted. The shipments to the United States were small, American buyers having very considerably supplied their wants at Port Elizabeth and Algoa Bay, but chiefly at the former port. From Messrs Bowes and Brothers' circular, we extract the following table, showing the prices of middling Orleans cotton, and certain descriptions of wool, at the close of the last five years:—

	1860. d	1861. d	1862. d	1863. d	1864. d
Cotton—					
Middling Orleans	7⅜	12	24	28	27

Owing to increased importations, the prices of flax at Dundee, last year, steadily declined, and on the 31st December last, nearly all descriptions showed a reduction in value, varying from 8*l* to 10*l* per ton as compared with the same date in 1863. The quality of the produce imported from Russia was mostly inferior, and a large proportion was consequently disposed of at low prices. The imports of flax and jute at the ports of Dundee, Aberdeen, Montrose, Arbroath, Kircaldy, and Hull, last year, were 64,825 tons, against 50,974 tons in 1863, and 61,847 tons in 1862; of tow and codilla, 12,478 tons, against 9,799 tons in 1863, and 11,887 tons in 1862; of hemp, 6,466 tons, against 6,444 tons in 1863, and 7,350 tons in 1862. The fall in fine tow and codilla, last year, was from 5*l* to 6*l*: in common codilla and jute, 9*l* to 12*l* per ton. Notwithstanding this reduction in the price of the raw material, very few changes of importance took place in that of yarns and cloth, the decline quoted in some qualities being counterbalanced by an advance in the value of other descriptions.

COMPARATIVE STATEMENT of HEMP, FLAX, and JUTE on hand in London, on January 1, 1863, 1864, and 1865, Dealers' Stock included.

Messrs Grant, Hodgson, and Co., writing in reference to the tobacco trade, state:—During the past month, the market for American descriptions has presented but little change, the only feature deserving notice being an increased disposition to secure selections of parcels that posses ed colour or spinning qualities, as soon as sampled, at gradually hardening rates. Sales have amounted to 1,581 hhds,—viz., 353 hhds Western strips, 629 hhds Western leaf, 16 hhds and tierces Virginia strips and leaf, 583 hhds Ohio and Maryland. Sampling is now progressing rapidly, and, as in many instances a decided improvement in the character of the crop is observable, we are in hopes that a fair portion, not yet inspected, may turn out superior to the bulk of what had previously been placed on the market. In taking a retrospective view of the course of the market for 1864, we observe that during the early months holders submitted to concessions, principally on middling and ordinary descriptions, whilst prices for the finer classes were better sustained. Lutterly, there has been a gradual and increasing firmness for all classes, more particularly selections and the lowest grades of strips, which has resulted in quotations showing, from time to time, a fractional advance. Imports—2,174 hhds. Deliveries—1,113 hhds, against 1,144 hhds in the corresponding month of last year. Stock—19,120 hhds, against 18,778 hhds in 1863, 21,320 hhds in 1862, 27,529 hhds in 1861, 21,685 hhds in 1860, 18,899 hhds in 1859.

The metal trade has continued quiet, and very few changes have taken place in prices. Scotch pig iron has realised 49s 10½d, cash, mixed numbers, and spelter, 18*l* 15s to 19*l* per ton. Most oils are a dull inquiry, and the tallow trade is devoid of animation.

The following particulars in reference to Banca tin are from Messrs Van Houten's annual report of the trade for 1864:—

	1864.	1863.	1862.

Production of tin from the Banca mines ..... slabs	...	191,963	141,770
Quotation December 31	f 56	f 70	f 68½

The general state of trade at New York during the week ending Dec. 24 was very inactive. Very few changes took place in the value of imported produce; but cotton declined 8 cents. per lb., and most descriptions of breadstuffs—owing to the export inquiry being much restricted—were obtainable at reduced prices. Gold declined to 120¾ per cent. prem. The stock of bullion held by the banks on the 17th ult. was 4,172,800*l*.

THE COTTON TRADE.

LIVERPOOL—JANUARY 6.

The cotton market was unfavourably influenced by the excess of stock declared at the close of the year, and the business has been very limited throughout the week. During the last few days the uncertain nature of the advices from New York has caused further depression, and prices yesterday closed heavily, with a general decline, particularly in the lower descriptions. For American, there has been a moderate demand, and a reduction of ¼d to ½d has been submitted to from last week's rates. In Sea Island there is no change, the supply being scanty. Egyptian has been very freely offered, and has declined about 1d per lb. In Smyrna, the transactions have been limited, and ¾d to 1d decline has been submitted to. In Brazil, the readiness of holders of Pernam to supply the demand has induced operations to a fair extent, but at a decline of ¾d to 1d per lb. Maceio is nominally ¼d lower, and Maranham is freely offered at ½d decline, without attracting the attention of consumers. East India has been quite neglected, and though, from comparative scarcity, the superior grades have better maintained their value, a reduction of ¼d per lb has taken place in them, and 1d per lb in the lower descriptions. Scinde and Bengal have been particularly unsaleable at this decline. China and Japan have been very dull of sale, and must be quoted 1d per lb lower.

The transactions "to arrive" have been at a decline of 1d to 1½d, and almost entirely confined to a few purchases of Egyptian, on Wednesday, of open, ship named, good fair 26d, and yesterday, fair 26d; and of Pernam yesterday, first quality, ship named, 25½d and 25d.

The sales of the week amount to 17,840 bales, including 2,480 on speculation, and 4,150 declared for export, leaving 10,850 bales to the trade. The sales to-day amount to about 3,000 bales.

The quantity of East India cotton now afloat is about 170,000 bales, against 194,000 bales last year.

LONDON—JAN. 6.

Sales of cotton from Friday, 30th December, to Thursday, 5th January, inclusive:—

Sales on the spot:—30 bales Dhollera, at 19d for fully fair; 50 bales Scinde, 11½d for fair; 300 bales Tinnevelly, 13½d for low middling, 14d for good middling, and 17d to 17½d for good fair; 680 bales Western, 12d to 14d for low middling, and 18½d for fully fair; 220 bales Northern, 19d for fine; 40 bales Coconada, 17½d for fully fair; 230 bales Bengal, 11d to 11½d for fair, 10½d for middling, and 12½d for fully fair; 50 bales China, 15½d for fully fair; 35 bales Japan, 16¾d for fully fair—total, 1,635 bales.

At public sales, on Tuesday, 200 bales Bengal were offered for account of whom it may concern, and all sold at 9⅝d to 10¾d per lb.

At public sales, yesterday, about 1,600 bales were brought forward, 650 of which were for account of whom it may concern. There was a very good attendance of buyers, notwithstanding which only 630 bales were sold, at lower and very irregular prices, viz., 200 bales Western, at 12d to 16½d, and 128 bales Bengal, at 11d to 11½d (both for account of whom it may concern); 290 bales damaged Japan, at 10¾d to 16½d, with all faults; and 8 bales Kurrachee, at 10¾d per lb.

Sales to arrive: 120 bales Western, at 18¾d October shipment, for guarrnteed fair new; 500 bales Japan, at 16d October shipment, for guaranteed fair new—total, 620 bales.

The cotton market has been dull and depressed throughout the past week, and only a limited business has been transacted, the decline in most cases being 1d to 1½d per lb.

NEW YORK—DEC. 24.

The cotton trade is dull, and prices to-day are 8 cents lower than on Saturday last. The quotation for middling Upland produce is 124 cents per lb. The following are the quotations:—

MARKETS IN THE MANUFACTURING DISTRICTS.

About an average business has been doing in goods for the time of year, and prices have been well supported. The stocks on hand are only moderate. The demand for iron has been much restricted, at about previous rates. Coals have sold briskly, at extreme quotations.

MANCHESTER, Jan. 5.—This market has not recovered its tone since Friday, when the excess of 114,000 bales was declared in the stock of cotton in Liverpool. Yarns have been weaker to the extent of 1d to 2d per lb in low numbers, and of ½d to 1d in fine numbers; but buyers have been few, and desirous of limiting transactions. In cloths, there has been some occasional inquiry for India, but the offers made have been at a reduction. For all other markets not the slightest animation is visible, attention being closely directed to the further development of American affairs. Apart from other causes, the present inactivity is consequent on the business in December having in a great measure anticipated that for January, whence, instead of the brisk demand expected to prevail at the new year, nothing has been left to be done.

BRADFORD.—The year opens with a wool market devoid of any marked animation. Some Down sorts and other sorts suitable for carded yarns have had a better share of business than has been the case of late. Business in the yarn trade does not yet show much improvement. Carded yarns are rather an exception to the general dulness, and for two-folds a steady inquiry keeps up. Pieces—Prices are on the whole well maintained, though plain goods can in some cases be bought a little easier.

LEEDS.—The tone of the market, both as to prices and the prospects of the spring trade, was cheerful, and the lack of purchasers arose chiefly from the fact that merchants have scarcely concluded their annual stock-taking. Stocks are believed to be in a moderate compass, though they have increased within the last few weeks.

ROCHDALE.—The manufacturers are tolerably well employed, and are looking for a better demand for their products with the turn of the season. Late prices are well maintained for both heavy and light goods. There was a very limited business done in low Yorkshire woollens.

LEICESTER.—There has not been much doing in hosiery goods generally. Yarns are firm, but not in request. Wools maintain high rates, with a firm market.

NOTTINGHAM.—Business has been dull, and no real reaction is expected until the end of the month. There is very little doing in stiff goods, and, indeed, all heavy fabrics are not in request. The silk trade continues flat. Not much change in the hosiery trade. Yarns are without alteration in price.

CARDIFF.—The new year has commenced, upon the whole, under favourable circumstances, and there is a considerable activity evinced in every branch of trade. The demand from the principal foreign markets continues good, and there is an average quantity taken by home buyers. The shipbuilding yards are in full employ, and there is no lack of employment at the other local works.

WOLVERHAMPTON.—Pig iron keeps at a very low figure, and the price is considerably below the ordinary proportion to the price of manufactured iron. The hardware trades keep steady, and a good spring trade is anticipated. The price of tin has again fallen 4s per cwt.

DUNDEE.—A few sales of flax and tow have been made at late rates, and the market is firm. Fine jute is scarce, and held for a small advance; medium is saleable at former prices, but common is very dull. Some small lots of yarns, of the various qualities usually spun, have changed hands at full prices, and the tendency is rather against buyers. Little has been done in linens.

GLASGOW.—Iron.—49s 6d cash and 49s 10½d one month; No. 1 g.m.b., 50s 6d; No. 3 ditto, 49s 6d; No. 1 Gartsherrie, 55s 6d; No. 1 Coltness, 55s, all free on board here; No. 1 Glengarnock, 53s, free on board at Ardrossan.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Dec. 24.—We have to report a heavy trade for all kinds of breadstuffs, and a general fall has taken place in prices. The following are the quotations:—Flour: Superfine State and Western, $9.45 to $9.60; extra State, $9.90 to $10.10; choice State, $10.15 to $10.35; extra bound hoops Ohio, $10.75 to $11; Canada, $10 to $12 per barrel. Wheat—Chicago spring, mixed, $2.28. Corn Western mixed, $1.85 to $1.88 per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The quantity of English wheat received fresh up to our market has been unusually limited. For all kinds the demand has ruled steady, at an advance in the quotations of from 1s to 2s per quarter, and at which a clearance has been effected. The imports of foreign wheat have been on a very moderate scale. Really fine samples have changed hands steadily, at an improvemont in value of 1s per quarter. Inferior kinds have moved off slowly, but at full prices. Malting barley has been in request, at extreme currencies, but grinding and distilling sorts have commanded very little attention. Malt has sold heavily. In prices, however, no change has taken place. An unusually large quantity of oats has arrived from Scotland. Dry samples have sold at full quotations, but inferior kinds have ruled in favour of buyers. Beans have met a heavy inquiry, at 1s per quarter less money. In peas, next to nothing has been doing, at late rates. Both English and foreign flour has commanded full prices.

On the Continent, wheat has sold on rather higher terms, but the trade has been by no means active. Most descriptions of spring corn have changed hands slowly. In America, both wheat and flour have sold heavily. The Chicago Board of Trade has adopted new rules for the inspection and grades of grain. For the information of buyers in this country, we insert the rules with respect to spring wheat and corn:—"Winter wheat—Extra white, to be pure white, sound plump, and well cleaned; No. 1 white, to be pure white, sound and reasonably clean; extra red, to be red winter wheat, or red and white mixed, sound, plump, and well cleaned; No. 1 red, to be pure winter wheat, red, or red and white mixed, and reasonably clean; No. 2 winter, to include inferior, shrunken, or dirty winter wheat, either red or white or mixed; rejected winter, to include winter wheat so much damaged from any cause as to make it unfit for flouring or warehousing. In case of a mixture of spring with winter wheat, it will be called spring wheat, and graded according to the value thereof. Spring wheat—Chicago extra, to be sound, plump, and well cleaned spring wheat, and strictly choice flouring wheat; No. 1 to be reasonably clean, free from other grain and rice wheat; No. 2 will include inferior or dirty wheat; rejected, all wheat so much damaged from any cause as to make it unfit for flouring or warehousing; Black Sea in no case to be graded higher than No. 1, and rice wheat no higher than No. 2; hard rice wheat, though in no respects 'extra,' will be graded No. 1. All wheat to be weighed and entered on inspector's books. Corn—White, to be pure white, and in all other respects to be No. 1 corn; yellow, to be pure yellow, and in all other respects No. 1 corn; No. 1, to be sound, dry, plump, and well cleaned; No. 2, to include all other corn, dry, and merchantable, and reasonably clean; rejected, all wet, very dirty, hot, and otherwise badly injured corn, unfit for warehousing."

In Scotland, wheat has been in fair request, and prices have rather advanced. Other kinds of produce have sold slowly.

The Irish markets have been scantily supplied with wheat. The transactions have been only moderate; nevertheless, the trade may be considered steady. Spring corn has met a slow inquiry.

At Mark lane to-day, there was decidedly less activity in the trade for English wheat. The supply on offer, however, being small, holders were firm, and Monday's advance in prices was supported. In foreign wheat, with which the market was fairly supplied, a very moderate business was transacted at late rates. Barley met a slow sale, at previous quotations. Oats were freely offered, and, with the exception of good and fine samples, prices were the turn lower. Beans and peas were in slow request, at late rates. The flour trade was steady, and prices ruled firm.

The following return shows the stocks of cereal produce at Liverpool at the close of the last two years:—

	31st Dec., 1863.		31st Dec., 1864.
Wheat ..... qrs	366,112	.....	518,026
Barley	4,662	.....	8,150
Malt	2,334	.....	2,266
Oats	24,227	.....	26,546
Beans	24,074	.....	4,612
Peas	6,666	.....	4,332
Indian corn	191,323	.....	169,766
Oatmeal ..... loads	46,039	.....	47,305
Flour ..... sacks	84,930	.....	106,746
— ..... bbls	138,408	.....	128,169

Mr George Dornbusch reports the arrival off coast of 20 vessels laden with grain, and a moderately active demand for wheat, at 1s per quarter more money. Other kinds of produce have moved off slowly, at about previous quotations. Cotton seed has realised 6*l* 17s 6d to 7*l* per ton.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has opened without animation, but prices have been generally maintained, the home refiners buying to a moderate extent. About 1,500 casks West India had sold in three days, including the portion submitted by auction, viz., 630 casks, of which the bulk found buyers. Barbadoes, 30s to 36s 6d; crystallised Demerara, 35s to 41s; soft brown and yellow, 31s to 33s. 1,426 bags grainy Berbice: yellow and white, 35s to 42s per cwt.

Mauritius.—On Tuesday, 2,928 bags, offered by auction, found buyers: grainy sorts, 34s to 37s; low grey, 33s; crystallised, 36s to 39s 6d per cwt. A few parcels are also reported sold by private contract.

Bengal.—1,381 bags, offered by auction, partly sold: brown and yellow Gurpattah date, 30s to 32s; Cossipore syrups, 35s to 35s 6d per cwt.

Natal.—2,146 bags were partly disposed of: brown, 25s 6d to 30s 6d; yellow, 31s to 34s per cwt.

Penang.—99 baskets partly sold at 34s to 35s for strong yellow; white taken in at 30s per cwt.

Foreign.—At auction, 4,607 bags Guatemala partly sold: muscovado sorts, brown and yellow, 29s to 33s. 964 casks 350 barrels Porto Rico partly met with buyers at 30s to 37s. 451 casks Cuba were sold in at 31s to 34s 6d. 331 boxes Havana: yellow and white, 35s 6d to 43s. About 200 casks Cuba have sold privately at 31s to 33s. Three floating cargoes of Cuba muscovado, for the United Kingdom, at 21s 3d to 22s. One, for a near port, at 22s 3d per cwt.

Refined.—The late advance paid for refined goods has been maintained, but the market is not very active.

COCOA.—There have not been any further sales this week, and the market is dull.

RUM.—A better demand has sprung up, Demerara selling at 1s 10d to 2s 1d, according to packages. Leewards, 1s 8d; Penang, 1s 5d per proof gallon. A few contracts have been made in Jamaica at full prices.

TEA.—The first public sales this year contained 7,945 packages, of which 6,011 packages sold, nearly all this quantity being printed "without reserve." Prices were lower in several cases, especially for the fine qualities of Canton gunpowder, and fine Canton Young Hyson. Fine Canton scented orange Pekoe sold at 2s 0½d to 2s 1d per lb. The market is quiet by private contract.

COFFEE.—The moderate quantity brought forward this week has been chiefly disposed of at about the valuations; but the market is not active. 685 casks 1,297 barrels and bags plantation Ceylon, by auction, found buyers: small berry to good, 80s to 87s. 359 casks 1,489 barrels and bags native partly sold at 69s 6d to 71s 6d for ordinary small to very good ordinary. 504 casks and cases 283 bags East India were sold: good to fine Mysore, 83s to 101s; other kinds, 77s 6d to 90s 6d per cwt, being full prices.

Digitized by Google

RICE.—A good demand prevails, about 25,000 bags being disposed of; Necrancie Arracan, 8s 6d to 9s, according to conditions; white Bengal, 11s 9d to 14s. The latter is higher, and soft grain descriptions obtain a slight advance, with few sellers.

SAGO.—1,935 bags offered by auction were chiefly sold, and went off at firmer prices: small grain, 17s 6d to 19s; medium, 18s to 19s per cwt.

SAGO FLOUR.—1,721 bags sold at lower rates, from 13s 9d to 14s per cwt.

SPICES.—The market for black pepper is firmer: 515 bags fair common brownish Penang by auction, sold at 3⅛d, one lot 3¼d. 3,300 bags Singapore: grey to good, 3⅛d to 3¼d. 69 bags good Singapore white sold at 5⅜d to 5⅞d, being dearer. 224 bags Penang, of old import, realised 5¼d to 5⅜d. 137 cases nutmegs: small, 10d to 10½d; middling to fine, 1s 3d to 3s 5d, being irregular prices. 31 cases mace of old import sold: low to middling, 1s to 1s 5d; middling to good, 1s 7d to 3s 5d per lb. Cloves are held very firmly.

SALTPETRE.—A few parcels of Bengal have changed hands at full prices: refraction 7⅛ to 3½, 32s to 32s 6d per cwt., cash.

COCHINEAL.—470 bags, by auction, sold at full prices to 1d advance: Honduras silvers, 2s 9d to 3s 5d; blacks, 3s 3d to 4s 6d; Teneriffe silvers, 3s to 3s 2d; blacks, 3s 3d to 3s 7d per lb.

OTHER DRYSALTERY GOODS.—A few sales of Gambier have been effected at 22s to 22s 6d. Tumeric is firmer: Bengal, 24s per cwt.

METALS.—The markets are quiet. Scotch pig iron last sold at 49s 9d per ton for mixed Nos. 100 tons spelter are reported at 18*l* 15s. The stock amounts to 11,200 tons, against 5,350 tons in 1863. More inquiry prevails for Straits tin at 91s to 91s 6d per cwt, cash.

JUTE.—The market is firm, with an active demand, especially for good qualities, at higher prices.

HEMP.—A large amount of business has been done in Manilla, at 25*l* 10s to 29*l* per ton.

LINSEED is quiet. Prices on the spot almost nominal. Azov cargoes, for spring shipment, offer at 58s 9d to 59s per quarter.

OILS.—Olive remains inactive. Rather more business has been done in sperm. Cocoa-nut is in better demand: Cochin, 37s; Ceylon, 36s. Fine palm steady at 35s 6d. Linseed has declined to 33s per cwt. Rather more inquiry for rape oil.

TALLOW.—Rather a firmer tone pervades the market. First sort new Petersburg Y.C. quoted 42s 3d to 41s 6d; March, 42s 6d; April to June, 42s 6d to 42s 9d; October to December, 43s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, January, 2.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is quiet, but not lower. 5,698 bags Mauritius sold at about the previous quotations. 1,833 bags Bengal partly sold at 35s 6d to 41s for white Benares. 630 casks 1,302 barrels and bag West India at previous quotations. The week's business in the latter amounts to 2,351 casks. 3,000 bags clayed Manilla have sold at 29s 6d per cwt.

COFFEE.—553 casks 171 barrels and bags plantation Ceylon, 158 cases 347 bags East India, and 1,162 bags Brazil, &c., in the sales, went off at about previous rates

RICE.—6,284 bags pinky Madras, by auction, sold at 11s to 11s 3d, being 3d to 6d dearer. 291 bags white Bengal sold at 12s for middling white, rather broken.

SALTPETRE.—290 bags Bengal were bought in: refraction 3, at 33s. 600 bags Bombay, of low quality, at 26s to 26s 6d. 631 bags French refined, refraction 3¼, at 30s. 1,000 bags privately: Bengal, refraction 10 to 6, 31s 6d to 32s per cwt.

GINGER.—575 bags rough Bengal, offered by auction, were bought in at 32s per cwt.

OIL.—76 tons sperm offered by auction were taken in at 63*l* to 63*l* 10s. 33 tons Southern whale part sold at 42*l* 10s to 45*l* per ton.

TALLOW.—950 casks Australian by auction, sold at 6d advance: sheep, 41s 6d to 42s 6d; beef, 38s to 40s 6d per cwt. Town unchanged.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues very quiet. Prices nominally the same as last week. The Dutch ports being closed by the frost, there is no business doing at present.

GREEN FRUIT.—The market is better supplied with oranges, and prices lower. Some parcels St. Michael's, Terceira, Valencia, and Seville, sold by Keeling and Hunt, went at easier rates. Lemons supported the advanced prices obtained of late. Barcelona nuts dull. Black Spanish and Para scarce. Alexandria grapes without inquiry. Chesnuts in moderate demand. Bilboa lower.

DRY FRUIT.—The market for currants has been dull; throughout the week attention only being paid to lowest qualities, which are a shade better in value. Raisins are slightly improved, owing to shortness of stock. Figs dull.

FLAX without alteration, only a few sales making of the finest Riga marks, at recent prices.

HEMP.—But little doing in Russian. A good demand for Manilla, this week, at fully 2*l* per ton advance on the quotations early in last week.

TOBACCO.—Demand very steady for all descriptions suitable for home trade. For good and fine qualities of American, prices remain firm, and selections unobtainable, except at outside quotations.

METALS.—We have again had a week of very limited business. Copper is maintained fairly at quotations, but to make sales a reduction has to be submitted to. Iron is quiet in all kinds. Tin is maintained at the improvement of foreign, but less has changed hands in the last few days. Again spelter has experienced a little inquiry. Lead quiet, and tin plates the same.

METROPOLITAN CATTLE MARKET.

MONDAY, Jan. 2.—The total imports of foreign stock into London, last week, amounted to 5,174 head. In the corresponding week in 1863-4 we received 3,846; in 1863, 1,559; in 1862, 3,164; in 1861, 1,118; in 1860, 1,852; and in 1859, 2,310 head.

There was only a limited supply of foreign stock on offer to-day, in but middling condition. Beasts and sheep were a slow inquiry at late rates; but calves commanded extreme currencies. The arrivals of beasts fresh up from our own grazing districts, as well as from Scotland, were moderate. Most breeds came to hand in good saleable condition. Good and prime breeds commanded a steady sale, at full prices. Otherwise the beef trade was in a sluggish state, on former terms. The primest Scots and crosses were disposed of at 5s 6d to 5s 8d; but the more general quotations were 5s 4d to 5s 6d per 8 lbs. We were but scantily supplied with sheep, but most breeds reached us in prime order. The mutton trade was in a sluggish state; nevertheless, previous rates were supported. The best Downs sold at 6s per 8 lbs. Calves, the supply of which was limited, moved off steadily at full quotations, viz., from 4s 4d to 5s 6d per 8 lbs. There was a fair demand for pigs at full prices. The supply was by no means extensive.

SUPPLIES.

	Jan. 4, 1864.	Jan. 2, 1865.
Beasts	4130	3347
Sheep	17060	15090
Calves	170	35
Pigs	430	350

THURSDAY, Jan. 5.—Our market to-day was but moderately supplied with beasts, but their general quality was good. Prime Scots, &c., moved off steadily at full prices, the top figure being 5s 6d per 8 lbs; otherwise, the beef trade was in a sluggish state on former terms. The show of sheep was rather limited, and all breeds were in request at fully previous rates. The best Downs and half-breds realised 6s per 8 lbs. The few calves on offer were readily disposed of at quite Monday's currency. Prime small pigs moved off freely at late quotations; but large hogs were very dull. In milch cows next to nothing was done.

Per 8 lbs. to sink the offal.

	s	d		s	d		s	d		s	d
Coarse and inferior beasts	3	8	to	4	4	Prime Southdown sheep	5	10	to	6	0

HOP MARKET.

BOROUGH, Monday, Jan. 2.—Our market as usual this season is somewhat quiet, but the few sales effected have fully sustained recent values. The supply of the last growth is so limited than the least activity in the demand would lead to higher prices. Mid and East Kents, 130s, 160s, 200s; Weald of Kents, 117s, 140s, 155s; Sussex, 113s, 135s, 140s; Yearlings, 110s, 125s, 140s.

FRIDAY, Jan. 6.—The demand for hops is by no means active. The supply on sale is very moderate, and the market, as regards prices, continues to present a firm appearance. Compared with Monday, the currency exhibits no alteration of importance.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Jan. 2.—The arrivals coastwise have been more plentiful, which caused a shyness amongst buyers. The following are this day's quotations:—Yorkshire Flukes, 90s to 110s; Yorkshire Regents, 80s to 100s; Dunbar Regents, 90s to 100s; Kent and Essex Regents, 80s to 95s; ditto Rocks, 70s to 75s; Perth, Forfar, and Fifeshire Regents, 70s to 80s; ditto, ditto Rocks, 65s to 70s; Belgian whites, 55s to 65s per ton.

FRIDAY, Jan. 6.—The trade for potatoes is dull, at from 55s to 120s per ton.

HAY MARKETS.—THURSDAY, Jan. 5.

SMITHFIELD.—Meadow hay, 4*l* 4s to 5*l* 5s 0d; clover, 5*l* 5s to 6*l* 6s 0d; and straw, 1*l* 6s to 1*l* 12s per load. Trade steady.

CUMBERLAND—Meadow hay, 4*l* 4s to 5*l* 7s 6d; clover, 5*l* 5s to 6*l* 6s; and straw, 1*l* 7s to 1*l* 12s per load. A moderate steady.

WHITECHAPEL.—Meadow hay, 4*l* 4s to 5*l* 5s 0d; clover, 5*l* 5s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 12s per load. Trade inactive.

COAL MARKET.

FRIDAY, Jan. 6.—Wallsend, Hartlepool 22s 6d—East Hartlepool 22s 6d—Braddyll's Hetton 21s 9d—Hough Hall 22s—Kelloe 21s 9d—S. Kelloe 22s—Cowpen Hartley 17s 6d—Buddle's W. Hartley 17s 6d—Holywell Main, 17s 9d. Ships at market, 72; sold, 14; gas contracts, &c., 13—27; unsold, 45; ships at sea, 40.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 6.—The new year hrs opened with increased inquiry, and although it has not resulted in any large amount of business, still there is evidently a better feeling gaining ground. Holders are, consequently, very firm in their demands.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 6.—Thin attendance. Wheat, limited request, at late rates. Flour held firmly for late advance. Indian corn weak: Galatz, 26s 9d to 27s. Beans steady. Oats and oatmeal, fair demand, at late rates.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 24th of December, on 11,732 miles, to 675,291*l*, and for the corresponding week of last year, on 11,395 miles, to 612,748*l*, showing an increase of 337 miles, and of 62,543*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,275 miles, to 556,803*l*, and for the corresponding week of 1863, on 8,022 miles, to 503,464*l*, showing an increase of 253 miles, and 53,339*l* in the receipts.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Jan. 2.—In the share market to-day there was no recovery of animation, but the movements in the closing prices showed a general return to a better tone. In English railways, Great Northern (A stock) recovered 1, and Caledonian and Lancashire and Yorkshire ¼ each; South Devon improved 1, Midland ¾, South-Eastern ¼, and Great Western, North-Western, and North British (Edinburgh, Perth, &c.) ½ each; and ditto (original) receded ½. In colonial, Great Southern of India advanced ½, Indian Branch ¼, and Grand Trunk of Canada (4th preference) 1; ditto (1st and 2nd preference) recovered 1 each; and ditto (1st preference deferred) declined 1¼. In foreign, Paris and Mediterranean advanced ¼. In American, United States Five Twenties close 1 better; and Pennsylvania Railroad (2nd mortgage) 1 lower; and Maryland, Atlantic and Great Western (New York 1st mortgage), and ditto (Pennsylvania 2nd mortgage) are now quoted ex coupons.

TUESDAY, Jan. 3.—In the share market to-day the transactions were again few, but, except in American securities and foreign mines, the closing prices were rather disposed to advance. In English railways, Great Western (West Midland, Newport) advanced 1, Brighton ½, North-Eastern (Berwick), and ditto (York) ¼ each, South Devon a further 1, and Great Northern (A stock) a further ½; and Lancashire and Yorkshire relapsed ¼. In colonial, Melbourne and Hobson's Bay improved 1, Great Western of Canada, and ditto (new) ¼ each; and Punjaub declined ½. In foreign, Lombardo-Venetian recovered ¼, and Paris and Orleans advanced 1, Sambre and Meuse ¼, Great Luxembourg and Paris and Mediterranean a further ½ each, and Antwerp and Rotterdam ¼. In American, Erie shares (paid up) receded 1. In British mines, Wheal Bassett advanced 2½, Chiverton and Clifford Amalgamated ½ each, and East Grenville ¼; and Great South Tolgus declined ¼. In foreign mines, Kapunda closed ¼ lower.

WEDNESDAY, Jan. 4.—In the share market to-day there was no recovery of animation, but in English railways there was a tendency to improvement in the closing prices, which also slightly affected foreign and American; the shares of the financial companies were rather disposed to weakness; while the other descriptions were unaltered in tone. Of the English lines, Manchester, Sheffield, &c., advanced ¾, Metropolitan, and Midland ¼ each, ditto (Birmingham and Derby) 1, Great Northern 1½, ditto (A stock) a further ½, South Devon further 1½, and North-Eastern (Berwick), and ditto (York) a further ¼ each. In colonial, Melbourne and Hobson's Bay relapsed 1. In foreign, Bahia, and Sambre and Meuse (preference) improved ¼ each, ditto (original) further ⅜, and Lombardo-Venetian a further ⅛. In American, Erie shares (paid up) recovered ½; Illinois Central shares also advanced ½. In British mines, East Grenville further improved ¾; and Tin Croft receded ½. In foreign mines, no movement occurred in the closing prices.

THURSDAY, JAN. 5.—In the share market the transactions were again very few, and, except a slightly downward tendency in English railways, and an upward inclination in foreign, there was no material average variation from yesterday's closing prices in either of the descriptions. Of the English lines, North British (Edinburgh, Perth, &c.) advanced ½, Metropolitan a further ½, and Great Western (West Midland, Oxford) 1; ditto (original) and North-Western declined ½ each, and Lancashire and Yorkshire ¼; and Midland (Birmingham and Derby) relapsed 1, and North-Eastern (Berwick) ¼. In British mines, West Chiverton advanced 2½, and East Caradon ½; and North Roskear declined 2, Great Wheal Vor ½, and West Wheal Russell ¼.

FRIDAY, Jan. 6.—The railway market was inactive to-day. As regards the principal stocks, the only movement was a decline of ¼ per cent. in Metropolitan and ⅛ in Lancashire and Yorkshire.

ST EDWARD'S SCHOOL, OXFORD.

The object of this School is to combine careful religious training, under a Clergyman and Graduate of the University, with a first-rate modern education. Day Boys are not received. Terms, including Classics, Mathematics, Bookkeeping, Drawing, French, Music, and the Elements of Physical Science, Twenty-five Guineas per Annum; Washing and the Use of Books Two Guineas extra. There is an excellent playground. —Address the Rev. the Head Master, or the Rev. T. Chamberlain, Christ Church, Oxford.

COUNTRY AND TOWN

Residences, Landed Estates, Investments, Hunting Seats, Fishing and Shooting Quarters, Manors, &c.—BEAL'S REGISTER of the above, published on the first of each month, forwarded per post, or may be had on application at his Offices, 209 Piccadilly, W. Particulars for insertion should be forwarded not later than the 28th of each month.

EDUCATION IN GERMANY.—

ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

TO GENTLEMEN SEEKING

preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton crescent, Tufnell park West, N.W.

PROPRIETARY SCHOOL, GRAVESEND.

Head Master, Mr M. GUTTERIDGE, B.A.

The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French, and the practice of good Handwriting.

Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.

For terms and prospectuses, apply at the School.

KINAHAN'S LL WHISKY

J. W. ALLEN, Manufacturer and Patentee, 37 West Strand, London, W.C.

NO MORE GREY HAIR.—

MELANOGENE, the superlative dye of DICQUEMARE senior, Rouen, for instantaneously dyeing in any shade of colour the hair and the beard, without danger to the skin, and free from smell. This dye is superior to all that have been employed hitherto Manufactory at Rouen, Rue St Nicholas, 39; Depôt for London, Messrs HOVENDON and SONS', 5 Great Malborough street, W., and 57 and 58 Crown street, Finsbury square, E.C.

WESTERN GRAMMAR SCHOOL,

Brompton, S.W., in union with King's College, London.—The system pursued at this school is eminently practical, and calculated to prepare pupils for the competitive examinations and the various pursuits of life. Three pupils successfully passed the Oxford Local Examinations this year. The Head Master takes a few boarders.—For terms and prospectus apply at the school.

THEATRE ROYAL, DRURY LANE.

Managers, Messrs Edmund Falconer and F. B. Chatterton. The Free List entirely suspended.

On Monday, January 9th, and during the week, the farce of A YOUNG LAD FROM THE COUNTRY. Principal characters by Messrs G. Belmore, G. F. Neville, Fitzjames, G. Spencer, Miss E. Falconer, and Miss Wilmott. Doors open at half-past six, commence at seven, and terminate at eleven.

Morning Performances every Wednesday and Saturday of the Pantomime until further notice. Children and Schools at reduced prices to the following parts of the Theatre:—Dress circle, first circle, and stalls, for morning performances only. The Grand Christmas Comic Pantomime, written by E. L. Blanchard; Esq., entitled, HOP O' MY THUMB. The gorgeously beautiful character of the decorations, inclusive of more than the usual amount of Scenical Surprises and Transformation Wonders, are ensured by the fact of their being entirely designed and for the most part executed by the celebrated artist, William Beverley, whose eminent services have been retained this Christmas exclusively for the Theatre Royal, Drury lane. The general action of the Pantomime arranged by, and the whole produced under the direction of, Mr Robert Roxby. Characters in the opening:—Miss Lydia Thompson, Miss Helen Howard, Miss Hudspeth; Mr G. Belmore, Tom Matthews, Mr Fitzjames, Mr G. Weston, Master Percy Roselle, &c. The Harlequinade will include the services of those popular pantomimists (forming a double company)—Harry Boleno and Mr C. Lauri, Clowns; Mr W. A. Barnes and Mr J. Morris, Pantaloons; Mr Cormack and Mr S. Saville, Harlequins; Mdme. Boleno and the Misses Gunniss, Columbines; and the talented One-legged Dancer, Signor Tescano, and Mdlle. Detcto, four years of age, who will introduce her celebrated imitations a la Perea Nena. The masks, devices, and dresses, from designs by the humerously renowned Dykwynkyn. The dances and action of the ballet arranged by Mr Cormack—Comic scenes, tricks, &c., invented by H. Boleno and Cormack. The music selected and arranged by Mr J. Barnard—Machinery by Mr J. Tucker and assistants—Gas effects by Mr J. Hinkley—Properties by Mr Needham and assistants—Dresses by Mr S. May and Mrs Lawler.—Box Office open from Ten till Five daily.

On Monday morning, January 9, Mr Howard Glover's Grand Musical Festival.

NEW THEATRE ROYAL ADELPHI.

Sole Proprietor and Manager, Mr B. Webster.

Unprecedented Attraction! 2nd week of the re-appearance of the great tragedienne Miss Bateman in the popular Drama of LEAH.

On Monday, and during the week, at 7, ICI ON PARLE FRANCAIS. Mr J. L. Toole. At 8, LEAH. Miss Bateman, supported by Messrs G. Jordan, Swinburne, R. Phillips, Stuart, Stephenson, Eburne; Miss H. Simms and Mrs Billington. To conclude with DARK DOINGS IN THE CUPBOARD BY THE KNOTTING 'EM BROTHERS. Messrs J. L. Toole, P. Bedford, R. Phillips, Billington; Mrs Alfred Mellon and Miss A. Seaman. Commence at 7.

ROYAL POLYTECHNIC.

—Patron H.R.H. the Prince of Wales.—"The best and cheapest shilling's worth to be found in London."—TIMES, December 27, 1864.—Professor Pepper's Third Ghost Lecture includes Exhibition of the Physioscope, and two new secretral tableaux entitled the Indian Widow's Suttee and the pretty fairy tale of Snow White and Rosy Red (J. H. Pepper and Henry Dircks joint inventors)—New Musical Entertainment, by Mr R. Coote, entitled Nile Sauce, or the Travels of Bruce and the Wonderful Rovings of the Great Baron Munchausen—Engagement of Signor Blitz, the renowned conjurer, and of Herr Whautkins, the King of Jugglers—The Headless Man, and Legs and Arms in Motion, without Bodies, by Mr Cheshire's Improved Shadow Pantomimic Effects in Mr J. L. King's new Lecture—The Royal Magic Tub, containing thousands of Toys and Trinkets The second gratuitous distribution amongst the juvenile visitors, on Thursday, the 12th January 1865.—Admission to the whole 1s.—Open 12 to 5, and 7 to 10.

CONSUMPTION, COUGHS, COLDS, ASTHMA BRONCHITIS, NEURALGIA, RHEUMATISM, SPASMS, &c.

CAUTION—"In Chancery."

CHLORODYNE.

VICE-CHANCELLOR WOOD stated that Dr J. Collis Browne was undoubtedly the Inventor of Chlorodyne. Eminent Hospital Physicians of London state that Dr J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr Browne's.—See TIMES, July 13, 1864. The Public, therefore, are cautioned against using any other than DR J. COLLIS BROWNE'S CHLORODYNE.

This Invaluable Remedy produces quiet refreshing sleep—relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretion of the body.

From J. M'Gregor Croft, M.D., M.R.C., Physician, London, late Staff Surgeon to H.M.F. "After prescribing Dr J. Collis Browne's Chlorodyne for the last three years, in severe cases of Neuralgia and Tic-Doloreux, I feel that I am in a position to testify to its valuable effects. Really in some cases it acted as a charm, when all other means had failed." No home should be without it. Sold in bottles, 2s 9d and 4s 6d. Sent free on receipt of stamps, by J. Davenport, 33 Great Russell street, W.C., Sole Manufacturer.

Observe particularly, none genuine without the words "Dr J. Collis Browne's Chlorodyne" on the Government stamp.

BOUDOIR PIANOFORTE.—THE

NEW PARIS MODEL BOUDOIR PIANOFORTE, now being introduced by Messrs Keith, Prowse, and Co., 48 Cheapside, is an oblique trichord with grand action, 7 octaves, and extra metal bracings for extreme climates.—The tone is full and rich, the articulation rapid and distinct. Price in Walnut or Rosewood, 30 guineas.

HARMONIUMS,

by Alexandre.—The new Church Harmonium, with a variety of stops and pedals, Venetian swell, and four rows of Vibrators, is now being introduced (price 24 guineas, packed and delivered at any London railway station) by the city agents, Messrs Keith, Prowse, and Co., 48 Cheapside.

MUSICAL BOXES,

by Nicole Frères.—Messrs Keith Prowse, and Co., direct importers, offer to parties seeking really fine, well-tuned Instruments, a selection of more than 200 boxes, with recently-introduced improvements, from four guineas. The new boxes, with accompaniment of flutes bells, and drum, should be heard to be appreciated, as the expressive effect upon the ear are exceedingly novel and beautiful.

AGENTS IN INDIA.—Messrs Thomson, Shaw, and Co.

SECRETARY.—Alexander Forbes, Esq.

Offices—2 East India avenue, India House, Leadenhall street, E.C.

PROSPECTUS.

This Company is formed for the purchase of thirteen valuable tea estates already in profitable cultivation, situated in the Province of Assam, in British India, and for the purpose of further developing and extending their operations.

The property consists of 12,000 acres of freehold land, held direct from Government, of which 2,182 acres are planted with tea plants of the following ages:—namely, 440 acres, 3 years old; 902 acres, 2 years old; 440 acres, 1 year old; and 400 acres just planted.

The soil and climate of this locality are second to none in the province, as the following extract from the Manager's Report to the Directors of the Bishnath Tea Company, a neighbouring concern, for the season ending 31st December, 1863, and submitted by them to the shareholders, will show:—

"The out-turn of tea and seed has been unprecedented in Assam. The plantation in its fourth year has given an average of 390 lbs, and the two-year-old gardens of 240 lbs of tea to the acre; and this has been obtained at no sacrifice to the prospects of future years, but with careful and light plucking, as is evinced by the present healthy appearance of the plants, which, I have often been assured, are, in size and vigour, unsurpassed by any plantation of the age in Assam."

The dividends paid by the Assam, the Upper Assam, the Jorehaut, Bishnath, and by several of the other tea companies in Assam, vary from 20 to 30 per cent., and their shares are at a premium of from 100 to 200 per cent.

The factories have the advantage of being traversed by good roads and navigable rivers, and steamers ply between Assam and Calcutta, affording great facilities for the supply of labour and for the other requirements of the estates. Not less than 8,000 acres can be brought into profitable cultivation; and each acre, when in full bearing, is capable of producing at least 400 lbs of tea.

The plantations are calculated to produce, during the first year of the Company's operations (1864-1865), returns sufficient to yield 10 per cent. on the paid-up capital; and the vendors guarantee a minimum dividend at the rate of 10 per cent., payable half-yearly, upon the paid-up capital for three years, to be calculated from the date of the registration of the Company. At the expiration of the three years the plants will be sufficiently advanced to give progressively larger dividends, until the whole have attained maturity and yield a maximum return.

The price to be paid for the property is £163,000, payable by annual instalments, with interest, at 5 per cent., extending over a period of six years, as follows, viz.:—

	£
On formation of Company	15,000
31st January, 1866	20,000
31st January, 1867	25,000
31st January, 1868	30,000
31st January, 1869	35,000
31st January, 1870	38,000
	163,000

These terms the Directors consider to be most advantageous, as, while they show the confidence of the vendors in the value of the property, the easy instalments as to payments will enable the young plants to grow up into full bearing, and to yield large returns before the greater part of the capital is called up.

The undertaking originates with the Directors and their friends. No promotion money will be paid to any one, either directly or indirectly, and the preliminary expenses will be strictly confined to such as are absolutely necessary.

The vendors stipulate that 6,000 of the shares are to be allotted to them; 6,000 of the remaining shares have been already subscribed for, leaving 6,000 shares available for the public.

PARTICULARS of the ESTATES of the NOWGONG TEA COMPANY of ASSAM (Limited).

1. THE BORKONDOLEE DIVISION—

Consists of the Factories of Borkondolee, Loongpoong, Tomokee, Topotjoonee, and Rembeng, all in the Nowgong District, on the banks of the rivers Kullung and Nonoye, and along the grand trunk road from Doboka to Nowgong; varying in distance from the station from 8 to 16 miles. Extent of land, 6,000 acres, of which 1,117 are planted, and of the following ages, viz.:—

	acres.
Three years old	230
Two years old	537
One year old	150
Just planted	200
Total	1,117

2. THE BAMONEE DIVISION—

Consists of the Factories of Bamonee, Topotjoree, Amluckeeghat, Borhoolah, Sa-sabat, Deejoomook, and Sepanullah, all in the Nowgong District, the principal factories being within seven miles of the station, and the others conveniently situated on the banks of the Rivers Kullung, Nonoye, and Deejoo—near the old station of Rungagora, at distances varying from 8 to 20 miles from Nowgong. Extent of land, 6,000 acres; of which 1,065 are planted, and of the following ages, viz.:—

	acres.
Three years old	210
Two years old	365
One year old	290
Just planted	200
Total	1,065

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men as the safest, speediest and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other kind.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy.

Dr GRANVILLE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found the Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light-Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.

SOLE CONSIGNEES:

The prospectus and every information may be had on application. GEORGE MORRIS, Secretary.

Dec. 26, 1864.

LONDON, CHATHAM, AND DOVER RAILWAY.

LOANS ON DEBENTURES.

The Directors of the above Company are prepared to receive LOANS on DEBENTURES of £100 and upwards, secured either on the general undertaking or upon the Metropolitan Extensions, for three or five years, at 6 per cent. per annum.—By order,

W. E. JOHNSON, Secretary.

Victoria Station, S.W., Sept. 16, 1864.

ATLANTIC AND GREAT WESTERN RAILWAY.

NOTICE TO BONDHOLDERS.

In conformity with the terms on which the FIRST MORTGAGE BONDS of the PENNSYLVANIA SECTION of this Railroad were issued to the Public, the SECOND ANNUAL DRAWING of 4 per cent. of the gross amount of these Bonds will take place at the Office of Mr E. F. Satterthwaite, 38 Throgmorton street, in the presence of Mr Grain, Public Notary, on THURSDAY, January the 19th, 1865, at ONE o'clock precisely.

The authorised issue is as under, viz.:—

			dols.	dols.
2,000	Bonds of	1,000 each.....		2,000,000
600	—	500 —		300,000
2,000	—	100 —		200,000
				2,500,000

Four per cent. of each denomination will be drawn on the above day, and the Bonds so drawn that have been issued in London will be paid off at the rate £225 for every 1,000 dollar Bond, £112 10s for every 500 dollar Bond, and £22 10s for every 100 dollar Bond, on presentation at the Company's Office, No. 2 Old Broad street, E.C., on and after 1st April next, in addition to the Coupon due on that day, after which all interest will cease.

On payment the drawn Bonds will be cancelled in the presence of a public notary.

Offices, 2 Old Broad street, London, E.C., Jan. 4, 1865.

JOSEPH CRAVEN AND CO. (Limited).

WORSTED and COTTON SPINNERS, MANUFACTURERS, and MERCHANTS.

To be incorporated under "the Companies Act, 1862."

Capital, £250,000, in 10,000 shares of £25 each,

Of which it is intended to call up not more than £20 per share, with power to create additional capital by new shares.

Deposit £1 per share on application, which must be made on or before the 10th day of January, 1865, after which time no further application will be received.

It is intended that allotments shall be made on the 20th day of January, 1865, the Company being previously registered; that the first call of £9 per share shall be paid on the 1st day of February, 1865; the second call of £5 per share on the 1st day of May, 1865; and the third call of £5 per share on the 1st day of August, 1865. Interest at the rate of £5 per centum per annum will be allowed on all calls paid in advance, and interest at the rate of £7 per cent. will be charged on all calls in arrear.

FIRST BOARD OF DIRECTORS.

Joseph Craven, West House, Thornton.
John Crossley, Manor Heath, Halifax.
Esau Hanson, Halifax.
Thomas S. Scarborough, Manager to Mr Craven.
(With power to add to their number.)

BANKERS.

Commercial Banking Company, Halifax.
London Joint Stock Bank, London.

SOLICITORS.

Messrs Wavell, Philbrick, and Foster, Halifax.

PROSPECTUS.

This Company is formed for the purpose of acquiring the following businesses, which it is considered may be advantageously combined:

1. The business of Mr Joseph Craven, Manufacturer and Merchant, carried on by him at Dole Mill, Thornton; Legrame Mill, Horton; and 23 Leeds road, Bradford.

2. The business of Messrs F. Lister and Co., Worsted Spinners, carried on at Waterloo Mills, Bradford, and comprising about 11,000 spindles, seven combing machines, and all necessary preparers. The freehold will also become the property of the Company.

3. The business of Messrs Esau Hanson and Co., Cotton Spinners and Doublers, now carried on at Haley Mills, Halifax, which comprises in the spinning department about 13,000 spindles, with adequate preparation; and in the doubling department about 5,000 spindles, all of which is adapted to meet the requirements of the manufacturing business before mentioned. It is also intended to purchase the freehold.

The Company will become proprietors of several hundred power looms for weaving Llama, D'Ecosse or Cashmere and other shawls; mantle cloths, Turcomans and Repps de Laine; Merinos, Henriettas, Paramattas, Barathea, and other dress goods. They will also purchase the Patent Shawl Fringing Machine and Finishing Apparatus.

Mr Craven obtained a medal from the International Exhibition of 1862, and the Commissioners of New South Wales have also awarded to him a massive gold medal for the excellency of his productions. It may be truly stated that he stands pre-eminent in the production of the principal fabrics above enumerated.

The merchant business is carried on by Mr Craven, at his Bradford warehouse, having branches in London, Glasgow, Manchester, and Dublin, with an old established connection.

Mr Craven will receive a moderate and equitable sum for good-will in paid-up shares of the Company, but it is arranged that no payment shall be made in respect of the other two businesses.

The valuations of the machinery and freeholds have been made by competent and independent valuers; the stock of raw material and manufactured goods has also been taken at a price which will leave a profit to the new Company after paying all expenses contingent upon the sale thereof.

The present proprietors will retain one-half of the subscribed capital.

Each share will carry one vote.

Forms of application for shares to be had at 23 Leeds road, Bradford.

The Investor's Manual *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price, 6d.*

In accordance with the suggestions of many subscribers, it is intended to publish the series of articles on the "Money Market for Men of Business" separately, carefully revised, and with a Preface.

THE REASON WHY THE LAW OF BANKRUPTCY IS SO BAD, AND THE MODE IN WHICH IT MAY BE AMENDED.

Mr Moffatt's Committee to inquire into the practical operation of the existing Bankruptcy Laws will probably be reappointed when Parliament meets. There will be a renewal of the legal discussions and the Parliamentary discussions with which we are so familiar. We shall be told, and justly, by the mercantile community, that the present law works in a manner most unsatisfactory; we shall be told, justly or unjustly, by several lawyers of eminence, that the present law works as well as any law about the matter can work. As before, those who feel the evil will say it is great—those who administer the evil will say it is small. We should not interfere in these habitual discussions except for two reasons—first, that Mr Moffatt's Committee has applied to the subject a very unusual amount of mercantile knowledge and sense founded on experience; and, secondly, that we have now a Lord Chancellor of whom his enemies cannot say—or, what is more to the purpose, even his enemies *do* not say—that he is averse to principle and inattentive to improvements. Lord Westbury is ready to face great difficulties for great objects. We have now a better representative of law and a better representative of commerce than we are soon likely to have again; and therefore it becomes our duty to lay before our readers a searching exposition of the essence of the subject.

First. There can be no doubt that the existing system is a great failure. You will not find a mercantile man,—any man who has had to do with the Court of Bankruptcy,—who approves of it. It is a Court, at first created for people in commerce, and all those people hate and disapprove of it. If the disapprobation and dislike were confined to the noisy talkers, to the eager and sanguine man, so common and, perhaps, so useful in the seats of enterprise, we should not much regard it. Making bad debts is very unpleasant, and, therefore, the Court of bad debts will never be popular. But the dissatisfaction is quite as deep among the quiet and thinking as with the loud and eager part of the commercial community. No experienced, steady-going merchant—no watchful banker—will say that the present law and practice in Bankruptcy are at all what they ought to be. Such persons as these are the ultimate tribunal,—the Court without appeal on this matter; they alone have the experience to feel the matter, and the understanding to comprehend it,—and they decide, one and all, with scarcely a reservation or a qualification, against it.

Secondly. There is no doubt that the matter is very important. Practical men know its magnitude, but many loose thinkers speak slightingly of it. They say, after all, it does not matter about bankruptcy; we all know the most important cases are settled out of Court, and what the Court is, and what it does, is but secondary. The best answer is the answer in figures; the last statistics,—those *just* published by the Government,—though a little old, will prove what we wish conclusively. The total amount of debts proved from bankrupts' estates was—

	£
1859	3,645,037
1860	4,478,037
1861	3,894,322
Total	12,017,396

and the amount of assets realised was—

	£
1859	1,057,834
1860	1,249,962
1861	1,132,255
Total	3,440,051

so that the magnitude of the jurisdiction—the importance of the subject-matter of bankruptcy—is evident. The same figures prove the bad exercise of that jurisdiction; it is certainly not conclusive that the amount realised is under 6s in the pound of the debts proved; the lawyers may say *that* is the fault of our mercantile community, who give such wrong credit, and do such bad business; but the irrefragable figures are of those of *dividends ordered*. It appears that these were—

	£
1859	687,244
1860	579,085
1861	657,053
Total	1,923,382

or *a million and a half* less than the assets received. Every man of business knows that the assets are neither collected as they ought to be nor divided as they ought to be, and these figures confirm it.

We must not deceive ourselves on this subject. The law of bankruptcy has been amended and amended, and then these amendments consolidated: again amended and again consolidated times without number. There have been palliatives, and modifications, and ameliorations of every sort; every sort

Digitized by Google

of person has tried to mend it; and yet up to the present time it is wholly unsatisfactory. *We* do not say it has never been worse, though many people do say so; but very bad. it beyond question is. There is no use in any more minor modifications and changes of detail. We had better bear the evils we have, than take a great deal of trouble, as experience shows, to very little use. If we can find a searching remedy, let us use it; if we cannot, do not let us change the *minutiæ* continually. The root of the evil lies very deep in practice, and yet it is very clear in logic when stated. We have set a Court of law to do work unfit for a Court of law; we have imposed on a body *essentially judicial, duties essentially administrative.* The constitution of the Courts of Bankruptcy, by no means perfect, has not been very unfit for the proper end of a Court of law—decision. But it has been utterly unfit for what no Court could be expected to be fit for—business. The whole idea of a deciding body and the whole idea of a transacting body are utterly at variance. The rules, the forms, the habits of the one are entirely unfit for the other. That which ensures success in the one will on that very account almost by necessity ensure failure in the other. A deciding body is well constituted when it has a good mode of extracting the point, a good mode of arguing the point, a good judge to decide the point;—in short, it is a machine for directing what should be done. But an executive body begins where it ends. An executive body has not to ascertain what is to be done, but to do what is to be done. A court of commissioners and registrars and other subordinates is a very fair machinery for the due decision of any matter of law which may arise in the course of the settlement of a bankrupt's affairs. But points of law are but a very trifling part of those affairs. In some peculiar cases, peculiar difficulties will arise, needing new legal decisions; but in general one insolvent estate is very much like another, and, even when there are peculiarities, the immense experience of the last thirty years has furnished us with a large storehouse for precedents which generally make much law idle. The great bulk of bankruptcy business is mercantile and financial; it is getting in the bankrupt's property and paying his debts. It is doing impertectly, now the bankrupt has given up business, what he would have done much more perfectly had he been able to continue in business.

The cardinal error of choosing a body adapted for deciding legal controversies as the executive body for transacting mercantile business is so great, that no changes or regulations of detail can ever cure its consequences. The same error, it is true, largely pervades the Court of Chancery, but, when examined, that is rather an argument against the error than for it. The Court of Chancery has as good judges as any in the world, and perhaps, take it for all in all, as good a law as there is anywhere in the world, and yet it is the most unpopular Court in the world. It is so, because it undertakes what no Court should undertake—it undertakes to administer; it has invented a term for the error—an "administrative suit." Accordingly, an estate in Chancery has become a by-word for everything which is ill-managed, ill-kept, and made the least of. A most costly expenditure is laid out in attaining a most miserable and inefficient result. In any of these estates belonging, at least in part, to minors—persons not in *esse*—persons unfit to manage—the Court has undertaken to manage, but it should not have so undertaken. The *Government* should have so undertaken. There ought to have been a department of the Executive Government specially charged with it. Many persons will object, and say, "Oh! the Government manages "things so ill; the Government does not care." But the answer is plain: "The Court manages worse, and the Court cares less." We have now a latent Executive department of State hidden in the law department; it would work better; it would be more amenable to criticism and public judgment if it were taken from its hiding, and placed in due prominence as it is.

We are not now, however, concerned with the Court of Chancery, but with the Court of Bankruptcy. We only alluded to the latter lest it should be accepted as a successful precedent for the cardinal errors of the former. The Court of Bankruptcy is, however, a much stronger case than the Court of Chancery. The principal business of the Court of Chancery is with *realised* property—with property that is in a fixed obvious form, which may be hurt and impaired, but will not be lost and ruined by mismanagement. But a trading debtor's estate, the principal business of the Court of Bankruptcy, is essentially unrealised property, outstanding debts, cargoes at ea, perishable goods, and other such things essentially fugitive, easily destructible, peculiarly requiring good management. Even though a Court of law could well administer fixed property (we do not believe a Court can); but though it could, it would not follow that it could well administer unfixed property—commercial property—the property most hard to manage at the time when it is hardest to manage—just when the late owner has failed, and the whole is in confusion.

But if the Court is not to manage the affairs of the bankrupt,—is neither to realise the assets, nor get in the debts, nor pay the dividends,—who is to do it? By far the best people to do it, if they will do it, are the creditors themselves. They are the parties interested,—they will have the money in case of success; they will lose the money in case of failure, They ought to have the most ample means, the fullest powers for taking the whole business—which is their own business—into their own hands. In Scotland, they do the whole. As soon as a man is declared bankrupt, a meeting of his creditors is called, a chairman and clerk are chosen, the list of creditors and their agents is made out. A statement of the affairs of the bankrupt is given in, and a trustee is appointed to manage them; and three "commissioners" are named to supervise and overlook him. The trustee so appointed takes possession of the visible property, gets in the outlying debts, realises as far as he can realise; as soon as he can, makes out an "inventory or valuation" of the estate, and reports to the creditors what he considers will be the probable results. This inventory is in the nature of a "debit" against him; he admits by it that the things contained in it exist; he must show what has become of them. He is, in fact, the manager for the creditors, and he can do in the bankrupt's estate exactly what the bankrupt would have done if he had not failed.

As we before observed, this is the *ideal* to which the management of a bankrupt's estate should endeavour to approach. It is a matter of mercantile business, only the merchant is no longer fit to manage it. Your course is to do as near as you can what he would have done in the management if he had been fit. You cannot hope to transact the affairs of, so to speak, a *deceased* business, as well as a keen trader will transact his own living business. But you must approximate and get as near as you can. When the trustee has done his work, the Commissioner appointed at the first meeting of creditors audits his accounts, and the dividend is divided.

Nothing can be more satisfactory than the results of this excellent system. In all ordinary cases the expenses are only 12½ per cent. on the assets, though in a few extraordinary cases they are more. But the most conclusive figures are these. In England, in three years, the assets collected were 3,440,000*l*, and 1,500,000*l*, or more than 44 per cent., were wasted in expenses; but in Scotland in seven years, 1,000,000*l* had been collected, and 800,000*l* divided. The Scotch Court wastes 20 per cent. and the English 45 of the realised assets, and in Scotland the assets are far better realised. The system in Scotland is liked by the Scotch merchants; the English system is hated, and most naturally, by the English merchants.

We would propose to adopt in England this system in all its essentials. We would give the creditors after bankruptcy as much license for managing all the affairs of a bankrupt as they have under composition deeds without a bankruptcy. We would throw the primary responsibilities on the parties interested. We would make the claimants to a bankrupt's estate look after their claims. We would make them manage if they chose to manage, and give them an absolute supremacy on what, though it is called the bankrupt's estate, is in fact their estate.

We believe this part of the subject to be the cardinal part. Unless the mercantile community can have, if they choose, the entire command of this bankruptcy business, which is really mercantile business, they will for ever be discontented. Rightly or wrongly, if they are excluded from the management, they will for ever believe that if they had the means of managing they could manage better. We believe that when they take a real interest they will manage better; the best that we can expect from the management of a bankrupt's estate is the best which now takes place under a composition estate. There the creditors, by means of an agent, or even without an agent, settle what is to be done, and we do not believe that anything better will ever be suggested. If there is a real care, a settled watchfulness on the part of the

Digitized by Google

creditors, their management will be better than any one else's management.

But suppose the creditors won't care, suppose they won't watch, suppose they say (as Lord Westbury suggeste) that the "first loss is the least, and they won't waste their time on it." Suppose they say, as we have heard it, "We would rather "not have the additional pain of having our loss brought to "our attention every morning. If we are trustees of the "whole, we are to think constantly about it; if we are not "trustees, we need not. We had rather write off more and "forget it directly, than write off less and be annoyed per-"petually." Many persons secretly act on such principles as these, who would never state them—who would be shocked at them in words. The high value of mercantile time in the great cities makes it practically certain that the best men will never attend to any bankrupt's estate but those in which they have a very large interest, and that the lesser ones will be left to inferior men, and the small ones almost to no one. In Scotland, perhaps, from the peculiar temper of the nation—perhaps from the comparative smallness of business, and the want in *most* places of that intense over-occupation which presses upon men in the great cities of the South—men of business are found to pay a real attention to almost all bankruptcies. We should be most happy to see it so in England. We would afford any conceivable facility for so doing. But we own we scarcely venture to expect or to hope it. We fear that in this occupied country many would scarcely be looked after at all if they are left to the creditors *and no one else.*

We would propose, therefore, an *optional* administration, not by the Court of Bankruptcy, but by a separate executive department. If we once permit the lawyers to pounce on the estate, all is over, and creditors had better rub off the greater part of the debt at once. But such will not be the case if the executive department is properly constituted. We would appoint in every district an assets collector who should realise, just as the trustee does in Scotland, all the property, get in the debts, and declare the dividends. We would require him to send reports and accounts at stated intervals to the creditors, and if they were not satisfied they should have the power to complain, not to a legal body, not the Court of Bankruptcy or the Court of Chancery, but to a Central Board in London. They will decide as men of business, whether the business has been done correctly. If needful, they can send down an inspector to decide on the spot. The Board of Collection should be a board just like the Poor Law Board. It should decide upon its own judgment, and act upon its own judgment.

It may be said that we are proposing a despotism; we do so, but then it is an *optional* despotism. If the creditors choose to manage their own affairs, we would not only permit, but aid and encourage them to do so. They should have all conceivable facilities and assistance in acting for themselves. But, if they will not act, we propose a substitute which they may empower. We would call the creditors together. We would say, "Gentlemen, will you manage this estate your-"selves, or shall the assets collector manage it?" If they choose their own management, it is well; and if they choose Government management, they must not complain that it does really manage for itself, and effectually. Either the voluntary system or State system, but not both. The creditors may either manage, or leave it to the collector to manage, but there must be a head somewhere. If they give it to him, they must leave it to him. No man would collect a farthing he could help if he were trammelled both by Government regulations and by close trade inspectors. The State should say, "We will undertake to manage such bankrupts' estates "as the creditors do not themselves choose to manage. But "if we do undertake it, we shall manage. The creditors "may complain of the local officer, and we will send down an "inspector from head-quarters, but they must not interfere in "matters of discretion. The manager, whoever he is, must "be absolute; and when we are chosen to manage, we shall "manage." No creditor can complain of a despotism like this, which he himself chose when he had the distinct option of freedom given to him.

Secondly. It would be necessary to have suitable provision for an effectual audit. This might be arranged either by a fixed local officer, or by a person sent down from the Central Board. Both systems have their respective advantages, and we need not discuss such points of detail now. We only mention it, that none of our readers may imagine we had forgotten a point so essential. Our system includes an effectual audit by the State in case the auditors do not choose to audit, as well as an effectual realisation of additional assets by the Board whenever the creditors do not themselves care to collect or realise.

We believe the plan we have thus sketched would meet the principal difficulties of the subject. No administration of such a business would ever be very popular. If some of the creditors manage, the rest of the creditors will always say they have managed ill; if a Government officer manage, many of the creditors, perhaps all, will say so too. A bankruptcy means a bad debt, and every one likes to say that the badness of the debt was owing to some one else's error and neglect, and not to his own blunders and mistakes. But the plan we suggest seems to effect all a plan can hope to effect. If the creditors choose to manage it, let them manage and let us help them to manage; if they do not choose, let us find them the best substitute we can. Our plan does not, like the present law, rely on a court of justice for practical administration; it shows the error of devolving executive duties on persons fit only for deciding duties; it entrusts those administrative duties to executive officers specially chosen for their work, exclusively occupied with it, and therefore presumably appropriate for it.

THE PROPOSED CHANGE IN THE MODE OF FEDERAL ADMINISTRATION.

Of the few Conservative elements which exist in Federal politics, perhaps the strongest is the reverence American statesmen feel for the words of the Constitution. They have not only held it up to the mass as a document almost divine, but they seem almost to have convinced themselves of its inspiration. It has taken a terrible war to induce them even to consider the possibility of introducing one new clause about slavery, and it will probably take another to make them revise the clauses about State rights. The most pressing emergencies will not induce them to do more than twist the meaning of their political scripture,—as in doing all manner of revolutionary things under the "war-power,"—and in ordinary times they interpret its paragraphs as some divines would interpret Moses, and all lawyers try to interpret written contracts. If the Constitution deposited absolute power anywhere, as those of England and Italy do in Parliament, this morbid excess of reverence would be highly beneficial; but, as it does not, the feeling compels Americans either to leave reforms which they desire undone, or to do them in the most objectionable of all modes, by military force. Within the last few weeks, however, they have, it is said, discovered a means of making a very great constitutional change without breaking, or even straining, the words of the Constitution.

The intention of the framers of that document undoubtedly was to make the Executive as strong and as permanent as a democratic form of rule would admit, and they, therefore, while leaving to the President power to veto all legislation, left to the Legislature no power of interfering with acts of the President, except by refusing money to carry out his will. They doubtless expected that this power would in the end bring the two forces of the State into harmonious accord, but they omitted to provide modes in which the influence thus created could be brought into habitual operation. The Executive went its own way, and the Legislature went its own; and when the two clashed, it was generally found that the people, who always like an individual better than a body, supported their individual nominee. The separation did not at first matter much, for though it produced one or two evils, still the country was so prosperous, and the power, whether of Congress or President, so limited, that an occasional dead lock was of no particular moment. People waited quite contentedly till the wheels began to turn again. When, however, on the election of Mr Lincoln, the nation found itself plunged in a gigantic war, and Congress was called upon to produce a large revenue, and every act of the Cabinet affected the present prosperity and future hopes of the Union, the situation became inconvenient. It was necessary to do strong acts, and also to pass strong laws, but while Congress had no means of asking explanation of that action, the President had no means of directly explaining his policy. The world, therefore, saw the absurdity of an elected House of Representatives voting that it would uphold an international act which the elected Executive next moment repudiated, of the Commons inscribing a menace on their records, while the Foreign Minister affirmed that the menace

Digitized by Google

meant nothing at all. Taxes, too, when they are heavy, are apt to annoy tax-payers. The American Chancellor of the Exchequer found it very annoying indeed not to be able to explain to Congress why he wished to increase, or decrease, or modify a particular tax, and Congress found it still more annoying not to be able to put questions to Mr Fessenden why he made tobacco so dear, and to Mr Seward why he would not attend to their anti-British votes. Moreover, able politicians always wish to convince, if they can, a Legislature possessed of real powers; and with so much money to raise, and so many important things to do, Congress finds itself powerful. The Chairmen of Committees, who regularly communicated with the Cabinet, began to occupy a *quasi*-Ministerial position, and, as Mr Lincoln did not appoint them, there sprung up a kind of double Cabinet,—one for executive, another for legislative purposes. That did not work well, and was, besides, very fretting to men who thought they could explain as well as act, perhaps better explain than act; and a Bill was, consequently, introduced giving the Secretaries the right to sit in the Houses, and members the right to ask questions, after Parliamentary precedent. They could not, of course, vote, for that would have been a breach of the Constitution, which excludes all placeholders, but nothing debarred Congress from letting anybody it thought expedient talk to the Houses about politics. It seems to be understood, therefore, that the Bill will pass, and that the American Ministry, though irresponsible to the American Parliament, will have right of speech within it.

Should the measure be carried, it will, we believe, carry wider and more beneficial consequences than its promoters suppose. Congress in the first place will cease to be a debating club. At present, members may talk by the hour about blunders committed in any department, but they cannot even compel the chief of that department to give them information, much less to defend himself. Once members are allowed by law to question him face to face, the Secretary must answer, and the inclination to make that answer acceptable, and so shape action that it shall be acceptable, will be found irresistible. Congress gains a distinct power of influence over the Executive which will immensely increase its dignity. Moreover, the President will find it very inconvenient indeed to be defended by men who cannot defend him well, or whom the House has refused to trust, and will be very apt to dismiss persons so censured, and to choose others who have within the House proved themselves competent debaters. Able and ambitious persons who now swarm round the White House, will gradually find that the easiest mode of access is through the capitol, to the indefinite increase of the ability concentrated within the Houses. Theorists in England have often suggested that it is a mistake to limit the choice of the Sovereign to the thousand gentlemen who happen to be members of the Legislature; but they forget that, while Parliament is the only road to power, every able man who seeks power is compelled to qualify himself for Parliament, to its untold gain in competence and prestige. Nothing would so greatly increase the steadiness, and, therefore, to use an odd but expressive word, the respectability of American politics, as a great access of dignity, ability, and knowledge to the debates of Congress, and the proposal tends to increase all three.

Above all, the measure tends, very slightly, but still tends to diminish the great defect of the American Government, the enormous power of the President to act without adequate discussion of his own projects and policy. The moment a man knows that he has to stand up and defend before able and dignified critics in a particular line of policy, he will insist on comprehending, and in a large degree on influencing, that policy. It will not be enough to say the President ordered that; he must also be prepared to say that he ordered that, and it was wise for such and such reasons, and every order must therefore be thought out in a way which has not hitherto been necessary, and under circumstances which have not hitherto been present. Everything must be thoroughly considered, and any man who has ever noticed the difference in a project as it was matured in his own mind, and as it was ultimately presented to the public, will understand the gain acquired in moderation, completeness, and adaptation of innovation to existing facts. We do not know that the reform will diminish the President's power. On the contrary, it will very likely increase it, as a similar step undoubtedly has done in France. But it will greatly increase in practice the President's responsibility, and that is an immense advance in the good government of the American Union.

THE POLITICAL COSTS OF RAILWAYS.

We last week showed that the transfer of the railways to the Government *might* be so managed as to diminish their working cost. We did not undertake to say that it *would* be so managed, for we acknowledged the delicacy and the difficulty of the task; we indicated a possibility, but we did no more. It is, however, fair to point out that the large sums now annually spent in Parliament in useless contentions between one railway and another, and now-a-days in the obtaining lines of railway between places which did not at all need a railway, would at once be spared.

The extent to which this expense still weighs upon the country is very serious. More than four hundred Bills have been deposited this year, for purposes more or less important, but most of them of secondary and many of disputable expediency. Some of them are to authorise deviations from and abandonment of lines passed in the last session; and not unnaturally. For, notwithstanding that England has a far greater and more ramified system of railways than any other country in Europe, Parliament last year passed 270 Railway Acts, authorising the parties interested to raise more than 47,000,000*l*, and to construct more than 1,300 miles of railway. The rejections in the last session were very numerous too, and are likely to be more numerous in this session.

Every one knows that there is no real desire on behalf of the public for most of these schemes. A railway is now-a-days got up *to sell*, or at all events *to promote*. A lawyer and an engineer get together in a district where there happen to be two small towns unconnected by direct railway communication, and devise a railway to unite them. The engineer and the lawyer are pretty sure of their money. Out of the legal expenses, and the Parliamentary expenses, and the surveying expenses, they will fill their pockets. Whether the Bill pass or not is comparatively immaterial. The Committee and the preliminary expenses will be enough to pay them. They will be benefited even if no one else is benefited. Very commonly some one else is injured. The railway so projected, if made or authorised, is offered to two rival companies, and they are made to bid for it; each is told that the other must buy, that the other will invade their district, &c. In the end one or the other does buy. And in consequence the main line of great railway which pays well is tied to a "branch" which will never pay, which is often a loss out of pocket. Any one such branch, or a few of them, main lines can stand, but the multitude with which they are now overcharged is weighing them down. The profit of the original *bonâ fide* railways is depressed by the losses of these *lawyers' and engineers'* railways.

We do not deny that the competition of railway companies for intermediate districts has had some great advantages as well as many great evils. It has diffused railway accommodation through the country more effectually than anything else could diffuse it, or than it is diffused elsewhere. But we say that *we have* gained these advantages, and we have reaped the good of the competition system, and what is now in progress is pure evil. The railway is diffused, speaking generally and broadly, as much as it need be diffused; it is brought home to every man to whom it ought to be brought home. The competition system now mostly makes wasteful railways; formerly, it made expedient railways.

All this the transfer to Government would sweep away. There would be no longer competition, no longer contending Companies in Parliament, no longer engineers and lawyers suggesting delusive plans. The expense of Parliament would be spared, and the expense of bad railways would be spared. Now that we have made ninety-nine-hundredths of the railways we ought to make, and go on scheming and wasting on hundreds of railways we ought not to make, this improvement, this economy, is of very great and rapidly-augmenting importance.

THE PROGRESS OF FREE-TRADE IDEAS IN AUSTRIA.

It is a matter for great congratulation to Austria that she can not only afford to have genuine free-traders high in her executive administration, but to let them speak and publish their ideas on this head freely without betraying either fear or jealousy. We told our readers last week that the negotiation of a commercial treaty with Austria likely to benefit materially our own trade, and still more her's, is now under discussion. It is satisfactory to know that one of the gentlemen who must necessarily exercise considerable influence upon the details of that treaty, Dr Von Hock, who has held an important post in the "Section of Indirect Taxes" in Austria, and been President of the Commission on Customs Duties in the Austrian Ministry of Finance, and is still, we believe, one of the most important of the officials to whom the details of any change of this kind must be submitted, is a professed advocate of the principles of free trade, and has a lucid and practical knowledge of the mischiefs of the protective system. We have now before us a book of his, which, coming from a man so highly placed in the financial executive of Austria, has an especial weight. In the preface to it, Dr Von Hock appears to think it necessary to apologise to his countrymen for taking so practical a view of things,—an apology which his English readers will certainly not feel to be necessary, even though the "rigorous exposition of ideas, the exhaustive account of the "literature of the subject, the polemical dissertations on the "opinions of others," should in consequence be found deficient, as Dr Von Hock modestly fears. Perhaps Englishmen may think an ounce of experience in the actual working of a complicated and burdensome protective system is of more use to any writer, especially a German writer, on the science of taxation, than all the logical divisions and literary illustrations with which a German professor would certainly beset his class. Perhaps we may be allowed to feel a little thankful that in Dr Von Hock "the man of business *has* gradually absorbed the author." We are sure his book will exercise a far more wholesome influence in Austria in consequence, and it is certainly far more interesting to English readers.

Dr Von Hock writes both upon State taxation and upon State indebtedness, and on both questions states boldly a view anything but favourable to the recent finance of Austria, for on the one subject he is a strong anti-protectionist, on the other as firmly opposed to an inconvertible or depreciated currency as we could be ourselves. Of course, his view on the currency question, though of first-rate importance to Austrians,—indeed, the Prussian repugnance to admitting Austria into the Zollverein chiefly hinged, we believe, on her depreciated currency,—are not of the same significance to us as the objections which he takes against the policy of protection; for the latter may really help our representations in the circle of Austrian financiers, and secure for our goods more liberal and simpler terms of ingress than we could otherwise hope to obtain. On the subject of multiplicity and complexity of duties, Dr Von Hock is very clear and decided. "A too great number of imposts," he says, "multiplies the official acts and costs of collection; "if they are laid upon a variety of objects, then it is impossible "to judge of their collective effect, and, in any case, they are "a heavy load to commerce; if they are laid upon one and "the same object, then the individual tax-payer will be pressed "upon by the force of all the burdens taken together. The "unlimited number of individual taxes which once weighed "heavily upon the national commerce of England has now, "with better judgment, been reduced to a few especially pro-"ductive; and, in like manner, the import duties have been "limited to a few articles of great consumption." And Dr Von Hock accordingly adopts this principle of simplification—almost as important for the encouragement of commerce as the anti-protectionist principle itself—as a substantial part of his doctrine. In the stress he lays upon this point, we see the practical statesman as distinguished from the theorist. It is not to no purpose that he has worked so long in the financial section of "indirect taxes" in Austria.

Dr Von Hock knows how to state the case of his opponents in the most plausible and telling form, as well as he knows how to dispose of it. He is a very fair antagonist. He puts the arguments of the Protectionists at least as well as intrinsically weak and bad arguments can be put. Their theory, he says, rests on the following ideas:—"Though undoubtedly "the natural wealth of a country is promoted by buying "in the cheapest market, whether that be a foreign market "or not, yet material wealth is only one side of the national "wealth, and the other is the mental, the sum total "of the powers which create wealth, amongst which "manufacturing activity stands high; and manufactur-"ing activity requires educating and fostering. It cannot "grow, if in its first infancy it has to stand the unequal "battle with the overbalancing capital and weight of expe-"rience of the foreigner, and therefore we ought to compen-"sate these advantages by import duties. Raw materials and "auxiliary materials which our industry requires should be "imported free, the half manufactured and completely manu-"factured articles should be taxed more or less heavily in "proportion as the labour which they incorporate is of more "or less value, and in proportion as there is more or less hope "of producing like manufactures by home industry; and the "export of raw materials which are produced at home in but "limited quantities, and which are essential to native indus-"try, should be impeded by export duties." That, it will be admitted, is a very fair and plausible statement of the case of protection, and has been often freely used by thinking Austrians who wish to keep for their own German manufacturing population at least the chance of monopolising the custom of their dependent Sclave and Magyar States. Dr Von Hock's reply, however, if not original, is very effective. "This demonstration," he says, "has obviously two gaps in it. "It does not prove that the development of manufacturing "activity and of capacity to pay taxes prospers more by the "help of a protective duty, than it would without it; nor "that, if this really were the case, the advantage which would "thus grow up for State and people, would be any greater "than the increase of the people's welfare, and of the produce "of the import duties, on a free-trade system. Every land offers "native as compared with foreign manufactures, great advan-"tages in their accurate knowledge of the resources, habits, and "centres of sale, without mentioning the saving of time and "cost of transport; and for many branches of industry these "advantages outweigh those of greater capital and greater "experience in the work. The development and training "(Grossziehung) of the productive forces may take place "without protective duties by the help of education, "teaching, reading, and free institutions. Capital, too, "is easily moved, and is attracted whithersoever it sees the "most advantageous opening; it flies away of itself from "lands where it is in excess to those where a want of it "prevails. Experience had to be bought by the old indus-"tries often by heavy losses, while those which are now "springing up for the first time have the gratuitous use of "that experience." Moreover, "the protective duty must "without fail cause a thronging to the protected manufac-"ture, while there may be others in which the expenditure "of capital would be more advantageous, and the development "of productive forces would have been more rapid and "prosperous. The loss in material wealth and in the pro-"ductiveness of import duties through the prohibitive and "protective system is real and inevitable, and such as to react "both on the growth and especially on the useful expendi-"ture of productive forces; while the impulse given to the "latter by the proposed protective system is only potential, "uncertain,—a mere hope,—and in the best event sure to be "weakened by the necessary reaction of the waste of capital... "When in Austria in 1852 the prohibitive duties were taken "off iron and iron goods, the iron manufacture declared that its "destruction was at hand; but some months later, in conse-"quence of the increased consumption of iron, it was in a "position to raise its prices, and for six years, up to the great "commercial crisis of 1858, which caused a stagnation in the "consumption of iron, notwithstanding several successive "lowerings of the duties, the home production of iron grew "much more than in proportion to the growth of the im-"ports."

Such reasonings as these,—so clear, so fair, so full of practical illustration,—cannot but tell upon both the Austrian Government and the Austrian people, and we have much reason to hope that the negotiation in which we are engaged with Austria will be brought to a prosperous issue by the aid of counsels so wise, and so well armed with detailed illustrations, as those of Dr Von Hock.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 12th inst. The return for the previous week is added :—

DEBTOR.	Jan. 12, 1865. f	c		Jan. 5, 1865. f	c
Capital of the bank	182,500,000	0	.....	182,500,000	0
Profits, in addition to capital	6,958,526	9	.....	6,943,047	76
Reserve of the bank and branches	22,105,750	14	.....	22,105,750	14
New reserve	4,000,000	0	.....	4,000,000	0
Notes in circulation and at the branches	806,325,675	0	.....	790,526,625	0
Drafts drawn by the bank on the branches of the bank payable in Paris or in the provinces	7,223,278	2	.....	5,486,412	53
Treasury account	91,374,473	44	.....	89,690,497	98
Accounts current at Paris	130,801,679	44	.....	159,787,156	64
Ditto in the provinces	22,386,705	0	.....	30,700,975	0
Dividends payable	8,971,645	75	.....	16,163,965	75
Various discounts	2,599,035	12	.....	2,060,373	91
Re-discounts	2,789,444	5	.....	2,789,444	5
Sundries	17,808,123	22	.....	25,818,238	42

The stock of coin and bullion in the Bank has again declined—it is to-day 15,340,000f less than it was last week. In the note circulation, there is an augmentation of 15,799,000f; in the discounts, a decline of 2,489,000f; and in the private deposits, one of 37,300,000f.

From Thursday up to Monday, the Bourse was firm, and quotations of the Threes advanced; but on Tuesday there was a reaction, and it made further progress yesterday and to-day. The following are the quotations :—

	Jan. 5. f	c		Jan. 12. f	c

The annual report of M. Fould on the finances has appeared. It is very unlike what such a document emanating from Mr Gladstone would be. It enunciates no brilliant reforms, contains no Latin quotations, is adorned with no literary ornaments. It is a plain, straightforward, simple exposure of the results of a simple and unpretending system of financial management. To those persons who think that great modifications could with advantage be made in the finances of France, the report will cause a certain degree of disappointment; but the statesmen, bankers, and merchants here, whose voice is potential in financial matters, are adverse to anything like radical change, and hold that the true interests of the country are best promoted by maintaining the great sources of the revenue untouched, by exercising in the expenditure the most rigid economy the Imperialist *regime* allows, and by strenuously opposing distant military expeditions for such vague objects as "the establishment of order and the defence of civilisation." Of this class of people, the present Minister of Finance is perhaps the most distinguished personification. All that they think, he thinks, and what they would wish to see done he does. In addition he possesses, veritably, genius in providing expedients for temporary difficulties; and in the art of making a set of stray items of chance resources present a formidable total, he is without an equal. On the whole, financial authorities have held, that in the Ministry of Finance His Excellency is "the right man in the right place;" and they put confidence in him, the like of which no other Finance Minister of the Empire ever enjoyed, and no other Imperialist financier can hope to gain.

In England a financial statement is confined to the past and the coming year; but that of M. Fould embraces no fewer than four years. It is, however, very brief, and withal so remarkably clear, that it can be analysed in small space. As regards the year 1863, there will be, it admits, a deficit; but the sum instead of being 43,000,000f, as we at one time anticipated, will be only 28,000,000f. As to 1864, the new law on sugar, which permits the payment of import duties to be postponed for four months, will cause a sum of about 50,000,000fr to be in arrear, but hopes are entertained that the greater part of it will be recovered in the first part of 1865. In the direct taxes, the stamp duties, the tax on wines, and the post office, there will be a larger revenue than had been calculated on. In consequence, the budget of 1864 will either not present a deficit at all, or if there be one, it will be confined to the diminution which may arise in the consumption of sugar. This result is considered satisfactory, particularly as the Treasury sustained a loss of 6,500,000f by a reduction in the registration duties. The Government received from Mexico, in payment of its advances, 12,500,000f in cash; and, in addition, securities of the Mexican loan to the amount of 54,000,000r. Of this sum, 40,000,000f were put down in the receipts of the budget of 1864; the rest in that of 1865. But circumstances not having been favourable for the negotiation of these securities, the Government has retained them; and it will receive interest on them, which for 1864 will be 5,400,000f. With respect to 1865, the credits inserted in the "corrected budget" amounted to about 82,000,000f, but, "thanks to the severity displayed in the regulation of the expenses," they have been cut down to 46,000,000f; and there are "corrected" resources (an increase in the yield of taxes, an annuity due from Mexico, and some smaller matters) to the amount of 64,000,000f; so that there will be a surplus of 18,000,000f to be carried over to 1866. As to 1866, the Minister proposes in the ordinary budget to abandon to municipalities and departments the tax on carriages, and on carriage and on riding horses; and to give the Ministry of Marine 2,500,000f, and that of Public Works 1,500,000f, more than had been set down for them. And he says that, notwithstanding these liabilities, there will be a surplus of more than 1,000,000f. The extraordinary budget of the same year presents an estimated expenditure for public works, for the transformation of the fleet, and for the different Ministerial Departments of 144,500,000f; and there will be resources to provide for them to the amount of 145,000,000f, leaving a disposable balance of 500,000f. With respect to the accumulated deficits of the Treasury, it was estimated, says the report, that at the end of 1863 they would be 972,000,000f, but in reality they were only 960,000,000f, and as a loan of 300,000,000f was authorised, they were reduced to 660,000,000f. The floating debt, however, which on the 1st January, 1865, was 936,000,000f, was on the 1st January of the present year 808,000,000f. The difference between this latter total and the said 660,000,000f is owing to 15,000,000f of the loan not having yet been paid up; to the delay in the payment of 50,000,000f of sugar duties; to the non-realisation of the 54,000,000f of Mexican stock; and to advances made by the Treasury for the Greek loan, to Steam Navigation Companies, &c. The cash in the Treasury, which, on the 1st January 1864, was only 39,000,000f was 107,000,000f on the 1st January of the present year; and the Treasury bills in circulation, which on the former date amounted to 307,000,00f, were in the latter only 208,000,000f. At the end of October last, the Treasury had entered within the *maximum* of 240,000,000f of bills it was authorised to issue by the law of the 8th June, 1864; and notwithstanding the high rate of interest which prevailed during the year, it paid no more than 4 per cent. for bills of from 3 to 5 months, and 4½ for those if from 6 to 12 months.

M. Fould concludes his report in these terms:—"The year 1863 will leave a deficit less by 15,000,000f than that which had been anticipated; the year 1864 will very probably be in equilibrium; in 1865, the military expenses will be reduced, for the War Department, by 21,000,000f; for the Navy, 23,000,000f,—together 44,000,000f; and we shall carry to the budget of 1866 a sum of 18,000,000f, arising from the excess of reserves of 1865. This sum may be considerably augmented in an early future, if, as it is permitted to hope, the extraordinary expenses of War and Marine, which are put down in the corrected budget of 1865 for 65,000,000f, successively decline and end by disappearing. That will present large reserves, the employment of which will be hereafter determined. On the whole, therefore, the situation presents itself under a favourable aspect. Monetary embarrassments have disappeared; a resumption of commercial enterprise appears near at hand; and our revenues cannot fail to increase with the activity of commerce and manufactures. These fortunate results

Digitized by Google

are due to the confidence which the Emperor's Government inspires, and to the pacific sentiments with which Europe knows your Majesty to be animated."

It will be observed from what precedes that, though M. Fould's report professes to be on the financial situation in general, it does not group the figures of the receipts and expenses of any one of the four years to which it refers; and abstains from entering into details which are necessary to a complete knowledge of that situation. The curious on these points must consult the budgets already published, and must wait for that which is to be presented to the Corps Legislatif—also for the report on the situation of the Empire which has to be communicated to the Legislature. It will likewise be noted that there is nothing in the report about raising large sums for public works, either by loan or by the sale of the Crown lands and forests; and this confirms what the ECONOMIST was long since able to announce that nothing of the kind would be done. The large amount of the floating (unfunded) debt will be remarked; but it should be borne in mind that it consists in great part of funds of municipalities, savings banks, various public establishments, the Credit Foncier deposits of caution money, &c., of which the Government is by law the custodier. On the whole, the report of the Minister, though it has not escaped criticism, must be considered the most satisfactory yet presented. It, at all events, gives the hope that, thanks to the energy and perseverance of His Excellency, France is at last about to emerge from the slough of deficit in which she has been floundering since the Empire was established.

The agitation about the question of banks has produced a great result,—the Government has decided that a solemn inquiry shall be made into the subject. Certain traders of Paris and Lyons, as you already know, petitioned it for an inquiry, on the ground that their interests were injured by the high rate of discount, for which they rendered the Bank of France exclusively responsible; and the Governors and Directors of the Bank, on their part, petitioned for one also, but subject to the condition that it should not be confined exclusively to the Bank of France, but should embrace "all recent economic facts" and certain "financial institutions"—in other words, the Credit Mobilier and its dependent companies, and their operations. The Bank Directors, as was to be expected, treat the theory of the permanent fixing of the rate of interest with much disdain. "The theory of the unchangeableness of the rate of interest," say they, "whatever the circumstances, whatever the value of money, in presence of the incessant obligation to assure the metallic reimbursement of notes, payable to bearer and at sight, would sooner or later result in the suspension of cash payments, unless recourse were had to measures much more onerous to commerce than the elevation of interest. There is no arrangement, no sacrifices, which could prevent this fatal result, and all the expedients put forth fall within the sterile domain of Utopian ideas." The Directors say further that monetary and commercial crises are occasioned by circumstances which no human power can control—such as scarcity of food or raw materials, and from the extension of international commerce, by dependence on other nations; also, specially in France, by Credit Companies engaging in operations too vast for the country, and thereby producing excessive immobilisation of capital at home, and large exports of it abroad. It is the Superior Council of Commerce which is to conduct the inquiry, under the able guidance of M. Rouher, Minister of State; and its investigation is to "embrace the whole of the principles and the general facts which influence the monetary circulation of France." M. Rouher will no doubt take care that the inquiry shall be searching and complete; and in that case it will certainly render as great services in France as similar investigations have done in England.

The Minister of Commerce, M. Behic, has been under the necessity of writing a letter to the Prefects of departments, for the purpose of dissipating a delusion which, it appears, prevails in the agricultural districts, that the recent low price of grain is caused by the abolition of the sliding scale having led to very large imports. The *Moniteur* states that it is owing to the last two harvests having been extraordinarily abundant in France; and he says that, of late, the exports have very largely exceeded the imports.

The following is the market report:—

FLOUR.—At *Paris*, yesterday, the quotation was 44f to 48f the sack of 157 kilogs. Six marks were: current month, 47f 75c; four months of March, 50f; four months of May, 52f 25c. Type Paris, the 101 kilogs, 29f 25c.

WHEAT.—At *Paris*, yesterday, choice white was 26f 50c the sack of 120 kilogs; choice red, 26f; first quality, 25f 50c; good sorts, 25f; ordinary, 24f to 24f 50c.

COTTON.—At *Havre*, in the week ending Friday, the sales were 5,353 bales and picals; the arrivals, 9,331. The closing quotations were 5f to 10f lower for Surat, Kurrachee, Madras, Bengal, 3f for China, and unchanged for other sorts. Consequently, low New Orleans was 343f the 50 kilogs; good ordinary Broach, 235f; ditto Tinnevelly, 220f; Madras, 215f; China, 119f; and Jumel, 320f. The stock was 53,640 bales, against 31,820 at this date in 1864, and 57,600 in 1863. Yesterday, the quotations were as follows: low New Orleans, 350f; Surat, 145f to 135f; Ingethaut, 247f 50c; Oomrawattee, 235f to 230f; Broach, 235f; Dhollerah, 205f; Tinnevelly, 180f to 175f; Madras, 235f and 202f 50c; Cocanada, 217f 50c: Kurrachee, 127f 50c; Japan, 207f 50c; China, 185f to 180f.

SUGAR.—At *Havre*, in the week which ended Friday, business was not animated, but prices were firm. The sales were 235 casks French West India, disposable or for delivery, at 51f the 50 kilogs, bonne quatrienne, duty paid; 635 Havana, 32f 25f, No. 12, in bond. By auction, 122 Havana, damaged, at 23f to 26f 75c, in bond. The arrivals were 230 casks and 915 sacks. This week, Havana, No. 12, has been at 31f 50c; Java, No. 12, 30f 50c to 31f. At *Nantes*, last week, the sales were 1,600 sacks Reunion, old crop, and 800 ditto, new crop, sold together, at 54f 25c, bonne quatrienne, duty paid; 2,840 ditto, new crop, 54f 50c; 202 casks French West India, 51f, bonne quatrienne; 15 usine, 27f 50c; 3 ditto, 61f 50c: 3 ditto, 55f; 30 ditto, 62f 50c. This week, Reunion, bonne qaatrienne, 54f 50c, duty paid; Pernambuco, No. 12, at 34f, in bond; French West India, bonne quatrienne, 54f; usine, 61f. At *Bordeaux*, last week, 182 casks Havana, 36f, in bond; 274 casks Santiago, disposable, at prices kept secret. This week, no sales. At *Marseilles*, last week, 1,100 casks Havana, 24f, in bond; 120 ditto French West India, for delivery, 34f 25c, in bond, bonne quatrienne; 400 Havana, No. 12, 84f, in bond. This week, Havana, No. 12, 33f to 34f.

COFFEE.—At *Havre*, in the week ending Friday, the sales were 400 sacks Hayti, disposable, 82f to 85f the 50 kilogs in bond; 1,200 Rio, not washed, disposable 71f to 77f; 1,600 ditto for delivery, 75f to 77f; 50 Laguayra, 90f. By auction, various sorts damaged were disposed of. The arrivals were about 12,400 sacks. This week, Hayti, 83f to 85f, and 82f 50c in bond; Rio, 75f to 80f disposable and for delivery; Cape, 85f; Santos, 78f; Hayti, 85f to 82f 50c. At *Nantes*, last week, no sales, and nothing done this week. At *Bordeaux*, last week, the sales were 1,000 sacks unwashed Rio, disposable, 84f 80c; Santiago, 95f; 300 sacks Bahia, at prices not stated, in bond. By auction, 407 Mysore, damaged, at 109f to 115f 50c. This week, Rio unwashed, 169f the 100 kilogs. At *Marseilles*, last week, 150 fardes Mocha-Alexandria nontrie, 105f; 30 trie, 129f; 400 sack Hayti for delivery, 85f; 270 sacks Brazil, 75f. This week, Rio 75f.

WOOL.—At *Havre*, in the week ending Friday, the sales were 64 bales La Plata unwashed, at 1f 55c to 2f 15c the kilog; 479 Peru unwashed, 2f 50c; and 14 bales lamb skin, La Plata unwashed, 1f 25c. The arrivals were 160 bales. This week, nothing done.

COMMERCIAL AND MISCELLANEOUS NEWS.

In reference to freights, the *Shipping Gazette* observes:—The tonnage loading in London for the East shows a reduction, there being 45,000 tons on the berth for India and China, nad 35,800 tons for Australia and New Zealand. There is not much activity in exports, but suitable vessels can be placed for all the leading ports. Coal freights are firm, and another contract has just been made for 5,000 tons to Bombay. The Admiralty invite tenders for the conveyance of the following stores: 96 tons to Auckland, 55 to Bermuda, 20 to Jamaica, 40 to St Helena, 90 to Malta, and 26 to Mauritius.

The imports of bullion during the week ending January 11, were:—gold, 411,857*l*; silver, 15,275*l*. The exports were:—gold, 181,933*l*; silver, 84,199*l*.

Annexed are the returns of the Bank of Bengal for the weeks ending Nov. 22 and Nov. 29, 1864:—

Total	17,266,455	...	14,502,768	...	11,282,447

During last year shipbuilding upon the Mersey attained a prodigious and unparalleled development, and at the present time there are upon the stocks ships exceeding in tonnage the whole amount added to the shipping of the port during the presure of the Crimean war. The greater part of the shipping constructed by Liverpool builders during the year has been absorbed by the port, and during the same period Liverpool shipowners have kept in active operation some of the principal building yards of other parts of the kingdom. The 12 leading shipbuilders on the Mersey constructed in 1864 94 vessels, exclusive of several iron barges intended for shipment to the East. Of these 94 the majority, 59, are iron, 16 steel, 8 wood, and 11 composite; 40 are described as steamers, 17 as paddle-steamers; 36 are described as sailing vessels; and 19 are not described in this respect at all. The total tonnage of the 94 vessels (adding 14 barges) is 76,300; 18 vessels and 12 barges are estimated at the total value of 230,000*l*.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 11th day of January, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,058,490	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,408,490
		Silver Bullion	...
	28,058,490		28,058,490

BANKING DEPARTMENT.

	£		
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	11,023,211
Rest	3,422,791	Other Securities	19,837,669
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4,445,535	Notes	7,576,205
Other Deposits	16,174,166	Gold and Silver Coin	688,900
Seven Day and other Bills	530,493		
	39,125,985		39,125,985

Dated the 12th January 1865. W. MILLER, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,012,778	Securities	30,957,880
Public Deposits	4,445,535	Coin and Bullion	14,097,390
Private Deposits	16,174,166		
	41,632,479		45,055,270

The balance of Assets above Liabilities being 3,422,791*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£5,563
A DECREASE of Public Deposits of	4,054,734
An INCREASE of Other Deposits of	2,299,189
A DECREASE of Government Securities of	1,186
A DECREASE of Other Securities of	1,873,838
An INCREASE of Bullion of	153,795
An INCREASE of Rest of	38,756
An INCREASE of Reserve of	196,853

The Bank of England return for the week is satisfactory. The Government deposits have been reduced by the dividend payments which have admitted of a decrease of 1,873,438*l* in the amount of the private securities, while the addition to the private deposits is 2,299,189*l*. There is an increase of 163,798*l* in the stock of coin and bullion, and of 198,853*l* in the reserve.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 21,388,501	£ 21,460,925	£ 21,018,849	£ 21,396,420	£ 21,012,778
Public deposits	2,294,292	4,586,353	4,280,730	5,264,097	4,445,535
Other deposits	10,842,702	16,480,452	16,772,782	15,411,794	16,174,166
Government securities	11,731,427	12,268,618	10,871,348	11,077,189	11,023,211
Other securities	14,035,963	17,144,246	20,196,727	20,555,386	19,837,669
Reserve of notes & coin	6,422,019	10,243,526	8,465,364	7,595,102	8,265,105
Coin and bullion	12,539,114	16,291,626	14,102,169	13,708,597	14,097,390
Bank rate of discount	5 p. c.	2½ p. c.	4 p. c.	7 p. c.	5½ p. c.
Price of Consols	91¾ ⅞	93¼	92⅝	90⅞	89⅝
Average price of wheat	73s 9d	61s 11d	46s 10d	40s 2d	38s 2d
Exchange on Paris (short)	25 5 10	25 15 22½	25 15 22½	25 25 30	25 17½ 22½
— Amsterdam ditto	11 15½ 15⅝	11 15½ 16	11 14½ 15	11 15½ 16½	11 14 15
— Hamburg (3 months)	13 5½ 5¾	13 6¾ 7⅛	13 6¼ 6⅜	13 7 7½	13 7½ 7¾

In the corresponding week of 1855, the acceptance of the "four points" had been announced by the Czar Nicholas after repeated refusals and delays. The King of Sardinia had joined the alliance of the Western Powers, and signed the protocol of April, 1854. The Committee of Foreign Affairs in the House of Representatives had requested the President of the United States of America to tender his mediation to the Powers engaged in the war in Turkey, with a view to a pacification.

In 1862, the surrender of Messrs Slidell and Mason had been decided on in reply to our demand addressed to the American Government. A rapid rise in securities had followed the announcement of this news. The Bank of England had reduced its rate from 3 to 2½ per cent.

In 1863, the discovery of an error in the cotton stock-taking at Liverpool had been made, and the stock was found to be 392,400 bales instead of 216,620. The English memorandum to the Provisional Government of Greece had been published, stating the terms on which the English were prepared to cede the Ionian Islands. A ministerial crisis had occurred at Constantinople.

In 1864, a circular note had been addressed by France to the German States on the Schleswig-Holstein question. The Danes still occupied the Northern part of Rendsburg. Great activity prevailed in the Danish dockyards at Copenhagen, and the Danish forces were being concentrated at Schleswig. Complete understanding existed between Austria and Prussia with regard to the policy to be pursued in the Schleswig-Holstein question. The Federal Commissioners had issued a proclamation decreeing the re-organisation of the central administration of Holstein. The Belgian Ministry had resigned. The frontier war in India had terminated. In America, General Longstreet had retired to a strongly fortified position in East Tennessee, necessitating the presence of a large Federal force. The decree stating the conditions of the French loan had been published. The demand for discount was quiet. The stock markets had slightly improved, and the supply of money in the Stock Exchange was abundant.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 3,193,261*l*; in 1862, a deficiency of 663,794*l*; in 1863, a deficiency of 3,423,945*l*; and in 1864, a deficiency of 5,143,592*l*. In 1865, the deficiency is 3,663,503*l*.

DISCOUNT AND MONEY MARKET.—On Thursday the Bank of England rate of discount was reduced to 5½ per cent. The terms in the open market are still rather below those at the national establishment; but there is more activity in the market, as some amounts of bills are understood to have been held back in expectation of the reduction in the rate.

Generally, the steady action of the Bank of England has met with complete approval. After a large course of high rates it was most probable that money would be again attracted to Europe, and it was certain that the check given to imports must act in the direction of greater ease to our markets. Accordingly, and although the fall in the value of produce has occasioned numerous failures, we are experiencing the beneficial effects of the measures adopted by the Bank some time ago. The increasing demand upon our resources for trade should, however, induce caution in entertaining the numerous applications making and to be made from abroad for loans. Since the derangement of our American cotton trade by the war, our new engagements are necessarily of a less certain character; and, with extended commercial relations, involving larger bullion operations than formerly, it is impossible to exercise too much care in a case like the present, where the greater ease of the market in money is to be regarded as a reaction rather than as a settled and reliable condition of things. The position of the Bank of France does not show the improvement observable in our own; and the continued inquiries in the open market of Paris appear still to indicate the risk attending a too rapid reduction in the official discount rate.

Annexed are the current rates for paper having various periods to run:—

30 to 60 days	5¼ ⅜ per cent.
3 months	5¼ ⅜ per cent.
4 months	5½ per cent.
6 months—Bank bills	6 per cent.
6 months—Trade ditto	6½ per cent.

On Government securities in the Stock Exchange, money is worth from 4½ to 5 per cent. for short periods.

Annexed are the rates allowed on deposits, that for money at call being unaltered:—

Joint Stock Banks	*4½ per cent.
Discount houses at call	4½ per cent.
Do. with seven days' notice	4½ per cent.
Do. fourteen days	5 per cent.

* At the London and Westminster 3½ per cent. only on sums below 500*l*.

BULLION.—44,000*l* have been taken into the Bank to-day, and 15,000*l* in sovereigns withdrawn for export to Smyrna.

The following are the current rates of discount in the principal cities of the Continent:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	4½	4½
Vienna	5	5 ½
Berlin	6	5
Frankfort	5	5
Amsterdam	5	5
Turin	6	6
Brussels	5	4
Madrid	9	...
Hamburg	...	4
St Petersburg	6½ 3 mths' bills.	...
—	7 6 —	...

Digitized by Google

The amount of Government bills on India for which tenders are invited on Wednesday next at the Bank of England is 300,000*l*.

The following are the results of a comparison between the accounts issued by the Bank of France last week, and that published this day :—

Increase.	£
Advances	80,000
Bank notes	632,000
Treasury balance	66,660
Decrease.	
Cash	612,000
Bills discounted not yet due	456,000
Current accounts	1,493,330

English Government Stocks.—After a long period of depression and inactivity, a few symptoms of returning animation are to be discerned. The investments of the public that have usually acted on the market in an important degree at this time of the year are as yet little felt; but business is on a greatly contracted scale in Government securities, as compared with former times. The reason for the improving tendency of Consols is to be found chiefly in the declining rate of money, which induces many to close "bear" accounts, and a few others to "invest" instead of leaving their money at call. At the same time, rumours of purchases on account of the Commissioners for the Reduction of the National Debt are not without influence, now that fewer depressing causes exit, and their action is consequently ceasing upon stocks.

The closing prices of Consols this evening is 89¾ to 89⅞ for money, and 90 to 90⅛ for February account; New 3 per Cents. and Reduced 89 to 89¼; and India 5 per Cent. stock 103¾ to 4.

There is no alteration in the Exchequer market, but India bonds are again better.

Exchequer bills, 4 per cent., due March, 1855 ..... par to 5s pm.
Exchequer bills, 3½ per cent., due June, 1865 ..... par to 5s pm.
India bonds, 4 per cent., div. March and Sept. ..... 8s to 14s pm.

Foreign Stocks—The rapid approach of the settling after the holidays has interfered slightly with the markets, by limiting the transactions on speculative account. But, notwithstanding this impediment to speculative operations, the tone of the foreign markets has been firm, with a decidedly upward tendency since the conclusion of the account, which passed over to-day. Foreign stocks at this time present the chief attractive features to those who are not deterred by some risk from the attempt to secure high dividends; and, as the mania for new companies and financial societies appears to have subsided, there are indications of a change in the nature of the demand, which now is in the direction of foreign Government stocks, Turkish securities, especially, have improved under the absorption of constant investments; and, indeed, the increased trade with the Ottoman Empire, in consequence of its extended cotton cultivation, has led to an augmentation of its income sufficient to justify the growing favour with which Turkish securities are now regarded. Spanish Passives have not undergone any material variation, there being no fresh intelligence of interest to the bondholders. Venezuelan stocks have receded, although at present low prices they pay near 14 per cent., owing to the unsatisfactory and irregular measures by which the interests of the bondholders are threatened. An advance has taken place in Greek bonds, it being believed that progress is being made by the Administration of the kingdom with matters calculated to conciliate their foreign creditors, and restore, by degrees, the public credit of Greece. The bonds of the Confederate loan have recovered slightly from the low price to which they declined after the news of the taking of Savannah. The Montevidean loan is lower this evening, having declined to 2 prem. The following are the closing prices of stocks dealt in to-day :—4½ per Cent. Brazil, 1858, 83 to 84; ditto, 1863, 83½ to 84½. Danish debenture scrip, 1873 to 1877, 1¾ to 2¼ prem. 7 per Cent. Egyptian, 97 to 99; ditto, 1864, 95½ to 96; ditto scrip, 1¼ to 1¾ prem. 5 per Cent. Greek, 24 to 24½. 3 per Cent. Mexican, 28 to 28¼ ex div.; ditto, 1864, 26½ to 26¾ ex div. 3 per Cent. Portuguese, 46¾ to 47¼. 4½ per Cent. Russian, 1850, 87 to 88 ex div.; 5 per Cent. ditto, 1862, 89 to 90. Spanish deferred, 40½ to 41; ditto Passive, 32¼ to 32½. 6 per Cent. Turkish, 1858, 71½ to 72; ditto, 1862, 70½ to 71 ex div. 6 per Cent. Venezuela, 1864, 41 to 43. 5 per Cent. Italian, 64¼ to 64½.

The closing price of French 3 per Cent. rentes this evening is telegraphed from Paris, 66.95.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day :—

Railways and Other Shares.—The undiminished favour with which railway shares have been of late regarded, is evidenced by the enhanced value of almost every description of these securities. Under circumstances calculated to restrict enterprise our railway system has nevertheless contrived to advance, and the returns give proof of a generally successful management. Moderate purchases have been made for investment account by the public, and the diminishing stringency of the money market has also induced speculations for the rise. Metropolitan stock is especially firm and notes a considerable rise this week. At the close of the market all prices are a shade lower, owing to the announcement of a dividend of the Manchester, Sheffield, and Lincolnshire stock of inferior amount to that which had been expected.

The dividend on Manchester, Sheffield, and Lincolnshire railway stock is at the rate of 2½ per cent. per annum.

Subjoined is our usual list of the closing prices of the principal railway shares on last Friday and this day :—

Banking Shares.—The firmness of the market in the shares of old-established institutions of this class is marked, the meetings and approaching payment of the dividends rendering holders indisposed to sell. In the newer companies, Alliance Bank shares, after a severe fall, show signs of a

Digitized by Google

rally, the settlement having discovered a considerable bear account. Many speculators have been compelled to borrow shares to meet their engagements to deliver; while, on the other hand, influential purchases have been made by parties apparently resolved, to uphold the credit of the Bank, and who are understood to be aware of the nature of its resources. The closing price this evening is 9 to 10 prem.

FINANCIAL AND MISCELLANEOUS SHARES.—The amount of business transacted has been small, but realisations of shares by large holders seem to be still taking place. The rates of continuation on the shares of the International Financial and some other associations denoted an increased supply in the market. General Credit shares have been maintained. Egyptian Trading Company are a shade lower, owing to the rumour that the dividend to be paid will be below the calculated amount. National Discount Company shares are hardly so firm. Hudson's Bay shares continue quiet, but the shares of the Milan Improvements Company have chiefly monopolised attention during the day. In them an unusual amount of business has been transacted, at a high rate of premium, and the price closes firm at 2 to 2⅜ prem.

FOREIGN EXCHANGES.—There was not much business, and there is little change to note.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The arrivals during the week consist only of—The City of York, from New York, with 232,000*l*; the Cuba, from ditto, with 89,700*l*; the Armenian, from Africa, with 10,000*l*. About 103,000*l* has been sent into Bank, and 14,000*l* in sovereigns have been withdrawn for the East. The only exports are—2,400*l* to Brazils, per Oneida; 5,000*l*, per Cambrian, to the Cape; and 14,000*l*, per Syria, to Bombay and Alexandria.

Silver.—The Oneida has taken 7,800*l* to the Brazils, and the Syria 202,500*l* to Bombay. Our market has been very quiet, and but little business has been doing during this week; we quote the price at from 61¼d to 61⅜d per oz standard.

Mexican Dollars.—The dollars ex Shannon have been sold at 60⅜d per oz; but the market has become very weak, and we do not think any fresh arrival could now be placed at that rate.

Exchange on India for drafts by the banks at 60 days' sight is as follows—2s for Bombay, 1s 11⅞d to 2s for Calcutta and Madras.

India Government loan notes without much change, and may be quoted as follows—5½ per Cents., 109 to 111; 5 per Cents., 101 to 103; and 4 per Cents., 89 to 91.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto, fine, 77s 9½d per oz std; ditto, refinable, 77s 11½d per oz std, last price; Spanish doubloons, 74s 6d to 75s per oz nominal; South American ditto, 73s 6d to 73s 9d per oz; United States gold coin, 76s 2⅝d per oz. Silver—Bar silver, 5s 1½d to 5s 1⅝d per oz std; bar silver, containing 5 grains gold, 5s 1⅝d per oz std; Mexican dollars, 5s 0⅜d per oz, last price, nominal. Quicksilver, 8*l* per bottle; discount 3 per cent.

Friday, the 13th inst., has been appointed by the Committee of the Stock Exchange a special settling day in the stock of the Montevidean European Loan. To be marked in the official list.

Monday, the 16th inst., has been appointed by the Committee of the Stock Exchange a special settling day in the stocks of the following Companies:—

Eastern Assam (Limited), for bargains entered into on and after 29th October last, to be marked.

Natal Investment (Limited), for bargains entered into on and after 2nd September last, to be marked in twice-a-week list.

Yorke Peninsula Mining (Limited), to be marked, in substitution of the Bon Accord Copper Mining Company.

FAILURES AND MERCANTILE EMBARRASSMENTS.—A circular has been issued by Messrs Reid, Irving, and Co., announcing a final dividend of 8s in the £ on their estate, making in all 10s 2d. They refer to the difficulties that have impeded the liquidation, which is only completed at the end of 17 years from the period of their failure, and express their regret that the realisation has not produced a larger amount.

Messrs James Dunham and Co., of the Borough, wholesale provision merchants, have stopped payment with total liabilities for about 300,000*l*.

The creditors of the Atlantic Royal Mail Steam Navigation Company (Limited) are required to send in their claims to Mr Fredk. Whinney, the official liquidator, by the 10th February.

Formal notice is given that a petition for the winding up of the General International Agency Company (Limited) is to be heard before the Master of the Rolls on the 14th inst.

PUBLIC COMPANIES.—A dividend at the rate of 8 per cent. per annum has been declared for the half-year, free of income tax, by the Directors of the Ebbw Vale Company.

The prospectus of the Milan Improvements Company has been issued, under the auspices of the Credit Foncier and Mobilier of England (Limited). The object of the Company in acquiring seven acres of freehold land in the centre of Milan is to carry out certain improvements determined upon since the year 1860 by the municipality of that city. The land originally purchased by the town is now ceded, at a considerably reduced price, to the English Company, in consequence of the resolution of the municipal council, to ensure the early completion of their projected improvements. The statements in the prospectus are full and clear, and invite the attention of investors by the promise they hold out of an unusually large dividend secured upon freehold property.

At the special meeting of the Union Bank of Australia, held on Monday last, the Directors reported that, after making provision for bad and doubtful debts, the profits of the half-year would admit of the declaration of a dividend of 2*l* 5s per share, and leave a balance of 1,320*l* to be carried forward to next account. The report was unanimously adopted.

The second annual general meeting of the shareholders of the London and Brazilian Bank took place at the London Tavern on Monday last. The net profits were stated at 24,704*l* 12s 11d for the half-year ending June 30, 1864. It was resolved to pay a dividend at the rate of 6 per cent. per annum, and to carry forward the balance of 9,104*l* to next account.

The liquidators of the Mercantile Credit Association have declared a final dividend of 5s per share, making a total distribution of 2*l* per share.

At the meeting of the Warrant Finance Company, to be held on the 24th inst., the Directors intend to propose a dividend of 7s 6d per share, and to carry a balance of 6,085*l* to profit and loss new account.

The meeting of the Union Bank of London was held on Wednesday. The amount available for dividend was stated in the report at 180,558*l* 9s 1d, and a dividend for the past six months was declared at the rate of 15 per cent. per annum, with a bonus of 2½ per cent., all clear of income tax; 61,371*l* 19s 1d is carried to new account.

At the meeting of the Westminster Brewery Company this day, the report of the Directors was adopted, and a dividend at the rate of 6 per cent. per cent. per annum declared, making, with the previous *ad interim* distribution, a total dividend of 8 per cent. for the year.

The report presented at the half-yearly meeting of the Bank of New South Wales, in Sydney, on the 24th October, showed net profit 80,179*l* 16s 3d. A dividend of 15 per cent. per annum was declared on the paid-up capital, with a bonus of 2½ per cent. A balance of 2,809*l* 19s 7d is to be carried to the account of the present half-year.

We are requested to state that the list for shares in the Nowgong Tea Company of Assam will be closed on the 18th instant.

On the 28th October the meeting of the shareholders of the Bank of New Zealand was held at Auckland. The net profit stated for the half-year was 32,275*l* 14s 10d, and the sum available for distribution 34,555*l* 12s 9d. A dividend and bonus at the rate of 15 per cent. per annum were declared, 5,000*l* carried to reserve, and 2,207*l* 18s 9d carried to new account.

The general meeting of the proprietors of the Metropolitan and Provincial Bank (Limited) was held this day. The total amount to credit of profit and loss was stated at 23,577*l*; but, as the losses by bad and doubtful debts are calculated to represent 44,468*l*, this is absorbed, and a draft taken from reserve 30,000*l* to balance the account. The report presented is full, and the division of current and deposit assets is made from the amount of acceptances and credits.

At the meeting of the East and West India Dock Company to-day the dividend was declared at the rate of 3 per cent.

The Crown Agents for the Colonies have advertised for a loan of 234,000*l* for the Government of the Cape of Good Hope, to be raised by the issue of 5 per cent. debentures having 35 years to run. This loan will not increase the debts of the colony, as the money is to be applied to paying off debentures already on the market, and falling due during the present year. Last session the Colonial Legislature passed an Act making provision for the final redemption of all its debentures by the operation of a sinking fund, into which is to be paid annually a sum equal to 1 per cent. on the total debts of the colony.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2 per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 2-10ths per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 423½ per mark, and the short exchange on London is 13.4⅜ per 1*l* sterling. Standard gold at the English Mint price is, therefore, rather more than 1-10th per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 238 per cent., and the premium on gold is about 217; at these rates there is a profit on the importation of gold from the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The trade for English wheat at Mark lane to-day was in a most inactive state. Owing, however, to the limited supply of produce on the stands, factors, in most instances, were unwilling to sell, except at full prices, and as most offers were at reduced rates as compared with Monday, sales progressed very slowly, and a portion of the supply was left unsold at the close of business. In the demand for foreign wheat, there was a want of activity, and the quotations had a drooping tendency. Good and fine barley and oats were firm in price, but inferior samples sold heavily, at barely late rates. Beans and peas met a slow sale at late prices. The flour trade was steady, on former terms. This week's imports amount to 1,654 quarters of wheat, 21,980 barley, 6,530 oats, 100 sacks and 3,510 barrels of flour.

At Liverpool, this morning, wheat sold slowly, at a decline in prices of 1d per cental. Flour was rather cheaper, but maize ruled steady in price. At Wakefield, the value of wheat had a drooping tendency.

Somewhat influenced by the reports of further disasters to the Confederates, the cotton market in the early part of the week was very quiet, and transactions took place at a decline of from ½d to 1d; but on the receipt of the news of the failure of the Wilmington expedition the demand increased and prices rallied ½d per lb. Since Tuesday, however, the market has assumed a quieter tone, but remains steady in price, which may be quoted ½d below those of last week. The stock of cotton now appears to be almost entirely held by the importers, so that, in the late calm in the market, there has been no pressure to sell. To-day the market closes dull and rather easier in prices, with sales amounting to 3,000 bales.

The demand for cotton at Madras, during the fortnight ending Dec. 12, was exceedingly limited. The fluctuations in prices were trifling, although it was estimated that the stock did not exceed 6,000 bales. Western produce sold at 14d to 14½d; and Salem, at 13¾d per lb. According to the official return, the quantity of land under cotton cultivation in the Madras Presidency, in October last, was 852,436 acres, against 677,482 acres at the same period in 1863. The following statement of exports is from Messrs Dymes, Cartwright, and Co.'s circular:—

EXPORTS of COTTON from MADRAS from Jan. 1 to Nov. 30.

	Great Britain.	France.	Elsewhere.	Total.
	cwts.	cwts.	cwts.	cwts.
In November	3,194	...	...	3,194
In previous ten months	263,989	15,809	2,557	282,355
Total for eleven months	267,183	15,809	2,557	285,549
Against same period 1863	393,302	33,720	6,751	433,773
— — 1862	215,900	11,475		227,375
— — 1861	119,502	11,335		130,837
Against the whole of 1863	422,101	35,177	6,741	464,019
— — 1862	234,745	11,475		246,220
— — 1861	122,714	15,044		137,758

Advices from Calcutta to December 5 state that the cotton trade during the fortnight prior to that date was firm, and that, although only a moderate business had been transacted for export to Great Britain, prices had advanced 2 rupees per factory maund. *New* produce was quoted at 33 to 36 rupees per maund.

The export of cotton from Coconada, from Jan. 1 to Oct. 30, amounted to 14,338 bales, against 10,587 bales; from Tuticorin, 55,270 bales, against 37,091 bales during the same period in 1863.

The cotton trade at Alexandria, at the date of our latest advices, viz., on the 2nd inst., was quiet, at 25d to 25½d for fair quality open-ginned, and at 25¾d to 26d for good fair ditto, per lb, free on board. During the week ending Dec. 27, a large business was transacted, both on the spot and for future delivery, the sales during that period having amounted to 26,525 bales, whilst the receipts were 30,300 bales. In a moment of great excitement, produce for delivery in January and February sold as high as 24¾d and 25d per lb, free on board. On the spot, good middling to fair, roller-ginned, realised 23½d to 24¼d; fully fair ditto, 24¾d; fair to fully fair, open-ginned, 25¼d to 25¾d; good fair to fully good fair, 26d to 26¼d per lb, free on board. According to the Egyptian Commercial and Trading Company's circular, the export from Oct. 3 to Dec. 15 was as follows:—

EXPORTS of COTTON from ALEXANDRIA from Oct. 3 to Dec. 15.

	Great Britain.	France.	Austria.	Total.
	bales.	bales.	bales.	bales.
1859—1860	14,438	2,742	658	17,838
1860—1861	22,260	3,740	1,788	27,788
1861—1862	13,990	3,790	1,612	19,392
1862—1863	21,037	12,310	1,787	35,134
1863—1864	27,899	11,985	3,084	42,968
1864—1865	51,397	5,320	2,654	59,371

The following table shows the rate of freight for cotton to London and Liverpool at some of the leading ports at which that article is exported, at the date of our latest advices:—

	London.		Liverpool.	
	£ s d	£ s d	£ s d	£ s d
Bombay	2 10 0	to 0 0 0	3 0 0	to 0 0 0
Calcutta	4 0 0	0 0 0	4 0 0	0 0 0
Madras	3 10 0	3 15 0	0 0 0	0 0 0
Yokohama	3 10 0	4 0 0	0 0 0	0 0 0
Alexandria	0 0 0	0 0 0	0 0 0	0 0 1½

The markets for nearly all descriptions of colonial and foreign grocery produce have been inactive in the extreme. In the sugar trade, there has been considerable depression, and raw qualities have declined in value to the extent of 6d to 1s per cwt. Coffee has changed hands with less animation, and inferior parcels have sold at rather lower prices. As regards tea, the chief alteration is confined to Assam produce, inferior qualities of which have been disposed of at slightly reduced rates, at the public sales held during the week. Cocoa has continued dull; but rice—although the inquiry has been far from active—has realised fully late rates.

All descriptions of sugar experienced a very heavy trade during nearly the whole of last year, whilst a general and serious fall—averaging 11s per cwt—took place in prices. The decline in the value of West India and Mauritius produce was from 10s to 12s per cwt. Towards the close of the year, owing to the low rates current, an inquiry sprang up for export to the Continent, and the market then exhibited signs of improvement.

From Port Louis, Mauritius, we learn that most descriptions of sugar were firm in price. For shipment to the Australian colonies, the market was tolerably active, and white qualities commanded considerable attention for export to Bombay. The annexed statement shows the extent of the shipments to all quarters from Aug. 1 to Dec. 1 in each of the last three years:—

COMPARATIVE STATEMENT of SHIPMENTS of SUGAR from the Mauritius, from the 1st of August to 1st of December.

Advices from China state that in consequence of unfavourable accounts respecting the English markets, the demand for tea was much restricted, and that prices had a drooping tendency. The

Digitized by Google

export from all ports to great Britain since June 1, had amounted to 89,713,700 lbs, against 91,883,200 lbs; to the United States, 7,276,600 lbs, against 7,544,800 lbs during the same period last season.

During the year just concluded, a heavy fall took place in the value of all descriptions of tea, the prices current on the 31st of December last being ½d per lb lower on common and the lower flavoury kinds of congou, and 1d to 2d on medium and second-class Kaisows; 1d to 5d on common to good black leaf, 6d on souchongs, and 2d to 6d on green teas, as compared with the same period in 1863. Commencing with a full average stock, there was great inactivity in the trade throughout the year; and the arrivals having more than kept pace with the deliveries, very little speculative business was transacted. The increase in the export trade was to the extent of about 1,500,000 lbs. The following prices of tea on Jan. 9, current year, and on Jan. 9, 1864, are from Messrs Layton and Co.'s circular:—

The quantity of tea afloat is estimated at 44,847,000 lbs, against 51,000,000 lbs last year.

The coffee trade, last year, showed very little depression; indeed, the supplies of produce brought forward met, in most instances, an active inquiry, and an average advance of 4s per cwt was established in prices. The arrivals from Ceylon were large, but owing to an increased export demand, they sold freely, at enhanced quotations.

In wool, since our last report, only a moderate business has been transacted. Home-grown qualities are firm in price, whilst in the value of colonial produce, no alteration has taken place. The market for hemp is dull, at 30*l* to 33*l* for clean Russian. New jute moves off steadily, at full quotations.

The public sales of East India wool will be commenced at Liverpool on the 24th inst. The present arrivals consist of about 15,000 bales.

Advices from Melbourne state that during the period from Oct. 25 to Nov. 25, eight public sales of wool had been held, at which 25,688 bales were brought forward. The biddings were moderately active, and very few changes of importance took place in prices, the rates current being as follows:—Greasy: inferior to ordinary, 8d to 10d; ordinary to average, 10d to 11d; good to superior, 11d to 1s 1½d; do. do. (cross bred), 1s 2d to 1s 3d. Fleece: Inferior to ordinary, 1s 4d to 1s 6d; ordinary to average, 1s 7d to 1s 9d; good to superior, 1s 10d to 2s 0½d. Scoured: Ordinary, 1s 5d to 1s 7d; good, 1s 9d to 1s 11d; superior, 2s to 2s 3d per lb. The clip, it is said, though not so deep grown as last season, is of fully an average length, and in excellent condition, the washed lots being cleaner and better got up than usual; whilst the attention that is being paid to careful breeding is becoming apparent in the improved quality. The unwashed lots are unusually clean and light, and have realised very satisfactory prices, particularly cross-breeds, which have ranged up to 15d per pound. Burr and grass seeds are not so frequent as in former years, many of the Victorian clips usually affected, being this season quite free from them.

The imports of silk last year fell off to the extent of 3,034,784 lbs; the consumption, 683,531 lbs; and at the close the stock showed a diminution of 1,913,959 lbs, or of 44 per cent., as compared with Dec. 31, 1863. Owing to the large decrease in the arrivals, the market was very firm, and an increase of 2s 6d to 4s per lb took place in prices. The export was 5,653,447 lbs, against 8,688,231 lbs; the consumption, including export, 7,567,406 lbs, against 8,250,937 lbs; and the stock on Dec. 31, 1864, 2,393,157 lbs, against 4,307,116 lbs on Dec. 31, 1863. The following table, from Messrs Durant and Co.'s circular, shows the state of the warehouses at the commencement of the present year:—

The silk trade at Shanghai, from Nov. 10 to Nov. 24, was very firm, and although the settlements were only 800 bales, Tsatlees improved 5 taels, and Taysaams 10 tales per picul. The unsold stock at latest date was estimated at 1,500 bales, against 9,000 bales in 1863. The total export from July 1 to date was 24,496 bales, against 25,599 bales during the same period in 1863.

The crop of indigo in Bengal is now estimated at 100,000 to 103,000 maunds. At latest date, the market at Calcutta was firm, fine qualities being 2d to fully 4d per lb dearer as compared with the London July sales, whilst fair to good parcels changed hands at unaltered rates.

Very few fluctuations took place in the value of leather last year. The chief feature was an active inquiry for low-priced descriptions, the leading alteration in the quotations being confined to inferior bellies and shoulders, which changed hands at enhanced rates. Heavy foreign butts experienced a very heavy trade, and this was the most discouraging feature during the year.

The import of timber into London last year was 654,002 tons, against 624,110 tons in 1863. From the British American colonies, the arrivals exhibited a falling-off of 50,000 tons, but this deficiency was more than compensated by the increase in the receipts from Norway, Sweden, and Russia, the augmentation in the imports from those countries being to the extent of about 65,000 tons. The annexed statement of stocks at the close of the last three years is from Messrs Churchill and Sim's circular:—

With the exception of an advance in Scotch pig iron to 50s per ton, the value of metals is without material change from last week.

In oils and tallow, a very moderate business has been transacted and prices have ruled somewhat in favour of buyers.

Digitized by Google

The principal meeting of the ironmasters was held at Birmingham yesterday. Although the attendance was large, scarcely any business was transacted, and from the prices offered, the conclusion arrived at was that a further reduction in the quotations would be necessary before buyers would operate to any extent.

Commercially, the principal feature at New York during the closing week last year, was a fall in the value of cotton of 9c per lb, consequent upon the capture of Savannah and of a considerable quantity of produce. In other departments of trade there was very little change. Gold fluctuated somewhat extensively in price, the quotation having been as low as 110 and as high as 130, closing at 127 per cent. prem. The stock of bullion in the banks on the 24th ult. was 4,120,000*l*, and the balance in the sub-Tressury 5,608,400*l*. The shipments of specie for the week ending Dec. 17, amounted to 224,300*l*, making a total for the year of 9,570,600*l*, against 9,535,200*l* in 1863, 11,620,500*l* in 1862, 680,000*l* in 1861, 8,432,400*l* in 1860, and 13,930,700*l* in 1859. The demand for money at latest date was much restricted, at 8 per cent. for the best short-dated commercial paper.

THE COTTON TRADE.

LIVERPOOL—January 12.

The cotton market was very heavy in the early part of the week, and a considerable decline was submitted to in the current descriptions. On Tuesday afternoon the advices from New York produced more firmness, and a decided rally took place; but though the demand has since continued fair, particularly from the trade, and the reduction of the Bank rate yesterday to 5½ per cent. was in favour of holders, only part of the fall has been recovered, and the quotations show a reduction from last week's rates generally. American has been in moderate request, and has declined ½d per lb. For Sea Island, there has been rather more inquiry, but without change in value. Egyptian has been much pressed upon the market, and sustained a fall of 1½d, but since Tuesday has rallied, and is now 1d per lb lower than last week. In Smyrna a decline of ½d per lb is quoted, with a limited amount of business. Brazil fell about 1½d in the early part of the week, and though prices have slightly recovered, closes fully 1d below former quotation. Pernam continues in demand, but Maranhan and Maceio are neglected. In the early part of the week East India was in very limited request and heavy of sale; prices have since in some degree rallied, but close ½d lower than on Thursday last. China and Japan declined fully 1d per lb, and have since only slightly recovered.

The transactions, to arrive, continue chiefly in Egyptian, and have fluctuated in price in accordance with the daily tone of the market. The last quotations were:—Egyptian, open fair, January shipment, 25½d; fully fair, ship named, 25½d.

The sales of the week amount to 32,580 bales, including 6,700 on speculation, and 5,640 declared for export, leaving 20,240 bales to the trade. The sales to-day amount to about 5,000 bales.

The quantity of East India cotton now afloat is about 167,000 bales, against 270,000 bales last year.

LONDON—Jan. 13.

Sales of cotton, from Friday, 6th January, to Thursday, 12th January, inclusive:—

Sales on the spot:—75 bales Oomrawatty, at 16¾d for fair; 40 bales Scinde, 11d for good fair; 340 bales Tinnevelly, 12½d for middling, 16d for fair, and 16½d for barely good fair; 830 bales Western, 13½d to 14½d for low middling, 14d for middling, 18d for fully fair, and 18¼d for good fair; 200 bales Coconada, 16½d for fair and fully fair; 240 bales Salem, 16d to 16¾d for fair; 840 bales Bengal, 10d for fair to good fair, 11d for fair, and 11⅜d for fully fair; 610 bales China, 14d for fair and 14½d for fully fair; 290 bales Japan, 16½d for good fair—total 3,475 bales.

The public sales yesterday contained about 2,700 bales, the cotton offered being principally Tinnevelly, more or less sea damaged, to be sold for account of whom it may concern, were consequently largely attended, and went off at very fair prices. About 1,630 bales were sold, viz.—1,120 bales damaged Tinnevelly, at 4*l* 5*s* to 6*l* 10*s* per bale; 265 bales Western Madras, at 10¾d to 18½d per lb; 106 bales Bengal at 10½d to 11d; 60 bales Scinde, at 10¾d to 11⅛d; 70 bales China, at 14½d; 37 bales Bourbon seed Madras, at 15½d to 22½d; 3 bales West India, at 25½d; and 2 bales Natal, at 21d per lb.

Sales to arrive:—120 bales Western, at 18¾d October shipment, for guaranteed fair new; 500 bales Japan, 16d October shipment, for guaranteed fair—total, 620 bales.

In the early part of the week the cotton market was very dull, and in some cases forced sales were made, at a decline of fully 1d per lb. During the last few days there has been an improved demand, and the market closes tolerably firm at a pretty general decline of ½d per lb upon our quotations of Friday last.

Yesterday the Bank rate of discount was lowered from 6 to 5½ per cent.

NEW YORK—Dec. 31.

The demand for cotton in the early days of the week was much restricted, but the market has since improved, and recently a fair business has been transacted. During the week, about 2,800 bales have been disposed of. Middling Upland produce is quoted at 119 cents per lb. The week's arrivals comprise 5,407 bales, of which 423 bales are from Liverpool, 2,341 Matamoras, 606 New Orleans, 546 Havana, and 849 bales by rail. This additional quantity raises the import since the 1st inst. to 21,493 bales, and since Sept. 1 to 69,967 bales. The following are the quotations:—

MARKETS IN THE MANUFACTURING DISTRICTS

For the time of year, about an average business has been transacted in goods since our last report. In prices, very few changes have taken place. The demand for iron has slightly improved, at fully late rates. There has been less activity in the sale for coals, and the quotations have had a drooping tendency.

Manchester, Jan. 12.—On Monday, this market opened with a tendency to depression, which became confirmed on Tuesday. On Tuesday, at noon, this depression, in so far as it had been derived from the first news of the fall of Savannah, was checked by later American telegrams, and sellers, who had been en-

Digitized by Google

deavouring somewhat vainly to force sales in the morning, were encouraged to be firm in the afternoon. The former feeling lasted on Wednesday, when some increased demand was experienced, but prices have since by no means recovered to the point of last week, nor has the business of this week been at all important. Neither the receipt of India letters nor the reduction of the Bank rate appear to have made any difference to-day. Stocks of manufactured goods are light, but buyers are cautious, the half-million bales of cotton in Liverpool being thought too large a present supply for present prices.

BRADFORD.—Prices of wool are steady, and there is an average number of transactions. The demand is still, however, far from large, and the business done is wholly unspeculative. The trade in yarns is most unsatisfactory, both to the spinner and the merchant. Orders, both for home and foreign account, are very few and small. There is a cheerful tone in pieces, which is strengthened by the relaxation in the money market. Americans are operating a little more freely.

LEEDS.—There is a little improvement in the demand by both the home trade and the export houses, and the prospects of the spring trade are generally deemed satisfactory. The country manufacturers report that they have a fair amount of orders in hand, though rather less than in brisk times. The flax trade is moderately active, and the principal mills are running full time.

NOTTINGHAM.—The inquiry for hosiery yarns was dull, and prices had a tendency to recede. For silks higher prices were paid. The demand for brown nets was very inactive, and prices, if anything, were rather in favour of the buyer.

ROCHDALE.—The flannel trade keeps rather quiet, purchases being made cautiously, and in rather smaller quantities than is usual.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Dec. 31.—The market for breadstuffs continues very quiet, and although the receipts of produce are small, home buyers show very little disposition to purchase except for immediate consumption. In wheat, for export, owing to the low rate of freight to Liverpool, viz., 1d per bushel, rather more business has been done. The alterations in prices are chiefly caused by the movements in the premiums on gold. Annexed are the rates current:—Flour—State, superfine brands, $9.60 to $9.85; State, extra brands, $10.10 to $10.15; State choice brands, $10.20 to $10.30; Ohio, common brands, $11 to $11.30; Ohio, fancy brands, $11.25 to $11.30; Ohio, good and choice extra brands, $11.25 to $12; Michigan, Indiana, Wisconsin, &c., $9.60 to $10.50; Genesee, extra brands, $10.40 to $12; Missouri, $11.25 to $15; Canada, common, $10 10 to $10.25; Canada, good to choice extra, $10.35 to $12 per barrel. Wheat—Inferior to good Chicago and spring, and Milwaukee Club, $2.17 to $2.25; common to prime winter red Western, $2.37 to $2.50; prime amber Michigan, $2.56. Corn—Western mixed, $1.88 to $1.90; and new yellow Jersey, $1.75 to $1.80 per bushel. The following were the exports from Dec. 1 to Dec. 27:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat up to our market, this week, coastwise and by land-carriage, have been limited; hence, the show of samples has been small. Good and fine qualities have moved off steadily, at full prices; but other kinds have ruled inactive, on former terms. With foreign wheat, we have been well supplied. Fine dry samples have maintained their previous value without difficulty. Inferior kinds have moved off heavily, at late rates. Malt has been in moderate supply, and steady request, at late full prices. There is a fair sale for oats, on former terms. Beans and peas have met a dull inquiry, at previous currencies. The flour trade has continued in a healthy state.

In the leading country markets, very little change has taken place in the value of any kind of produce. The supplies have not increased.

There has been rather more doing in wheat in most of the continental markets, at very full prices. Barley, oats, beans, and peas have commanded extreme rates. In American, the transactions in wheat and flour have been much restricted, owing to the low prices ruling in this country.

In Scotland, wheat, fine barley, and oats have moved off steadily, at full quotations. Other articles, however, have commanded very little attention.

Only moderate supplies of grain have been disposed of in the Irish markets. Prices, however, have been fairly supported.

Although the supply of English wheat at Mark lane, to-day, was small, the trade both for red and white qualities was very inactive, and prices had a drooping tendency. There was a fair average supply of foreign wheat on offer, and the demand for all descriptions was in a sluggish state, at about previous quotations. Good and fine malting barley ruled firm, at extreme rates; but inferior barley sold heavily, on rather easier terms. Oats met a slow sale, at previous quotations. Beans and peas were in limited supply, yet they commanded very little attention, at unaltered currencies. The flour trade was steady, at late rates.

Mr George Dornbusch reports the arrival off coast of 11 cargoes of wheat, 6 maize, 17 barley, 1 millet-seed, 10 linseed, 1 rapeseed, 2 cotton-seed, and 1 oilcake. About an average business has been transacted in wheat, at full prices. All other produce has sold heavily. Cotton-seed has realised 7*l* 5s per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has been an extensive supply brought forward on a very flat market, and quotations have in most instances fallen 6d to 1s per cwt where importers effected sales. A partial inquiry prevails for exportation, but the refiners and the home trade generally have bought to a moderate extent only. By auction, 420 casks Barbadoes partly sold at 30s to 34s; 80 casks other West India, 29s to 32s. In muscovado sorts, grainy and crystallized sorts, 36s 6d to 39s 6d. The deliveries are improving, being 4,127 tons last week, against 2,187 tons in the corresponding one of 1864, but the stock in London exceeds that of the previous week by 50 per cent.

Mauritius.—16,265 bags offered by auction were partly sold at 6d to 1s decline; soft qualities brown, 24s 6d to 29s 6d; grey and yellow, 29s 6d to 32s; grainy and crystalised, 32s 6d to 37s; grainy white, 39s 6d to 43s. Two floating cargoes have sold for the United Kingdom: No. 13½ to 14, at 26s; No. 11½, at 24s 6d. One for France, No. 12 to 12½, at 26s per cwt.

Bengal.—3,167 bags, by auction, chiefly sold at only a trifling reduction upon Gurpatta date sorts: brown and yellow, 29s 9d to 32s 6d per cwt. White Benares taken in above the value.

Madras.—2,482 bags by auction on Tuesday, chiefly sold at rather lower prices, ranging from 28s 6d to 35s per cwt for brown and yellow.

Foreign.—Of 1,344 casks 154 barrels Cuba, brought to auction, a large portion found buyers at 28s, and afterwards at 32s. 645 casks 57 barrels Porto Rico partly sold at 30s to 35s 6d per cwt.

Digitized by Google

RUM.—There has been a full amount of business transacted this week at rather higher prices. Demerara, 1s 10d to 1s 11½d; low qualities in proportion; Leewards, &c., 1s 8d to 1s 9d per proof gallon. Some Jamaica is reported at 2s 9d to 3s per gallon.

COCOA.—628 bags Trinidad brought to auction were chiefly bought in, a few lots selling at 58s to 80s. 40 bags Surinam cocoa were part sold at 73s per cwt.

COFFEE.—The better qualities of plantation Ceylon continue firm, but native as well as common East India descriptions are inactive and rather lower. Of the former, 668 casks 1,198 barrels and bags all sold at 80s to 86s 6d for small berry to good. Of 172 casks 22 barrels, 2,870 bags native, a large proportion was taken in at 69s 6d to 72s. Some very good to fine ordinary sold at 71s to 72s. 137 bales Mocha were bought in chiefly at 95s for long berry. 500 casks and barrels 2,390 bags East India partly sold at 67s 6d to 72s 6d for pale qualities. Singapore bought in at 60s to 65s. A floating cargo of Rio has sold at 57s for a near port, one at 58s 3d per cwt. for Antwerp.

TEA.—The first sales of Indian growth, which commenced on Tuesday and concluded on Thursday afternoon, went off steadily, and generally at full prices excepting for the commoner sorts which were easier. 4,352 packages were brought forward, 2,935 packages being sold and the remainder withdrawn. Very large sales of China growth are declared, to commence on the 17th inst.

RICE.—The market is firm with few sellers. Soft grain descriptions maintain the recent advance, and holders generally require a further advance. About 4,000 bags Necrancie Arracan have sold at 9s cash. By auction, 1,523 bags Rangoon obtained 9s to 9s 6d. 3,169 bags white Bengal were taken in at 12s 6d to 13s for good middling. A floating cargo of Rangoon is reported at 9s 3d per cwt, for the United Kingdom.

SAGO.—1,597 boxes offered by auction sold readily as follows: small grain, 18s to 19s 6d; medium, 18s to 18s 6d; bold, 19s to 20s 6d per cwt.

SALTPETRE.—The market is firm. 100 tons Bengal have sold for arrival at 32s 9d. By auction, 600 bags, refraction 8, were taken in at 32s 3d. 82 bags Madras, refraction 17, sold at 28s 6d. 345 bags Bombay chiefly sold, refraction 45½ to 10, at 25s 6d to 28s 6d per cwt.

SHELLAC.—666 cases in the public sales sold at former rates to 2s 6d advance; native orange, 4*l* 15s to 5*l*; D. C. block, 5*l* to 6*l* 15s; orange, 5*l* 15s to 6*l* 7s 6d; good garnet, at 5*l* 12s 6d to 5*l* 15s; good button sort, 6*l* 10s to 6*l* 12s 6d per cwt.

METALS.—The transactions of the week have been smaller than usual, and quotations of many kinds are almost nominal. Nothing of importance has transpired in foreign tin: Straits, 89s cash. The last price of Scotch pig iron was 50s per ton, mixed numbers. Copper is unsettled. Some business is reported in spelter, of which particulars do not transpire.

JUTE.—There were 8,720 bales brought to auction on Wednesday, of which about 600 sold. A small portion of the new crop went readily at 21*l* 10s to 27*l* 10s. Old parcels sold irregularly at 11*l* to 26*l* per ton.

LINSEED.—The market has been unfavourably influenced by the occurrence of large arrivals from the East Indies; importers have submitted to a decline of 6d to 1s 6d per quarter. Business has been done in Calcutta on the spot at 58s to 58s 6d, and for arrival to the extent of about 3,000 tons (November to January shipments), at 57s 6d, for London. There are several cargoes of Black Sea on offer off the coast at 58s 6d per quarter.

MANILLA HEMP.—3,000 bales have sold at 26*l* to 29*l* per ton.

OILS.—Rather more business has been done in sperm: American, 64*l*; colonial, 66*l*. A better inquiry prevails for common olive: Mogadore, 48*l* to 49*l* per tun. Other kinds steady at the quotations. Cocoanut is very firm. By auction, to-day, 400 tons Ceylon sold at 36s to 37s 3d. By private contract, 38s refused for Cochin. Fine palm is in demand at 36s per cwt. Rape meets a steady consumptive inquiry. Linseed oil quiet at 33s on the spot; 34s 6d per cwt has been paid for delivery in April and June.

SPIRITS TURPENTINE.—French steady at 63s 9d to 64s per cwt.

TALLOW.—The market for foreign has been unsettled, and prices are easier towards the close. First sort new Petersburg Y.C., 41s 3d; March, 42s to 42s 3d; April to June, 42s 3d to 42s 6d; last three months, 43s 3d to 43s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, January, 9.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market shows uninterrupted dulness. 2,862 bags Mauritius, 5,049 bags Bengal, and 246 casks Jamaica, by auction, partly sold at previous rates. 1,558 casks West Indian have sold for the week.

COFFEE.—There were not any public sales held to-day.

RICE.—Of 4,146 bags Rangoon by auction, the sound portion was taken in at 9s 6d. Some repacked sold at 9s to 9s 6d. 500 pockets Bengal sold at 12s 6d per cwt for middling white hard grain.

CASSIA LIGNEA.—150 cases sold upon further reduced terms, ranging from 75s to 80s per cwt for ordinary coarse to middling quality.

SHELLAC.—512 cases sold at former prices.

TALLOW.—1,375 casks Australian, by auction, went at 3d decline: beef, 40s to 40s 3d per cwt. Sheep withdrawn.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar remains very quiet. What sales have been made are in frvour of the buyers for export. Some sales in crushed have been made at 32s 3d and 32s, in barrels f.o.b. Dutch crushed, since the opening of the navigation, is offering at lower prices for present and forward delivery.

GREEN FRUIT.—The market has not recovered from the depression that has existed since Christmas. Some parcels St Michael, Terceira, Valencia, Fayal, sold by Keeling and Hunt, at public sale, went at a reduction of 1s to 2s per package. Lemons are lower. More inquiry foa Barcelona nuts, the moderate figure leading to business. Black Spanish without alteration. Chestnuts and walnuts dull.

DRY FRUIT.—Currants have been quiet all the week, and in some instances easier prices have been taken. Raisins dull and lower.

SEEDS.—The seed trade opens at the commencement of the year rather flatly, and except for red clover seed, the prices of which have been daily advancing, no description is brisk, quotations consequently remain unaltered.

ENGLISH WOOL.—Prices steady.

COLONIAL WOOL.—There is rather more inquiry, and generally a better feeling.

FLAX.—Market steady.

HEMP.—Market quiet, without any alterations in quotations.

SILK.—The market continues active and prices firm.

TOBACCO.—An improved demand has been experienced for American descriptions for home trade, and a fair extent of sales effected at firm prices. There has also been more inquiry for exportation. Sales of other growths made to some extent at full rates.

LEATHER AND HIDES.—Since the commencement of the year more business has been doing in leather than for many weeks previously, but the bulk of the transactions have been in English goods. The supply at Leadenhall on Tuesday was moderate, and our late quotations were uniformly obtained. The articles most in request were light English butts, English shoulders, stout English bellies, prime light shaved hides, and English horse hides.

METALS.—We have found very little business doing all the week. Copper is steady in quotations, but still in small demand. Tin is rather weaker again, the business done in Straits having been 20s to 30s per ton below last week's rates. Spelter is unchanged. Lead steady, and tin plates still quiet.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	43	9
Fat by ditto	2	1½
Yellow Russia	42	9
Melted stuff	32	6
Rough ditto	18	0
Greaves	18	0
Good drags	7	0

METROPOLITAN CATTLE MARKET.

THURSDAY, Jan. 12.—The supply of beasts in our market to-day was only moderate. Prime Scots, crosses, &c., moved off steadily at full quotations, the top figure being 5s 6d per 8 lbs; otherwise, the beef trade was inactive on former terms. Sheep, the show of which was rather limited, were in good request at extreme currencies. The best Downs and half-breds sold at fully 6s per 8 lbs. We have to report a slow sale for calves at late rates, viz., from 4s 6d to 5s 8d per 8 lbs. The supply was very moderate. In pigs and milch cows, the transactions were limited, at about stationary prices.

Per 8 lbs. to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	8	to 4	4	Prime Southdown sheep	5	10	to 6	0

HOP MARKET.

BOROUGH, Monday, Jan. 9.—Our market continues firm, with a steady demand for all good qualities of the last growth, at rather better prices. Mid and East Kents, 130s, 160s, 200s; Weald of Kents, 120s, 140s, 155s; Sussex, 116s, 135s, 146s; Yearling, 110s, 126s, 140s.

FRIDAY, Jan. 13.—Scarcely any change has taken place in the value of hops since we last wrote. The supply of produce, both English and foreign, on sale being small, the market continues to present a firm appearance, and all descriptions of hops fully support previous quotations.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Jan. 9.—The arrivals have been greater than for a long time, particularly coastwise, and the market has been overdone with supplies, and a considerable fall in price has been the consequence. The following are this day's quotations :—Yorkshire Flukes 100s to 120s; Yorkshire Regents, 75s to 90s; Yorkshire Rocks, 65s to 70s; Kent and Essex Regents, 75s to 90s; ditto Rocks, 60s to 70s; Perth, Forfar, and Fifeshire Regents, 60s to 65s; ditto, ditto Rocks, 55s to 60s; Belgian whites, 55s to 65s per ton.

FRIDAY, Jan. 13.—The supplies of potatoes on sale are tolerably large. Prices range from 60s to 120s per ton.

HAY MARKETS.—THURSDAY, Jan. 12.

SMITHFIELD.—Meadow hay, 4*l* 4s to 5*l* 8s 0d; clover, 5*l* 5s to 6*l* 6s 0d; and straw, 1*l* 8s to 1*l* 12s per load. A fair demand.

CUMBERLAND—Meadow hay, 4*l* 5s to 5*l* 10s 0d; clover, 5*l* 5s to 6*l* 6s; and straw, 1*l* 8s to 1*l* 12s per load. Trade inactive.

WHITECHAPEL.—Meadow hay, 4*l* 4s to 5*l* 8s 0d; clover, 5*l* 5s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 12s per load. Supply moderate.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, JAN. 13.—A fair amount of business has been done this week at current rates. The public sales of East India wools will begin on the 24th inst. About 15,000 bales have arrived for this series, which may be increased by any further imports that may come in still in time. The sundry kinds of low wools will be brought forward after the close of the above sales.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 13.—Moderate attendance. Wheat slow, and 1d lower. Flour quiet, and prices favour buyers. Indian corn steady. Beans unchanged. Oats and oatmeal dull at late rates.

The Gazette.

TUESDAY, Jan. 10.

BANKRUPTS.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 31st of December, on 11,774 miles, to 581,360*l*, and for the corresponding week of last year, on 11,448 miles, to 542,723*l*, showing an increase of 326 miles, and of 38,637*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,275 miles, to 477,399*l*, and for the corresponding week of 1863, on 8,033 miles, to 443,225*l*, showing an increase of 242 miles, and 34,174*l* in the receipts.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Jan. 9.—In the share market to-day the fluctuations in the prices left an appearance of firmness at the close in American securities and miscellonaous shares, and of weakness in Canadian and foreign railways and British mines, while in other descriptions the movements in both directions nearly balanced each other, so as to indicate no material change of tone. Of the English lines, South Devon improved 1½, South-Western 1, and Manchester, Sheffield, &c., and Metropolitan ¼ each; Midland and South-Eastern relapsed ¼ each, and Edinburgh and Glasgow and Shropshire Union declined 1 each, North-Eastern (Leeds) ½, and ditto (Berwick) and ditto (York) ¼ each. In colonial, Grand Trunk of Canada (equipment bonds), and ditto (2nd and 4th preference) receded 1 each. In foreign, Great Luxembourg relapsed ¼. In American, United States Five Twenties improved 1, and Illinois shares ½. In British mines, New Seton declined 10. In foreign, United Mexican closed ¼ better.

TUESDAY, Jan. 10.—In the share market to-day considerable dulness prevailed, and the several descriptions closed with a flatter tendency, except mines and foreign railways, which showed no material average change. In English railways, Shropshire Union recovered 1; Great Western (West Midland, Newport) advanced 1, Brighton ½, Metropolitan (new) ⅛, ditto (original) ¾, and South Devon further 2; South-Western relapsed 1, and Manchester, Sheffield, &c., ¼; and Caledonian, Great Eastern, and Great Northern (A stock) declined ¼ each, North-Western ¼, Midland a further ½, and North-Eastern (York), and South-Eastern a further ¼ each. In colonial, Melbourne and Hobson's Bay improved 1; Great Western of Canada (6 per cent. bonds) declined 2, ditto (5½ per cent.) and Madras (4¾ per cent.) 1 each, and ditto (5 per cent.), Scinde, Delhi (stock), Punjaub, and Grand Trunk of Canada ½ each. In foreign, the only alteration was an improvemen of ½ in Lombardo-Venetian.

WEDNESDAY, Jan. 11.—In the share market to-day a mere nominal amount of business was transacted, but English railways and banks closed with a slight tendency to firmness. Canadian securities were rather weaker, and the other descriptions were not materially altered. In colonial, Grand Trunk of Canada (4th and 3rd preference), declined 1 each, ditto (3rd preference deferred, and 1st preference) 1½ each, and Great Western of Canada (6 per cent. bonds), further 1½. In foreign, Sambre and Meuse improved ½; Lombardo-Venetian relapsed ½; and Dutch-Rhenish receded ½. In American, Erie shares (paid up) further declined 1. In British mines, East Wheal Russell were ½ lower. In foreign mines, Fortuna advanced ¼, and Cape Copper declined ¼.

THURSDAY, Jan. 12.—In the share market to-day rather more than half the transactions were for the account, and the final quotations showed an improved tendency in English railways and miscellaneous shares, but no material change of tone in other descriptions. Of the English lines, Lancashire and Yorkshire and Midland recovered ¾ each; Caledonian improved 1, Great Eastern, Great Western (West Midland, Oxford), Blackwall, North-Western, South-Eastern, and North-Eastern (Berwick) ½ each, ditto (York) ¼, and Great Western (original) and Metropolitan a further 1 each; and South Devon declined 2. In colonial, Madras (5 per cent.), Scinde, Delhi (stock), and Punjaub advanced ¼ each. In mines the only movement was a fall of ½ in Brazilian Land and Mining.

FRIDAY, Jan. 13.—The railway market was inactive to-day, and, with the exception of a decline of ⅜ per cent. in London and North-Western, and ¼ in Lancashire, the principal stocks exhibit no change.

THE PALL MALL GAZETTE:

An Evening Newspaper and Review.

It is difficult to describe the plan of an enterprise like the PALL MALL GAZETTE without seeming to boast or to decry the efforts of others. But we are unwilling to lose the advantage of a few words of explanation, and we therefore trust the candour of the reader for a just interpretation of our meaning.

The PALL MALL GAZETTE will contain all the news proper to an Evening Journal. But, addressed as it will be to educated men and women, the space of the Paper will not be occupied by trifling chronicles, nor by that excess of words which adds nothing to the interest of newspaper records, while it destroys their significance. Literary considerations alone would determine us to have our News Reports written in plain English; but beyond these there is the fact that the lessons to be found in many an accident of human life or social polity are lost in the turgid language in which they are commonly narrated.

Events made known by the Morning Papers may be discussed in the PALL MALL GAZETTE of the same day, but they will not be reported anew. Trustworthy advices from the Money Market will be included in the News of the Day.

The rest of the Paper (by far the greater part) will be made up of original articles upon the many things which engage the thoughts, or employ the energies, or amuse the leisure of mankind. Public Affairs, Literature, the Arts, and all the influences which strengthen or dissipate Society, will be discussed by men whose independence and authority are equally unquestionable, and who are accustomed to regard the public expression of opinion as a serious thing. This is the chief aim of the PALL MALL GAZETTE: to bring into Daily Journalism that full measure of thought and culture which is now found only in a few Reviews.

At the same time, we by no means intend to make the Paper pedantic or solemn. Humour is too powerful, as well as too pleasant, to be left out of the design, which will lose none of the advantages of occasional trifling. If a thing can be said better in verse than in prose, it will be said in verse. Epigram, but not spite—burlesque, but not vulgarity—will be readily admitted into its columns; and since a joke is often as illustrative as an argument, good jokes will be welcome too.

It will be understood that this Advertisement is rather a proclamation of idea and of effort than of promise. But the proclamation is not made before a large number of able writers have accepted the idea, and pledged themselves to the effort.

*** The Quarterly Review is Published as nearly as possible on the 14th of January, April, July, and October.

John Murray, Albemarle street.

INDIA OFFICE, 6th January, 1865.

THE SECRETARY OF STATE FOR INDIA in COUNCIL hereby gives notice, that he has received from the Government of Bombay the undermentioned Schedules, viz.:—

Schedule of all Sums of Money, Bonds, and other Securities, received by the Administrator-General, on account of each Estate remaining under his charge, together with the Payments made thereout, and the Balances. Prepared up to 30th of June, 1864, under Section XXXIV. of Act VIII. of 1855.

Schedule of all Administrations, whereof the Balances have been paid to the persons entitled to the same, specifying the amount of such Balances, and the persons to whom paid. Prepared for the half-year ending 30th June, 1864, under Section XXXIV. of Act VIII. of 1855.

And that the said Schedules are open to the inspection of the public, in the Department of the Official Agent to the Administrators-General of India, at the India Office, Westminister.

INDIA OFFICE, 6th January, 1865.

THE SECRETARY OF STATE FOR INDIA in COUNCIL hereby gives notice, that he has received from the Government of India the undermentioned Schedules, viz.:—

A. Schedule of all Administrations whereof the final Balances have been paid to the parties entitled to receive, specifying the amount of such Balances, and the persons to whom paid, during the six months ending on 30th of June, 1864.

B. Schedule of all Sums of Money, Bonds, and other Securities received by the Administrator-General on account of Estates, not being Hindoo or Mahomedan, remaining under his charge, together with the payments made thereout, and the Balances. Prepared up to the 30th of June, 1864, under Section XXXIV. of Act VIII. of 1855.

C. Schedule of all Sums of Money, Bonds, and other Securities received by the Administrator-General, on account of Hindoo and Mahomedan Estates remaining under his charge, together with the payments made thereout, and the Balances in hand.

D. Schedule of Balances in the hands of the Administrator-General set apart to meet the admitted claims of creditors against the Estates therein mentioned.

E. Schedule of Unclaimed Balances of Estates under 500 rupees, deposited with the Sub-Treasurer, Fort William, under the Financial Secretary's letter of the 8th of October, 1852, interest being allowed thereon by Government.

And that the said Schedules are open to the inspection of the public, in the Department of the Official Agent to the Administrators-General of India, at the India Office, Westminister.

CAPE OF GOOD HOPE
GOVERNMENT LOAN of £234,000, to be effected by the issue of DEBENTURES, bearing interest at the rate of 5 per centum per annum, in sums of £100, £200, and £500 each, secured on the public revenues of the Colony, and redeemable on the 31st December, 1900. Authorised by an Act of the Colonial Legislature No. 8.

The Crown Agents for the Colonies, acting under the powers conferred upon them by the above cited Act, and in pursuance of instructions received from Sir Philip E. Wodehouse, K.C.B., Governor of the Cape of Good Hope, Hereby Give Notice, that they will be prepared to receive Tenders until one p.m., on TUESDAY, the 17th instant, for the above DEBENTURES, to the extent of £234,000 sterling.

Both principal and interest are made payable at the Offices of the Crown Agents for the Colonies in London, the former on the 31st December, 1900, and the latter, by coupon, half-yearly, on the 15th April and 15th October of each year.

Purchasers of the Debentures will be entitled to the interest accrued since the 14th October last—equal to about 1¼ per cent.

Tenders in accordance with the annexed form, enclosed in a sealed envelope, marked outside "Tender for Cape Loan," are to be delivered not later than One p.m. on the day of treaty, at the offices of the undersigned, where they will be opened in the presence of such persons interested therein as may attend.

The Debentures will be allotted to the highest bidders, provided the rates offered are not below the minimum, which will be fixed in the usual manner before the tenders are opened.

Tenders at a price including a fraction of a shilling other than sixpence will not be accepted, and in the event of an equality of tenders beyond the amount to be disposed of, a pro rata distribution on such tenders will be made.

Five per cent. of the purchase money must be paid into the Bank of England on allotment, and the balance not later than the 3rd February following.

The Debentures will be delivered at the offices of the undersigned in exchange for the Bank receipts.

The 6 per Cent. debentures issued under Acts Nos. 8 and 10 of 1857, and Acts No. 16 and 21 of 1858, redeemable in 1865, will be received at par in payment from persons tendering for the above 5 per cent. loan.

An Act was passed in the last Session of the Cape Legislature providing for the annual appropriation, out of the general revenues, of a sum equal to 1 per cent. on the total public debt of the Colony, for the formation of a sinking fund for paying off the debenture loans as they fall due.

PENROSE G. JULYAN, } Crown Agents for
W. C. SARGEAUNT, } the Colonies.

Offices of the Crown Agents for the Colonies,
Spring gardens, London, Jan. 7, 1865.

FORM OF TENDER.

To the Crown Agents for the Colonies, Spring gardens, London.

Gentlemen,—I hereby tender for the following portion of the Cape of Good Hope Government Five per Cent. Loan, authorised by Act No. 8 of 1864, subject to the conditions contained in your advertisement of the 7th January, 1865, viz.:—

Debentures to the extent of £ , for which I undertake to pay at the rate of £ for every £100 in Debentures.

Name .....
Profession or occupation .....

BANK OF NEW SOUTH WALES.—

The half-yearly general meeting of the shareholders of the Bank of New South Wales was held in Sydney, on Wednesday, 26th October last. The Hon. G. Allen, Esq., M.L.C., in the chair.

The Secretary read the following report and balance sheet:—

The Directors have the pleasure to present to the proprietors the following abstracts of the Bank's liabilities and assets, and of the profit and loss account for the half-year ended on the 30th ultimo.

	£	s	d
The net profits for that period, after deducting rebate on current bills, interest on deposits, providing for bad and doubtful debts, and reducing valuation of bank premises and office furniture, amount to	74,176	16	8
To which are to be added—			
Recoveries from debts previously written off as bad or doubtful	2,106	3	11
Undivided balance from last year	3,896	15	8
Giving for distribution	80,179	16	3

Which the Directors appropriate as follows:—

To payment of dividend at the rate of 15 per cent. per annum—				
On old stock for six months	£56.250	0	0	
On new ditto, paid in the colonies, five months	8,172	10	0	
On new ditto, paid in London, three months	1,894	10	0	
	66,317	0	0	
On bonus at the rate of 2½ per cent. per annum on capital paid up	11,052	16	8	
On balance carried to "profit and loss," new account	2,809	19	7	
				80,179 16 3

The proprietors will observe that a larger amount of new capital has been paid than was called for on the 27th April last, and upon which dividend is now being paid; the next payment will be due to-morrow, of which intimation has already been given.

The Directors have the pleasure to report the advantageous purchase of a site in London, upon which suitable banking premises are about to be erected.

Branches of the Bank have been opened in this colony at Richmond, and in Queensland at Bowen, Port Denison.

It is the duty of the meeting to elect a director in the room of Thomas Buckland, Esq., who retires by rotation. Messrs Thomas Walker, George Thorne, and R. A. Hunt are candidates for the office, and have given the required notice.

It also devolves upon the meeting to elect two auditors in the room of Mr James Milson, jun., and John Richardson, the latter gentleman being eligible for re-election.

The dividend will be payable at the head office to-morrow, and at the branches on receipt of advice.

For and on behalf of the Board of Directors,
GEORGE ALLEN, President.

AGGREGATE BALANCE SHEET of the Bank of New South Wales, September 30th, 1864 (including London Branch to 20th June, 1864, and New Zealand Branches to 5th September, 1864).

Dr.	£	s	d
To Bank Stock { Old Stock £750,000 / New ditto, paid up... 181,280 }	931,280	0	0
Reserve fund	310,426	13	4

PROFIT AND LOSS, September 30, 1864.

Dr. 1864.	£	s	d
Sept. 30—To rebate (at current rates) on bills discounted not due at this date	23,158	10	11
Dividend at the rate of 15 per cent. per annum	66,317	0	0
Bonus at the rate of 2½ per cent. per annum on capital paid up	11,052	16	8
Balance carried to "profit and loss," new account	2,809	19	7
	113,338	7	2

Cr. 1864.	£	s	d
March 31—By amount from last account	3,896	15	8
Sept. 30—By recoveries from bad debts	2,106	3	11
Balance of half-year's profits after writing off bad debts	107,335	7	7
	113,338	7	2

The report was adopted.

Mr Thomas Walker was elected a Director in the room of Mr Thomas Buckland, who retired by rotation.

Mr J. Richardson was re-elected an auditor, and Mr Francis Mitchell was elected an auditor in the room of Mr J. Milson, jun., who retired by rotation.

The resolution to increase the stock on the London register to one-third of the capital, agreed to at the special meeting held on the 28th ultimo, was not confirmed, there being a large majority against it.

A vote of thanks was awarded to the Directors, and the proceedings terminated.

THIRTY-THIRD REPORT OF THE

UNION BANK OF LONDON.

At a Half-yearly Meeting of the Proprietors, held at the Court Room of the Banking house, 2 Princes street, Mansion House, on Wednesday, the 11th January, 1865,

P. Northall Laurie, Esq., Governor, in the Chair.

The following report was read:—

The Directors have to report that the net profits of the bank for the six months ending 31st December last, after payment of all charges (including the sum of £164,375 12s 4d for interest paid and due to customers on their current and deposit accounts), and making ample provision for all bad and doubtful debts, amount to £180,195 2s 11d, which, with £363 6s 2d brought forward from 30th June last, amount to £180,558 9s 1d.

The Directors now declare a dividend for the last six months at the rate of 15 per cent. per annum, and a bonus of 2½ per cent. on the increased paid-up capital, being at the rate of 20 per cent. per annum, clear of income tax.

The 20,000 new shares issued under the authority of the special general meetings held in July last, were all claimed by the proprietors, except 65 shares; and in order to complete the capital, the Directors have debited the profits of the half-year with £1,950, the amount of such unclaimed shares.

In accordance with the resolutions of those special general meetings, the paid-up capital of the Bank has been thus raised from £900,000 to £1,200,000, and the reserved fund from £67,600 (the amount at which it stood in July last) to £300,000, by the addition of £233,000, part of the amount received from premiums on the new shares.

The Directors are of opinion that the reserve fund is, for the present, adequate in amount, and they have, therefore, appropriated the balance of the premiums on the new shares, amounting to £67,000, towards a Buildings Investment Account.

After payment of the dividend and bonus, amounting together to £119,182 10s, and appropriating £67,000, received from premiums, to the Buildings Investment Account, there will remain a balance of £61,375 19s 1d to be carried forward for appropriation at the end of the financial year in July next.

The Directors recommend that the 65 unclaimed shares should be placed at their disposal, to enable them to apply the dividends in the temporary relief of some of those urgent and unforeseen cases of pressure from illness which occasionally occur amongst the clerks in the establishment.

THE UNION BANK OF LONDON.
For the Half-year ending 31st December, 1864.

	119,182	10	0
Balance, being undivided profit carried forward to next half-year	61,375	19	1
	180,558	9	1

Cr.	£	s	d
Profit unappropriated on 30th June, 1864	363	6	2
Amount of net profit of the half-year ending 31st December, 1864, after deducting all expenses, and interest, paid and due (£164,375 12s 4d), allowed to customers on their current and deposit accounts	180,195	2	11
	180,558	9	1

The Governor then declared a dividend for the past half-year at the rate of 15 per cent. per annum, and a bonus of 2½ per cent., clear of income tax.

It was resolved unanimously—

That the report now read be adopted, printed, and circulated among the proprietors.

That the well-deserved thanks of the meeting be given to the Governor, the Deputy-Governor, and the Directors, for the able, judicious, and profitable manner in which they have conducted the affairs of the Bank during the past half-year.

That the best thanks of the meeting be given to Mr W. W. Scrimgeour, the General Manager, for the zeal and ability so long displayed by him in the discharge of his important duties.

That the thanks of the meeting be given to Mr Barton, the Manager; Mr Ingpen, the Manager of the Regent street branch; Mr St Barbe, the Manager of the Charing cross branch; Mr Beattie, the Manager of the Temple bar branch; and to Mr Newmarch, the Secretary, for the zealous and efficient manner in which they have discharged their several duties.

(Signed) P. NORTHALL LAURIE, Governor.

That the thanks of the meeting be given to P. Northall Laurie, Esq., the Governor, for his conduct in the chair this day.

(Signed) JAMES FARQUHAR, Deputy-Governor.

Extracted from the minutes.
W. O. BEVILLE, Assistant Secretary.

N.B.—The Dividend and Bonus will be payable on and after Friday, the 20th instant.

BANK NOTICE.

DUBLIN, December 31, 1864.

A Memorial having been addressed to the several Banking Establishments in this City, by the principal Merchants and Traders connected with it, soliciting those banks to adopt the practice which has been for a lengthened period in operation in the large towns of England and Scotland, namely that of closing the banks on Saturdays at One o'clock:

In deference to the prayer of such memorial the several banks, as undersigned, have consented to close their establishments for business at One o'clock on each Saturday.

Notice is, therefore, hereby given, that such closing will commence on SATURDAY, the 11th of FEBRUARY next, and that all Bills and Promissory Notes remaining unpaid on that or any succeeding Saturday, at One o'clock, will be referred to the Notaries of the respective banks.

P. Du Bedat, Secretary, for Bank of Ireland.
Robert Murray Manager, for Provincial Bank of Ireland.
G. F. Hardy, Manager, for National Bank.
D. La Touche and Co., Castle street.
Bel and Co., Henry street.

BANK OF NEW SOUTH WALES.

Established 1817.

Notice is hereby given, that at a half-yearly general meeting of proprietors, held within the Head Banking House of the Corporation, at Sydney, on the 26th day of October last, a dividend on the old capital stock of the Bank was declared at the rate of 15 per cent., and a bonus at the rate of 2½ per cent. per annum, for the half-year, and at the same rate for three months upon the new stock paid in London on the 27th June last, making a distribution at the rate of 17½ per cent. per annum. The same will be payable at this office on and after Monday, the 16th instant, on the old and new capital stock standing on the London register. The share register will be closed from this date to the 16th instant.—By order of the London Board,

JOHN CURRIE, Secretary,
37 Cannon street, London, E.C., 12th Jan., 1865.

METROPOLITAN & PROVINCIAL BANK (Limited).

The Sixth Half-yearly Meeting of the Shareholders was held at the London Tavern, Bishopsgate street, on Friday, the 13th January, 1865,

CHARLES GILPIN, Esq., M.P., in the Chair.

The Directors state in their Report that, consequent on a large amount of previously reserved profit having been absorbed, they cannot on this occasion recommend the payment of a dividend, but that all bad and doubtful debts have been provided for, the usual proportion of preliminary expenses written off, and all the current expenses paid, with the exception of the amount appropriated, under the articles of association, to the remuneration of the Directors, which in the present instance they propose not to accept.

The position of the Bank on the 1st January may be briefly stated as follows, viz.:—

	£	s	d
A subscribed capital (held by 535 Proprietors) of	1,934,700	0	0
A paid-up capital of	309,380	0	0
A reserved fund of	10,000	0	0
And a balance of	3,073	5	10

carried forward to the profit and loss new account.

The Report and Balance sheet were unanimously adopted, and the retiring Directors and Auditors unanimously re-elected. The best thanks of the meeting were cordially given to the Chairman, for his able and impartial conduct in the chair.

Extracted from the Minutes.

Jan. 12. J. F. WILKINSON, Managing Director.

DEBENTURES AT 5, 5½, AND 6 PER CENT.

CEYLON COMPANY (LIMITED).

DIRECTORS.

CHAIRMAN—Lawford Acland, Esq.

Major-General Henry Pelham Burn.	Duncan James Kay, Esq.
Harry George Gordon, Esq.	Stephen P. Kennard, Esq.
George Ireland, Esq.	Patrick F. Robertson, Esq.
	Robert Smith, Esq.

MANAGER—C. J. Braine, Esq.

The Directors are prepared to ISSUE DEBENTURES for one, three, and five years, at 5, 5½, and 6 per cent. respectively.

They are also prepared to invest money on mortgage in Ceylon and Mauritius, either with or without the guarantee of the Company, as may be arranged.

Applications for particulars to be made at the office of the Company, No. 12 Leadenhall street, London.—By order, JOHN ANDERSON, Secretary.

SIX PER CENT. DEBENTURES.

THE CREDIT FONCIER OF MAURITIUS (Limited).

Subscribed Capital, £500,000. Paid-up Capital, £100,000. Unpaid Capital, £400,000.

DIRECTORS.

CHAIRMAN—Sir John P. Grant, K.C.B.

Colonel Balfour, C.B.	Lieut-Col. F. A. V. Thurburn.
George Henry Money, Esq.	Henry Young, Esq.
George Palmer Robinson, Esq.	George Clerihew, Esq.
Richard Spooner, Esq.	Robert G. Lancaster, Esq.

The Credit Foncier of Mauritius (Limited), duly authorised to borrow to the extent of the money invested on mortgage, is now prepared to issue debentures, with coupons attached, for terms to be agreed upon, in amounts from £20 upwards, at 6 per cent. per annum, payable half-yearly at the Alliance Bank, on the 15th of June and 15th of December.

The security to debenture-holders will be the whole of the assets of the Company, including the paid and uncalled capital, and its lien on the property mortgaged to the Company.

The state of the law of Mauritius, including the system of registration of mortgage and other claims upon land, is peculiarly conducive to the security of mortgagees.

Applications for debentures to be made to the Secretary of the Company, 17 Change alley; to the Alliance Bank, 5 Lothbury; or to Messrs J. and A. Scrimgeour, the brokers of the Company, 10 Old Broad street.

WILLM. G. DICK, Secretary.

BANKERS IN LONDON.

The Agra and Masterman's Bank (Limited).

SOLICITORS.

Messrs Newbon, Evans, and Co.
Messrs Phillips and Son.

This Company is prepared to receive proposals for the issue of Debentures in sums of £100 and upwards, bearing interest at the rate of 7 per cent. per annum, for periods of three, five, seven, or ten years.

Also to receive money on deposit, on terms to be agreed on.

The security offered to the bondholders comprises—

1. The uncalled capital of the Company.
2. The estates possessed by the Company in the colony.
3. The paid-up capital and general assets of the Company.

It is also prepared to enter into arrangements with intending emigrants and others for the sale or lease, with the option of purchase, of any of its estates, and to undertake general agency business in the colony, the management of estates, collection of debts, &c.

The Company will also make FREE GRANTS of Farms of 50 acres each to suitable emigrants possessing limited capital. Each emigrant will have the right of selecting his grant out of an estate of not less than 1,000 acres, with the privilege of leasing or purchasing, upon long credit, such other portion of the estate upon which his grant is situated as he may find desirable.

The settler will not be restricted in any way in his choice of a location, but will be at liberty to select such land as may best suit his requirements, whether for grazing or agricultural pursuits, or with reference to water power. All lands thus offered by the Company for selection are now ready for pasturage or the plough, and involve no expense to the settler in clearing or other preparations for immediate occupancy. The only condition stipulated for by the Company is personal occupation by the emigrant of the grant allotted to him.

C. GRABHAM, Secretary.

2 St Michael's House, Cornhill.

WARRANT FINANCE COMPANY (Limited).

Notice is hereby given, that the First Ordinary General Meeting of the Shareholders of the Warrant Finance Company (Limited) will be held at the London Tavern, Bishopsgate street, in the City of London, on Tuesday, the 24th instant, at Two o'clock precisely, for the following purposes:—

To receive a report and statement of accounts.
To sanction the declaration of a dividend.
And to appoint Auditors.

And notice is hereby further given, that the Transfer Books of the Company will be closed from Friday, the 6th, to Tuesday, the 24th instant, both days inclusive.—By order of the Board, J. A. MANN, Secretary.

EXTENSIVE FLOUR MILLS, &c., in EDINBURGH, for SALE.

There will be SOLD by PUBLIC ROUP, at Dowell's, 18 George street, Edinburgh, on Wednesday, 18th January, 1865, at Half-past Two o'clock, afternoon,—

The Extensive and Valuable FLOUR MILLS at the West-end of Edinburgh, called HAYMARKET MILLS, situated close to the Haymarket Station, and on the road from Edinburgh to Corstorphine, with the Machinery therein, Steam Engine and Boilers; together with Commodious Warehouses containing ample Storage, Counting-houses, Four Excellent Dwelling-houses for Workmen, and other conveniences. The Mills contain at present Twelve Pairs of Stones, all in excellent working order, and there is room for lying down other five pairs, for which the engine, of 100 horse-power, with a slight alteration, would be sufficient. There is a superior Wheat-dressing Machine, and Seven Four-dressing Engines.

The Mill, which was specially constructed for Messrs Hume and Co., is of a most substantial description, the machinery, &c., having been supplied by a very eminent firm with all the latest improvements. The premises are admirably adapted for the business, being well and conveniently laid out, and advantageously situated as respects means of conveyance. There is a siding into the premises from the Edinburgh and Glasgow Railway, communicating with Haymarket Station. It has been found in practice that the business can be carried on with one-third of the number of horses found necessary for other flour mills of like extent in this quarter.

Along with the above premises will be Sold the comfortable Dwelling-house, of modern construction, immediately adjoining the Mill, containing two public rooms, four bedrooms, kitchen, and other accommodation.

The Ground is held feu of the Edinburgh and Glasgow Railway Company, for a moderate feu-duty, and the proprietors of the Mill are entitled to a supply of water from the Union Canal for working the steam-engine.

The Mill is in going order, and will be kept working for some time, in order that a purchaser may have the opportunity, if desired, of entering upon and commencing the business at once.

For particulars and orders to view, apply to Alexander Smith, Esq., Merchant, Leith; or to Murdoch, Boyd, and Henderson, W.S., 120 Constitution street, Leith, who have the titles.

TO MERCHANTS AND SHIPPERS.

The increased demand for

DINNEFORD'S FLUID MAGNESIA

(for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

CENTRAL RAILWAY OF VENEZUELA (Limited).

Guaranteed Interest 11½ per cent.

FIFTY SHARES, £10 paid, for SALE, or will be EXCHANGED for Quebrada or other shares.—Address M. P., care of Mr Barker, News Agent, 1 Castle court, Birchin lane, Cornhill.

LONDON, CHATHAM, AND DOVER RAILWAY.

LOANS ON DEBENTURES.

The Directors of the above Company are prepared to receive LOANS on DEBENTURES of £100 and upwards, secured either on the general undertaking or upon the Metropolitan Extensions, for three or five years, at 6 per cent. per annum.—By order,

W. E. JOHNSON, Secretary.

Victoria Station, S.W.

NAMUR AND LIEGE RAILWAY COMPANY.

Notice is hereby given, that the usual Half-yearly Dividend on all the shares of this Company will be payable at the Banque de Belgique, Brussels, and at my office here in London, on and after Monday, the 16th instant, viz., on presentation of Coupons No. 17 of the Original Shares, and of No. 2 of the Preference Shares.

On payment of the Coupons, a notice to shareholders of proposal for providing for redemption of the Original Shares will be handed to the party presenting them.—By order, WM. MOATES, Agent.

and a quantity of

CAST IRON PIPES, STAND PIPES, SLUICE VALVES, &c.,

as per drawings and specifications, to be seen at these offices.

Tenders, endorsed "Tender for Switches, Cast Iron Pipes, &c.," must be delivered to the undersigned, on or before 12 o'clock at Noon on Thursday, the 26th day of January, 1865.

The Company is not bound to accept the lowest or any Tender.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, January 11, 1865.

EAST INDIAN RAILWAY COMPANY.

"I" EXTENSION SHARES, £5 PAID.

Notice is hereby given, that, in pursuance of a resolution passed at a meeting of the Board of Directors, held this day, the proprietors of "I" Extension Shares in the East Indian Railway Company are requested to pay the third Call of £5 per share on each of their respective shares, on or before the 7th day of February, 1865, at the public Drawing Office of the Bank of England.

Notice is hereby further given, that proprietors whose Calls are not paid on or before the day named will be charged with interest at the rate of Five per cent. per annum on the amount called on each share, for the time the said Call may remain in arrear, and will incur a loss of interest on the same amount for the period intervening between the 7th February, 1865, aforesaid, and the date at which the Company is entitled, under the contract, to make the next payment to the Secretary of State for India in Council, on account of the capital; and that, if default is made in payment of this Call, the shares in respect of which default is made will become liable to forfeiture under the Company's deed of settlement.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, January 12, 1865.

ATLANTIC AND GREAT WESTERN RAILWAY.

NOTICE TO BONDHOLDERS.

In conformity with the terms on which the FIRST MORTGAGE BONDS of the PENNSYLVANIA SECTION of this Railroad was issued to the Public, the SECOND ANNUAL DRAWING of 4 per cent. of the gross amount of these Bonds will take place at the Office of Mr E. F. Satterthwaite, 38 Throgmorton street, in the presence of Mr Grain, Public Notary, on THURSDAY, January the 19th, 1865, at ONE o'clock precisely.

The authorised issue is as under, viz.:—

	dols.	dols.
2,000 Bonds of	1,000 each.....	2,000,000
600 —	500 —	300,000
2,000 —	100 —	200,000
		2,500,000

Four per cent. of each denomination will be drawn on the above day, and the Bonds so drawn that have been issued in London will be paid off at the rate £225 for every 1,000 dollar Bond, £112 10s for every 500 dollar Bond, and £22 10s for every 100 dollar Bond, on presentation at the Company's Office, No. 2 Old Broad street, E.C., on and after 1st April next, in addition to the Coupon due on that day, after which all interest will cease.

On payment the drawn Bonds will be cancelled in the presence of a public notary.

Offices, 2 Old Broad street, London, E.C., Jan. 4, 1865.

SECRETARY.—Alexander Forbes, Esq.

Offices—2 East India avenue, India House, Leadenhall street, E.C.

PROSPECTUS.

This Company is formed for the purchase of thirteen valuable tea estates already in profitable cultivation, situated in the Province of Assam, in British India, and for the purpose of further developing and extending their operations.

The property consists of 12,000 acres of freehold land, held direct from Government, of which 2,182 acres are planted with tea plants of the following ages:—namely, 440 acres, 3 years old; 902 acres, 2 years old; 440 acres, 1 year old; and 400 acres just planted.

The soil and climate of this locality are second to none in the province, as the following extract from the Manager's Report to the Directors of the Bishnath Tea Company, a neighbouring concern, for the season ending 31st December, 1863, and submitted by them to the shareholders, will show:—

"The out-turn of tea and seed has been unprecedented in Assam. The plantation in its fourth year has given an average of 390 lbs, and the two-year-old gardens of 240 lbs of tea to the acre; and this has been obtained at no sacrifice to the prospects of future years, but with careful and light plucking, as is evinced by the present healthy appearance of the plants, which, I have often been assured, are, in size and vigour, unsurpassed by any plantation of the age in Assam."

The dividends paid by the Assam, the Upper Assam, the Jorehaut, Bishnath, and by several of the other tea companies in Assam, vary from 20 to 30 per cent., and their shares are at a premium of from 100 to 200 per cent.

The factories have the advantage of being traversed by good roads and navigable rivers, and steamers ply between Assam and Calcutta, affording great facilities for the supply of labour and for the other requirements of the estates. Not less than 8,000 acres can be brought into profitable cultivation; and each acre, when in full bearing, is capable of producing at least 400 lbs of tea.

The plantations are calculated to produce, during the first year of the Company's operations (1864-1865), returns sufficient to yield 10 per cent. on the paid-up capital; and the vendors guarantee a minimum dividend at the rate of 10 per cent., payable half-yearly, upon the paid-up capital for three years, to be calculated from the date of the registration of the Company. At the expiration of the three years the plants will be sufficiently advanced to give progressively larger dividends, until the whole have attained maturity and yield a maximum return.

The price to be paid for the property is £163,000, payable by annual instalments, with interest, at 5 per cent., extending over a period of six years.

These terms the Directors consider to be most advantageous, as, while they show the confidence of the vendors in the value of the property, the easy instalments as to payments will enable the young plants to grow up into full bearing, and to yield large returns before the greater part of the capital is called up.

The undertaking originates with the Directors and their friends. No promotion money will be paid to any one, either directly or indirectly, and the preliminary expenses will be strictly confined to such as are absolutely necessary.

The vendors stipulate that 6,000 of the shares are to be allotted to them; 6,000 of the remaining shares have been already subscribed for, leaving 6,000 shares available for the public.

PARTICULARS of the ESTATES of the NOWGONG TEA COMPANY of ASSAM (Limited).

1. THE BORKONDOLEE DIVISION—

Consists of the Factories of Borkondolee, Loongpoong, Tobokee, Topotjooree, and Rembeng, all in the Nowgong District, on the banks of the rivers Kullung and Nonoye, and along the grand trunk road from Doboka to Nowgong; varying in distance from the station from 8 to 16 miles. Extent of land, 6,000 acres, of which 1,117 are planted.

2. THE BAMONEE DIVISION—

Consists of the Factories of Bamonee, Topotjoree, Amluckseehat, Borhoolah, Sasabat, Dejeoomook, and Sepanullah, all in the Nowgong District, the principal factories being within seven miles of the station, and the others conveniently situated on the banks of the Rivers Kullung, Nonoye, and Deejoo—near the old station of Rungagora, at distances varying from 8 to 20 miles from Nowgong. Extent of land, 6,000 acres; of which 1,065 are planted.

Prospectuses and Forms of Application for shares can be had of the Secretary or from the Brokers of the Company.

CAUTION—"In Chancery."

CHLORODYNE.

VICE-CHANCELLOR WOOD stated that Dr J. Collis Browne was undoubtedly the Inventor of Chlorodyne. Eminent Hospital Physicians of London state that Dr J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr Browne's.—See TIMES, July 13, 1864. The Public, therefore, are cautioned against using any other than DR J. COLLIS BROWNE'S CHLORODYNE.

This Invaluable Remedy produces quiet refreshing sleep—relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretion of the body.

From J. M'Grigor Croft, M.D., M.R.C., Physician, London, late Staff Surgeon to H.M.F. "After preserving Dr J. Collis Browne's Chlorodyne for the last three years, in severe cases of Neuralgia and Tic-Douloreux, I feel that I am in a position to testify to its valuable effects. Really in some cases it acted as a charm, when all other means had failed." No home should be without it. Sold in bottles, 2s 9d and 4s 6d. Sent free on receipt of stamps, by J. Davenport, 33 Great Russell street, W.C., Sole Manufacturer.

Observe particularly, none genuine without the words "Dr J. Collis Browne's Chlorodyne" on the Government stamp.

NO MORE GREY HAIR.—

MELANOGENE, the superlative dye of DICQUEMARE senior, Rouen, for instantaneously dyeing in any shade of colour the hair and the beard, without danger to the skin, and free from smell. This dye is superior to all that have been employed hitherto. Manufactory at Rouen, Rue St Nicholas, 39; Depôt for London, Messrs HOVENDON and SONS', 5 Great Malborough street, W., and 57 and 58 Crown street, Finsbury square, E.C.

BOUDOIR PIANOFORTE.—THE

NEW PARIS MODEL BOUDOIR PIANOFORTE, now being introduced by Messrs Keith, Prowse, and Co., 48 Cheapside, is an oblique trichord with grand action, 7 octaves, and extra metal bracings for extreme climates.—The tone is full and rich, the articulation rapid and distinct. Price in Walnut or Rosewood, 30 guineas.

HARMONIUMS,

by Alexandre.—The new Church Harmonium, with a variety of stops and pedals, Venetian swell, and four rows of Vibrators, is now being introduced (price 24 guineas, packed and delivered at any London railway station) by the city agents, Messrs Keith, Prowse, and Co., 48 Cheapside.

MUSICAL BOXES,

by Nicole Frères.—Messrs Keith Prowse, and Co., direct importers, offer to parties seeking really fine, well-tuned Instruments, a selection of more than 200 boxes, with recently-introduced improvements, from four guineas. The new boxes, with accompaniment of flutes bells, and drum, should be heard to be appreciated, as the expressive effect upon the ear are exceedingly novel and beautiful.

No. 48 Cheapside.

E. DENT AND CO., WATCH,

CLOCK, and CHRONOMETER MAKER to Her Majesty, H.R.H. the Prince of Wales, and H.I.M. the Emperor of Russia, and Maker of the Great Clock for the Houses of Parliament.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men as the safest, speediest and most effectual remedy for CONSUMPTION, CHRONIC BRONCHATIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other kind.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy.

Dr GRANVILLE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light-Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.

SOLE CONSIGNEES:

ANSAR, HARFORD, and CO., 77 Strand, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

ROYAL POLYTECHNIC.

—Patron H.R.H. the Prince of Wales.—"The best and cheapest shilling's worth to be found in London."—TIMES, December 27, 1864.—Professor Pepper's Third Ghost Lecture includes Exhibition of the Physioscope, and two new spectral tableaux entitled the Indian Widow's Suttee and the pretty fairy tale of Snow White and Rosy Red (J. H. Pepper and Henry Dircks joint inventors)—New Musical Entertainment, by Mr R. Coote, entitled Nile Sauce, or the Travels of Bruce and the Wonderful Rovings of the Great Baron Munchausen—Engagement of Signor Blitz, the renowned conjuror, and of Herr Whautkins, the King of Jugglers—The Headless Man, and Legs and Arms in Motion, without Bodies, by Mr Cheshire's Improved Shadow Pantomimic Effects in Mr J. L. King's new Lecture—The Royal Magic Tub, containing thousands of Toys and Trinkets. The second gratuitous distribution amongst the juvenile visitors, on Thursday, the 12th January 1865.—Admission to the whole 1s.—Open 12 to 5, and 7 to 10.

NOTICE.

COMMERCIAL HISTORY AND REVIEW OF 1864. *As part of an early Number of the* Economist, *we shall issue a Supplement under the above title, containing a careful Digest of the leading Merchants' and Brokers' Circulars in the different branches of trade, Lists of New Companies, Returns of Prices, Accounts of the Banks of England and France, &c. The object of the Supplement being to place in possession of our readers a Commercial History of* 1864 *worthy of preservation and adapted for reference.*

The Investor's Manual *is now sold separately, price* 9*d stamped,* 8*d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price,* 6*d.*

WHAT THE VALUE OF MONEY IS LIKELY TO BE.

At the commencement of the year 1864, we ventured on a prediction that, during its course, the peculiarity of the money market would be the "oscillations of the rate of interest at "high level." The words have been far more accurately fulfilled than we could have expected. They were the direct consequence of simple reasoning, but it is rare that in this perturbed world facts capable of computation beforehand have so exclusive a share in the determination of the result. If we may *this* year venture on a prediction, it is that the value of money will tend to be high,—not at all so high as in 1864, but still high as compared with past years and old notions,—but that it will not oscillate so much or so violently as we have been lately used to—that it will *tend* to be far steadier. All anticipations on so involved a matter are treacherous, but principle would be useless if it did not give us some sort of light to the tendencies of the future.

The money markets have for a long time been disturbed by two causes, one of which affects the bullion—the cash reserve—of the country: the other its capital—its disposable means. The first effect of the civil war in America was to drive us to new sources of supply for our cotton,—to India, to Egypt, to Brazil. Like all great disturbances of trade, the civil war in America creates new trade; it drove us from our old sources, and made us look for new sources. All new trade requires *cash:* the complicated system of payment by manufactured goods and commodities requires time to develop itself. The taste of consumers in new countries has often to be formed, and even when people abroad are at once ready to take our goods, they are rarely ready at once to *pay* for them. As a rule, they take short credit and give long credit, and the inevitable effect of beginning a new commerce is, therefore, to absorb actual money—international money—bullion. In the cotton case, the new countries to be dealt with being but semi-civilised, the usual effect was enhanced by the keen appetite of such people for gold and silver. Now, the trade in Indian and Egyptian and Brazilian cotton has become an established trade; it no longer requires cash on account of its novelty; and though from the imperfect civilisation of these countries they may always tend to absorb gold and silver beyond the usual requirements of trade, yet that absorbing taste is naturally most at first, and we may now expect that the cotton drain of bullion, from which we have been suffering so long, will become much less formidable.

India, too, is now supplied in some degree from Australia direct. Our imports from Australia of gold were in eleven months:—

	£
1862	6,307,717
1863	5,504,476
1864	2,629,766

and though some part of the decline may be due to diminished production, much of it is doubtless owing to the diverting influence of the Indian demand. On an average it matters nothing whether the gold goes from hence or from Australia; the world saves the cost of transit if the seat of demand be supplied from the nearest seat of production, and there is no other general or continuing effect. But the change tends to make our market steadier though not higher. We are no longer the first persons to feel a sudden access of demand. We suffer at second-hand because the gold does not come here,—but we do not suffer so suddenly; for we are not liable at any moment, and however otherwise occupied, to be asked to find it.

The effect of the cause which has disturbed the money market by abstracting our *bullion* is therefore, we believe, now diminishing. But it is otherwise with the new causes which are now acting upon that market by attracting our *capital.* After much writing and discussion these causes are still not adequately comprehended; at least, the whole of their practical effect is not seen. People say our savings are immense, and though you may reckon up modes of employing them here, there, and everywhere, yet we shall be as prepared for them as we used to be. We shall have, since we have saved more, additional means of being prepared.

But this expectation is erroneous. Our savings have been a steady, gradual, accumulating force, going on much at the same pace for years and years. But the means of employing our capital have, of late, received a simultaneous augmentation from several causes.

First—and everything would be otherwise useless—our trade is rapidly growing—our exports and imports are both augmenting rapidly and year by year. This augmentation is essential to a value of money even moderately high. The figures of trade are so large—the masses of capital it takes so huge—that if from any cause it falls into arrear, declines, or even does not increase, the value of money is sure to decline. If the commercial demand for capital in common

Digitized by Google

trade be bad, no supplementary demand—no loans—no companies—will make capital dear.

Second. Our *intelligence* is increasing. We now dare take investments we used to shrink from—we consider applications which we used to shudder at—we think of outlets we never dreamed of formerly. It may be said that an increase of mind is not an increase of wealth—of capital. But in fact this is a mistake—capital is but an instrument in the hand of man. As is the mind of man so will be the efficiency, so will be the work of the instrument. An increase of the intelligence of the capitalist is to the power of his capital, just what the coming of a good general after a bad one is to the power of an army. It augments the achievements, though not the numbers.

And our *opportunities* have increased as well as our intelligence. There is an outlet for English capital in foreign countries such as there never was before. A great many countries—all Europe—all the world—where the British race either colonise or rule—is arrived at the industrial era—at that stage of progress when peace is sufficiently secure, minds sufficiently capable, and wants sufficiently developed for a real commerce. At that stage—especially when it comes so suddenly, as in many countries it has lately done—there is room and opportunity for vast accumulations of capital. We have now foreign debtors to lend to for industrial and productive purposes such as we never had before, and we are lending to them. We thus equalise the rate of interest throughout the world. Formerly there was, if the phrase may be pardoned, *local congestions* of capital in particular places, in Lombard street above all places, because it is the centre to which capital naturally converges. Now we have a distributing tendency which diffuses our means through a whole system of international commerce, and to remote extremities much in need of it.

In this country too, and in all countries, the productive forces are in a state very favourable to the lender. They produce him *securities*. In an early stage of commerce these are rare. The land and the funds then were only phrases, and they represent accurately enough the sort of things which, in all countries at similar stages of development, exclusively present the attribute of a security. These are permanence and paying-ness; what you have lent on, must last, and it must pay. Formerly when you once left the soil of the country and the debt of the country, which is a sort of mortgage on the separate industry of the country, there was nothing else to look to—no other things which were sure to last and sure to pay existed. Now, railways, telegraph companies, canals, and other enterprises without number, are competing with land and the State for loanable capital. And to all appearance the competition is only beginning. Every year applications of science create for us or improve for us good securities.

The improved organisation of industry—to use a French phrase, but a most useful phrase—does the same. Forty years ago a man who had a little money by him could hardly do anything with it. Now he does not know what not to do with it. The channels by which the funds of the accumulator are transmitted to the hands of the producer, and the share of the accumulator sent back out of the results of the produce, are enormously improved. In every town of England there is some bank which will give considerable interest for money. That bank takes the money—the capital—to London and there employs it—lends it to some one who makes something. The Limited Companies, Railway Companies, and others of which so much is said, are but machines more or less good for attaining the same result. They attract the money of those who wish for a fixed income—they attract those who hope for an increasing income; they give debentures to the one and shares to the other. Either way they take out of the loan market capital which used to overload and press it down.

The area for employing our capital being thus enlarged, the physical opportunities of employing it being augmented by science, the mental opportunities being increased by the growth of civilised organisation and the improvement of individual intelligence, we must not expect to go back to the old times when capital was not employed, or was scarcely employed. We must expect high rates for money, because money can be with comparative ease turned to good account.

At present, it is true, these causes are counteracted by another. The language is unusual, but we may be understood if we say that the present state of commerce is largely affected by a diminished *opinion of ourselves*. In the autumn we believed that we were entrenching on our capital, and that we should get into difficulties if we did not diminish our transactions. We thought we were not strong enough to go on as we were going. We did diminish our transactions, and the result is a temporary diminution in the demand for capital. This is in fact a derangement of *credit*, though it so small a one as hardly to seem to deserve that name. After 1847 and 1857 there were real lulls and cessations of commercial enterprise. Now there is only a diminution of enterprise. We would not be understood to say that this is the only effect of 1864 which we still feel. The great drop in produce—the losses of last autumn must have fallen somewhere. Very sanguine persons fancied that the returns of the Joint Stock Banks this year would present a spectacle of unmixed prosperity. They *do* present one of marvellous prosperity, all things considered. Still grave traces of disasters of the autumn may be discerned in them, and they would be scarcely worthy of credence if it were not so. But the main losses fall not on the banks but on the traders; and, without wishing to be over-gloomy, it is certain that there must be many who will remember October 1864 as long as they live, and probably that there may be exceptional houses, whose most available means are exhausted, and which exist as "shells" waiting for some slight calamity to destroy them. Perhaps some will fail up to 1867 and 1868, and when their affairs are searched into, the remark will be, "Oh, the old story; they lost all they had in 1864."

But these failures, if they happen, will matter little to the mass of mankind. Most trade will be good, as it has commonly been good. The diminution of the business of which we are now feeling the effect will be temporary. What will not be temporary,—what will be permanent, is a high—we do not say a very high—but in comparison with old times, a high value of capital caused by the plain fact, that so much more in so many ways can be made of capital than used to be made of it.

But there is one cardinal difference between a bullion drain and a demand for capital. The latter—the demand for capital—is a steady force going on constantly month by month and week by week,—a bullion demand, an unfavourable exchange to pay Egypt and India for cotton, is a *catastrophic* phenomenon. It jerks the money market out of its proper place. As this perturbing influence is diminishing, as the settled influences will have greater effect, we expect the value of money to be tolerably steady as well as to be moderately high.

MR BRIGHT ON REPRESENTATION.

Mr Bright is a very satisfactory opponent. He is always vivid, always intelligible, always frank, and seldom fails to excite in reasonable minds that strong prepossession against himself which does more than half the duty of an effective reply. His speeches on the suffrage at least are so exciting and so clear that almost every one reads them, every one who reads them understands them. and almost all thinking men fret under them almost as intellectual insults, till they have seen their own thoughts fairly expressed in relation to them. Mr Bright would be sorry, he says, to call his opponent, Mr Charles Buxton, a "robust politician." Well, no one would object to admit that Mr Bright is himself a robust politician. But there is this disadvantage in political robustness—which means we imagine an excess of animal vigour in attack over the force of reason which may be displayed,—that if it excites keen pleasure amongst partisans, it kindles neutrals and indolent opponents into warm opposition. A great part of the answer to Mr Bright consists in simply expressing and justifying the natural protest which his words excite in reasonable beings.

Mr Bright's whole argument on representative reform is based on the assumption that the representation of the political wishes and interests of a great nation is not in any way an art, but the simplest matter in the world. With reference to many of the schemes proposed for representing minorities, he says: "If representation be not an art,—and "who in this country shall say that it is?—what is the use of "all these tricks, not to complete representation, but to evade "and escape it. What is the representation which we con- "sider the foundation of liberty? If all the five or six "millions were assembled on Salisbury Plain to decide a pub- "lic question, the body would be too large for business and

Digitized by Google

"chaos would come. It has therefore been resolved, that "people in different localities shall send men to meet at a "certain time and place, and to act honourably in the face of "God and the country on behalf of the true and solid in- "terests of the nation. Bnt if you did decide a question on "Salisbury Plain, the majority must carry the day, and if you "split the nation up into constituencies the majority must "carry the day." Well, even on the face of Mr Bright's own exposition,—bad as it is,—representation is not quite so simple a matter,—is far more of an *art*,—than he admits. Supposing any question at issue between the present million of electors and the five million of non-electors, the million of electors would at least have a fair representation on Salisbury Plain, quite force enough to ensure a hearing and a fair discussion. But separate them, as he proposes, into little electoral knots, of the same proportionate numbers of five to one, for the purpose of electing representatives, and the minority of one million are simply wiped out of the electoral system altogether,—eliminated in the process of election, and utterly unrepresented in the deliberative assembly so obtained. Even on his own exposition, therefore, a fair representation of the deliberation on Salisbury Plain will never be got by giving absolute majorities in any constituency the power to determine what opinions are to be expressed and what are to be suppressed in Parliament.

But, of course, few thinking men accept Mr Bright's conception of representation. What we want in Parliament is a fair general representation of the *interests and mind* of the nation, such as may give a voice to every important interest, but also, interest apart, may give a general weight to opinions in some considerable degree proportionate to the energy, intelligence, and culture of the classes by whom they are entertained. If Mr Bright thinks that ordinary agricultural labourers, or other unskilled labourers, like cabmen or navvies, who may be taught about as much as agricultural labourers, navvies, and cabmen usually are taught, have as much right to have their social grievances and political wishes concerning their own education or taxation heard in the House of Commons as barristers or bankers, we quite agree with him; but when he comes to add to this, as he does, that they should have also as much weight in discussing and determining the general policy of the nation as the more intelligent and educated classes, he is talking what seems to us sheer nonsense. Parliament is partly, no doubt, a mechanism for measuring the force of conflicting or opposing interests. But it is also, in still greater measure, a mechanism for sifting and discriminating the value of opinions. Nor can the two functions be separated. It is not till discussion has been so far applied as to determine which opinions are wholly untenable and worthless, that the mere conflict of will can be settled with any benefit. Unless you get a powerful and faithful representation of the higher mind of the nation in Parliament, the voting would become a mere vulgar wrestling of interests, and it is to this Mr Bright's views tend. He wants Parliament to reflect the mind of the majority of six millions of voters. Such a Parliament would not represent the mind of the nation, but the raw and unconsidered wishes of the least educated part of the nation. It would not represent the deliberating power of England, but the incapacity of England for deliberation. The only plausible feature such a scheme has is its vicious simplicity. It would be impossible to have a much worse constitution for the deliberative functions of Parliament, than an exact mirror of the political wishes of six millions of adult Englishmen. But Mr Bright decrees something even worse than this. He wishes for an exact mirror of the wishes of the *majority* of these six millions of Englishmen to the exclusion of the minority. He believes that representation of the mind of the nation means the exclusion of its thinking minority from power. And then he asks us what there is to object to in this. "They are afraid," he says, "of the five or six millions "of grown up Englishmen, men who are allowed to marry, "to keep house, to rear children—men who are expected to "earn their living, who pay taxes, who must obey the laws, "who must be citizens in all honourable conduct; they are "afraid of these five or six millions who by the present "system of representation we shut out, and insultingly shut out, "from the franchise." Now, if Mr Bright means, as we suppose he does, that we are afraid, not of these five millions of persons, but of their ruling us, deciding our destiny, our policy, our laws, our institutions, we do not see anything so silly in the fear. Suppose Mr Bright was a shareholder in a great joint stock company, and was concerned in the election of its board of directors, would he be satisfied to let that board of directors be chosen purely by the majority of small shareholders who had least knowledge of such undertakings and least capacity to work them successfully? Would he, if fretting under the want of knowledge and the want of wisdom shown on the selection of that board, find it any consolation to him that a friend should turn round and say, "Why are "you afraid of these small shareholders? Are they not "allowed to marry, to keep house, to rear children?" Mr Bright, we suspect, would reply that the capacity for contracting marriages, keeping house, and rearing children, though excellent in its way, is not exactly a guarantee for business talents and general intellectual lucidity,—that he did not suspect the small shareholders of any wish to steal his money, but of a deficient experience that would hamper them in the choice of men who knew how to turn it to good account. Marrying and rearing children is an accomplishment no doubt, but scarcely a political accomplishment of any high order.

When Mr Bright came to discuss the minority principle—which we are very happy to see that the member for Bradford, Mr Forster, at least so far appreciates that he has offered a prize to the artisans for the best essay on the subject—he is unfair to it, not because he wishes to be so, but because he is intellectually incapable of treating it with equity. He ridiculed the principle of giving as many votes as there are members to each elector, and permitting him either to divide or *pile* his votes as he pleases, by proving that in the case where there are two and only two members, it might end in putting the member who had fewest but perfectly united supporters, at the head of the pole. No doubt it might, but Lord Grey never dreamt of proposing it for the case of two members. He meant it for the case where there are three or more. And let us see how it would act in that case. "I will suppose," says Mr Bright, "for the sake of illustration, that this borough "had a number of electors equal to 10,000, and that 6,500 "were Liberal, and would support us; that 3,500 would have "been disposed to support Mr Acland when he was a candi- "date. That, of course, is a very wild supposition. Now, "look how it would work. The 3,500, supposing they kept "well together, instead of giving 3,500 votes, which we now "call 'plumpers,' to Mr Acland, each man of them would "give him two, and it would make 7,000; so that Mr Acland "would stand on the poll with 7,000. If the remaining "6,500 who were Liberal were kept together and had an equal "regard for Mr Schofield and myself, and voted steadily for "him and for me, we should have 6,500 each; and if one "more voted for Mr Schofield than for me, of course Mr "Acland would at be the head of the poll as regards us both "And thus the gentleman who came into your town upon "principles repudiated by two-thirds, or a vast majority of "the constituency, under this ingenious scheme would be "returned by your worthy Mayor next day at the head of the "poll."

If we did not know the force of Mr Bright's prejudices we should call this intentional misrepresentation. The true illustration is this. Suppose there were three members for Birmingham, two Liberals and a Tory, and, as Mr Bright says, 6,500 Liberal electors and 3,500 Tory electors, and that each elector had three votes with the power of piling them. The greatest number of votes the Tory candidate could then have, even if all the Tories were united, would be 10,500, three for each Tory elector. But the Liberals would have 19,500 votes to dispose of, and could easily place Mr Bright at the head of the poll with 11,000 votes, and still get in Mr Schofield with the remainder, nearly 8,500. What would the effect of the election then be? The Liberals would have two-thirds of the representation though they had *not so much* as two-thirds of the constituency in their favour, and the Tory member would only secure his seat at all in case of great unanimity in his supporters. In the case of four members the same minority could only carry one out of the four, so that then the Liberals would have three-fourths of the representation with less than two-thirds of the constituency in their favour. Now, if we are really to have a representation, even a *numerical* representation, of the popular mind, is it or is not unfair that opinions which are held by more than one-third of the constituency should have *at best* one-third of the representation? Even on Mr Bright's own principles we cannot see how he could maintain it to be unfair.

Digitized by Google

The more carefully we consider the whole subject the more clear it appears to us that the only just and possible Reform is the one we have recently suggested in these columns, which would, we think, at once give its due representation to the energy of the North of England, and at the same time introduce a considerable number of working class members into the House of Commons. Mr Bright pleads so passionately, less, we imagine, for the cause which he believes to be the cause he loves, than for an increased influence in Parliament for the manufacturing energy of the North. We believe that demand to be no less just than the demand made on behalf of the working class, and we can see no scheme that legitimately satisfies both, except the plan we have proposed for disfranchising gradually the very small,—the habitually threatened—boroughs, and distributing the seats thus gained among the larger manufacturing towns, so as to give three members for each. In these towns, and in these alone, the suffrage should be so reduced as to include the bulk of the working class, but Lord Grey's principle of cumulative voting should be combined with it, to secure at least one member certainly for the wealth and capital of these towns, besides the two who might be chosen by the working class. In this way we may manage to effect the best part of Mr Bright's wishes: as for the worst and most levelling part of those wishes, they are shared by so few reasonable beings in this country, that we may leave them to die the natural death which violent and unreasonable desires must expect in a tranquil and contented land.

COTTON PROSPECTS FOR THE YEAR 1865.

It is important as well as interesting to endeavour to form some reasonable estimate of what is likely to be the position of our great staple manufacture during the year on which we are just entering,—what will probably be the available supply of the raw material, what the extent of demand for the manufactured article, and how far the two together will fall short of affording full employment to the factory population. Of course at this early period of the year much of our estimate must be conjectural, and any conjectures we may form are liable to be contradicted by unforeseen circumstances which may arise as time goes on; but still we shall probably be able to reach that degree of certainty which is considered by prudent merchants as an adequate basis for their operations. On the whole the prospects are encouraging—decidedly more so than at any period since the American war began.

There was a period in autumn last when there was some ground for a sanguine hope that the conflict on the other side the Atlantic was about to cease; a few more Federal defeats and discouragements at that time might probably have brought about that desirable consummation; but at the most critical moment of the strife, the taking of Atlanta and some minor successes on the part of the North dispersed the gloom and discouragement that had been creeping over them, and the peace party disappeared almost as quickly as it had emerged. Now the war rages as before; and it would clearly not be safe to base mercantile transactions upon any other assumption than that of a continuance of the conflict for an indefinite period. At the same time the blockade has become gradually more complete and successful, and our supply of American cotton will probably be somewhat smaller than last year. The accounts from Bombay and Bengal are not as satisfactory as could be wished; but there can be no doubt that a much greater breadth of land has been planted, and some increase may, no doubt, be counted on. But general reasoners and observers have always been far too sanguine regarding our Indian supply, in spite of our yearly efforts to bring them to a soberer way of thinking. The first sudden demand and advance in price brought us a large additional supply, because it drained the country of existing *stocks*, but as soon as that source of increase was exhausted, a far higher price failed to stimulate any very great fresh growth. Thus, Bombay sent us before the war in

	bales.
1860	508,000
1861	906,000
1862	915,000
1863	899,000
1864	1,043,000

showing a very moderate progressive increase indeed after the first spurt. Madras again sent:—

	bales.
1860	55,000
1861	80,000
1862	124,000
1853	177,000
1864	173,000

But Bengal, which never used to send us any cotton at all, appears to have applied itself vigorously to the cultivation, and its supply rose from 30,000 bales in 1862 to 182,000 in 1864.

Egypt and Brazil are, next to India, our two most hopeful sources of supply, and are making great exertions, and sowing fresh land. Thus:—

	Egypt. bales.	Brazil. bales.
1860	109,000	103,000
1861	97,000	100,000
1862	132,000	134,000
1863	204,000	138,000
1864	257,000	212,000

The accounts from Turkey are not very good. From China and Japan an increase is expected, but the bags are small, and the aggregate quantity not very large.

The following is the best estimate we can form of our supply for the current year, after a careful investigation:—

	bales.	Weight of bale. lbs.
America	150,000	438
Egypt	300,000	500
Brazil	250,000	180
India	1,500,000	365
Peru and West Indies	100,000	200
Turkey	100,000	355
China and Japan	500,000	240
	2,900,000	

The *apparent* aggregate increase of supply since the commencement of the cotton famine is greater than the real one, as shown at least by the trade accounts, inasmuch as the average weight of the bales has been steadily decreasing. The following table gives the full statement of the imports:—

	bales.	Average weight. lbs.	Aggregate in lbs.
1860	3,366,000	425	1,430,550,000
1861	3,036,000	415	1,259,940,000
1862	1,445,000	370	534,650,000
1863	1,932,000	364	703,248,000
1864	2,587,000	347	897,689,000
1865 (estimated)	2,900,000	341	988,900,000

The import last year was considerably greater than the manufacturers could consume *at the existing prices*, and the consequence was a considerable increase of stock in the ports, viz., 575,000 bales, against 327,000 at the close of 1863. The weekly consumption has been as follows:—

	bales.	lbs.	lbs.
1860	48,500	425	20,612,500
1861	45,500	415	18,882,500
1862	22,800	370	8,436,000
1863	26,500	364	9,646,000
1864	30,900	347	10,722,300

The export during the past year has been 732,000 bales: it is expected to reach 800,000 in 1865,—leaving 2,100,000 for our own consumption without any diminution of stock. This would allow a weekly consumption of about 40,000 bales or 13,640,000 lbs. The sole questions remaining for consideration are, *first*, whether this supply will suffice to employ our mills and to produce as much cotton yarn and cloth as the world will buy?—and, *secondly*, what effect on prices this supply will probably produce?

In 1860, when all factories were fully employed and every man was producing as much as he could, the apparent weekly consumption reached 48,500 bales; but as at the end of that year the stocks in the hands of the trade were unusually large, the real consumption was probably only 47,000 bales of 425 lbs each, or about 20,000,000 lbs. For 1865, we have a supply available of 40,000 bales of 341 lbs each, or 13,640,000 lbs;—and as we may, perhaps, set off the dirtier character of the cotton now used against the greater economy in its use, and the various substitutes or rather auxiliaries employed to eke it out,—we may say that we shall virtually have *two-thirds* or 66 per cent. of the quantity we used up in our briskest and most prosperous year. But the present character of most of the cotton employed, being so much shorter and dirtier than formerly, requires a much greater amount of manipulation. The same number of spindles and looms cannot produce the

Digitized by Google

same quantity of yarn and cloth, the cotton has to be passed through more processes and a greater amount of machinery, and the machinery has to run slower than before. It is not easy—perhaps not possible—to estimate the amount of this change; but we shall probably be safe in assuming that all the factories existing in 1860 could not now work up more than 18,000,000 lbs instead of the 20,000,000 they did work up then. Now, since that date, numbers of old concerns have been broken up or gone into such complete disrepair that they will never start again:—others no doubt have been created, and perhaps the one may be set against the other. In that case, we only want 18,000,000 lbs a week, and we have 13,640,000 lbs, or as nearly as may be 75 per cent. of the extreme quantity we want, or could use.

Now few persons, we believe, who are aware of the great amount of disorganisation and dispersion which has occurred among the factory population during the last three or four years,—the number who have migrated or emigrated, the number who have gone to service, the number who have sought and found other occupations—would consider that more than 80 or 85 per cent. at the outside of the former factory population is now extant or to be found in Lancashire and Cheshire, available for their old work. And when we add to this the further consideration that more hands as well as more machinery than formerly are required to spin and weave a given quantity of the inferior cotton now alone attainable,—we think there is every reason to hope that, before the end of 1865, very nearly the whole of the manufacturing population, strictly so called, will or may be in full employment. The *subsidiary* trades,—the carriers, dyers, bleachers, printers, &c.,—will of course not recover so completely;—since 13,640,000 lbs will not furnish to *them* as much employment as 20,000,000 lbs.

That prices of cotton must fall, as indeed they are falling, there can we apprehend be no doubt;—though at what rate they may decline, or at what point they may stop, we should be sorry to hazard any confident conjecture. Thus much, however, is certain. The production of cotton goods in 1860 was notoriously in excess of the aggregate demand of the world, even at the comparatively low prices then prevailing, for stocks accumulated in every market. Now, is it probable that if the world could not consume 20,000,000 lbs a week when Orleans was at 8d and Surats at 5d per lb, it will be able to consume 13,640,000 lbs, with Orleans at 24d and Surats at 18d per lb? As soon as prices reach a *moderately* low limit, there can be no doubt that both production and demand will increase, for all the markets of the world are bare of stocks and need to replenish them;—but what "moderation" is, whether 12d—or 9d—for East Indian cotton, no man can venture to pronounce.

THE PROSPECTS OF THE CONSTITUTIONAL CONFLICT IN PRUSSIA.

The Constitutionalists of Prussia occupy this session a singular and we greatly fear an untenable position. They are not inclined it would seem, as was expected in many quarters, to reconcile themselves with the Court, or to come to a tacit understanding that they will suspend the Constitution if Prussia is only aggrandised. They are pleased, no doubt, with the result of the campaign in Schleswig-Holstein—for that is human nature,—but they have been harassed and exasperated during the recess into a temper even more pertinacious than before. Herr von Bismark, a true absolutist, instead of remaining content with the obedience of the country, has endeavoured to make the Liberals declare that they prefer despotic rule, and commenced a series of small but irritating persecutions. Such of the majority as are officials have been systematically snubbed, the Press has been virtually suppressed, municipal elections have been overridden, and every opportunity has been taken of bringing leading Liberals to trial. They are, therefore, resolved, as the only means of terminating these excesses, to consent to no compromise which does not involve the substantial control of the Chamber over the annual budget. Even the Catholic section of the House, whose action was considered doubtful, the Pope having endorsed Her von Bismark's opinions almost *en masse*, have adhered to the Liberal party, and assert the right of the nation to control the expenditure of its own money. The contest, therefore, of last session will be renewed once more, but the circumstances are increasingly unfavourable to the national side.

In the first, place the disposition of the Court party towards a compromise has in no way improved. The King's speech, it is true, is generally moderate in its tone, and he expresses a strong desire to arrive at an "understanding," but the moderation disappears when he speaks of the army, which he evidently will reorganise whether the country likes it or not, and the "understanding" he seeks is explained by Count Eulenberg as pretty much equivalent to a readiness to obey. The King may indeed give way on trivial points, but he is quite resolved that the army shall be turned into a force capable of aggression, that the Government shall be authorised to spend all it deems necessary, and that the throne shall remain the only "pivot of power." In short, reconciliation is only possible if the Chamber will give way. Count Eulenberg, indeed, on the very first day of the session openly expressed the Court sentiment, declaring with naïf surprise and regret that agreement was further off than ever because the President appeared to think "agreement only possible, provided the Government resolve "to adopt the course of the Chamber of Deputies," which is the precise truth, but which he intended as a *reductio ad absurdum*. The Court being thus determined finds its hand greatly strengthened by events. The army is enthusiastic for the throne, the war having given it a self-confidence always pleasant to soldiers, and brought out its irresistible strength against insurgents as well as enemies. The new organisation, too, has worked so well that the Chamber, in resisting it, is in the unpopular position of a body which resists a visibly sound reform upon abstract constitutional grounds. Then the rescue of Schleswig and Holstein, though it has not softened the representatives, has diminished the irritation of the masses, and particularly of the peasantry, who care a little for freedom, and very much indeed for the aggrandisement of Prussia. With the army and the masses friendly to Government, there is no chance even of the passive insurrection called non-payment of taxes, and for constitutional resistance there is as yet no loophole. If the Government wanted money, the Chamber might even now win the game, for it is understood that the Prussians will not pay taxes levied by royal decree alone; but the Administration of Prussia, to its credit be it spoken, is the thriftiest, not to say the most penurious, in the whole world. The vast establishment maintained in Berlin to check expenses honestly earns its cost, and Herr von Bismark has been enabled, partly by the traditionary thrift of the departments, partly by sound management, and partly by the unscrupulous plunder of Jutland, to carry on a successful campaign without a deficit. According to the Budget presented on the 17th inst. by Herr von Bodelschwing, the receipts of the year to come will be 150,714,031 thalers against an expenditure permanent and temporary of the same amount, and no loan will be required—a result which, though it does not show the truth as to the past year, is still remarkable. The Court evidently can manage without new taxes, and till abolished by bills which the King can veto, the collection of all taxes previously voted remains always legal. So long, therefore, as the expenditure can be kept within the receipts, the Chamber cannot "stop the sup-"plies," and though it may remonstrate and censure, and perhaps stir up some feeling in its own favour, the King's Government can go on as if nothing had been said, without embarrassment to the Exchequer, and without fear of popular disturbance. It is, in fact, as independent as if there were no Constitution, and the country party of Prussia has to resist its Strafford while the levy of ship-money is legal.

It is possible that the King, who, though an absolutist, is not the kind of man given to *coups d'état*, may adopt a quiet policy, and simply place no business before the Chamber; but this is not, we are told, the belief of the Liberal party. They think that on the first adverse vote the King will pronounce the Chamber impracticable, send the members to their homes, and reign alone at least for some time to come. If he does, there are apparently no means of resistance whatever, the country being too well off to bear disorder, and resistance to the tax-gatherer yielding only a useless amount of individual suffering. Herr von Bismark will then be unchecked even by free speech, and the pleasure of showing that he can control "revolution" at home as well as defy the enemies of Prussia abroad will probably tempt him to the course which, however needless, seems to have in itself such temptation for Ministers of absolutist temperament. He has ideas to carry

Digitized by Google

out, too, which free speech in Parliament would impede, and many farsighted Liberals admit their belief that a few weeks will see the Chamber dismissed, and Prussia openly erased from the list of constitutional countries. In that case, the Prussians will have paid for an unjustifiable aggression by the temporary surrender of the forms as well as reality of liberty.

Agriculture.

MEAT SUPPLIES, PRESENT AND PROSPECTIVE.

THE high price and comparative scarcity of meat are topics of universal interest, from the householder, who feels the pinch on his pecuniary resources, to the cabinet minister, who feels not altogether easy as to possible pressure on the resources of the country. We regard the modern rise in the price of meat, not only without apprehension, but as one of the means by which British husbandry will by-and-by come to take its proper place in the various industries of the nation. Meat is dear because the labouring classes are earning good and constant wages, and they expend a considerable portion of such wages in better food than they formerly bought, thus creating a largely increased and effective demand for meat. And with this increased demand for meat there has been no equivalent increase in the supply. We find in society and in the press some surprise expressed that an effective demand has not produced a more adequate supply, and some not always complimentary allusions are made to the unreadiness of farmers in meeting the increased demand. But such remarks only prove how very little knowledge of the state and operations of English agriculture exists in the mind of the non-agricultural public. We have no public statistics which enable us to judge with any precision the numbers of live stock in this country now and at any antecedent period. But the careful statistics of live and dead meat for consumption in the metropolis which Mr Robert Herbert from time to time furnishes to the Royal Agricultural Society's Journal and other publications, may serve as proximate guides to reliable estimates of the effect of our urgent demand on the supplies of meat.

In his paper, read before the British Association last autumn, Mr Herbert estimates the number of beasts in the different agricultural districts of England at 4,700,000, and of sheep at 32,000,000; and these numbers are said to indicate little if any increase during the last twenty years. But admitting the standing stock not to be increased during that time, it will be found that larger supplies have proceeded from that number in two ways,—first, the size and quality of the animals are superior, and they are earlier mature, are sold fat when younger than formerly. Thus, a farmer with a herd of 20 cows, or a flock of 200 ewes, now sending his fat steers to market at two or two and a half years old, and his fat sheep at from 14 to 18 months old, will furnish more meat year by year than the farmer of yore, whose steers were kept till four years old, and his sheep till two years old and upwards, before they went to the meat market. And this we believe to have been the main source of such increased supplies of meat as we have obtained during the last twenty years. What is now wanted is an increase in the numbers of live stock on English farms.

Of late years imports of live stock have increased. Thus in 1853, 125,253 beasts and 230,037 sheep and lambs were imported, while in 1863 the imported beasts had increased to 150,898, and sheep and lambs to 430,788. This is no great increase for ten years, during the whole of which our market has offered the inducement of high prices. It must be noted also that the foreign stock, both in condition and quality, are much inferior to the English. Neither do we look for any great improvement in foreign stock, or any important increase of their numbers, for stock improvement is a work of time, and the climate of the continent of Europe—hot in summer and severely cold in winter—presents obstacles to stock breeding and feeding not easily to be overcome.

Even in this country, where there are so many advantages for stock-keeping, there are serious difficulties in the way of a general increase. The first increase must, of course, consist of breeding stock, which ought to be kept on many farms where only feeding stock have hitherto been kept, or where there has heretofore been little stock of any kind. This at once involves a considerable outlay of capital in addition to that already employed. Cows and ewes must be bought, and kept for, say a year, before they produce young, and such young must be reared and well fed; as to cattle, for two or three years, and as to sheep, from one year to eighteen months, before they can be turned into money. And then to enable this extra stock to be kept, additional provision for them must be made in the shape of green and root crops, by cutting hay and straw into chaff, pulping the roots, and, perhaps, by purchasing some small quantity of extra food, such as linseed cake, all involving outlay, and deferred though certainly greater returns. Then additional buildings are almost universally needed, in order that more breeding stock may be kept with advantage, requiring an outlay by the landlord, which he is usually very loth to make.

But the farmers already complain that they have no security for the capital they at present employ, that they are yearly tenants, that they are overrun with game and game watchers, and in many cases they require their land to be drained and extra buildings put up before they can hope to breed stock profitably. We need scarcely suggest to the reader, especially if he has any practical knowledge of English agriculture, what an amount of obstacle to be overcome is here indicated. And he will experience very little difficulty in understanding why even the actual prices of meat and wool fail to provide the consuming public with that extra supply of meat the exigencies of our society demand.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 19th inst. The return for the previous week is added:—

DEBTOR.	Jan. 19, 1865. f c		Jan. 12, 1865. f c
Capital of the bank	182,500,000 0	.....	182,500,000 0
Profits, in addition to capital	6,974,128 93	.....	6,958,526 9
Reserve of the bank and branches	22,105,750 14	.....	22,105,750 14
New reserve	4,000,000 0	.....	4,000,000 0
Notes in circulation and at the branches	817,443,275 0	.....	806,325,675 0
Drafts drawn by the bank on the branches of the bank payable in Paris or in the provinces	5,462,364 77	.....	7,223,278 2

The inquiry into banking, currency, and commercial questions, which the Superior Council of Commerce is to make, will be the most searching and comprehensive ever instituted in any country, not excepting England. It is said that his Excellency, M. Fould, whose practical knowledge of those questions, gained partly as banker, partly as Minister of Finance, is, perhaps, more extensive and profound than that of any living man, will consent to give evidence. The Messrs Pereire will, no doubt, state the

Digitized by Google

results of their experience, and will expound their peculiar doctrines. And many of the theorists and practical men of this country whose opinions are of weight on banking matters, will be summoned before the Council. Invitations to appear will also be addressed to eminent men of other countries, especially of England, and among the English there will be both defenders and adversaries o the present currency system, and the present Bank Act of Englandf That the investigation will be conducted with remarkable talent there can be no doubt; seeing that M. Rouher, Minister of State, is President of the Commission, and M. Michael Chevalier one of its members. An excellent suggestion has been made by M. Forcade, the brilliant writer of the political article in the *Revue des Deux Mondes*;—namely, that the evidence shall be published day by day in the *Moniteur*. In that way it would be read by everybody, and would be discussed in the newspapers: whereas if it be reserved for a large blue book, it will be consulted by comparatively few persons.

One of the newspapers has commenced the publication of a series of articles "inspired" by the Bank of France, in reply to the attacks made on that establishment. But the penman selected by the Bank is not equal to such rude adversaries as M. Michael Chevalier and M. Isaac Pereire; and besides the approach of the *Enquete*, when all questions relative to the Bank will be treated by really competent persons, deprives anything that can now be urged on behalf of the Bank of all interest. There is, however, one point in the lucubrations of the inspired scribe, which may be noted:—and that is, that the Bank would not object to sell its Government stock, provided it were allowed to employ the proceeds in establishing new branches.

Returns relative to the collection of direct and indirect taxes have been published. In 1864, the total of the former due was 520,583,000f, and the amount paid up was 507,331,000f. In 1863, the total due was 513,230,000f, of which 500,061,000f were paid in the course of the year. A month's credit being allowed for the payment of taxes, the aforesaid 507,331,000f exceeded by 30,130,000f what could have legally been exacted. In 1863, the amount paid in advance was 29,600,000f. In 1864, the legal expenses for enforcing payment were at the rate of 1f 28c per 1,000f; in 1863, they were 1f 33c.

As to the indirect taxes, the amount received in 1864 was 1,176,692,000f, and it was less by 67,685,000f than that of 1863, and 13,995,000f less than that of 1862. On comparing 1864 and 1863 item by item, it will appear that there is a decline of 77,006,000f in the import duties on foreign and colonial sugar, and in the duty on the manufacture of beetroot sugar. It is owing to the fact that under the last law on sugar, four months' credit are allowed for the payment of duties, and that as drawback is abolished, the amount to be paid is less than formerly. There is also a decline in the registration duties of 2,852,000f; in the grain duties of 1,506.000f; in the customs duties of 5,611,000f; and of about 500,000f in two other items. These reductions are natural, the registration and customs duties having been reduced, and the imports of grain having been less on account of the excellent harvest. The various diminutions, which amount altogether to 87,268,000f, are compensated to the extent of 19,593,000f by an increase in the revenue from the stamp, wine, and salt duties, the sale of tobacco and gunpowder, and the post office, &c. In definitive, therefore, the decline of 67,685,000f, which remains after deducting the increase, is more apparent than real, inasmuch as it is represented by sugar duties which have to be paid. In addition, a sum of 4,372,000f on other duties is owing for 1864.

The following is a detail of the indirect taxes for the last and the two preceding years:—

Designation of Taxes.	1864. f		1863. f		1862. f
Registration, mortgage dues, &c.	328,586,000	...	331,438,000	...	318,510,000
Stamp duties	76,340,000	...	73,072,000	...	65,296,000
Customs duties on grain	308.000	...	1,614,000	...	4,12 ,000

Total	1,176,692,000	...	1,344,377,000	...	1,190,687,000

The Peruvian Government having consented to sell guano in France at a price not exceeding 310f per ton, instead of 325f as heretofore, the French Government has reduced the duty on that article imported in foreign ships from 30f the ton to 18f. This arrangement came into force on the 15th of this month.

The quantity of alcohol manufactured in France and imported from the commencement of the season (1st October) to the end of November was 389,509 hectolitres (the hectolitre is rather more than 22 gallons); and adding thereto the stock in hand at the beginning of the season, there was a total of 594,524 hectolitres. The quantity taken for consumption was 247,587 hectolitres, and there remained on hand 346,937.

The Municipal authorities of several localities having taken on themselves to fix the price at which meat shall be sold, the Minister of Commerce, M. Behic, has addressed a circular to the Prefect of departments, pointing out the inconvenience and injustice of the system, and its opposition to the principles of liberty of commerce.

The shareholders of the Caisse Generale des Assurances Agricoles, in a recent meeting, authorised the raising of a loan of 1,700,000f, by means of the issue of bonds at 85f to be paid off by annual drawings in twenty years from 1866.

The following is the market report:—

Flour.—Business at *Paris* continues inactive, and yesterday the quotations were 43f to 48f the sack of 157 kilogs. Six marks, disposable, were 47f 50c to 47f 75c current month; March and April, 48f to 48f 25c; May and June, 50f; four months of May, 51f to 51f 25c. Type Paris the 101 kilogs, current month, 29f to 29f 25c.

Wheat.—Provincial markets generally have declined. At *Paris*, yesterday, choice white was 26f 50c the 50 kilogs; red, 26f; first qualities, 25f 50c; good sorts, 25f; ordinary, 24f to 24f 50c.

Cotton.—At *Havre*, in the week ending Friday, the sales were 5,835 bales, and the arrivals 5,818. The closing prices were the same as those of the last week for United States, Surat, and Bengal, but 5f lower for Tinnevelly, China, Jumel, Brazil, and French West India, and 10f for Hayti. Consequently, low New Orleans was 343f the 50 kilogs; good ordinary Broach, 235f; ditto Tinnevelly and Madras, 228f; Jumel, 315f. Yesterday, French West India was 325f; Pernambuco, 300f; Surat Oomrawattee, 225f; Tinnevelly, 170f; Madras, 200f; China, 170f to 177f 50c.

Coffee.—At *Havre*, in the week ending Friday, business was somewhat animated, and prices rose. The sales were 4,800 sacks Hayti Port au Prince, disposable, for delivery, 82f 50c to 85f the 50 kilogs in bond; 200 ditto ditto, damaged, 78f 50c; 200 ditto Cape, 85f; 2,520 Rio, unwashed, disposable or for delivery, 74f 50c to 76f; 3;350 ditto ditto, for delivery, 74f to 80f; 23 ditto washed, disposable, 100f; 2,250 Santos, 78f to 79f; 250 ditto, washed, 94f; 1,500 Tellicherry, 90f. The arrivals were 21,500 sacks. This week, Rio disposable, 74f; ditto for delivery, 76f 50c, 78f, and 80f; Cape, 86f 50c; Saint Marc, 91f; Hayti Port au Prince, 84f and 83f; Gonaives, 89f; Mysore, 89f; Malabar, 90f; the whole in bond. At *Nantes*, last week, no sales were made, and nothing done this week. At *Bordeaux*, last week, 225 sacks Mysore, 120f, duty paid; 100 ditto, 119f; 92 Bahia, 83f in bond; 90 ditto, 90f; 4,600 Hayti, for delivery, at prices kept secret. This week, Mysore 120f. At *Marseilles*, last week, 3,861 sacks Rio, for delivery, 80f in bond; 655 ditto, 75f; 3,800 ditto, at prices kept secret; 3,200 Hayti, 84f; 400 St Domingo, 85f. This week, Bahia for delivery, 70f; St Domingo, at prices kept secret; Maracaibo, 87f.

Sugar.—At *Havre*, in the week which ended Friday, the sales were 30 casks French West India, bonne quatrieme, 51f the 50 kilogs duty paid; 180 usine, 58f 50c to 63f; 900 casks Havana, 31f 50c; No. 12 in bond, 31f to 32f 50c; 200 Java for re-exportation, 30f 50c, No. 12 in bond. The arrivals were about 140 casks and 600 sacks. This week, Havana, 31f 75c. At *Nantes*, last week, the sales were 540 sacks Reunion, new crop, bonne quatrieme, 54f 50c; 164 ditto, 54f 75c duty paid; 5,830 Mauritius, 32f 50c in bond; 122 sacks French West India, 51f; 11 usine, 61f; and some 58f 50c duty paid. 200 sacks Pernambuco, 31f 50c in bond. This week, French West India usine, 57f 50c, 58f, and 59f 50c. At *Bordeaux*, last week, the sales were 2,300 sacks Reunion, bonne quatrieme, 54f 50c; 800 at prices kept secret; 11,000 sacks Mauritius, 55f, bonne quatrieme; 400 sacks Madras, ditto, 55f, the whole duty paid. 716 casks Havana, No. 12, 32f in bond. No sales this week. At *Marseilles*, last week, the sales were 3,200 sacks Brazil, 30f in bond; 2,000 casks Havana, No. 12, 33f; 1,500 ditto, 34f; 3,000 bales Mauritius, at prices kept secret. Nothing done this week.

Indigo.—At *Havre*, in the week ending Friday, business was somewhat buoyant, and prices rose. The sales were 40 chests Bengal at 10c to 45c the half-kilog above the last estimate; 37 ditto at 20c and 17 ditto at 12c above. The arrivals were 28 serons. This week, some chests Bengal have been sold at prices kept secret. At *Bordeaux*, last week, 12 chests Bengal and 20 Kurpah at prices not stated. The arrivals were 262 chests. This week, 27 chests Madras and 12 Kurpah at prices not stated.

Hides.—At *Havre*, in the week ending Friday, the sales were 2,573 Monte Video dry cow, 91f to 99f the 50 kilogs; 500 Rio Grande salted ox, 55f; 758 Para salted, 37f, quality indifferent; 1,447 Ceara salted, 68f; 340 Rio Hacha salted dry ox, 61f; 8 bales Calcutta calf, 100f; 737 horse, Monte Video salted, 42f 50c; 343 ditto, Monte Video dry, 6f 50c each. The arrivals were about 31,000. This week, Pernambuco, 68f; Monte Video salted cow, 42f; Valparaiso salted ox, 52f; Uraguay, 61f; Rio Grande salted cow, 53f; Valparaiso salted cow 42f 50c, ox 52f; Monte Video dry cow, 95f; Buenos Ayros ditto cow, 81f; New York salted cow, 37f.

Wool.—At *Havre*, in the week which ended Friday, the sales were 20 bales Monte Video, washed, at prices kept secret; 171 do sheepskins, unwashed, 1f 71c the kilog; 4 ditto lambskin, washed, 1f 27c. By auction, 727 bales Monte Video, unwashed, 105f to 285f the 100 kilogs; 16 ditto, washed, 230f to 322f 50c; 505 Buenos Ayres, unwashed, 147f 50c; 3 ditto, washed, 200f to 240f; 12 ditto, 375f to 575f: 3 Busaco, unwashed, 180f; 52 ditto, washed, 515f to 525f; 97 Bombay, unwashed, 115f to 275f; 140 Peru, unwashed, 180f to 217f 50c; 104 ditto, washed, 235f to 430f; 8 Chili, unwashed, 175f; 12 Rio Grande, unwashed, 150f to 210f; washed, 190f to 230f. The arrivals were 18 bales and 50 sacks. This week, Buenos Ayres, unwashed, 167f 50c to 175f the 100 kilogs; ditto, lambskin, 130f unwashed; Monte Video, 252f 50c ditto.

Digitized by Google

TALLOW.—At *Havre*, in the week ending Friday, the sales were 17 casks New York, 49f 50c to 50f 50c the 50 kilogs. 220 Buenos Ayres for delivery, 50f. The arrivals were about 229 casks. This week, New York, 51f 50c; inferior, 49f 75c to 50c; La Plata, 47f 50c and 50f; Buenos Ayres, 50f; ditto, yellow, 48f 50c At *Paris*, yesterday, the 100 kilogs were 103f 70c, octroi duty included.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, 62f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc 73f; beetroot, 67f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The general customs duties on articles imported into Hamburg have been reduced to one quarter marc, currency per 100 marcs banco value of such merchandise, and that all goods imported, not exceeding in value fifty marcs banco, will be admitted duty free.

Statement of the business of the United States Assay Office at New York for the month ending December 31, 1864:—

In reference to the freight market, the *Shipping Gazette* observes:—The tonnage loading on the berth for India and China is 44,000 tons, and for Australia and New Zealand 44,900 tons. There is little animation in freights, and vessels are more plentiful. Only 45s per register ton is obtainable for large vessels to Australia. Coal freights from the outports are more freely offered for the Cape of Good Hope, Mauritius, Aden, Bombay, Point de Galle, and Manilla and rates are firm. Forward vessels can be placed from Bombay at 60s per ton for cotton; 75s per ton is offered for moderate-sized ships from Java to the Continent.

The following statement shows the value of 100*l* of tithe rent charge for each year since the passing of the Tithe Commutation Act, viz.:—

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 18th day of January, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,061,675	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,411,675
		Silver Bullion	...
	28,061,675		28,061,675

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	11,023,211
Rest	3,489,023	Other Securities	18,269,062
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4,186,614	Notes	7,350,975
		Gold and Silver Coin	756,552
Other Deposits	14,658,015		
Seven Day and other Bills	513,148		
	37,399,800		37,399,800

Dated the 19th January 1865. W. MILLER, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,223,848	Securities	29,389,273
Public Deposits	4,186,614	Coin and Bullion	14,168,227
Private Deposits	14,658,015		
	40,068,477		43,557,500

The balance of Assets above Liabilities being 3,489,023*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£211,070
A DECREASE of Public Deposits of	258,931
A DECREASE of Other Deposits of	1,516,151
No change in Government Securities.	
A DECREASE of Other Securities of	1,568,607
An INCREASE of Bullion of	70,837
An INCREASE of Rest of	66,232
A DECREASE of Reserve of	157,578

The repayment of advances to the Bank and the diminished demand for money have caused an important decline in the other securities. At the same time the large withdrawals of private deposits have prevented any increase in the reserve, which, on the other hand, is rather lower. The bullion shows a small augmentation.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of

In the corresponding week of 1855, the English and French Ambassadors in Vienna, and received powers to treat for peace. The total subscription for the French loan of 500,000,000f had reached 2,198,000,000f.

In 1862, the suspension of specie payments in New York had been announced. The prospectus of a Morocco loan for 426,000*l* had been issued in London, where the money market was moderately easy.

In 1863, news had been received of the conclusion of a commercial treaty with Burmah. The Spanish Ministry had resigned. The Bank rate had been advanced from 3 to 4 per cent. to meet the movement of that of the Bank of France to 5 per cent.

In 1864, Austria had forwarded a despatch to the Bavarian Government, and arrangements were being made for the advancement of Austrian troops. The King of Hanover had reluctantly sanctioned the march of Prussian troops through his kingdom. The ultimatum of Austria and Prussia had been delivered to the Danish Minister of Foreign Affairs. Denmark had refused to accede to the summons of Austria and Prussia, and the troops of those powers had received orders to march. Advices from Mexico had come to hand, with information that General Dobledo had given in his adhesion to the French. A new Spanish Ministry had been formed. In America the shelling of Charleston was still being continued. Congress had re-assembled at Washington. Johnson was actively engaged in re-organising his army, and had formed his lines 35 miles from Chattanooga. The ratifications of the treaty of commerce between France and Italy had been exchanged. In the discount market the demand for money was active. The prices of public securities continued to decline, owing to the critical position of affairs in the North of Germany. The Bank of England had raised the rate of discount from 7 to 8 per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 3,354,681*l*; in 1862, a deficiency of 1,733,021*l*; in 1863, a deficiency of 4,400,713*l*; and in 1864, a deficiency of 6,391,794*l*. In 1865, the deficiency is 3,611,047*l*.

Discount and Money Market.—The demand for discount this week has been generally moderate, although on one or two days some large amounts of Indian and Australian bills fell due, which temporarily increased the inquiry. The rate for short bills has been about 5⅜ per cent., but the best paper has in many cases been taken this afternoon at only 5¼. The impression appears to be in some quarters gaining ground that a further reduction of the Bank minimum may shortly be expected. The following are the current charges for paper of various dates :—

30 to 60 days	5⅜ per cent.
3 months	5⅜ per cent.
4 months	5⅜ per cent.
6 months—Bank bills	5¼ per cent.
6 months—Trade ditto	6 ¼ per cent.

On the Stock Exchange, the supply of capital is abundant, and loans are nominally quoted 3 to 4 per cent.

Annexed are the rates of interest allowed on deposits :—

Joint Stock Banks	*4½ per cent.
Discount houses at call	4½ per cent.
Do. with seven days' notice	4¾ per cent.
Do. fourteen days	5 per cent.

* At the London and Westminster 3½ per cent. only on sums below 500*l*.

About 32,000*l* in gold was taken to the Bank yesterday. There were no operations to-day.

On Tuesday, proposals for the Italian 5 per Cent. State-Domain Loan were issued, with 8,000,000*l* nominal capital, in bonds to bearer of 20*l*, or 505 francs or lire each, and larger amounts, with half-yearly coupons attached, payable 1st April and 1st October, at 77*l* 10s per cent. The bonds to bear interest at 5 per cent. on their nominal amount, and are to be redeemed at 100*l* by fifteen equal drawings in fifteen years, commencing 1st January, and payable 1st April, 1866. Each bond further carries with it a free coupon *de jouissance*, representing its *pro rata* participation in 10 per cent. of any profit realised by the sale of the domains over their valuation, which, at the average rate at which sales are now making, may be estimated at from 2*l* to 3*l* on a 100*l* bond, receivable over the fifteen years.

The Committee of the Stock Exchange have ordered the shares of the Italian Land Company to be quoted in the daily official list.

The tenders for the Cape of Good Hope loan were opened on Tuesday last. A total of 295,000*l* was offered, at prices ranging from 90 to 105. The minimum price was 90. Tenders above 91*l* 0s 6d received the amount in full; those below were rejected. The principal tenders were from Messrs J. and A. Scrimgeour, 234,000*l* at 91*l* 0s 6d; and Messrs Linton and Clarke 25,000*l*, at 93*l* 5s to 95*l* 5s.

The biddings for 300,000*l* Government bills on India took place at the Bank of England on Wednesday. 165,000*l* was allotted on Calcutta, 120,000*l* on Bombay, and 10,100*l* on Madras. The minimum prices were 1s 11⅛d per rupee on Calcutta and Madras, and 1s 11¾d on Bombay. Tenders on Calcutta and Madras at 1s 11⅛d will receive in full, and on Bombay, at 1s 11⅛d, about 13 per cent.; above these quotations applicants will receive in full.

The return of the Bank of France for this week gives the following results :—

	£
Increase.	
Bullion	136,000
Circulation	444,000
Decrease.	
Treasury balance	90,000
Current accounts	440,000
Bills discounted	420,000

There is no material change in the advances.

Subjoined are the rates of discount in the principal cities of the Continent, showing a decline at Berlin :—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	4½	4½
Vienna	5	5 ½
Berlin	5	4⅞
Frankfort	5	5
Amsterdam	5	5½
Turin	6	6
Brussels	5	4
Madrid	9	...
Hamburg	...	4
St Petersburg	6½ 3 mths' bills.	...
—	7 6 —	...

English Funds.—The funds this week have been flat, and have fallen about ¼ per cent. The immediate cause of the decline appears to be the continued issue of new securities, but it is also to be remarked that realisations are taking place of stock purchased at low prices during the recent commercial disturbance. Consols which closed last week at 90 to 90⅛ for February account, were quoted this afternoon 89⅞ to 89⅞; for money the final price was 89⅝ to 89¾. Reduced and New Three per Cents., 88¾ to 88⅞. Indian Five per Cents. are a shade flatter, at 103⅝ to 103⅞.

There has been no alteration in Exchequer bills or India bonds, the respective quotations being par to 5s prem., and 8s to 14s prem.

Foreign Stocks.—The principal movement in foreign bonds have been a rise in Spanish Passive and Certificates, on a telegram stating that the Finance Minister had advocated in the Cortes some measure for arranging with the foreign creditors in order to re-open the markets of London, Paris, and Amsterdam, preparatory to the issue of a new loan. The more detailed accounts, however, show that the speech proceeded from a private member, the Government replying with great reticence on the point. There is, nevertheless, a general belief that this measure of justice cannot now be much longer postponed. Italian securities have been slightly weaker on the new loan just announced. Turkish stocks continue in good demand, especially the Consolidés. The latter closed at 50 to 50¼. The Confederate loan further rallied this morning to 57, but afterwards relapsed to 55. Russian and Venezuelan descriptions continue heavy, and in several other cases there has been a reduction. The market left off this afternoon with a heavy tendency. The following are the closing prices of

Digitized by Google

the stocks dealt in to-day :—4½ per Cent. Brazilian, 83 to 85. 7 per Cent. Egyptian, 98 to 100 ; ditto, second issue, 97 to 99 ; ditto 1864, 95½ to 96. 5 per Cent. Greek, 23½ to 24. 5 per Cent. Italian (Maremmana Railway), 68 to 69. 3 per Cent. Mexican, 27¾ to 28 ; ditto 1864, 26½ to 26¾ ; the Scrip, 10 to 8 dis. 4½ per Cent. Peruvian, 1862, 81 to 83. 3 per Cent. Portuguese 47 to 47½. 4½ per Cent. Russian, 1850, 87 to 88 ; 5 per Cent., 1862, 88½ to 89½ ; ditto, 1864, 89½ to 90½. Spanish Deferred, 40½ to 41 ; ditto Passive, 33¼ to 33½. Turkish 6 per Cents, 1858, 71¾ to 72¼ ; ditto, 1862, 70¼ to 70¾. 4 per Cent. Dutch Certificates, 98½ ; and 5 per Cent. Italian. 64⅛ to 64⅜.

The scrip of the new Italian loan was first quoted about 1½ prem., but left off this evening at ⅝ to ⅞. The Danubian loan is dull, at ¾ to ½ discount, while the Montevidean loan has improved to 3½ to 4 prem.

On the Paris Bourse to-day, French 3 per Cent. rentes closed at 66f 95c, or the same as last week, but slightly lower than yesterday.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day :—

Railways and other Shares.—The railway market has been heavy this week, partly in sympathy with the funds, but chiefly from the disappointment caused by some of the dividends lately announced. Midland, Great Northern, and Caledonian have shown especial flatness. Metropolitan also, at one period, had experienced a rather considerable decline, but subsequently partially recovered. This afternoon, the market was slightly better than at one period of the day.

The transactions in colonial securities have been unimportant, and the general tone has been rather weak, though less than in the English market. Foreign shares have been comparatively steady.

The market for joint stock bank shares has experienced a reaction, notwithstanding the generally favourable character of the meetings now being held. A renewed fall has particularly occurred in Alliance Bank. Financial descriptions have also been depressed.

Numerous transactions have taken place in the new City of Milan Improvements Company, and the price has varied from 2 to 3 prem., closing this afternoon at 2¾ to 3. The applications for shares amount to over 117,000*l*.

Subjoined is our usual list of the closing prices of the principal railway shares on last Friday and this day :—

Foreign Exchanges.—The rates are generally steady, Amsterdam especially exhibiting a slight advance.

Bullion.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper :—

Gold.—There has been but little doing during the week. The demand for abroad, although not very active, has been sufficiently so to absorb the arrivals mentioned below, with the exception of about 69,000*l*, which has been sent into the Bank. The shipment of sovereigns to Alexandria are much smaller than formerly, and only 75,000*l* have been withdrawn from the Bank to be sent thither. The Tasmanian has brought 79,000*l* from the West Indies; the Kangaroo has brought 161,000*l* from New York ; the Africa has brought 3,000*l* from Boston ; the City of Manchester has brought 92,000*l* from New York. The Poonah has taken 20,000*l* to Alexandria and the East. The vessels now on the way from Australia are the Sussex, with 27,000*l*; the Monarch, with 104,000*l*; the Royal Dane, with 8,000*l*; the Lincolnshire, with 35,400*l*; the Star of Peace, with 43,600*l*; the Moravian, with 65,600*l*; the Istamboul, with 15,800*l*; the Marco Polo, with 8,400*l*; the Omar Pasha, with 17,200*l*. The Sussex and Monarch may be considered as due.

Silver.—The Tasmanian has brought about 171,000*l* from the West Indies. The market has been very quiet, and in the absence of any demand, the Dore portion of the bars sold at 61⅛d per oz standard, and the fine bars at 61½d per oz standard. The Poonah has taken about 15,000*l* to China and the Straits.

Mexican Dollars.—The few dollars ex Tasmania were sold at 60⅜d per oz. Our market is exceedingly quiet for this coin, and in the event of any large supply finding its way here, prices would experience a further decline. The Poonah has taken about 50,000*l* to China and the Straits.

Exchange on India for drafts by the banks at 60 days' sight remains: 1s 11⅛d to 2s Calcutta and Madras, and 2s Bombay. The Council drafts were sold yesterday, at a slight reduction, applications on Calcutta at 1s 11⅛d being met in full, and on Bombay 13 per cent.

India Government Loan Notes.—Our quotations are identical with those of last week, viz., for the 5½ per Cents., 109 to 111 ; the 5 per Cents., 101 to 103 ; and the 4 per Cents., 89 to 91.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std ; ditto, fine, 77s 9½d per oz std ; ditto, refinable, 77s 11½d per oz std, last price ; Spanish doubloons, 74s 6d to 75s per oz nominal ; South American ditto, 73s 6d to 73s 9d per oz ; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 1½d per oz std ; bar silver, containing 5 grains gold, 5s 1⅝d per oz std ; Mexican dollars, 5s 0⅜d per oz, last price, nominal ; five-franc pieces, 4s 11½d per oz. Quicksilver, 8*l* per bottle ; discount 3 per cent.

Failures and Mercantile Embarrassments.—The Master of the Rolls will, on the 21st inst., hear a petition for the winding up of the Madrid Bank (Limited).

Notice has been given of a petition for the winding up of the Littlehampton, Havre, and Honfleur Steamship Company (Limited), to be heard on the 21st inst. before Vice-Chancellor Wood.

An adjourned meeting of the creditors of Messrs John Nathan and Son, merchants and clothiers, of No. 153 Houndsditch, was held on Monday. The statement of accounts presented gave liabilities 62,900*l*, and assets, 35,902*l*. A composition of 6s was accepted, payable as follows :—1s in the pound payable within one month from the date of the estate being taken out of bankruptcy ; 1s 6d at four months ; 1s 6d at eight months ; 1s at twelve months ; and 1s at eighteen months, the two latter payments secured.

A meeting of the creditors of Messrs Cuadra, Enciso, and Co., took place on Tuesday. The statement submitted by Mr Hart, showed debts and liabilities to the amount of 93,133*l*, and assets, 99,800*l*. It is anticipated that 20s in the pound may be ultimately realised. A resolution was passed to wind up the estate under inspection.

In the Bankruptcy Court, on Tuesday, an order was made, at the instance of the requisite majority of creditors, for

Digitized by Google

the taking out of Court the case of Mr Frankenheim, the diamond merchant, of Bloomsbury square, whose failure has latterly attracted so much attention. It was mentioned that the aggregate liabilities are about 50,000*l*, and that the creditors will receive (partly from the bankrupt's friends) 2s 6d in the pound, which is described as "a much better dividend than would have been obtained under the bankruptcy."

An extraordinary general meeting of the Madrid Bank was held on the 19th. A resolution was proposed to wind up the affairs of the bank, after a preliminary investigation by a committee of the shareholders.

The suspension has been announced of Captain Bennitt, of the Oldbury Furnaces, in the South Staffordshire iron trade. The liabilities are estimated at 60,000*l* to 70,000*l*.

A meeting of the Leeds Banking Company, attended by Mr Turquand, the official liquidator, and by most of the gentlemen who were appointed by the shareholders to look after their interests, took place on Friday night last. The call of 70*l* was due on Wednesday, and the meeting was held to consider how it had been met. It is understood that the result was very satisfactory, the amount which Mr Turquand reported had been received being larger than was anticipated. It is stated that during the last few days property has been recovered in Paris to the value of 20,000*l*, which will go towards the relief of the creditors of Mr Saalfeld, and, of course, as the largest creditors, the bank will participate in the advantage thus derived by the estate.

The *Liverpool Albion* mentions the failure of Messrs Halhead, Fletcher, and Co., in the timber trade, and of Messrs Edmund Thompson and Co., Australian merchants. The liabilities of the former firm are thought to be heavy, and the reports as to the prospects of the liquidation are not favourable. The liabilities of Messrs Thompson and Co. are stated at 60,000*l*.

Public Companies.—At the half-yearly meeting of the City Bank held on Tuesday, the report presented to the shareholders stated the gross profits at 79,933*l* 15s 8d, which, added to 7,969*l* 17s 9d, brought from last half-year, made a total of 87,903*l* 13s 5d. The usual dividend of 6 per cent. on the paid-up capital was declared, and a bonus of 1*l* 10s per share, equal together to 12 per cent. per annum. 4,685*l* was carried forward to new profit and loss account.

The first report of the Imperial Mercantile Credit Association has been issued preparatory to the meeting to be held on the 23rd inst. The net profit is stated at 99,217*l*. It is proposed to pay a dividend of 10s per share, free of income tax, and to carry forward 47,697*l* to new account.

The report of the Midland Banking Company shows a disposable balance of 4,169*l*. A dividend of 5 per cent. is proposed, 1,000*l* is to be added to the reserve fund, and the balance, 755*l*, to be carried forward to profit and loss new account.

The report of the Consolidated Discount Company, presented at the meeting to-day, stated that the profits, after deducting all current expenses, amount to 14,681*l*. Against this sum the Directors have to write off 15,940*l* from losses by bad debts, leaving 1,259*l* to be debited to next year's account.

According to the report of the Scottish Australian Investment Company, the profits realised during the last six months amounted to 15,662*l*. The dividend proposed is at the rate of 10 per cent per annum, less income tax, which will leave 7,281*l* to be placed to the credit of the reserve fund.

It is stated that the rate of dividend to be proposed by the London and Provincial Marine Insurance Company will be at the rate of 5 per cent. per annum, together with a bonus of 10 per cent.

The annual meeting of the proprietors of the London and Westminster Bank was held on Wednesday. Ths report and accounts, which were unanimously adopted, showed a net profit for the half-year of 247,235*l* 17s 9d, including the balance brought forward from the preceding half-year. A dividend at the rate of 6 per cent. per annum, and a bonus of 13 per cent. were declared; leaving a balance of 79,735*l* 17s 9d which was disposed of in the purchase of Messrs Jones, Lloyd, and Co.'s bank, alterations of chief office, and 22,500*l* added to the reserve.

The half-yearly meeting of the National Discount Company was held on the 18th instant. After a brief discussion, the report was unanimously adopted, and a dividend at the rate of 20 per cent. per annum declared.

At a meeting of the shareholders of the New Zealand Trust and Loan Company (Limited) held on Wednesday, an ad interim dividend of 1s per share was declared, and the agent of the Company was authorised to use the Company's seal in New Zealand.

At the half-yearly meeting of the National Bank of Australasia, at Melbourne. on the 1st of November, the available balance was stated at 30,387*l*. A dividend was declared at the rate of 10 per cent. per annum, 9,000*l* was added to the reserve fund (now increased to 45,000*l*), and 1,387*l* was carried forward.

The report of the Imperial Bank (Limited), which was unanimously approved at the meeting, stated that after making provision for bad and doubtful debts, and providing for a dividend at the rate of 10 per cent. annum, there will be a balance of 5,228*l* to be carried forward to profit and loss new account.

The report of the London, Italian, and Adriatic Steam Navigation Company (Limited) has been issued preparatory to to the meeting. The profit and loss account is stated to show a net balance to the Company's credit of 11,060*l*. The directors propose to pay a dividend of 5 per cent. per annum, and to carry 9,958*l* to the reserve fund,

The Oriental Commercial Company (Limited), have declared a dividend at the rate of 10 per cent. per annum, for the six months ending the 30th ult

The dividend of the London, Brighton, and South Coast Railway is at the rate of 6 per cent. per annum, against 5 per cent. for the corresponding period of last year.

It is stated the English and Foreign Credit Company will pay a dividend of 10 per cent., and carry forward nearly 3,000*l* to new account.

A meeting of the National Bank of Australasia was held on the 1st November at Melbourne. The half-yearly report showed a balance available of 30,387*l*. 10,000*l* was appropriated to dividends, at the rate of 10 per cent. per annum, 9,000*l* to reserve, and 1,387*l* carried forward to new account.

At the annual meeting of the Peel River Land and Mineral Company a second dividend, at the rate of 10 per cent. per annum, free of income tax, was declared, being profits on 12 months' receipts, against 18 months expenditure, in consequence of the change in the period of the annual meeting.

The report of the London Financial Association (Limited) has been issued, preparatory to the meeting called for the 23rd inst. The dividend to be proposed is at the rate of 8 per cent., with a bonus of 10 per cent. per annum, free of income tax. A balance of 40,063*l* 8s 6d to be carried to new account.

The International Land Credit Company (Limited) announce a payment on account of dividend at the rate of 6 per cent. per annum, payable on the 30th inst.

The Directors of the General Credit and Finance Company of London have resolved to recommend, at the approaching meeting of shareholders, the payment of a dividend of 10s per share, making, with the *ad interim* dividend of 2s paid in August last, a total of 12s per share, being at the rate of 15 per cent. on the paid-up capital. It will also be proposed to carry 150,000*l* towards a reserve fund, and 22,440*l* of undivided profits to next year's account.

The Directors of the Ocean Marine Insurance Company have issued their report preparatory to the general meeting. A total of 82,709*l* is stated to be available for division. The directors recommend a dividend of 5s per share on the paid-up capital, and a bonus of 1*l* per share, both free of income tax.

An *interim* dividend to December, the 31st ult., at the rate of 6 per cent. per annum, has been declared by the International Contract Company.

The half-yearly meeting of the Bank of London was held on Thursday. The accounts made up to the close of the past half-year showed that, after the payment of all current expenses, there remained a disposable balance of 62,719 13s 2d. A dividend and bonus, amounting to 20 per cent. per annum, was declared, and 30,000*l* transferred to the reserve fund.

At the half-yearly meeting of the London Joint Stock Bank, held on the 19th inst., a dividend of 12½ per cent. per annum was declared, together with a bonus of 1*l* 17s 6d per share, and 21,125*l* 9s 7d carried to the credit of the guarantee fund. The dividend and bonus will be payable on the 27th instant, free of income tax.

A meeting of the directors of the Thames and Mersey

Digitized by Google

Marine Insurance Company (Limited) was held on Thursday, when a dividend and bonus, amounting to 20 per cent. on the paid-up capital, were resolved upon.

The report of the National Provincial Marine Insurance Company states that, since the 17th of May last, the revenue has amounted to 63,665*l* 3s 9d, and that the dividend will be at the rate of 6 per cent. per annum. The sum of 39,209*l* 1s 11d will be carried forward.

The prospectus of Cressey's London and Burton Steam Cooperage Company, with a capital of 100,000*l*, has been issued. The object of the Company is to bring machinery into direct competition with manual labour.

The Metropolitan and St John's Wood Railway Company is announced. The share capital is 300,000*l*.

The Darjeeling Company (Limited) has been formed for the purchase of three valuable tea estates in India. The capital is 250,000*l*, in 12,500 shares of 20*l* each.

The report of the Directors of the Oriental Financial Corporation recommends a dividend at the rate of 8 per cent. per annum. The sum of 12,971*l* 3s 3d will be carried forward.

The directors of the English and Foreign Credit Company have issued their report. The dividend will be 5s per share, leaving 2,282*l* 15s 7d to be carried to the next account.

A dividend at the rate of 10 per cent. per annum, and a bonus of 5s per share, will be paid by the Bank of Egypt.

MISCELLANEOUS.—The agents of Messrs Baring Brothers and Co. in Venezuela advise that the Federal Court have decided nothing regarding the 55 per cent. of import duties, payment of which had been suspended, as by advices received by last mail.

The General Credit and Finance Company of London are in receipt of advice from their agents, Messrs H. L. Boulton and Co., dated La Guayra, 23rd December, 1864, of duties collected as follows on account of the Venezuelan 6 per Cent. loan, 1864 :—Per statement No. 20 from Puerto Cabello, 201 dols 94c ; ditto No. 21 from Puerto Cabello, 1,590 dols 91c; ditto No. 13 from La Guayra, 2,057 dols 37c—total, 3,850 dols 22c.

The number of bonds drawn of the Austrian 5 per Cent. loans of 1852 and 1859 are published for redemption.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2 per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 2-10ths per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 423 per mark, and the short exchange on London is 13.4 per 1*l* sterling. Standard gold at the English Mint price is, therefore, at about the same price in London and Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is about 249 per cent., and the premium on gold 127; at these rates there is a small profit on the importation of gold from the United States.

CORN AVERAGES.

From the GAZETTE of last night.

A STATEMENT showing the Quantities Sold and the Average Price of British Corn, Imperial Measure, as received from the Inspectors and Officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended Jan. 14, 1865:—

	Quantities Sold. qrs bush	Average Price. s d
Wheat	86,286 0	38 7
Barley	73,976 1	28 0
Oats	8,615 0	19 0

COMPARATIVE AVERAGES.

Corresponding week in	Quantities Sold. Wheat.	Barley.	Oats.	Average Prices. Wheat.	Barley.	Oats.
	qrs bsh	qrs bsh	qrs bsh	s d	s d	s d
1861	61,580 7	63,467 0	11,839 2	57 1	40 6	22 6
1862	46,888 1	63,699 3	12,900 7	61 11	36 9	21 9
1863	57,334 5	57,280 4	9,967 7	46 10	34 6	20 6
1864	69,825 2	56,209 3	9,805 5	40 2	31 7	18 8

In future the corn returns will be restricted to wheat, barley, and oats, and no statement will be issued showing the averages for the six weeks. The annexed notice was published in last night's GAZETTE:—"By the provisions of the Act 27th and 28th Victoria, cap. 87, the corn returns are restricted, from and after the 31st December, 1864, to wheat, barley, and oats, and to the towns from which the returns were received under the Act 9th George IV., cap 60. The average prices have been ascertained to be practically the same, whether computed upon returns from the larger or smaller number of towns."

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The small supply of English wheat on sale at Mark lane to-day, was disposed of at the prices current on Monday. With foreign wheat the market was but moderately supplied, and as regards good and prime old produce, the trade was firm, at low quotations, but new qualities were a dull inquiry. Good and fine malting barley and oats moved off steadily, at full currencies. Inferior qualities, however, including beans and peas, met a slow sale at late rates. The flour trade was steady, at previous quotations. This week's imports consist of 1,950 quarters of wheat, 1,200 of barley, 11,410 oats, and 120 sacks of flour.

At Liverpool, this morning, the wheat trade was firm, at full currencies. Flour and maize were in fair request, at quite previous rates. At Wakefield, the trade for wheat ruled inactive, on former terms, but there was a good demand for barley, at fully late prices.

The uncertain course of American politics has again caused a week of depression in the cotton market, the demand being on the narrowest scale, and spinners being the chief operators. Prices have declined from 1d to 1½d, but through the forced sales of some holders quotations are but nominal. American has been but little inquired after, and has declined about 1d. In Brazilian and Egyptian, very little business has been done, and prices must be quoted 1¼d below those of the last week. Bengal and Scinde have been pressed for sale by some needy speculators, and a fall of 1¼d to 1½d is the result. Surats and China are about 1½d lower. The total sales of the week at Liverpool reach 18,710 bales, of which speculators have taken 2,050 bales, exporters 3,310 bales, leaving 13,350 to the trade. 18,470 bales have been imported during the week, and the stock is now estimated at 509,350 bales. To-day the market remains quiet, and the sales are reported at 4,000 bales.

During the week ending Jan. 6, cotton declined in value at Alexandria to the extent of from ½d to ¾d per lb. The arrivals, from Dec. 27 to Jan. 6, were 48,600 bales, and the sales for the week ending as above, 10,774 bales. According to the Egyptian Commercial and Trading Company's circular, good middling to fair produce, roller-ginned, was worth 23½d to 24¼d; fully fair ditto, 24¼d; fair to fully fair, open-ginned, 24¾d to 25d; good fair to fully good fair, 25d to 25½d per lb, free on board. Freight by steam to Liverpool, 1¼d per lb.

The state of trade in the markets for colonial and foreign grocery produce is very unsatisfactory, and sugar, notwithstanding the heavy fall in prices last year, has further declined in value this week 6d to 1s per cwt. In other articles there is very little alteration to notice. The public sales of tea have passed off slowly, at about previous quotations, and all good and fine descriptions of coffee have changed hands at late prices. The market for rice is firm, at full currencies. Last week, duty was paid on 1,311,783 lbs of tea, and the export for the week ending Jan. 12 amounted to 386,838 lbs.

Rum and brandy are in fair demand, at full prices. Messrs Martell and Co. have fixed the price of last year's vintage at 130f per hectolitre, in cash, whilst the United Vineyard proprietors quote the same vintage at 120f per hectolitie, or 5s 4d in hogsheads here.

The wool trade is rather quiet, yet prices are without material change from last week. Hemp and flax are very inactive; but there is a fair demand for good and fine jute, at full currencies.

In the sugar trade at Havana at the close of last year, there was a great want of activity. No. 12, Dutch standard, was quoted at 28s 11d per cwt, free on board. The following table shows the extent of the shipments from Havana and Matanzas in each of the last three years, and also the stocks at the close of those periods:—

Destination.	1864. boxes.	1863. boxes.	1862. boxes.
United States	144,853	206,627	92,252
Great Britain	595,096	482,604	531,962
North Europe	57,789	78,030	109,730
France	242,191	171,243	221,580
South Europe	275,898	266,510	299,838
Other parts	34,627	28,077	31,389
Total	1,350,454	1,233,091	1,286,751
Stocks.	1864. boxes.	1863. boxes.	1862. boxes.
In Havana	37,936	14,385	23,555
— Matanzas	5,720	3,499	6,529
Total	43,656	17,884	30,084

Metals continue very quiet. Scotch pig iron is quoted at 49s 7½d, cash, mixed numbers. The small amount of business transacted in other metals has been at previous rates. Fish oils are steady; but other descriptions move off slowly, at about stationary prices. The tallow trade is firm, at 41s 6d for new P. Y. C. on the spot.

Trade at New York during the week ending Jan. 7 was not marked by any important occurrence. Generally speaking, the transactions both in produce and manufactures were limited to the actual wants of buyers, and very few changes took place in prices. Financially, the chief feature was a fluctuating market for gold, which, in consequence of less favourable military intelligence, advanced to 127¾ per cent. prem. The balance in the Sub-Treasury, on the 31st ult. was 4,142,500*l*. The shipments of specie for the week ending Dec. 31 amounted to about 200,000*l*, making a total for the year of 10,023,000*l*, against 9,950 900*l* in 1863, 11,887,500*l* in 1862, 843,300*l* in 1861, and 8,432,400*l* in 1860. The total foreign imports at New York last year were valued at 41,292,500*l*, against 36,880,000*l* in 1863, and 34,430,000*l* in 1862. At latest date, the money market was firm, at 8 per cent. for the best short-dated commercial paper. The stock of Rio and Java coffee at New York on the 1st inst. was 81,702 bags and mats, against 18,841 bags and mats last year: of Manilla hemp 22,000 bales, against 15,484 bales; of East India rice, 43,240 bags, against 27,309 bags; of all descriptions of sugar, 17,544 hhds, against 21,214 hhds; and of American tobacco, 28,907 hhds, against 23,948 hhds on Jan. 1, 1864.

THE COTTON TRADE.

LIVERPOOL—JANUARY 20.

Cotton has again been limited in demand, and freely supplied throughout the week, prices continuing to decline, and though on Wednesday and yesterday rather more steadiness and regularity appeared, the quotations generally show a considerable reduction from last week's rates. American continues in moderate demand, and has declined 1d to 1½d per lb. The demand for Sea Island is still limited, but without change in prices; the choice of this description has been increased by recent arrivals. Brazil has fallen about 1d per lb, with a fair amount of business in Pernam, and very few transactions in Maccio and Maranham. In Egyp-

Digitized by Google

tian, considerable purchases were made on Wednesday and yesterday, partly on speculation induced by the low rates submitted to on Tuesday, particularly in fair qualities; prices have been very irregular, but close ½d to 1d below last week's rates. Smyrna has been very heavy, and has declined fully ¾d per lb, particularly in the lower qualities, of which the recent arrivals principally consist; the good descriptions remain scarce and comparatively dear. East India has been neglected, but holders have not pressed sales, and the decline in value does not, on the average, exceed ½d per lb from the quotations of last week. China and Japan have been abundantly offered, and, with a limited inquiry, a reduction of 1d per lb has been submitted to.

The transactions "to arrive" have been limited to a few purchases of Egyptian, at fully 1d decline. The last quotation was for fair open, February shipment, 24d.

The sales of the week amount to 18,710 bales, including 2,050 on speculation, and 3,310 declared for export, leaving 13,350 bales to the trade. The sales to-day amount to about 4,000 bales.

The quantity of East India cotton now afloat is about 158,000 bales, against 229,000 bales last year.

LONDON—JAN. 20.

Sales of cotton, from Friday, 13th January, to Thursday, 19th January, inclusive:—

Sales on the spot:—50 bales Oomrawatty, at 17d for fair; 140 bales Tinnevelly, 15½d to 16d for good fair; 890 bales Western, 13d to 14½d for middling and 17⅞d to 18d for good fair; 60 bales Coconada, 16d for fully fair; 30 bales Salem, 15d to 15½d for fully fair; 280 bales Bengal, 8½d to 8¾d for middling fair, 10½d for fair, 10½d for fully fair for cash, and 11d for good fair; 250 bales Japan, 15d for fair and 15½d for fully fair—total, 1,700 bales.

At public sales, yesterday, about 280 bales of various descriptions were offered; but the market being very dull, the demand was limited, and the greater portion of the cotton was withdrawn, with the following exceptions, viz., 125 bales middling fair Bengal at 8½d to 8¾d, and 44 bales fully fair on account of whom it may concern at 9¼d; 50 bales Western at 13¾d to 15d; and 6 bales Algerian cotton on the seed at 8¼d per lb.

Sales to arrive:—300 bales Western, at 17d November sailing, for guaranteed fair new.

The cotton market has again been dull this week, and in some cases prices have declined ¼d to 1d per lb.

NEW YORK—JAN. 7.

The cotton trade, on the whole, has ruled firm, but the market closes with less activity, and with a downward tendency in prices. During the week, about 3,900 bales have been disposed of, and at one period middling Upland produce was worth $1.20 per lb; the quotation is now $1.19 per lb. The receipts have amounted to 5,300 bales, making a total since September 1 of 75,276 bales. The export in December was 888 bales, against 165 bales last year. Annexed are the prices current:—

	New York Classification. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary	105	105	105	105
Middling	119	119	119	120
Middling fair	127	127	127	127

1864	81 82	82 ...
1865	120 ...	120 121

MARKETS IN THE MANUFACTURING DISTRICTS

The amount of business doing in goods, this week, has been very moderate; nevertheless, prices generally have ruled firm, and there is no increase in the stocks on hand. The demand for coals has been unusually active; but the iron trade has continued in a most inactive state.

MANCHESTER, Jan. 19.—The market has been quite at a standstill since last week. On Monday, telegrams from Calcutta to 28th ult. reported a partial decline in our fabrics there, whilst a rise in the same which was reported from Bombay was counterbalanced by heavy imports of cotton from the latter port, with drooping prices for the staple in the interior. These advices, along with the immediate fulness of stock in Liverpool, have induced buyers to hold off in expectation of lower rates. Sellers have been slow to forestall a reduction by forcing sales, but quotations have been very irregular, and in the absence of business, 32's cop twist, which marks the widest fluctuations in the yarn market, has fallen since the late highest quotations of December about 6d per lb. Shirtings have been partially supported by a few purchases on China account which took place last week, putting some of the larger makers under contract; but with this exception, if it be such, all classes of goods have been unsaleable or lower.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

Raw Cotton.	Price Jan. 19, 1865	Price Jan. 1864	Price Jan. 1863	Price Jan. 1862	Price Jan. 1861	Price Jan. 1860

BRADFORD.—The utmost quiet prevails in the wool trade. Purchases are limited to the supply of immediate requirements, and there is more anxiety to sell. A demand for two-fold yarns still exists, and the inquiry for carded yarns, too, keeps up. Prices are firm. Business in pieces is chiefly confined to a few small orders in fancies for the approaching spring. Prices are tolerably firm, but a little irregular.

Digitized by Google

LEEDS.—The manufacturers were not overcharged with stock, and prices were both steady and firm. Wools fully maintain late quotations. The flax trade is steady rather than brisk, and threads and yarns are but in moderate request. Neither flax, tow, nor hemp are in very great request, yet prices keep high.

ROCHDALE.—Manufacturers, notwithstanding the dull state of the markets, are fairly employed, and that, too, in many instances, on orders for early delivery. The local wool trade is without animation.

LEICESTER.—There has been very little doing in hosiery goods. Wools are high in price, but not in much request. The yarn market is quiet, high rates being yet quoted.

NOTTINGHAM.—Most classes of lace goods sell slowly, but more is expected to be done shortly. A few buyers have been in the market, but no purchases of a large amount have been made. The home trade is flat. In hosiery, there has been a fair amount of business doing. Buyers are purchasing for the spring demand. Stocks are very light. Yarns continue firm.

CARDIFF.—The steam coal trade of the district is in an active state, and the exports during the last six or seven days have been considerable. There is a good demand from France, Italy, and other continental countries, and a large quantity of steam is sent to the Spanish markets, principally through French houses. Quotations are well maintained. House coal is in request from the West of England, and also on account of Irish buyers, and there is a moderately active inland demand. Prices remain without any material change. Very few orders are being given out in the iron trade.

BIRMINGHAM.—There has been a fair amount of business doing in the various branches of the manufactures of this town. The home trade has only partially recommenced, the factors' travellers having just resumed their journeys.

GLASGOW.—Iron—There is little business doing in our market. Warrants, 49s 9d cash and 50s one month, sellers; No. 1 G.m.b., 50s 6d; No. 3, 49s 6d; No. 1 Gartsherrie, 55s 6d; Coltness, 55s; Calder, 54s 6d; Eglinton, 50s 6d.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Jan. 7.—The market for breadstuffs is still without activity. The export demand continues greatly restricted, yet the fluctuations in prices during the week have been unimportant. A few alterations will be observed in the quotations; but these are caused by the movements in the premium on gold. Flour—State, superfine brands, $9.65 to $9.85; State, extra brands, $10.15 to $10.25; State, choice brands, $10.30 to $10.35; Ohio, common brands, $11.15 to $11.25; Ohio, fancy brands, $11.30 to $11.35; Ohio, good and choice extra brands, $11.40 to $12; Michigan, Indiana, Wisconsin, &c., $9.70 to $10.50; Genesee, extra brands, $10.40 to $12; Missouri, $11 to $15; Canada, common, $10.15 to $10 30; Canada, good to choice extra, $10.35 to $12 per barrel. Wheat—Chicago spring, $2.17½ to $2.32; Milwaukee Club, $2.30; choice amber Milwaukee, $2.37; winter red Western, $2.35 to $2.54; amber Michigan, $2.55 to $2.56; white ditto, $2.64; prime winter red State, $2.55. Corn—Western mixed, $1.87 to $1.90; white Southern, $2.05; old and new mixed and yellow ditto, $1.83 to $1.85 per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat up to our market this week have been very moderate, but in full average condition. On the whole, the demand has ruled steady, and fair clearances have been effected, at about stationary prices. The imports of foreign wheat have been limited, but the show of samples ex granary has been extensive. Really fine qualities have changed hands at full currencies, but inferior kinds have ruled almost nominal. Fine malting barley has moved off freely—other kinds slowly, at last week's quotations. There has been a steady inquiry for most descriptions of malt, at full prices. The supply has not increased. Oats have come slowly to hand; nevertheless, the demand for them has been far from active, at late rates. Beans have further declined 1s per quarter, with a heavy inquiry. In the value of peas, no change has taken place. Both English and foreign flour has realised full prices.

Messrs Horne, Son, and MacInnes have published the following statement, showing the arrivals into, and exports of grain and flour from, London, during the last two years:—

Annexed is a statement showing the stocks of grain, &c., at New York, at the commencement of the present and the last two years:—

	1863.	1864.	1865.
Flour.			
Western and State .....bbls.	721,383	557,057	465,835
Canadian	2,405	15,100	4,950
Southern	28,500	35,100	37,463
Total	752,288	607,257	508,248
Wheat ..... bush	4,734,817	5,540,444	1,807,356
Corn	4,223,013	1,731,320	464,414
Rye	33,270	37,409	212,298
Barley	99,844	584,700	304,104
Oats	531,312	3,341,836	3,018,301

The demand for wheat on the Continent has fallen off; nevertheless, the quotations have been supported. Most descriptions of spring corn have changed hands slowly. The export demands for breadstuffs at New York has not improved.

The Scotch markets have been scantily supplied with most descriptions of produce. Fine wheat, barley, and oats have moved off steadily, at full prices. Otherwise, the trade has continued heavy, at late rates.

In Ireland, the grain trade has been very inactive. On the whole, however, the quotations have been well supported.

The supply of English wheat on sale at Mark lane to-day was small, and the whole was disposed of at Monday's currency. Good and prime old foreign wheat ruled firm, at full currencies; but new qualities were a dull inquiry. Malting barley sold steadily, at quite previous rates: inferior produce, however, was dull, at about stationary prices. Oats were in moderate request, at full quotations. Beans were dull, at the late decline in prices. Peas met a slow sale, on former terms. In flour, about an average business was transacted, at late rates.

The London averages announced this day are:—

	qrs	s	d
Wheat	3619 at	42	1
Barley	898	29	4
Oats	1194	19	4
Rye	...	...

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of this day's Markets see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—The supply being again large and in excess of the demand, prices have further given way, the decline amounting to fully 1s per cwt upon most kinds. An increased quantity of the better sorts of grainy sugar has gone off without much animation, generally at the above reduction. The refiners have taken a portion of the latter, but not more than 703 casks West India had changed hands in the three days, Of 268 casks Barbadoes a few lots sold at 32s to 35s. Other parcels chiefly taken in: crystallised Demerara at 35s to 37s. 729 bags grainy Berbice, part sold at 35s to 41s 6d per cwt for yellow and white. The landings last week were 4,178 tons and the deliveries 4,059 tons, leaving the stock at the close 110,333 tons; against 77,427 tons in 1864 at the corresponding date.

Mauritius.—Of 11,812 bags brought to auction, a considerable portion found buyers: low to good brown, 23s to 28s; grey and yellow, 29s to 32s; grainy and crystallised, 32s to 37s 6d; dry grainy white, 11s 8d duty, 39s 6d to 40s. A floating cargo sold for the United Kingdom, Nos. 12½ to 13, at 25s 6d per cwt.

Bengal.—On Tuesday, 1,357 bags offered by auction, were taken in at 24s for low brown. Some business has been done privately in Gurpatta date.

Penang.—1,085 bags in public sale were partly disposed of: soft brown and low grey, 28s 6d to 29s 6d; low to middling yellow, 30s to 31s per cwt.

Madras.—5,573 bags submitted on Wednesday all sold, but generally below the valuations: grainy white, 12s 10d duty, 39s 6d to 41s. Other kinds as follows: grainy, 33s to 39s for yellow and white; soft brown, 28s per cwt.

Foreign.—A floating cargo of Cuba muscovado has sold at 20s 9d, for the United Kingdom. By private contract, on the spot, 300 boxes white Havana at 41s 3d to 41s 6d. 4,800 bags clayed Manilla at 28s. At auction, 904 casks Porto Rico partly met with buyers: brown and yellow at 29s to 36s. 40 cases 211 bags Bahia were bought in at 26s 6d to 30s per cwt.

Refined.—The market has tended downward, and dry goods may be quoted 6d per cwt lower for the week.

Molasses.—No sales reported.

Rum.—The inquiry continues steady, and the supply is small. Demerara has sold at 1s 10d to 1s 11d per proof gallon. The stock of West India is 19,646 puns, against 24,740 puns in 1864. Of East India, 2,460 puns and casks, against 1,950 ditto last year.

Coffee.—The market has been devoid of animation, and prices rather favour the buyers in many instances. 959 casks 1,057 barrels and bags plantation Ceylon, by auction, were disposed of at 50s 6d to 86s 6d for small berry, and pale to good middling. 230 bags native at 69s 6d to 71s for good ordinary to fine ordinary. Some business has been done in good ordinary quality privately at 69s. 139 packages ungarbled Mocha sold at 83s. 68 cases 700 barrels and bags East India at 68s to 78s 6d. A floating cargo of Rio has sold at 60s 9d per cwt for Trieste.

Tea.—The large public sales of China growth commenced on Tuesday, and have gone off at rather lower prices in many instances. There were 39,571 packages submitted, 31,068 being printed "without reserve." A fair proportion sold, principally teas offered on the latter conditions. Common red leaf congou obtained 11¼d to 11¾d; dusty leaf congou, 7½d; common to fair black leaf, 10½d to 1s 4d; good black leaf, 1s 9d; red leaf, 11½d to 1s 3d; dusty and broken leaf, 8d to 8½d. A considerable quantity of low souchong, 3d per lb. Some parcels of green realised previous rates.

Spices.—Some small parcels of nutmegs and mace in the public sales on Wednesday sold at previous rates. 328 bags Penang white pepper partly met with buyers: fair quality at 5⅜d to 5¾d. 2,520 bags Penang black were only partially disposed of at easier rates, from 3d to 3⅛d; but 1,184 bags Singapore sold readily at 3⅜d, with a few lots at 3½d, being a shade dearer. Stocks are still large. 1,495 bags pimento partly sold on former terms, ranging from 2d to 2⅜d for low of old import to good fair quality. 60 bags Zanzibar cloves were bought in at 3¾d to 3⅞d per lb. 602 bags rough Bengal ginger chiefly sold at 30s to 31s. 117 barrels low and ordinary Jamaica sold at 70s to 75s per cwt. 160 cases cassia lignea were bought in above the market value: middling rather broken at 86s per cwt.

Rice.—An extensive business has been done this week, the quantity which changed hands to yesterday (Thursday) afternoon, reaching nearly 100,000 bags, the bulk soft grain, and the last transactions established 3d advance on Friday's currency: low and fine, 8s 6d to 9s 6d according to quality. Several parcels of Bengal are reported at extreme rates, including white at 11s 3d to 14s 6d; Ballam, at 10s 6d. 1,366 bags Bengal offered by auction, sold afterwards at 12s 9d for good middling white, hard grain. The sound portion of 5,889 bags Rangoon was bought in at 8s 6d to 9s 6d per cwt for low to good.

Imports and Deliveries of Rice to Jan. 14, with Stocks on hand.

	1865.	1864.	1863	1862.
Imports ..... tons	8380	5740	1520	3480
Deliveries	1830	1310	2040	2380
Stock	47770	50370	63570	31000

Saltpetre.—About 4,000 bags Bengal have changed hands by private contract; refraction 7 to 2¾ at 31s 6d to 32s per cwt, cash or short prompt. At auction, 100 bags, refraction 4, were taken in at 32s per cwt. The market is quiet, and the above transactions show some slight reduction.

Other Drysaltery Goods.—Safflower firm. 1,150 bags Bengal turmeric by auction, sold readily at 24s to 24s 6d. Several transactions have occurred in Gambier at 22s 6d to 22s 9d; to arrive, the same. Cubes on the spot at 27s per cwt.

Jute.—The market shows more steadiness. 7,400 bales offered by auction on Wednesday, about half sold, without material change in quotations: low to fine, 11*l* 10s to 26*l*; fine new at 27*l* per ton.

Hemp.—Petersburg clean is steady, and a few sales have been made at 30*l* to 30*l* 5s. Manilla has further advanced, good Sorsogon selling at 30*l* per ton, with other qualities in proportion.

Metals.—A large business has been done in spelter, at low prices, ranging from 18*l* 5s to 18*l* 19s, on the spot and to arrive. Several sales are reported in Straits tin, at a decline, viz., 87*l* cash, 89*l* to 90*l* per ton for arrival. Scotch pig iron quiet, at 49s 6d per ton cash for mixed numbers. Copper dull. Lead steady.

Linseed.—About 800 tons Calcutta have sold, on the spot, at 57s 6d. Two cargoes of Black Sea, on the coast, have sold at 58s 6d and 59s 6d. About 8,000 tons Calcutta have sold for December to March shipment, at 57s 6d to 57s 9d per quarter.

Oils.—Sperm oil has been quiet: colonial, 67*l*; American, 66*l* per tun. The lower qualities of olive are steady: Mogadore scarce, at 48*l* per tun. Linseed oil is steady at 33*l*. Rape oils are inactive: foreign refined, 46*l* to 46*l* 10s; brown, 42*l* 10s to 43*l* per ton. A moderate inquiry prevails for palm, in the proportion of 36*l* for fine Lagos. Cocoanut is firmer: Cochin, 38*l*; Ceylon, 37*l* per ton.

Petroleum.—Refined Pennsylvanian, 2s 1d to 2s 2d per gallon; crude held at 18*l* per tun.

Tallow.—The market is now firmer, with a good demand. 1st sort new Petersburg Y.C., 41s 9d to 42s; March, 42s 6d to 42s 9d; April to June, 42s 6d; October to December, 43s 6d per cwt.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is flat, and prices generally are 1s to 1s 6d lower for the week. 482 casks 180 barrels 806 bags West India, by auction, to-day, partly sold, including crystallised Demerara, at 34s to 39s 6d. 8,994 bags Mauritius partly sold at 6d per cwt under previous terms. 1,806 bags Bengal chiefly sold: Gurpatta date, 26s 6d to 31s 6d per cwt. The week's business in West India amounts to 1,167 casks. Sales of clayed Manilla are reported, privately, at 27s 6d per cwt.

COFFEE.—66 casks 60 barrels and bags plantation Ceylon sold steadily at 81s to 88s. 501 bags Singapore, at 57s per cwt.

RICE.—Of 2,429 bags Bengal, by auction, the sound was bought in at 13s 6d for good white; sea damaged cargo, 4s to 9s. The sound portion of 14,674 bags Necrancie Arracan was withdrawn at 9s. First-class sea damaged sold at 7s 6d to 8s per cwt.

TEA.—The sales to-day passed off with fair spirit, and occasionally at rather better prices than at the commencement.

OILS.—By auction, 300 casks Cochin cocoa-nut two-thirds sold at 37s 3d to 38s 9d. 194 casks palm, at 36s to 36s 3d per cwt. 32 tuns good colonial sperm, at 67*l* to 68*l* per tun.

TALLOW.—Town advanced to 44s 3d this afternoon. 1,214 casks, by auction, chiefly sold: South American, 42s to 42s 3d; Australian beef, 39s 9d to 40s 6d; sheep, 43s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been very dull this week, and about 6d lower for most descriptions of goods. Dutch crushed is offering at lower prices for present and forward delivery.

DRY FRUIT.—Currants continue very dull, and low sorts show a fall of 1s since the first of the year, parcels being offered at 20s 6d. Fine and medium, though neglected, are steady. Old show further reduction, and buyers are unwilling to pay over 22s. Valencia raisins are dull after their last rise, and Smyrnas are nearly unsaleable. Eleme in little demand at 34s. Sultanas steady and in fair request. Figs lower.

GREEN FRUIT.—Market continues dull for all kinds. Orange still depressed in value, some parcels St Michael, Terceira, Valencia, and Sicily, sold by Keeling and Hunt at public sales, went at similar prices obtained last week. Lemons are 1s to 2s per case lower. Barcelona and black Spanish in moderate demand. More inquiry for Seville sours. Chesnuts and walnuts dull. Almeria grapes clearing off the market.

SEEDS.—The seed trade is slow for the time of year, the only exception being red clover seed, which is held for high prices.

COLONIAL WOOL.—Market without change.

FLAX market steady.

HEMP market quite without any alteration in quotations.

SILK.—The silk market is very firm in prices, but business less active than last week. Japan and China silk even a shade higher, but Bengal silk much neglected.

TOBACCO.—American descriptions of good and fine qualities have been taken for the home trade to a fair extent at present quotations. A few small sales have been made for exportation, consisting chiefly of selections of Western leaf. Other growths than American in good demand at steady prices.

LEATHER AND HIDES.—The leather trade of the week has been unaltered. The transactions have been of a fair average extent, and at about previous rates. At Leadenhall, on Tuesday, the supply of fresh leather was limited, and the chief demand for light English butts and offal.

METALS.—The week has been uniformly quiet in our market. Copper is even further depressed, at least such as in second hands, and any that it is found necessary to realise, there being literally no buyers except such as are always ready to great bargains. Iron is in but small demand. Tin has been drooping more or less daily in Straits until we close with sellers at 87*l*, and small demand. Lead and tin plates are both quiet.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	44	3
Fat by ditto	2	2
Yellow Russia	43	6
Melted stuff	32	6
Rough ditto	18	0
Greaves	18	0
Good dregs	7	0

PROVISIONS.

The bacon market is less active active this week, and we may look for a decline of 2s. The stocks are increasing, while the trade at the warehouses is very slow. We quote best Waterford at 63s to 63s 6d landed. In Freisland butter there has been a good demand, the quality being better, and prices advanced to 130s, all cleared off. No Jersey to-day, the ship not arrived. All other provisions of dull inquiry.

METROPOLITAN CATTLE MARKET.

MONDAY, Jan. 16.—The total imports of foreign stock into London last week, amounted to 4,081 head. In the corresponding week in 1864 we received 2,032; in 1863, 4,650; in 1862, 1,667; in 1861, 306; in 1860, 2,310; and in 1859, 5,731 head.

Our market to-day was very moderately supplied with foreign stock; nevertheless the demand was heavy, and prices had a drooping tendency. The arrivals of beasts fresh up from our own grazing districts, as well as from Scotland, were considerably on the increase, and mostly in prime condition. Although the attendance of butchers was somewhat numerous, all breeds of beasts moved off slowly, at a decline in the quotations, compared with Monday last, of 2d per 8 lbs. A few very inferior Scots and crosses sold at 5s 6d, but the general top price was 5s 4d per 8 lbs. We were again scantily supplied with sheep, but their quality was tolerably good. The mutton trade was heavy, Prime Downs and half-breds moved off slowly at barely late rates. Long-woolled sheep declined 2d per 8 lbs; the top quotation was 6s per 8 lbs. About 500 clipped sheep were in market, and they were disposed of at 1s 2d per 8 lbs beneath those in the wool. Calves, the supply of which was only moderate, sold slowly, at 2d per 8 lbs less money. The highest quotation was 5s 6d per 8 lbs. The demand for pigs was heavy, yet prices were supported. The supply was tolerably good.

SUPPLIES.

	Jan. 18, 1864.	Jan. 16, 1865.
Beasts	3460	4680
Sheep	14870	15930
Calves	192	85
Pigs	390	310

THURSDAY, Jan. 19.—Our market, to-day, was moderately supplied with beasts, in fair average condition. All breeds moved off slowly at Monday's currency. The top quotation was 5s 4d per 8 lbs. We were scantily supplied with sheep, which met a dull inquiry at about stationary prices. The best Downs and half-breds realised 6s per 8 lbs. Shorn sheep sold at 1s 2d per 8 lbs beneath that quotation. Calves were in short supply, and slugglish at late rates, viz., from 4s 4d to 5s 6d per 8 lbs. Pigs and milch cows were very dull on former terms.

Per 8 lbs. to sink the offal.

	s	d	s	d		s	d	s	d

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Jan. 16.—The arrivals both coastwise and by rail, have been moderate, but still equal to the demand; with the exception of Flukes, there is no improvement in prices. The following are this day's quotations:—Yorkshire Flukes 100s to 130s; Yorkshire Regents, 80s to 90s; Yorkshire Rocks, 65s to 70s; Kent and Essex Regents, 75s to 90s; ditto Rocks, 60s to 70s; Perth, Forfar, and Fifeshire Regents, 60s to 65s; ditto, ditto Rocks, 55s to 60s; Belgian whites, 50s to 55s per ton.

HOP MARKET.

BOROUGH, Monday, Jan. 16.—There is scarcely any alteration to report in our market, which remains firm, with a fair amount of business doing, preference being given to the finest qualities. Mid and East Kents, 130s, 160s, 200s; Weald of Kents, 120s, 140s, 155s; Sussex, 116s, 135s, 145s; Yearlings, 110s, 126s, 140s.

FRIDAY, Jan. 20.—The market continues tolerably firm. In good and fine qualities sales progress steadily, at fully late rates; but inferior produce moves off slowly, and the quotations have in some instances, a drooping tendency.

COAL MARKET.

FRIDAY. Jan. 20.—Wallsend Hetton, 19s—South Hetton, 19s—Hartlepool, 18s 9d—East Hartlepool, 18s 9d—Braddyll's Hetton, 17s 3d—Gosforth, 15s 9d—Harton, 15s 9d—Heugh Hall, 17s—South Kelloe, 17s—Byass's Bebside West Hartley, 17s 3d—Hastings Hartley, 17s 3d—Lambert's West Hartley, 17s—North Pelton Gas, Walker Primrose, 14s. Ships at market, 128; sold, 82; gas contracts, &c., 47—70; unsold, 49; ships at sea, 40.

HAY MARKETS.—THURSDAY, Jan. 19.

SMITHFIELD.—Meadow hay, 4*l* 4s to 5*l* 10s; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 12s per load. A fair demand.

CUMBERLAND—Meadow hay, 4*l* 5s to 5*l* 12s; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 12s per load. Trade inactive.

WHITECHAPEL.—Meadow hay, 4*l* 4s to 5*l* 10s; clover, 5*l* 10s to 6*l* 12s 6d and straw, 1*l* 8s to 1*l* 12s per load. A moderate supply.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 20.—The business done this week has been to a fair extent, at steady prices, and the prospects for our approaching public sales of East India next week are very good, as the quantity to be brought forward is by no means excessive (about 15,000 bales), whilst the consumption of this class of wool continues very steady. The sales of the sundry kinds are to follow on the 7th proximo, but the quantity of these has not yet been announced.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 20.—The market moderately attended. Wheat firm at full prices of Tuesday, with scarcely so much depression. Flour steady and demand moderate. Indian corn firm: Galatz, 26s 6d. Beans, oats, and oatmeal unchanged.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 7th of January, on 11,786 miles, to 565,249*l*, and for the corresponding week of last year, on 11,460 miles, to 530,292*l*, showing an increase of 326 miles, and of 34,957*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,287 miles, to 456,842*l*, and for the corresponding week of 1864, on 8,045 miles, to 429,673*l*, showing an increase of 242 miles, and 27,169*l* in the receipts.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Jan. 16.—The share market was again dull to-day, and English and colonial railways and the banks closed with a disposition to flatness, the other descriptions being without material alteration of tone. Of the English lines, Great Western recovered ¼, Bristol and Exeter improved 1; and Metropolitan and South Devon declined 1 each, North-Eastern (Berwick) ¼, and Lancashire and Yorkshire, North-Western, and Midland a further ¼ each. In colonial, Great Western of Canada improved ⅛, Indian Branch relapsed ¼, and East Indian, Scinde, and Delhi (stock) receded ½ each. In foreign, Lombardo-Venetian further improved ¼, Ottoman relapsed ½, and Great Luxembourg declined ⅛. In American securities and foreign mines not a single movement occurred in the final quotations. In British mines, West Chiverton advanced 2½, and East Caradon further receded ½.

TUESDAY, Jan. 17.—In the share market to-day very little business was transacted, and the few movements in the closing prices were generally towards depreciation. In English railways, South Devon recovered 1, and Lancashire and Yorkshire and Midland ¼ each; ditto (Birmingham and Derby) improved 1, and Great Northern declined 1, ditto (A stock) 1½, Caledonian, Great Eastern, and North-Eastern (Leeds) ¼ each, ditto (York) ½, and Metropolitan a further ⅛. In colonial, Grand Trunk of Canada (4th preference) advanced 1, and Madras (5 per cent.) further receded ½. In foreign, Western and North-Western of France were ½ better, and Lombardo-Venetian relapsed ⅛. In American, Erie shares (paid up) declined ¾. In British mines, Great Wheal Vor improved ½, and West Chiverton further 2½; and New Seton and Wheal Seton declined 5 each, East Grenville ½, East Wheal Russell and Grenville ¼ each, Wheal Ludcott ⅛, and East Caradon a further ½. In foreign mines, Cobre Copper improved 1, and Yudanamutana ⅛.

WEDNESDAY, Jan. 18.—In the share market to-day there was no recovery of animation, and in the banks there was a rather general tendency to depression at the close, the same tendency slightly affected American securities; but mines were firm, and the other descriptions showed no average alteration. In English railways, Great Western (Newport) advanced 1; Manchester, Sheffield, and Lincolnshire ½, and Midland a further ¼; Lancashire and Yorkshire relapsed ¼, South-Western declined ½, and Caledonian a further ½. In colonial, Indus Steam Flotilla advanced 1, and Punjab and Grand Trunk of Canada receded ½ each, and Madras (4½ per cent.) 1. In foreign, Lombardo-Venetian recovered ⅛; Bahia improved ¼, and Namur and Leige ⅛; Central Argentine and Lemberg-Czernowitz declined ½ each, Dutch Rhenish ⅜, and Great Luxembourg ½. In American, United States' Five-Twenties and Illinois Central shares declined ½ each, and Erie shares (paid-up) a further 1. In British mines, East Grenville and East Wheal Russell recovered ¼ each, Great South Tolgus also improved ¼; East Bassett declined 1, and Marke Valley ¼. In foreign mines, Santa Barbara improved ⅛, and Cobre Copper a further 1.

THURSDAY, Jan. 19.—In the share market to-day very general dullness prevailed, and English railways, American securities, banks, and miscellaneous shares again closed with a weaker tendency, mines and colonial and foreign railways being steady in tone. In British mines, East Caradon and Great Wheal Vor were each finally quoted ½ better. In foreign mines, no movement occurred in the closing prices.

FRIDAY, Jan. 20.—The railway market was rather firmer to-day, although there was not much business. Foreign and colonial securities ruled inactive, and prices were without variation.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity: with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"Mr Hare is, we think, a sound and successful practioner.'—MEDICAL CIRCULAR.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

London: John Churchill; and may be had of all booksellers.

TEETH AND PAINLESS DENTISTRY.—Messrs LEWIN, MOSELY, and SONS, 30 Berners street, Oxford street, and 448 Strand (opposite Charing Cross Railway Station), established 1820, beg to direct attention to their method of supplying Artificial Teeth on a system of Painless Dentistry. These Teeth are cheaper, more natural, comfortable, and durable than any yet produced. They are self-adhesive, affording support to loose teeth, rendering unnecessary either wires or ligatures, require but one visit to fit, and are supplied at prices completely defying competition. Consultation free. Teeth from 5s. Sets, 5, 7, 10, and 15 Guineas, warranted. For the efficacy, utility, and success of this system, vide LANCET.

. No connection with any one of the same name.

NO MORE GREY HAIR.—MELANOGENE, the superlative dye of DICQUEMARE, senior, Rouen, for instantaneously dyeing in any shade of colour the hair and the beard, without danger to the skin, and free from smell. This dye is superior to all that have been employed hitherto Manufactory at Rouen, Rue St Nicholas, 39; Depôt for London, Messrs HOVENDON and SONS', 5 Great Malborough street, W., and 57 and 58 Crown street, Finsbury square, E.C.

HOLLOWAY'S PILLS.—Nervous Irritability.—The very perfection of the human body renders it, like a complex machine, very liable to be thrown out of order—a state that is at once made manifest by the nerves. Holloway's Pills are always the seasonable and reasonable remedy: they relieve every ailment which is not mortal in the human system. As alteratives, stomachics, tonics, and aperients, these Pills occupy a proud pre-eminence from which no other medicine can dislodge them: they restore health and strength which nervous and dyspeptic sufferers have failed to recover elsewhere. Holloway's Pills act with such directness on the organs of digestion, assimilation, and circulation, that they immediately arouse torpid organs, augment diminishing vital power, and support failing energies.

MORE CURES OF COUGHS, COLDS, and HOARSENESS by DR. LOCOCK'S PULMONIC WAFERS.—From Messrs Fergyson and Son, Auctioneers, Leek: "Sir,—The beneficial effects we have derived from your Pulmonic Wafers, make us feel it a duty to offer you our gratuitous testimony to their superiority over any other remedy we have ever tried for colds, coughs, and hoarseness, so peculiarly troublesome to our profession." To singers and public speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, 4s 6d, and 11s per box. Sold by all Medicine Vendors.

GRATIS AND POST FREE.—E. MOSES and SON'S new pamphlet "The Philosophy of Dress."

Country Branch:—Bradford, Yorkshire.

E. MOSES AND SON'S Establishments are closed every Friday evening at sunset until Saturday evening at sunset, when business is resumed until 11 o'clock.

Any article not approved of will be exchanged, or the money returned.

List of prices, with rules for self-measurement, fashion-card, and their new pamphlet, "The Philosophy of Dress," gratis and post free.

STARCH MANUFACTURERS TO H. R. H. THE PRINCESS OF WALES.

GLENFIELD STARCH, Awarded the PRIZE MEDAL, 1862. This unrivalled Starch is USED in the ROYAL LAUNDRY, and Pronounced by Her Majesty's Laundress to be the FINEST STARCH SHE EVER USED. HER MAJESTY'S LACE DRESSER declares it to be the BEST SHE HAS TRIED, and the above Award, by some of the most Eminent Scientific Men of the Age, CONFIRMS ITS SUPERIORITY.
WOTHERSPOON and CO., Glasgow and London.

TO MERCHANTS AND SHIPPERS.
The increased demand for
DINNEFORD'S FLUID MAGNESIA
(for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men as the safest, speediest and most effectual remedy for CONSUMPTION, CHRONIC BRONCHATIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other kind.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy.

Dr GRANVILLE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light-Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.
SOLE CONSIGNEES:

Henry Morris, Esq., late of the Madras Civil Service, 25 Mark lane, City.
Robert Porter, Esq., 50 Old Broad street.
Alfred Wilson, Esq., Firgrove, Weybridge, Surrey.

MANAGER.
Matthew Marshall, Jun., Esq.

SECRETARY AND DEPUTY-MANAGER.
C. J. H. Allen, Esq.

At the Eighteenth General Meeting of the shareholders, held at the London tavern, Bishopsgate street, on Thursday, the 19th of January, 1865,

Sir JOHN VILLIERS SHELLEY, Bart., M.P., in the Chair,

after authentication of the register of shareholders, by affixing the common seal of the Company, the following report was read by the Secretary:—

By the annexed statement of accounts, made up to the conclusion of the past half-year, which the directors have now the pleasure of submitting, it will be seen that the balance of profit amounts to £101,272 2s 2d.

After payment of interest upon the new shares, liquidating the current expenses, including a gratuity to the clerks of the establishment of 10 per cent. upon the amount of their respective salaries, making full provision for all bad or doubtful debts, and allowing for rebate of interest on bills discounted not yet due, there remains for disposal the sum of £62,719 13s 5d.

The directors declare a dividend at the usual rate of 10 per cent. per annum, and a bonus of £2 10s per share, amounting together to £20 per cent. per annum, both free of income tax, and they transfer £30,000 to the reserve fund, which, with the addition of £136,570 received in respect of the new shares, now amounts to £296,570. The balance, viz., £2,505 4s 8d, is carried to the credit of profit and loss account of the current half-year.

The shareholders will be called upon on this occasion to elect an auditor, in the place of Mr Alfred Lamb, whose resignation has been received. Mr Francis Nalder, a duly qualified shareholder, has given notice that he is a candidate for the vacant office.

GEO. THOMSON, } Auditors.
GEORGE BONE, }

It was resolved unanimously.—

That the report now read be received.

The chairman announced that the dividend and bonus would be payable on and after Thursday, Jan. 26, at the Head office, in Threadneedle street.

It was resolved unanimously.—

That Mr Francis Nalder be elected an auditor of this bank in the place of Mr Alfred Lamb resigned.

That the best thanks of the meeting are due to the chairman and directors for their very able and efficient services.

That the cordial thanks of the shareholders are hereby tendered to Mr Marshall, Mr Allen, and the other officers of the bank for the excellent manner in which the business of the bank is conducted.

Extracted from the minutes.

JOHN VILLIERS SHELLEY, Chairman.
C. J. H. ALLEN, Secretary and Sub-Manager.
Threadneedle street, Jan. 19, 1865.

BANK OF LONDON,

Threadneedle street, and Charing cross.

CHAIRMAN—Sir John Villiers Shelley, Bart., M.P.
VICE-CHAIRMAN—John Griffith Frith, Esq., (Frith, Sands and Co.)

MANAGER—Matthew Marshall, jun., Esq.

Current accounts opened with parties properly introduced, and interest allowed on credit balances, provided such balances are not drawn below £200.

Money received upon deposit, repayable on seven days notice, interest on which is regulated by the market value of money, as announced from time to time by public advertisement, the present rate being Four-and-a-half per Cent.

Circular Notes and Letters of Credit issued free of charge, and all descriptions of banking business transacted.

C. J. H. ALLEN, Secretary and Sub-Manager.

EIGHTEENTH REPORT OF THE CITY BANK,

London.

At a General Meeting of the shareholders, held at the London Tavern, on Tuesday, 17th January, 1865.

Peter Bell, Esq., Chairman.

DIRECTORS.

Peter Bell, Esq.	Robert Lloyd, Esq.
John Campbell, Esq.	William Macnaughtan, Esq.
Henry Vigurs East, Esq.	Jonathan Thrup, Esq.
David Q. Henriques, Esq.	John Vanner, Esq.
John Hackblock, Esq.	Augustus J. White, Esq.
John Jones, Esq.	George Young, Esq.
Andrew Lawrie, Esq.	

MANAGERS.

John Woolmore Duncan, Esq.
Alfred George Kennedy, Esq.
Branch Office—E. G. Mullins, Esq.

SOLICITORS.

Messrs Pearce, Philips, and Pearce.

The "Register of Shareholders" and "Register of Transfers" having been authenticated by impressing thereupon the Corporate Seal of the Bank, the following Report was read by the Secretary, viz.:—

The annexed statements of the liabilities and assets, and of profit and loss for the six months to 31st December last, show, after payment of interest on current and deposit accounts, a gross profit of £79,933 15s 8d, which, added to £7,969 17s 9d brought from last half-year, makes a total of £87,903 13s 5d. This result, after providing for current expenses, bad debts, rebate of interest on bills discounted not yet due, and the half-yearly deduction from the building account, enables the Directors to declare the usual Dividend of £6 per cent. per annum on £500,000, the present paid-up capital of the Bank, and a Bonus of £1 10s per share (together equal to £12 per cent. per annum), free of income tax, and to carry forward £4,685 9s 11d to the new profit and loss account.

The Directors regret that the late severe commercial crisis has not passed without entailing considerable losses on the Bank; they have, therefore, decided to reserve a sum of £30,000, which they believe will be amply sufficient to meet any deficiency which may arise upon estates now in course of liquidation.

The progress of the Bond street branch continues satisfactory.

The Dividend and Bonus will be payable at the Bank on and after the 24th instant.

A Dividend was declared for the period ending the 31st December last, at and after the rate of £6 per cent. per annum on the paid-up Capital, and a Bonus of £1 10s per share, both free of income tax.

It was resolved unanimously—

That the report just read be received and adopted.

That the best thanks of the meeting be tendered to the Chairman and Directors for their able services during the past half-year.

That the thanks of the shareholders be given to Mr Duncan and Mr Kennedy, the Managers; Mr Mullins, the Branch Manager; Mr Worth, the Secretary; and to the other officers of the Bank, for their efficient services.

That the thanks of the meeting be presented to Mr Lewis and Mr Curry for their careful audit of the accounts.

(Signed) PETER BELL, Chairman.

JOHN CURRY, }

THE CITY BANK, LONDON.

Incorporated by Royal Charter, A.D. 1855.
Head Office—Corner of Finch lane, Threadneedle street.
Branch Office—No. 34 Old Bond street.
Subscribed Capital (10,000 shares of £100 each), £1,000,000.
Paid-up Capital, £500,000.
Reserved Fund, £140,000.

Current accounts are made up to the 30th of June and the 31st of December in each year, and if the credit balance shall not at any time during the half-year have been below £500, interest at the rate of 2 per cent. per annum is allowed on the minimum monthly balances. If not below £200, interest at the rate of 1 per cent. per annum is allowed on the minimum monthly balances; but if under £200 no interest is allowed. Parties keeping current accounts have the privilege of drawing cheques, of having approved bills discounted, of obtaining loans upon negotiable securities, of depositing bills, coupons, &c., for collection, and of lodging with the Bank deeds and other valuable property in the fire-proof strong rooms for safe custody.

Deposit Accounts—Money, in amounts of £20 and upwards, is received from the public generally,—subject to seven days' notice of withdrawal, and interest is allowed thereon at the current rate of the day: the Bank notifying any change in the rate of interest by advertisement in one or more of the leading London newspapers. If the money be withdrawn within a fortnight, no interest is allowed. Persons having current accounts can transfer any portion of their credit balance to deposit account.

The Agency of Country and Foreign Banks, whether joint stock or private, is undertaken by the Bank.

Letters of Credit, payable at any of the chief commercial towns and cities of the world are granted.

Circular notes are issued by the Bank, addressed to all, and payable at any of the places on the Continent where the bank has an agent.

Dividends, &c., on Government and other stocks, annuities, pensions, &c., are received for customers of the Bank without charge; the purchase and sale of stocks, shares, and securities are also undertaken; and every description of banking business is transacted.

London, Jan. 17, 1865.

THE SCINDE, PUNJAUB, AND DELHI BANK COPORATION (Limited).

Head Office—80 King William street, London, E.C.
Capital, £1,000,000. Paid up, £373,414.

Drafts and Letters of Credit granted on the branches of the Bank at Bombay, Calcutta, Kurrachee, Lahore, and Umritsur, and on its Agents at Madras and Ceylon. Approved Bills on those places negotiated or sent for collection; and circular notes issued for the use of travellers.

Deposits of £100 and upwards received at interest for such periods, and at such rates, as may be agreed upon.

Investments in, and sales of, Indian and other securities effected: dividends, pay, &c., received, and every description of banking and exchange business with India transacted.—By order of the Court of Directors,

T. G. CRAIG, Manager.

THE LONDON AND SOUTH AFRICAN BANK,

Incorporated by Royal Charter, 1860,
(Paid-up Capital, Half a Million Sterling)

Issues Letters of Credit, free of charge, and Drafts on its Branches at the undermentioned places, viz.:—

Port Elizabeth	Fort Beaufort.
Graham's Town.	Ultenhage.
Cape Town.	D'Urban.
Graaff Reinet.	Pietermaritzburg.
Colesberg.	King William's Town.

Advances made against shipments of goods to the Cape Colonies.

Bills negotiated and sent for collection, and all banking business transacted.

Interest at the rate of 6 per cent. per annum (payable half-yearly if desired) allowed on fixed deposits subject to twelve months' notice.

The rates for other periods may be known at the Head Office, No. 10 King William street, London, E.C.

By order of the Court,
WILLIAM MORRIS JAMES, Manager.

London, June 13, 1864.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, 30th Aug., 1851.

Paid-up capital, £1,500,000; reserved fund, £444,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Madras, Ceylon, Hongkong, Singapore, Mauritius, Melbourne, and Sydney, on terms which may be ascertained at their office. They also issue Circular Notes and Letters of Credit for the use of Travellers by the Overland Route. They undertake the agency of parties connected with India, the purchase and sale of Indian Securities, the safe custody of Indian Government Paper, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of Remittances between the above-named dependencies.

They also receive Deposits of £100 and upwards, repayable on a notice of 10 days, and allow interest thereon at 1 per cent. below the Bank of England minimum rate of discount, rising and falling therewith, but not rising above 5 per cent. Deposits subject to longer notice or repayment bear higher rates, which may be ascertained at their office.

Office hours 10 to 3. Saturdays, 10 to 2.
Threadneedle street, London, 1865.

FIFTY-FIFTH REPORT OF THE

LONDON JOINT-STOCK BANK.

At a General Meeting of the Shareholders, held at the Banking house of the Company, in Princes street, Mansion house, on Thursday, the 19th of January, 1865,

FREDERICK RODEWALD, Esq., Chairman,
GEORGE POLLARD, Esq., Deputy-Chairman,

the following Report was presented:—

The directors have much pleasure in placing before the shareholders the annexed statement of the liabilities and assets of the bank, and of the profit and loss account for the half-year ending the 31st ultimo, by which it will be seen that the bank has made a net profit of £171,125 9s 7d, including £26,976 7s 10d brought forward from the previous half-year.

Of this amount, the directors have appropriated the sum of £150,000 for the payment of the usual dividend at the rate of 12½ per centum per annum, with a bonus of £1 17s 6d per share, and have carried £21,125 9s 7d to the credit of the guarantee fund. In pursuance of the resolution of the General Meeting of the 18th August, confirmed on the 15th September last, the issue of 12,000 new shares has been made, and the directors have the satisfaction to acquaint the shareholders that the subscribed capital of the bank is now £3,600,000, divided into 72,000 shares of £50 each, paid up to the extent of £15 per share, thus making the paid-up capital £1,080,000 entitled to participate in profits from the 1st January.

The guarantee fund has been credited with the sum of £1,372 19s 6d, realised on the sale of 227 new shares not taken up by the allottees.

This fund is also credited with accruing interest, and debited with £4,875 to cover the depreciation in value of the Government Securities since the 30th June, and now amounts to £298,069 7s 1d.

With a view to avoid the inconvenience of varying the Guarantee Fund at the close of every half-year by an entry to regulate the market value of the Government Securities held by the Bank, and which is of no practical utility, inasmuch as these securities are held as a permanent investment, a resolution, of which no notice by circular has been given to the shareholders, will be proposed to the meeting to authorise the directors to value for the future at par the Exchequer bills, and at the fixed price of 90 all Consols and New Three per Cents. held by the bank.

The following Directors retire by rotation, under the provisions of the Deed of Settlement, viz.:—Henry Christy, Esq., Francis B. Goldney, Esq., Charles J. Heath, Esq., Henry Lee, Esq., and George Pollard, Esq., who, being eligible, offer themselves for re-election.

The dividend and bonus, free from income tax, will be payable on and after Friday, the 27th inst., and the interest payable on the new share capital and premium is payable on and after the same day.

The preceding report having been read to the meeting by the Secretary, a dividend for the half-year ending the 31st December last, after the rate of £12½ per centum per annum, and a further division of £1 17s 6d per share, out of the profits of the half-year ending as above, were declared by the Chairman.

Resolved unanimously,—

That the Report now read be received, and that it be printed for the use of the shareholders.

The following directors, having retired by rotation, were unanimously re-elected, viz.:—

Henry Christy, Esq.	Henry Lee, Esq.
Francis B. Goldney, Esq.	George Pollard, Esq.
Charles J. Heath, Esq.	

Resolved unanimously,—

That this meeting desires to express its opinion that the directors, in making up their half-yearly balance-sheets, should and they are hereby authorised to value consols and the New and Reduced £3 per Cent. Annuities at 90, and Exchequer Bills at par, without regard to the actual value or market price thereof at the time such accounts are made up.

Resolved unanimously,—

That the best thanks of the shareholders be given to the Chairman and directors for their able and successful management of the affairs of this bank.

Resolved unanimously,—

That the thanks of this meeting be given to the Managers, Secretary, and officers for their continued attention to the business of the bank.

(Signed) FREDK. RODEWALD, Chairman.

Extracted from the Minutes,
ALFRED SCRIVENER, Secretary.

At the Ordinary General Meeting of proprietors, held at the London Tavern, Bishopsgate street, on Wednesday, 18th January, 1865, the following report was read by the Secretary:—

The Directors have the satisfaction to inform the shareholders that by the completion of the issue of the new shares, the capital of the Company is now as follows, viz.:—

	£
Subscribed capital	3,000,000
Paid up	600,000
Reserved fund	300,000

The accounts for the half-year ending 31st ultimo show a gross profit of £130,746 11s 10d, and after deducting the current expenditure, Directors' and Auditors' remuneration, making an ample allowance for bad and doubtful debts, writing off proportion of building expenses, and reserving £55,229 10s for rebate of interest on bills not yet due, there remains the sum of £62,372 8s 8d, which, with £1,830 3s 10d brought forward from the last half-year, amounts to £64,202 12s 1d.

The Directors have, therefore, the pleasure to recommend that a dividend at the increased rate of 20 per cent. per annum be declared, and that the balance of £4,753 0s 4d be carried forward to the credit of the next half-year's profit and loss account.

The Directors congratulate the proprietary upon the steady but marked success which this Company has attained; but would still again impress upon them how greatly its prosperity might be extended by each shareholder becoming a depositor with the Company, and by recommending its principles to their various connections.

The Directors who go out of office by rotation on this occasion are—

George Burnand, Esq.,
H. H. Toulmin, Esq., and
F. C. Wilkins, Esq.,

all of whom, being eligible, offer themselves for re-election.

The dividend, free of income tax, will be payable on and after the 1st of February.

The shareholders will have to elect Auditors for the current year, and notice has been given that a resolution will be submitted at the meeting to increase their remuneration from £100 to £150 a year each.

(Signed) J. MORTON BELL, J. R. MORRISON, } Auditors.

33 Cornhill, January 19, 1865.

The advertisement calling the meeting, together with the Report and Accounts, have been read,

The following Resolutions were moved and carried unanimously:—

First.—That the Report and Accounts now read be received, adopted, and entered on the minutes.

Second.—That a dividend at the rate of 20 per cent. per annum, free of income tax, be declared on the paid-up capital of £600,000; that the same be payable on and after the 1st February, and that the balance of £4,753 0s 4d be carried forward to the credit of the next half-year's profit and loss account.

Third.—That George Burnand, Esq., Henry Hayman Toulmin, Esq., and Frederick Charles Wilkins, Esq., who retire by rotation on this occasion, be re-elected as Directors of the Company.

Fourth.—That J. M. Bell, Esq., and J. R. Morrison, Esq., be re-elected as Auditors for the current year, and that their remuneration be increased from £100 to £150 per annum each respectively.

Fifth.—That the shareholders fully appreciate and offer their best thanks to the Chairman, Deputy-Chairman, and Directors for the valuable and efficient aid they have rendered in promoting the interests of the Company.

Sixth.—That the best thanks of the shareholders be given to the Managers, Secretary, and general staff of the Company for their zealous and efficient services.

(Signed)

FRANCIS WILLIAM RUSSELL, Chairman.

(Extracted from the Minutes),

RICHARD PRICE, Secretary.

SECRETARY—John Henchman, Esq.

Offices—17 Duke street, Westminster.

The line authorised by the "Metropolitan and St John's Wood Railway Act, 1864," has been laid out for the purpose of affording to the residents of St John's wood, Belsize park, the Finchley road, Kilburn, Hampstead, and their vicinity the advantages of direct railway communication with the heart of the city of London, and with other parts of the metropolis

The line, which, as at present authorised is nearly two miles and a half in length, will commence at the Baker street station of the Metropolitan Railway, pass up the Park road, crossing the South bank, Regent's canal, North bank, and St John's wood road, and thence up the Finchley road to its termination at the Finchley road station of the Hampstead and City Junction Railway, and the proposed new station on the Midland Railway.

There will be three intermdiate stations, the first at the St John's wood road (contiguous to Lord's Cricket Ground), the second at the junction of the Malborough road (near to the Eyre Arms), and the third at the Swiss cottage, accommodating the district of the Avenue road, Belsize park, Victoria road, and other new roads on the western and southern sides of the line, together with the southern part of Hampstead.

An agreement has been entered into with the Metropolitan Railway Company to work and maintain the line, to provide engines, carriages, and plant of every description, and to defray all outgoings connected with the working, for 50 per cent. of the gross receipts; it also comprises through booking over their system and an interchange of traffic, to enable passengers from the Metropolitan and St John's Wood Railway to pass to and from all the stations on the Metropolitan Railway.

Upon the completion of the authorised extensions of the Metropolitan Railway to Trinity square on the east, and to Brompton by way of Notting hill on the west, with the Metropolitan District Railway (forming together a complete inner circle of metropolitan railways) being carried out, direct railway access will be afforded by the proposed line to all parts of the metropolis, to the Crystal Palace, and to all the great trunk lines terminating in London. The advantage to the residents of Hampstead, Kilburn, and other districts adjacent to the line, of being enabled to take season tickets to the City and over the whole of the inner circle can scarcely be over-estimated.

The necessary steps have been taken to enable the Company to apply in the next Session of Parliament for powers to extend the line to a central part of Hampstead. The proposed station at Hampstead will be as near the surface and as easy of access as the existing stations on the Metropolitan Railway. This extension of about a mile in length will bring the railway into communication with a very large and important residential district, yielding a steady and daily increasing traffic, and will at the same time secure a large amount of pleasure traffic to Hampstead heath and the beautiful scenery in the vicinity. The Bill will have the cordial support of the principal landowners in the district, and no opposition of importance is anticipated.

The railway will be worked on the same safe principle as that which has been so successfully carried out on the Metropolitan Railway, viz., in not permitting two trains to be between any two stations at the same time on the same line of rails, and it has been ascertained that at least 60,000 passengers per day can be carried by the Company without difficulty.

With regard to the anticipated profits, it is only necessary to point to the densely populated and rapidly growing district which the line will serve, and to the small capital required for its construction, which afford reasonable promise of its becoming soon a greater success than the Metropolitan Railway, whose shares, even in its now incomplete state, are at a considerable premium.

Arrangements have been made which will secure the completion of the line within the shortest possible time and the payment of interest at the rate of £5 per centum per annum on the amount of capital from time to time called up.

Applications for shares to be made to the Secretary or the brokers of the Company in the annexed form. A deposit of £1 on each share applied for must be paid to Messrs Herries, Farquhar, and Co., St James's street, or to Messrs Robarts, Lubbock, and Co, 15 Lombard street, previously to the application being sent in, and a further sum of £1 on allotment. Should no allotment be made the deposit will be repaid in full.—By order,

JOHN HENCHMAN, Secretary.

Offices, 17 Duke street, Westminster, Jan. 16, 1865.

FORM OF APPLICATION FOR SHARES.

To the Directors of the Metropolitan and St John's Wood Railway Company.

Gentlemen,—Having paid to the bankers of the Company the sum of £ to your credit, I request you to allot to me shares in the Metropolitan and St John's Wood Railway Company, and I agree to accept such shares, or any less number that may be allotted to me; and I request you to place my name on the register of shareholders.

Name in full.....

Profession or trade .....
Date .....

BANKERS' RECEIPT.

London, ——, 1865.

Received of the sum of pounds, being a deposit upon an application for shares in the Metropolitan and St John's Wood Railway Company.

For

ITALIAN FIVE PER CENT. STATE-DOMAIN LOAN.

Principal and interest guaranteed by the Italian Government, with special hypothecation on the State Domains in terms of law of Italian Parliament of 24th November, 1864.

£8,000,000 Nominal Capital,

In bonds to bearer of £20, or 505 francs or lire each, and larger amounts, with half-yearly coupons attached, payable 1st April and 1st October, as also the reimbursement of the bonds drawn annually in sterling in London, and in francs or lire on the Continent, at—

London—The General Credit and Finance Company of London (Limited); the Italian Land Company.

Paris—The Societe Generale.

Lyons—The Credit Lionnais.

Turin—Italian Credit Mobilier; Discount and Silk Bank.

Florence—The Tuscan Credit Bank.

Leghorn—M. A. Bastogi and Sons

Genoa, Milan, Bologna, Ancona, Naples, Palermo, Messina, Parma, Modena, and Bari—National Bank of Italy.

Amsterdam—Banque des Pays Bas.

Frankfort—Messrs Von Erlanger and Sons.

Geneva—Banque de Credit Genevois.

This issue, in terms of the law, is secured by the deposit with the Societe Anonyme, which acts as agent for the Italian Government for the sale of the State-Domains, and issues the bonds of an identical number of State Treasury bonds of the same amount specially appropriated, giving each bond of the present issue the guarantee of the Government for its principal and interest, which will be certified on the back by a Royal Commissioner; and, in addition, by a special hypothecation on the State-Domains, and the proceeds of these sales, estimated at about £10,000,000.

The bonds bear interest at 5 per cent. on their nominal amount, and are to be redeemed at £100 by fifteen equal drawings in fifteen years, commencing 1st January, and payable 1st April, 1866.

The price of issue for a bond of the nominal value of £100 is payable as follows:—

£	s		
5	0	.....	on Application.
5	0	.....	on Allotment.
15	0	.....	1st March.
17	10	.....	3rd April, less 2½ Coupon.
15	0	.....	2nd May.
10	0	.....	1st June.
10	0	.....	3rd July.
77	10		

A Coupon of 2½ per cent., due 1st April, 1865, will be attached to the Scrip, thus reducing the net price of the Bond to 75, and subscribers will have the option of paying the instalments under discount at the rate of 6 per cent. per annum on any of the days fixed for payment of the instalments; but in default of due payment of the respective instalments, all previous payments will be liable to forfeiture.

Each bond further carries with it a free coupon de jouissance, representing its pro rata participation in 10 per cent. of any profit realised by the sale of the domains over their valuation, which, at the average rate at which sales are now making, may be estimated at from £2 to £3 on a £100 bond, receivable over the fifteen years.

The net price of a £100 bond is thus further reduced to about 74, at which rate the interest, with the advantage of the annual drawings, makes the investment at the rate of over 10 per cent. per annum. (This calculation has been verified by Mr Jellicoe, the President of the Institute of Actuaries.)

After allotment, Scrip Certificates in sterling money will be issued to "bearer," by the General Credit Company for the portion of the loan subscribed in England, and by the foreign agencies for the portion subscribed in Italy and elsewhere on the Continent in francs or lire.

The Continental Scrip Certificates will not be uniform with those issued in England until after payment of the final deposit when they will be exchanged for the definitive bonds to bearer, which will be printed uniformly in English, French, and Italian.

Applications for allotment must be addressed to the General Credit and Finance Company of London (Limited), 7 Lothbury, London, Agents for the Contractors, and to the following houses abroad:—

Turin—Italian Credit Mobilier; Discount and Silk Bank.

Florence—The Tuscan Credit Bank.

Leghorn—M. A. Bastogi and Sons.

Genoa, Milan, Bologna, Ancona, Naples, Palermo, Messina, Parma, Modena, Bari—National Bank of Italy.

Amsterdam—Banque des Pays Bas.

Frankfort—Von Erlanger and Sons.

Geneva—Banque de Credit Genevois.

Paris—Henisch, Lutcher, and Co.

Applications must be accompanied by the prescribed deposit of 5 per cent. on the nominal amount applied for, which may be paid at

The General Credit Company, 7 Lothbury.

Messrs Robarts, Lubbock, and Co., Lombard street.

The London and Westminster Bank.

The Union Bank of London.

The Anglo-Italian Bank, 16 Leadenhall street.

Forms of application and prospectuses may be obtained at the General Credit and Finance Company of London (Limited), 7 Lothbury; and of the Brokers, Messrs James Cape and Co., 5 Throgmorton street, and Messrs Mullens, Marshall, and Co., 3 Lombard street.

Copies of the law, and documents relating to the authorisation of the loan, may be seen at the office of Messrs Baxter, Rose, Norton, and Co., 6 Victoria street, Westminster.

FORM OF APPLICATION FOR SHARES.

To be retained by the Bankers.

Italian Five per Cent. State-Domain Loan.

To the General Credit and Finance Company of London (Limited.)

Having paid to , your Bankers, the sum of £ , being the required deposit of 5 per cent. on £ , I request that you will allot to me £ in the above Loan, and I hereby agree to accept that amount, or any less sum that may be allotted to me.

CRESSEY'S LONDON AND BURTON STEAM COOPERAGE COMPANY

(Limited), for manufacturing casks, &c., without the aid of skilled labour. Incorporated under the Companies Act, 1862. Capital £100,000, in 10,000 shares of £10 each. First issue 5,000 shares, more than half of which are already applied for. Deposit 10s per share on application, and 30s on allotment. No further call will be made without giving three months' notice, and not to exceed £2 per share. Deposit returned if no allotment made.

DIRECTORS.

W. H. Brown, Esq., contractor, Stockport.

James Fox, Esq. (Fox Brothers), Derby.

Robert Harlow, Esq., Brass and Iron Works, Heaton Norris, Stockport.

F. C. Jones, Esq., Blackfriars and Dinorben Court, Hants

J. C. Mason, Esq., Birmingham.

Sir Edwin Pearson, Wimbledon, F.R.S., Director of the Scottish Australian Investment Company.

George Redrup, Esq., brewer, Loughborough.

John Werrett, Esq., Temple and Clapton, Director of the Hercules Insurance Company, London.

(With power to add to their number.)

BANKERS.

London, Birmingham, and South Staffordshire Bank, London, and its several branches; Derby and Derbyshire Bank, Burton-on-Trent, Derby, &c.

SOLICITORS.

Messrs James Taylor, Mason, and Taylor, 15 Furnival's inn, London.

BROKER.

Roger Mortimer, Esq., 77 Old Broad street.

AUDITORS.

Messrs Kemp, Ford, and Co., Public Accountants, Gresham street, London; Samuel John Shrubb, Esq., 94 Cannon street, London.

SECRETARY.

Mr John Jeyes.

Temporary Offices—London, 36 Bucklersbury; Burton-on-Trent, Messrs J. and W. J. Drewry's offices, High street.

PROSPECTUS.

The first object of this Company is to purchase and work Cressy's patents for manufacturing casks (to which a first-class medal was awarded at the Exhibition of 1862), to prepare staves and hoops, for the repair of casks already in use, for the working up of brewer's own materials; also to supply machinery and grant licences for the use of the same in this and foreign countries.

This machinery has for some time been in most successful operation at Messrs Bass, Ratcliff, and Gretton's, the celebrated brewers at Burton-upon-Trent, and was adopted by them after careful comparison with other inventions.

The advantages of constructing an article so largely required by machinery instead of by hand labour are too apparent to require lengthy enumeration; the chief being great economy in wood, perfection of manufacture and consequent durability, prevention of leakage, saving in cost of labour, and the absence of the necessity for dependence upon skilled labour.

The Directors will also make use of all the available, most modern, and perfect wood machinery, and they have already other important inventions, adapted for cask-making, offered to their notice.

The present system of making casks by hand labour is utterly inadequate to supply the requirements of the brewers; and the trade generally, both in London and the country, suffers much inconvenience therefrom; while in the cider and wine-growing countries large sums are annually lost through the inability to procure properly-constructed casks in sufficient quantity.

It is computed that at least £3,000,000 worth of casks are used annually in this country for beer only; and for all purposes more than double that amount is expended.

The objects of this Company have the strong approval of the brewing and other cask-requiring trades, and such an amount of capital and support is already promised, that the Directors will, immediately after allotment, commence the construction of factories on a large scale at Burton-upon-Trent and in London, with the certainty of orders for all the casks the Company can manufacture; and extend their works hereafter to such other places as may appear desirable.

Advantageous terms have been made with Mr Cressey for the purchase of his patents, who has consented to take four-fifths of the purchase money in paid-up shares.

A large amount of the required capital has been privately subscribed.

From a careful examination of the cost of manufacturing casks by Cressey's machinery over the labour system, the Directors have every reason to believe that the minimum dividend will be at the rate of 20 per cent. per annum.

The articles of association may be inspected at the Company's offices, where specimen casks may also be seen.

Prospectuses and forms of application for shares may be obtained at the bankers, and their several branches; or of the brokers and solicitor; and at the temporary offices of the Company, 36 Buckler-bury.

SECRETARY—John A. L. Barnard, Esq.

Offices—5 Sherborne lane, King William street, E.C.

PROSPECTUS.

This Company is possessed of, and working, three valuable and extensive slate quarries in Carnarvonshire, North Wales, which are at the present time producing at the rate of about 3,000 tons of manufactured slates per annum.

The Vron Quarry, situate in Nantlle Vale, is on the celebrated Bangor Vein, and adjoins the Pen-ye-Ossed, Cilgwyn, Doreathes, Pen-y-Bryn, Tal-y-Sarn, and other famous quarries. This quarry is fitted up with extensive plant, buildings, &c., and is now in full work, producing considerable quantities of slate monthly. The estate consists of about 60 acres, and is most eligibly held under a lease from the Crown for 21 years. New works are being rapidly carried on, which will, within the next twelve months, very largely increase the present production of slates.

The Cwm Eigia Slate Quarry is situate in Carnarvonshire, about six miles east of the late Assheton Smith's and Colonel Pennant's slate quarries, and what is well known as the Festiniog Slate Vein. This quarry has been fully opened, and is fitted up with extensive plant, machinery, water-wheel, large sheds and workshops, as also offices and barracks for 150 men, and is now in full work, producing large quantities of slate monthly, which will be considerable increased on the completion of the works now in progress. The estate is of very large extent, comprising about 1,000 acres, and is held under a lease from Sir Richard Bulkeley Williams Bulkely, Bart., for a term of 21 years.

The Caedryn Quarry is situate about one mile and a quarter from the Cwm Eigia Quarry, and has been extensively opened with four large galleries, from which upwards of 800 tons of slates have been made within nine months. This yield can at once be doubled by the erection of Hunter's sawing machines, and increased to an almost unlimited extent. This quarry is held under a lease from Lord Newborough for a term of 21 years, renewable for a further term of 21 years on payment of a fine of £500.

In connection with the two last-named quarries the Company also possess a tram-road, extending from the Cwm Eigia Quarry, through the Caedryn Quarry, to the river Conway, a distance of nearly seven miles, recently completed at a cost of nearly £8,000, by which the slates from these quarries are now being shipped from the Company's own wharf on that river. The construction of this tram-road has reduced the carriage of the slates to the shipping port from 10s, paid formerly, to 2s per ton.

Each of these quarries possesses an unlimited amount of slate rock still unworked, with ample tip room for rubbish and waste, and is capable of being developed equal to some of the largest quarries in Wales. The production of slates has been more than doubled within the last six months, and as a large amount of additional machinery is in course of erection, together with buildings and extension of the workings in the quarries, their joint production will, it is confidently anticipated, be attended with equally favourable results within the next six months, and go on increasing monthly.

The principal advantages are the same as those possessed in the quarries of Colonel Pennant and the late Mr Assheton Smith (which are realising profits of upwards of £120,000 and £90,000 respectively). Lord Palmerston's quarries, on which nearly £200,000 has been expended, are also paying enormous profits, while the £25 shares in the Doreatha Quarries, on which only £8 has been paid, are now quoted at from £250 to £300 each. The same applies to numerous other slate quarries, which are paying almost fabulous dividends.

It is well known that the demand for slates far exceeds the supply, and it is extremely difficult, at the larger quarries, to have orders executed in less than two years from the date of order. In the case of this Company, the orders received for slates are already considerably in advance of the supply.

The slate from these quarries can be delivered at such a cost on board ship as to leave a net profit of from 20s to 25s per ton; and, judging from the results already obtained, it is anticipated that a good dividend will be earned in the first six months of the Company's operations, which will be increased as the works are extended, until ultimately the profit to be realised upon the paid-up capital of the Company will equal any of the best quarries in Wales.

Application for shares to be made at the offices of the Company, or to their bankers, or brokers, in the following form. No application will be entertained unless a deposit of £1 per share on the number of shares applied for be previously paid to the bankers of the Company, in exchange for which a receipt will be given; and on allotment a further payment of £2 per share on the number allotted must be paid. In the event of the Directors allotting less than the whole number applied for, the amount paid into the bankers will be applied towards the further payment on the number allotted.

FORM OF APPLICATION FOR SHARES.

To the Directors of the British Slate Company (Limited).

Gentlemen,—Having paid to your credit at the the sum of £ , being a deposit of £1 per share, on shares in the above Company, I hereby request that you will allot me that number, and I agree to become a member of the Company in respect of such shares, or in respect of any less number you may allot me, and to execute the Articles of Association when required, and I request that my name may be placed on the Register of Members for the shares so allotted.

CHLORODYNE.

VICE-CHANCELLOR WOOD stated that Dr J. Collis Browne was undoubtedly the Inventor of Chlorodyne. Eminent Hospital Physicians of London state that Dr J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr Browne's.—See TIMES, July 13, 1864. The Public, therefore, are cautioned against using any other than DR J. COLLIS BROWNE'S CHLORODYNE.

This Invaluable Remedy produces quiet refreshing sleep—relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretion of the body.

From J. M'Grigor Croft, M.D., M.R.C., Physician, London, late Staff Surgeon to H.M.F. "After prescribing Dr J. Collis Browne's Chlorodyne for the last three years, in severe cases of Neuralgia and Tic-Douloureux, I feel that I am in a position to testify to its valuable effects. Really in some cases it acted as a charm, when all other means had failed." No home should be without it. Sold in bottles, 2s 9d and 4s 6d. Sent free on receipt of stamps, by J. Davenport, 33 Great Russell street, W.C., Sole Manufacturer.

Observe particularly, none genuine without the words "Dr J. Collis Browne's Chlorodyne" on the Government stamp.

THE PALL MALL GAZETTE:

An Evening Newspaper and Review.

It is difficult to describe the plan of an enterprise like the PALL MALL GAZETTE without seeming to boast or to decry the efforts of others. But we are unwilling to lose the advantage of a few words of explanation, and we therefore trust the candour of the reader for a just interpretation of our meaning.

The PALL MALL GAZETTE will contain all the news proper to an Evening Journal. But, addressed as it will be to educated men and women, the space of the Paper will not be occupied by trifling chronicles, nor by that excess of words which adds nothing to the interest of newspaper records, while it destroys their significance. Literary considerations alone would determine us to have our News Reports written in plain English; but beyond these there is the fact that the lessons to be found in many an accident of human life or social polity are lost in the turgid language in which they are commonly narrated.

Events made known by the Morning Papers may be discussed in the PALL MALL GAZETTE of the same day, but they will not be reported anew. Trustworthy advices from the Money Market will be included in the News of the Day.

The rest of the Paper (by far the greater part) will be made up of original articles upon the many things which engage the thoughts, or employ the energies, or amuse the leisure of mankind. Public Affairs, Literature, the Arts, and all the influences which strengthen or dissipate Society, will be discussed by men whose independence and authority are equally unquestionable, and who are accustomed to regard the public expression of opinion as a serious thing. This is the chief aim of the PALL MALL GAZETTE: to bring into Daily Journalism that full measure of thought and culture which is now found only in a few Reviews.

At the same time, we by no means intend to make the Paper pedantic or solemn. Humour is too powerful, as well as too pleasant, to be left out of the design, which will lose none of the advantages of occasional trifling. If a thing can be said better in verse than in prose, it will be said in verse. Epigram, but not spite—burlesque, but not vulgarity—will be readily admitted into its columns; and since a joke is often as illustrative as an argument, good jokes will be welcome too.

It will be understood that this Advertisement is rather a proclamation of idea and of effort than of promise. But the proclamation is not made before a large number of able writers have accepted the idea, and pledged themselves to the effort.

Office of the PALL MALL GAZETTE,
14 *Salisbury street, Strand, W.C.*

LAURIE'S TABLES OF SIMPLE INTEREST for EVERY DAY in the YEAR, at 5, 4½ 4, 3½, 3, and 2½ per cent. per annum, from £1 to £100, &c. Twenty-seventh Edition, 800 pp., 8vo, cloth, strongly bound, £1 1s; or in calf, £1 6s.

LAURIE'S TABLES OF SIMPLE INTEREST, at 5, 6, 7, 8, 9, and 9½ per cent. per annum, from 1 day to 100 days. Eighth Edition, 8vo, cloth, 7s.

London: Virtue Brothers and Co., 1 Amen corner, E.C.

THE QUARTERLY REVIEW, No. CCXXXIII., is published THIS DAY.

CONTENTS.

I. William Blake the Artist.

NEW EDITION.—POST FREE.

GABRIEL'S PAMPHLET ON THE TEETH (illustrative and descriptive).

Explaining the only effectual mode of supplying Artificial Teeth without pain, to answer in every particular the purpose of natural masticators.

These Teeth are supplied on the principle of capillary attraction and suction, thus dispensing entirely with springs, and are supplied at moderate charges.

London:—27 Harley street, Cavendish square, W.
City Establishment:—36 Ludgate hill.
(Four doors from the railway bridge).
Country Establishments:—134 Duke street, Liverpool; 65 New street, Birmingham.

Messrs GABRIEL guarantee every case they undertake.

PROPRIETARY SCHOOL, GRAVESEND.

Head Master, Mr M. GUTTERIDGE, B.A.

The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French, and the practice of good Handwriting.

Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.

For terms and prospectuses, apply at the School.

INDIA OFFICE, 6th January, 1865.

THE SECRETARY OF STATE FOR INDIA in COUNCIL hereby gives notice, that he has received from the Government of Bombay the undermentioned Schedules, viz.:—

Schedule of all Sums of Money, Bonds, and other Securities, received by the Administrator-General, on account of each Estate remaining under his charge, together with the Payments made thereout, and the Balances. Prepared up to 30th of June, 1864, under Section XXXIV. of Act VIII. of 1855.

Schedule of all Administrations, whereof the Balances have been paid to the persons entitled to the same, specifying the amount of such Balances, and the persons to whom paid. Prepared for the half-year ending 30th June, 1864, under Section XXXIV. of Act VIII. of 1855.

And that the said Schedules are open to the inspection of the public, in the Department of the Official Agent to the Administrators-General of India, at the India Office, Westminister.

INDIA OFFICE, 6th January, 1865.

THE SECRETARY OF STATE FOR INDIA in COUNCIL hereby gives notice, that he has received from the Government of India the undermentioned Schedules, viz.:—

A. Schedule of all Administrations whereof the final Balances have been paid to the parties entitled to receive, specifying the amount of such Balances, and the persons to whom paid, during the six months ending on 30th of June, 1864.

B. Schedule of all Sums of Money, Bonds, and other Securities received by the Administrator-General on account of Estates, not being Hindoo or Mahomedan, remaining under his charge, together with the payments made thereout, and the Balances. Prepared up to the 30th of June, 1864, under Section XXXIV. of Act VIII. of 1855.

C. Schedule of all Sums of Money, Bonds, and other Securities received by the Administrator-General, on account of Hindoo and Mahomedan Estates remaining under his charge, together with the payments made thereout, and the Balances in hand.

D. Schedule of Balances in the hands of the Administrator-General set apart to meet the admitted claims of creditors against the Estates therein mentioned.

E. Schedule of Unclaimed Balances of Estates under 500 rupees, deposited with the Sub-Treasurer, Fort William, under the Financial Secretary's letter of the 8th of October, 1852, interest being allowed thereon by Government.

And that the said Schedules are open to the inspection of the public, in the Department of the Official Agent to the Administrators-General of India, at the India Office, Westminster.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT, AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates.

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instructions on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

ALLSOPP'S PALE OR BITTER ALE.—Messrs SAMUEL ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments.—

LONDON	At 61 King William st, E.C.
BRIGHTON	At 6 Marine Parade.
LIVERPOOL	At Cook street.
MANCHESTER	At Ducie place.
LEEDS	At Commercial buildings.
BIRMINGHAM	At Upper Temple street.
DERBY	At the London road.
LEICESTER	At 52 Granby street.

NOTICE.

COMMERCIAL HISTORY AND REVIEW OF 1864.

As part of an early Number of the Economist, *we shall issue a Supplement under the above title, containing a careful Digest of the leading Merchants' and Brokers' Circulars in the different branches of trade, Lists of New Companies, Returns of Prices, Accounts of the Banks of England and France, &c. The object of the Supplement being to place in possession of our readers a Commercial History of* 1864 *worthy of preservation and adapted for reference.*

The Investor's Manual *is now sold separately, price* 9*d stamped,* 8*d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price,* 6*d.*

THREE BANKS; OR, THE LESSONS OF THE AUTUMN AS TO BANKING.

In the early part of 1864 it was widely believed that banking was a trade of few difficulties and great gains: hundreds of shareholders subscribed to new banks because they believed that any bank was sure to get money. It was also believed even more widely that times of dear money were favourable to bankers *as such*, and that in times of 8 or 9 per cent. all banks were sure to get higher profits even than usual. These ideas more or less operated upon the price of bank shares for many months, and lingered up to the declarations of the late dividends. The reports, however, which have accompanied these dividends, or excuse the non-declaration of any dividend, entirely dissipate these delusions; they show that banking is a trade of nicety and difficulty which requires much care, much coolness, and much judgment in those who carry it on; they show that times of dear money are as disastrous to one class of banks as they are profitable and pleasant to another class.

The last autumn was a detective experiment in this matter. It brought dear money among an unexampled number of banks both new and old; it was not one of those diffused panics—those impartial hurricanes which often destroy the good trader as well as the bad trader. It was a selective trial which was surmounted by the trader of good judgment, and which destroyed the trader of bad judgment. It was in its nature to bring into strong relief the advantages of some situations and the disadvantage of other situations. What, then, does the experience of this season prove?

We take as illustrations the reports of three banks—not that these banks are exactly better or worse than some others, but because their recent history happens to be instructive. They are three *types*, if we may so say, to which numerous other banks more or less approach, and which peculiarly instruct us, because their characteristics are larger and more marked.

The London and Westminster have this year set a most excellent example to the other great joint stock banks of London. In most cases, it is not possible to say how much of the vague item "deposits, *&c.*," is really deposits, and how much is made up of "bills payable," of acceptances. You cannot tell how much of the liability is on money the public have left, and how much on pieces of paper the Bank have given. The London and Westminster can well afford to give the information: they have 18,649,214*l* of real money,—of money of other persons deposited with them,—an amount which, from the way in which other banks make up their accounts, we do not *know* to be equalled by any bank in the world which does not possess the Exchequer account of a great nation. The London and Westminster Bank has been very successful this autumn in using this money. It made a net profit of 238,405*l* in the half-year, or at the rate of *forty-seven* per cent. per annum. It has not divided as much as this,—part of it is expended in paying Jones Loyd and Co. the purchase of their business, part is put to the surplus fund, part in improving the office, &c., &c. They only divide at the rate of 32 per cent. on the capital, but the amount actually realised is nearly half as much again—47 per cent.

The lesson of this is the simple but most valuable one, that those who *deserve* the confidence of the public will, at a time of trial like the autumn of 1864, be most richly rewarded for it. The London and Westminster Bank are known to manage with prudence, caution, and tact. They shun large "lock ups." They won't "run risks for half per cent." Accordingly, they have money, much money to use, when it is most profitable to use it. This autumn has been such, that any one with great sums of money, who would consent to remain in the ordinary, plain, well-known sort of banking business; who did not look out for very high interest; who rather shunned the bills which paid the very highest rate; who would have nothing to say to a customer who would "pay anything"—would be sure to make great profits. Such great establishments as the Bank of England and the London and Westminster have had such means, have pursued some such policy, have reaped some such profits.

Let us compare this with the report of a bank of which every operation appears to have been *bona fide*, on which no one ventures to breath a breath of moral imputation—we mean the "Alliance." This bank also has given us, for the first time, the full means of judging of it; it has separated the money which it receives from the acceptances which it gives. It has now about the same liability, 6,048,076*l*, to the public,

Digitized by Google

with which it commenced the half-year, and it is now made up—

	£
Current and deposit accounts	2,331,325
Bills payable	3,716,750
Total means of making profit	6,048,075

and on this they have made *a loss* of

Profit on the half-year	66,731
Taken from reserve fund	61,737
Total ascertained loss	128,468

besides an unascertained loss which may be 50,000*l*, or may be nothing, the data for making an estimate being quite insufficient. The paid-up capital of the Alliance is 746,175*l*, and it has, therefore, in half a year an ascertained loss at the rate of 33 per cent. per annum, besides an unsettled and outstanding further claim.

The cost of making this loss, too, has in one respect been very great. The total amount of real money in the hands of this bank is, as we have said, 2,331,325*l*, and the interest paid for keeping it is 81,920*l*, or at the rate of more than 7 per cent. per annum. We have never heard ourselves of any interest so great being given on an amount which includes sums on running accounts, which may be drawn out any day, as well as deposits for fixed periods. The Union Bank only pays 164,375*l* for the half-year, and its liabilities are 18,807,393*l*, so that it would appear not to pay 2 per cent. per annum for its money. It is true the Union Bank does not tell us the amount of its acceptances, but even at the most exaggerated estimate, the contrast of the sum paid by it and by the Alliance Bank is very striking.

It is curious, after the floating rumours of commercial society, to hear from the Chairman that the Alliance Bank has never lost a shilling by cotton, by credits, or by acceptances, but that almost the whole of its losses have been made in the discount of bills of exchange. It must certainly have contracted a habit of choosing bad bills.

The moral of this account is the exact reverse of the moral of the London and Westminster. The former showed the advantage of much caution and much money; the latter the disadvantage of little caution and little money. We do not mean that 2,331,000*l* is a small sum of money in itself, but it is a small one for a bank so much talked of as the Alliance. If you begin a half-year of dear money with little money and a wish for high profits,—with small means and a wish for an *appearance* above these means,—the detective nature of the time will find you out. You will have a bill case of papers on which a large discount has been paid, but a fair fraction of which is worthless; you will have to meet shareholders who have been led to look for high profits, and have to tell them of large losses.

The Alliance Bank may yet do well, as far as the state of its affairs now disclosed can be relied upon. It *must* have the nucleus of a most valuable business, and if it change its management, if managed quietly and safely, it may yet do well. But it must change; as yet it is only fit to "point a "moral and adorn a tale."

The tale which it tells is how a new and small bank will *fail* to make profits in difficult times. The history of the "Consolidated" may be taken as the history of a new and small bank which succeeds in making good profits in such times. The Directors "cannot boast of having escaped un-"scathed," but they at least bring out a good result. Their capital is 600,000*l*; their deposits—their real money—3,411,206*l*; and they declare 17½ per cent., besides making a further sum. This is very fair; and if the capital of the bank had not been proportioned rather to its future expectations than its present liabilities, the per centage divided would have been far more attractive. These profits cannot be compared with those of the London and Westminster, and there are other banks which may have done as well, or better, but we select it from its happy contrast to the Alliance Bank. Both are new, both are small; but one is prosperous, and the other most unprosperous. The lesson of the autumn is, that it is one thing to start a bank, and quite another thing to get money; that it needs much caution to bank profitably; that without it there will soon be great losses; but that *with* caution in dear times immense profits may be made of much money, and considerable profits of less money.

DEMOCRATIC INCONSISTENCIES.

Mr Leatham's speech at Huddersfield on Wednesday is, in some very important respects, even more instructive than that of his great model, Mr Bright. Of course he expresses the same ideas in the same form, and labours very hard to misinterpret into distrust of the working classes, the simple and very natural wish of the middle class to retain a substantial share in the representation for itself. The fallacies of the member for Huddersfield on this head are so very broad and so very simple and even childish, that, if there were not a more important section in his speech, we should scarcely think them even worth notice. "But if you bring in such a "Bill, your opponents say you will swamp the constituen-"cies. Swamp them with what? With ignorance and "brutality? I think we shall hardly bear out that argu-"ment in the face of the good conduct, of the at-"tachment to law and order, and rapidly increasing "intelligence of the working classes. But if the new element "is moral and intelligent, to maintain that the moral and in-"telligent working man possesses interests—special interests "of his own—which if he has the opportunity he will serve, "which are inimical to and incompatible with the interests of "the enfranchised classes, is, it seems to me, to make a gross and "gratuitous assumption. I know *of no sharp line* dividing "the interests of the unenfranchised from the interests of "those who are enfranchised; but what I do know is that "all the tendencies and all the experience of the age points "to the time *when any apparent discrepancy will be removed*, and "to the blending, harmonising, and amalgamating of the in-"terests of every class in the State." For so democratic a politician as Mr Leatham this virtual admission of at least seeming and perhaps real, but temporary discrepancies between the interests of the unenfranchised and enfranchised classes is remarkable, though we shall see the reason of it presently. However, for the present, it is quite sufficient to remark that if Mr Leatham sees no objection at all to swamping the moral intelligence of the middle class by the moral intelligence of the working class, we cannot see why he feels any objection to swamping the moral intelligence of the working class, as at present, by the moral intelligence of the middle class. What Mr Leatham's "honourable friend, Mr Stansfeld, calls a policy of trust," can be accepted just as easily by one class as the other. We, for our parts, think it would be quite as natural for the working men to trust the present constituencies, as for the present constituencies to trust the working men. If it is to be a policy of trust on one side *or* the other, why should not Mr Bright and his followers urge it upon the working classes? And if it be true—as they say, but we deny—that there are no specific ideas of their own which the working men want to express, why, then, this "policy of trust" could do them no harm. The present constituencies are quite large enough to give a very good specimen of average Englishmen's wishes and thoughts,—they cannot, certainly, be controlled by any faction in the State; and if all the political ideas and interests of different classes are homogeneous,—precisely of the same kind,—then there is surely no injustice in leaving the power where it is, in the hands of a section of the people who have proved themselves capable; and have managed to express very freely and very fairly the general will of the English people. It is because we believe that "a policy of trust" is wholly inapplicable to the case of the working class, that we maintain their right to a specific representation. Their ideas and wishes are *not* fairly represented in Parliament, and cannot be trusted to other hands. But then, precisely the same thing is true of the middle class, except that at present their ideas and wishes *are* fully represented in Parliament. Still these wishes could not be fairly trusted to the working class to represent, any more than those of the working class can be trusted to the middle class. We maintain that a "policy of trust" is inconsistent with the very idea of representing large interests and class principles. We deny that the working class ought to accept "a policy of trust" with regard to the middle class. But this is equally denying that the middle class can be expected to accept it with regard to the working class. Mr Leatham and his "honourable friends" must be consistent. If they urge "a policy of trust" at all, let them urge it upon those who have experience to teach them what they trust in. The working men might reasonably—we do not say *justly*—say, "We can trust the present constituencies, for they have "governed the country for thirty years with prudence and

Digitized by Google

"wisdom. We are *not* a separate class with ideas of our own, "and are just as well represented by them as we could be if "we had votes of our own." This might be reasonably said, that is, said by very reasonable beings, though we do not think it would be true. But it would be scarcely reasonable for the middle class to say, "We are anxious to be relieved of "power by the working class, because, though we are not "aware of any great errors in the use of it, and can see for "ourselves how rapidly English legislation and administration "has improved under our rule, yet we have such a much deeper "respect for the working class, who have no such experience, "that, in the absence of all *grounds* for preferring them, we "would much rather be ruled by them than by ourselves." That is scarcely the speech of a reasonable being, but that is what Mr Leatham proposes to the middle class to say when he urges upon them "a policy of trust."

But Mr Leatham's speech is more remarkable for its opening than for its close. The first part of it is a long and very able exposure of the tyranny involved in what is called the Permissive Bill,—the Bill permitting ratepayers to prohibit the sale of spirits or alcoholic drinks in any district by a two-thirds vote, which he calls a "constitutional innovation," on the ground that it gives the people of certain sections of the country the direct right of legislation on great matters, of which, therefore, it robs the House of Commons; and which he also protests against as "a gross outrage upon private and "public freedom." What he said on this subject is truly remarkable, because it shows Mr Leatham's and his friends' reasons for their misgiving that there may, after all, prove to be a discrepancy in interests between the working class and the middle class which now rules: "With what force could they "ask for the enfranchisement of the people at the hands of "incredulous opponents when the people themselves were the "first to clamour for that Permissive Bill,—when they them-"selves were the first to admit that their morality was so "shaky and their intelligence so feeble, that they asked to "be treated like positive children, because they wished that "all temptation might be taken out of their sight? What "a confession this was! what a picture of the people into "whose strong grasp it was supposed that the legislators "were about to entrust so much of the future "prosperity and so much of the future dignity of this "country! If he could believe that picture to be a true "one, he should that day cease to be a Reformer. He should "not dare to entrust so much to hands so feeble." This seems to us exceedingly candid and exceedingly instructive. The first "idea," properly so called, of the working class which has taken a practical shape, offends Mr Leatham so much, that he would abandon Reform if he believed it pervaded the majority of the working class. Now it is precisely because we are quite sure such ideas—and not this only, but other *social* ideas of the same type—do pervade the working class, that we ask for their fair representation in the House of Commons. We are better Reformers than Mr Leatham. We do not ask them to give up such ideas at once on pain of abandoning their cause,—we advocate their cause *in order* that they may have free and fair opportunity of urging such ideas on the English Legislature, and of hearing fairly the counter-arguments of the representatives of other classes. But we do claim not to be delivered into bondage to such ideas, not to be almost without a chance of resisting them so far as they are really wide-spread and deeply-rooted in the working class. We ask for them a good representation and a good hearing in the House of Commons,—a fair chance of convincing our own representatives there if their ideas be really wise,—a fair chance of being vanquished in argument by our conflicting ideas if they are really unwise; but some protection against a *guaranteed victory* to such raw experiments, whether they be wise or unwise. Mr Leatham, on the other hand, wants the working class to give up such ideas altogether if he is to continue the advocate of their admission to electoral rights. We say, then, that Mr Leatham wishes not only to enfranchise, but to hand over the whole electoral power to, an ideal working class,—a fiction of his own brain,—to accept a policy of trust towards an idea, not a reality. We, on the other hand, wish to give some real power and representation to the working class as it is, with its often noble but generally crude ideas, but not supreme power. And we maintain that we are the true Reformers.

One word more. Why does Mr Leatham denounce so warmly as unconstitutional the notion of permitting a direct vote of the rate-payers on the subject of the sale of alcohol. "It was the principle," he says, "of representative Govern-"ment that the class which elected, which was a similar class "to the one paying rates, should possess no direct legislative "power; and the principle of Parliamentary representation "was that not even the representative principle should alone "legislate. They had taken the precaution to protect the "rights and property of Englishmen by the prerogatives of "the Crown, the privileges of the Lords, and the authority of "a representative assembly. All this constituted the three-"fold and invaluable shelter which they had raised over the "rights and property of the meanest subject in the realm." Well, that is very good, but that is not very democratic. What is the meaning of all these provisions,—especially of denying direct legislative power to the electoral classes, of obliging their representatives to discuss together every great measure before it becomes law, except to ensure the fair representation of different classes of opinion? And how can Mr Leatham, who is so eager to expel some very large sections of opinion wholly from the House, who mocks at "your "plump voting and lump voting"—we thought, by the way, *plump* voting was not an innovation but as old as our electoral system,—on the ground that its tendency is to prevent the overshadowing influence of a single class, object on principle to the unqualified tyranny of the majority of the ratepayers, if he does not object to the unqualified tyranny of the representatives of those majorities? It is perfectly clear that if two-thirds of every electoral constituency in England under a democratic electoral law insisted on the abolition of public houses, the remaining third would simply be extinguished—not even heard—in Parliament. There would be no qualifying discussion of principles there. The effect would be precisely the same, though somewhat delayed, as it would be according to the Bill Mr Leatham so much objects to. In fact, Mr Leatham and his friends are inconsistent with themselves. They want to trust "the people," but to condition that the people shall first abandon all their crude ideas. They are floundering about in a sea of inconsistencies, ridiculing those who ask for a real representation for ideas, *not* in an absolute majority, and yet anxious, directly they know them, to suppress the ideas of the true popular majority because these are displeasing to them. If they would think a little more, and declaim a little less, Mr Leatham and his friends would be better Reformers.

THE MONEY MARKET.

A SERIES OF ARTICLES FOR MEN OF BUSINESS.

No. XI.

SHOULD THERE BE A SINGLE ISSUER OF BANK NOTES OR MANY ISSUERS?

As we remarked in a former article of this series, the Scotch and Irish Acts of Sir R. Peel cannot always remain as they are. Their errors are plain. They burden the mercantile community with the cost of transporting much gold from London to Scotland; they take that gold from London, where it is of use in rectifying the exchange, to Scotland, where it is of no use; they do not use that gold when it gets to Scotland in securing the special convertibility of the bank note, but let it fall into the general assets. Yet, as we also observed, these Scotch and Irish Acts cannot be mended without raising the grave preliminary question as a matter of principle:—Should there be a single issuer of bank notes or many issuers? It happens that this speculative question also underlies the keen controversies now excited in Paris upon the banking and the currency. We, therefore, need no apology for attempting to discuss it fully.

First of all, we must deal with the question in its simplest and plainest form. Every old country has had an economical history, contains a bank of some sort, contains notes of some sort; and the special nature of these, the effect of the whole history, the privileges which have been conferred, the tastes which have been created, the prepossessions which have been generated, must be heedfully regarded in future legislation. Even the political circumstances may, as we shall hereafter show, exercise an influence on the paper currency. We will in this article discuss the question in its simple form; we will divest it of every historical dress; we will discuss it without reference to the special circumstances of any country; as far as we can, without thinking of Scotland or of France.

What is the simple form of the problem? We must suppose a country already possessing a metallic circulation, and

Digitized by Google

now fit for a credit circulation,—possessing, that is to say, the disposition to trust an issuer of paper, and, in a sufficient degree, both the capacity to detect a bad issuer and the inclination to prefer a good issuer. We suppose, in a word, a country like so many parts of Europe—very fairly civilised, but with an active circulation wholly metallic, and hoards of precious metal everywhere abounding,—not so much considerable hoards, as petty hoards universally diffused and, in the aggregate, of vast amount. The problem for discussion is, how are you to get *out* the metal and get *in* the paper; by what sort of issuer will this desired substitution be best effected?

Credit is the instrument by which this substitution is to be effected, and we must test a proposed plan of issue by three questions:—

1st. Is the suggested issuer, the person or persons who will most easily *gain* credit, and so most easily introduce the note.

2ndly. Is he the person who best *deserves* that credit?

3rdly. Is he the person who will best *use* that credit?

We ought to have the credit which is easiest gained but merited, and most likely to bring the greatest collateral advantages.

In practice there are three competing plans. First, ought the State to be the sole issuer, and if not, and the issue is to be conceded to a bank, ought it to be conceded to one bank or to several. The three schemes—State issue, monopolist bank issue, competing bankers' issue—are the typical and principal propositions to which all others converge, and by testing which we may judge of all others.

In some countries, for instance in India, it may be said that the State is the sole issuer who will in any degree satisfy our two first criteria. Taking India and many other countries as a whole—looking not merely to the large cities, or to the cultivated classes, but to the whole rural districts and the mass of the people—there is no other person or *entity* except the State who enjoys any such degree of credit as is required to introduce a paper circulation. No private citizen—no corporation of private citizens—is trusted sufficiently.

And the English Government of India deserves such credit. But this combination is exceedingly rare. It almost always happens that, in the low state of civilisation in which a population will only trust their Government and will not trust each other, the Government itself ought not to be trusted. The inferior morality which diffuses the distrust among the people is generally contemporaneous with dishonesty in the Government. The English Government is a Government of alien rulers of a higher civilisation than their native subjects, and, therefore, though it is the exclusive object of credit, it deserves that credit; but commonly, when Government credit is the only credit, that credit is unmerited. It is this undeserved State credit which has covered many countries with inconvertible State currencies. The new and the old world abound with conspicuous examples of the consequences of permitting a Government to substitute for a metallic currency a paper currency nominally payable on demand; it ends in substituting a paper which is hopelessly depreciated,—which the Government never thinks of repaying, however much it may be demanded. There is, indeed, often greater excuse for the insolvency of a Government than for the insolvency of an individual. The strain upon national finance at a crisis such as has now occurred in the Federal States is so overwhelming that the distinctions between a good currency and a bad currency seem altogether unimportant. The universal feeling is—'Only 'keep the State together, only save the nation, and never 'mind your currency. We cannot have a bad country to 'have good bank notes.' But, exactly because there are so many excuses for the insolvency of a Government,—for its not paying its notes,—is it undesirable to entrust to it the power of issuing notes. The person most likely to be suddenly in want of a large sum is the Government, and in all but the highest states of society, if the Government can get that sum from the currency, it will get it.

But even when a State currency best answers our two first criteria, even when it gets credit most easily, when it best deserves credit, it always fails in satisfying the third criterion: it never can make the best use of a paper circulation. It may and will make, under many circumstances, the best attainable use, but never can make the best conceivable, the ideal best use.

The best use is the introduction of banking into a country. If a Government introduces the circulation, it may get it out in payments, and receive it in taxes; it may introduce it into the floating circulation of a country, but it will not introduce it into the latent, unknown, immoveable hoard in which the savings of a country are kept. No man, or but very few men, ever yet hoarded paper. If the state of society is such that you hide away money for a distant futurity, you will naturally choose the money which has been most to be relied upon in the long antecedent past, which is most likely, therefore, not to fail in the long prospective future—the currency which has intrinsic value, the currency of precious metal. A Government paper cannot as a rule penetrate into the secret hoards of money; it can only pass in the market, be used in bargains, supersede the floating cash. Under favourable circumstances it will be substituted for the visible money of a country; only under the most unfavourable circumstances, only when there is nothing else to hide, will it be substituted for the secreted money.

This substitution of credit for metal in the latent hoards as well as floating cash of society can only be effected by a bank. A bank is, so to say, a *secreting place*. By promising safe custody, by paying an interest, by the convenient payment in cheques, it collects the saved money, the hoarded money of the country into its own till. It takes ages to establish this. We referred in a former article to the evidence of a considerable English banker before the Committee of 1818. He said that so lately as in 1815 there were hardly any deposits at all. Yet his bank, one of the highest credit, had then been in existence fifty years. For a long time the country people will take the banker's note, but they will not trust the banker's ledger. They like to see *something at home* for their money. It is a very late and not a very easy step in civilisation to induce people to leave their money, with *nothing to show for it*, miles off in a place of whose interior they know but little.

This step in civilisation has, in the course of years, been made in England and Scotland by the use of the local bank note. This has acted as a banker's *advertisement*. It has circulated about the country, among all classes of people, and made the idea of credit familiar to the whole community—not merely to the intelligent and educated, but the ignorant, narrow-minded, and suspicious class who accumulate in rude districts the savings of the country. These people think of nothing but their money, and to get it out of them is a task of the utmost difficulty and the nicest delicacy.

The system of State issue is therefore inferior to that of bank issue in a cardinal particular. The State issue does not and cannot act as the beginning of banking; it does not bring into the till, and it does not economise, the secreted and hoarded cash of the community. It is inferior also, because it does not introduce the other use of banking. A local bank is not a mere chest for the precious metals; it is also, if the expression may be pardoned, a *jet* of loanable capital. It diffuses naturally, and because it is the interest of the banker and his income depends on it, the capital of those who save, among the hands of those who work. Banks are to money, or rather to capital, what railways are to people,—the railway takes the passenger where he is wanted; the bank takes the capital where it is wanted.

The vast amount of capital thus economised and thus diffused will be best appreciated by those who have compared a district where banking is well developed with a country where banking is ill developed. In the advanced country, not a sixpence is wasted, and nobody who ought to have capital wants capital; in the backward country, most persons who ought to have capital are in need of it, and much is wasted on floating cash and hoards of the costly precious metals.

It is true, that if the State issue a paper currency, it secures to itself a gratuitous loan without interest. It can erect a barrack, or fill an arsenal, or carry on a war without paying for it. But this advantage is dearly bought when it delays the full development of banking throughout the country. Let one country try a Bank issue, and another try a State issue, and see which will be the richer in ten year. It is miserable economy to raise a 100,000*l* for the Exchequer at the cost of millions to the nation.

But if the State should not issue notes: if a bank is to issue, should it be one bank or many?

The same consideration will guide us. How are we best to get paper circulated in lieu of gold, and banking established in

Digitized by Google

place of old stockings and hoards? A monopolist single establishment will never do it. It will not pay. It would not fifty years ago have paid the Bank of England to establish branches in every petty town in England in the hope that in the slow lapse of a long time they should secure to themselves—first, the circulation of the district, and then its savings. The Bank of England would have paid no dividend for a quarter of a century if it had so acted. This inestimable economy of capital was effected by persons who did not on that account go down from London to Gloucestershire, but who were in Gloucestershire already. A local man of repute and credit first issued notes, then attracted small savings, then he became a great banker. Such popular systems do not begin from the centre and radiate outwards; they begin all over the interior of the circle. Wherever there was capital, the free popular system of England and Ireland established—first, the paper bank note, and then the bank deposit credit. It *did the work*, and no monopolist bank, no system of State issue, could ever have effected it.

We know it will be said that though the system of many issuing banks does so economise capital, does so introduce deposit banks, though it alone does both, yet that it causes so many other evils, that the cost is more than the gain. We will next week examine the basis of these apprehensions.

THE SOLUTION OF THE NEW ZEALAND KNOT.

The consequences of our mistaken policy in New Zealand have this month become so apparent that Parliament will next session be compelled to devote much more attention than it will like to New Zealand affairs. The Colonial Office appears to be fast driving the mother country and the colony into a position in which no relations at all are possible, and out of which a declaration of independence is the only escape. A strong party has arisen recently in New Zealand, which declares that the difficulty before their population must be faced whatever the result, and holds that it cannot be faced without concessions which amount in the aggregate to a surrender of all prerogatives whatsoever. It is quite clear, for instance, that whatever the ultimate terms of our connection with the colonies, the mother country, if it is to defend them, must retain certain powers, the right of making peace and war, the control of intercolonial disputes, the administration of military affairs, and that general right of voice and veto on subjects of imperial magnitude, which is involved in the appointment of Governor. Yet the colonists of New Zealand have now been driven to ask that every one of these prerogatives shall in this particular case be suspended, and their asking is not unfair. The Assembly is about, it is said, to require that the Ministry should direct the garrison, and we cannot blame them, for English direction has led to nothing but disaster. They are forced to request, almost to order, that Sir George Grey should be recalled, and there is no ground for refusal, for he is admitted in this country to be a vacillating, injudicious, and unsuccessful Governor, and to have displayed those incapacities on a question of life and death on which toleration is not possible. Finally, they have suggested that if England does not approve their views, the united islands must either be separated into two, which is an Imperial matter, yet obviously reasonable, the island without war now paying for the one with war, or she must withdraw her troops, and leave them to wage war at their own discretion, as if they were not subjects of a Sovereign at all. What are we to reply when we have incessantly threatened, if they went their own way, to withdraw those very troops? The colonial demands amount in the aggregate to a declaration that Great Britain can have no authority except the burden of protecting them; but we have driven them into those demands, and made them so just that the Imperial Government is deprived of the means of making any unanswerable reply. The Colonial Office is, therefore, in this absurd position. If it refuses to reverse its policy, the colony will refuse all supplies of money, and the Crown will be compelled either to carry on an expensive war at the antipodes against the will of those for whom it is fighting, or by withdrawing its garrison to surrender the prerogative of peace and war. If, on the other hand, the Colonial Office yields to the demands, it virtually acknowledges that Great Britain is incompetent to control even those departments of colonial action which she has hitherto reserved, and which, if she is to remain an Empire, she must continue to retain. It must either give the colony so much authority that independence would be a relief to all parties, and so give the signal for breaking up the Empire, or interfere so harshly and unnecessarily that the grand gift of self-government is virtually recalled.

It is a most disagreeable position, and one offering very few outlets of escape. The colonists ask nothing which many English journals have not repeatedly recommended, or which the Duke of Newcastle would not readily have granted, yet it is not pleasant to any Englishman to see the Home Government morally coerced by a colony. Precedents have a very high value among Englishmen everywhere, and the demands, which are now quite just, may be repeated when the colonists are entirely in the wrong. Every possible course is full of annoyance, and it may be of danger. It is most disagreeable to entrust to anybody except the responsible Ministers of the Crown the control of British troops, or the direction of a partially British war. We could not do it in Canada or the Cape. It is most unsafe to suggest to all colonies that, in a great emergency, we may suspend or override charters which contain a promise that they shall be irrevocable. It is most unsatisfactory to recall the garrison of a British colony because we cannot agree with British colonists as to its usefulness; to find one of the long list of British military stations struck out of the list without our own consent. Above all, it is most annoying, just as Canada had shown the way to better things, to be involved in a political strife with a colony almost as bitter as a military struggle. It is most humiliating to be compelled to recall a Governor simply because he has tried to carry out the orders of those who sent him, in the spirit in which those orders were composed. Yet what is the alternative to the acceptance of some one or other of these extremely regrettable necessities? Mr Cardwell is in the position of an Englishman challenged on the Continent to a duel. He must either fight, which he thinks murder; or skulk, in which case he cannot live there; or patch up an agreement, which is either impossible or most humiliating.

Upon the whole, we trust that Mr Cardwell will prefer the interests of the nation to those of a Ministry, and meet the difficulty by sending Sir George Grey to Ceylon, or St Helena, or Hong Kong, or somewhere where he cannot make any very dangerous mistakes. It is not necessary to pronounce him officially wrong, although that also ought to be done. It is sufficient to say either that the colony needs a soldier at its head, or if that be inconvenient to admit that in the excited state of public feeling in New Zealand, Her Majesty's Government prefer an officer not hampered by local animosities. A really capable governor—and the Colonial Office might find fifty, if not at home, then in India,—would soon induce the colonists to re-consider all other points, and content themselves with securing their objects, without establishing precedents inconsistent not only with empire, but even with reasonably just alliance.

COTTON SUPPLY FOR 1865.

Our estimate of the probable supply and consumption of cotton during the year just commenced appears to be regarded by those qualified to judge to be as correct as such conjectural calculations ever can be. On two points only have we received criticisms which appear to suggest some slight modification of the anticipations we expressed.

1. We are reminded that a considerable proportion of the increased supply which we have obtained from the three Indian Presidencies since 1860 is owing not altogether, nor perhaps principally, to increased production, but in a very considerable measure to the diversion to our markets of the large quantities which used to be exported to China, but which during the last four years have been attracted hither by our high prices. For example, the real increase of exports from Bombay has not been from 508,000 to 1,043,000 bales, but only from 710,000 bales to 1,043,000; and a similar remark may be made with even greater force in reference to the Madras and Bengal exports. It is probable, therefore, that the augmented growth in India may not be as large as has been believed, and that our calculation of the supply thence may be a little over sanguine.

2. It is thought by some competent observers that we have over-estimated the dispersion of the factory population by migration and permanent absorption into new occupations. The most careful inquiries have, we are informed, only been

Digitized by Google

able to trace the disappearance from the cotton districts of about 40,000 persons; and this number includes young children as well as actual factory hands. Still, we incline to doubt whether the residual numbers *could* work up more than 40,000 bales a week of such cotton as now constitutes the average of our imports.

TRANSLATION OF M. PEREIRE'S LETTER.

Several readers having expressed a wish for a translation of this letter which appeared in the original French in the ECONOMIST of the 31st Dec., we present one:—

TO THE EDITOR OF THE ECONOMIST.

Sir,—The rights of criticism are, I admit, very extensive, but they do not go to the length of misrepresenting the ideas of an author, and of gratuitously incriminating his intentions. This, however, is what has been done with respect to me, unknown to you no doubt, in the article you have just published on my pamphlet, *De la Banque, et de l'Organisation du Credit en France.*

I should have reason to be surprised at such a proceeding, which is contrary to your habits, if I had not ground for believing, from the tone of the article, and particularly from the use that has been made of it here,* that it could not be inspired by you, who are ordinarily more courteous and better informed.

"*M. Pereire denies, or seems to deny,*" says the author of the article, "*that it is necessary to preserve a metallic stock;*" and starting from that declaration, he gives himself the pleasure of an assured victory.

I said, Sir, precisely the contrary, and what I laboured most strongly to demonstrate was the *necessity of a sufficient metallic reserve.* Permit me to quote, in support of this assertion, the two following paragraphs from my pamphlet, page 8:—

"Among the guarantees which the State has the right and the duty to require, three essential conditions must be placed in the first rank; namely, a capital proportionate to the services to be rendered; the incessant command over that capital; and *the maintenance of a sufficient reserve to assure constantly the convertibility of notes and specie.* Apart from that, there is nothing but trouble and confusion,—danger of crises incessantly arising,—serious fears of the suspension of cash payments."

It is evident, as you see Sir, that no dissension whatever can exist between us as to the fact itself of the necessity of a metallic reserve; it can only arise as to the means to be employed for forming and maintaining that reserve.

The author of the article in question believes in the efficacy of raising the rate of discount; but that system, in my opinion, is without value,—is not only false and dangerous in character, but is fatal to all interests, except indeed those of the bank.

It places commerce and industry in a desperate state of uncertainty and change; it embarrasses commercial affairs without any real motive,—the relation between the offer and demand of capital not being able to change from one day to the other, in the proportion indicated by the fluctuations in the rate of discount; and in any case it can only act by producing a general slackness in business, and even the suspension of all activity in certain branches of industry.

To what other cause can be ascribed the augmentation which has recently taken place in the metallic reserve of the Bank of France, when the analysis of the bank returns demonstrates that it comes solely from the reduction in its discount accommodation, and from the increase of unemployed sums deposited with it? Even the quantity of notes in circulation has declined, which is a new proof of what I advance.

Continuing the system of representing me as indifferent to the existence of a metallic reserve, which is the contrary of the truth, your contributor blames me for criticising the system sometimes employed by banks, of procuring gold by means of a superabundant issue of notes, and of giving the preference to the *sale of some fractions of real wealth,* according to his own expression,—such, for example, as the Government stock possessed by the Bank of France. But no one is ignorant of the sad results of the experiments so often and so fruitlessly made by banks of purchasing gold with promises to reimburse that gold at sight, instead of buying it with *real wealth.*

* It was translated *in extenso*, and widely circulated in Paris.—[Ed. ECONOMIST.]

In the years 1855, 1856, and 1857, the Bank of France made on a very large scale purchases of that kind by means of supplementary issues of notes; but as the notes exceeded the wants of the circulation, it could never succeed in keeping them afloat. During that period these purchases of gold amounted to the enormous sum of ONE THOUSAND THREE HUNDRED AND EIGHTY-FOUR MILLIONS OF FRANCS (in English money 55,360,000*l*), and by this operation, renewed from the fable of the tun of the Danaides, the Bank of France lost a sum of FIFTEEN MILLIONS EIGHT HUNDRED AND NINETY-THREE THOUSAND FRANCS (635,720*l*) without any profit, unless it were for the money-changers, and for the bankers who are known to be regularly engaged in trafficking in the precious metals.

I will not endeavour to explain here the extremely simple mechanism by means of which the Bank of France could be sure to preserve the gold which it might obtain and which it really would obtain by the sale of the Government stock it possesses:—evidence need not be demonstrated. I will simply confine myself to stating that all things remaining in the present position at the Bank, the sale of that stock, which amounts to 150,000,000f (6,000,000*l*) would have the certain effect of augmenting in an absolute manner the metallic reserve by the same sum. That augmentation would in fact be produced, either by the natural return into circulation of the notes which would have been withdrawn to pay the stock sold, or by the direct employment of those notes, thus returned to its till, in the purchase of gold in a quantity corresponding to the amount of the stock. And the gold thus obtained could not issue from the till of the Bank except by a new development of commerce.

In that case the Bank would be obliged to have recourse to the augmentation of its capital in order to satisfy the new wants which might be manifested. But here objections are accumulated, as to the difficulty of obtaining that increase of capital in due time. In the long run, it is said the result might be obtained, or it might fail; but entire months might pass away without a solution.

Permit me to reply that that pretended difficulty does not exist; and as it is not necessary here to indicate the numerous means of surmounting it, I will confine myself to remarking that it would suffice to do what is done by all assurance companies, which having only need of a capital guarantee, do not require the integral payment of the amount of their shares, and stipulate certain guarantees, and if thought desirable, the deposit of *public securities,* for the portion of the capital not called up,—a portion which remains reserved for certain extraordinary cases.

I regret to say it, but all the reasonings of the author of the article have not succeeded in proving to me that the realisation of the securities one possesses, and especially of those which, like the funds of a great State, constantly find a ready market, is not for banks, as for everybody else, the surest way of filling the till.

Neither can I partake the fears he feels relative to the possibility of regularly supplying a nation with the precious metals; I cannot feel anxiety any more than the illustrious Cobden, my friend, and Robert Peel, the great statesman, felt about the danger of famine, to which, according to certain alarmists, England might expose herself by free trade in grain.

It has been seen that never was England so well supplied with all things as since the establishment of free trade. Be assured that the supply of a country with precious metals enters in the general law which regulates the movement of all sorts of merchandise, and that the more or less arbitrary fixing of the rate of interest by banks is absolutely without influence on the abundance or rarity of specie.

Points of doctrine, being thus disposed of, I cannot be silent on the sentiments you ascribe to me, and which are said to be the motive of the work I have published.

The author of the article to which I reply, believes that that work has been produced by the irritation caused me by the measures of the Bank of France, as being peculiarly connected with the most enterprising part of French commerce; and in imitation of some obscure journals, devoted to the service of private animosity or private speculation, and it may be unknown to you under the same inspiration, he affirms that pamphlet is only *the plaintive cry of impeded advantage.*

It will suffice to point out to you, in order to make you

Digitized by Google

regret, such an appreciation of undertakings supported by men who not only during thirty years have been mixed up in all the great affairs of public utility of this century, but who have conducted them to success, in concert with the most powerful houses in Europe, not excepting those of your country. I will, therefore, confine myself to telling you that none of these enterprises has remained in a state of loss; that none has had to demand the co-operation of the Bank of France; that neither myself, nor my brother, nor the Credit Mobilier, has ever had need of that establishment,—indeed, we have given it credit instead of receiving it, as is proved by the large sums which we have constantly deposited in its coffers without interest. In fact, the balance of the Credit Mobilier at the Bank of France is at this moment 25,000,000f (1,000,000*l*), and it frequently exceeded that sum in the course of the present year, even when the last financial crisis was in its greatest intensity.

A year ago, in particular, at the moment at which the metallic reserve of the Bank had fallen to the lowest figure, we might, by withdrawing our capital, if we had been animated by the malevolent sentiments you suppose, have plunged the Bank of France into the most cruel embarrassments.

For those who know us, I have no need to say that such acts cannot ever enter our thoughts, and that, notwithstanding the passionate attacks which are made on us, I should not have spoken of such a possibility if at the present moment the metallic reserve of the Bank of France were not the double of what it was at that epoch.

The pamphlet which I have just published is considered by your contributor as a manifesto of the Credit Mobilier. I must in consequence declare that my quality of founder of the Credit Mobilier has nothing to do with that pamphlet. All the founders of that establishment do not adopt the principles expressed therein. Those principles have been on my part, for nearly forty years, the subject of the most serious meditations; and before being strengthened by a practice which has acquired considerable notoriety, they were derived, not from an experience of the Bourse, but from the source of the greatest masters of economic science.

On this account, I believed myself entitled to greater regard from your journal.—Accept, &c.,

Paris, Dec. 27. ISAAC PEREIRE.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 26th inst. The return for the previous week is added:—

DEBTOR.

A large reduction in the amount of discounts (24,342,000f) compared with last week, is the principal feature in the Bank return of this week, and it is not a pleasant one. The coin and bullion have increased 3,949,000f, the circulation of notes has declined by 9,160,000f, and the private deposits are 2,997,000f less.

The Bourse has, on the whole, not been very animated during the past week. Subjoined are the quotations:—

Several influential persons who take great interest in the Inquiry into the Banks which the Government has ordered the Superior Council of Commerce to make, are of opinion that it would be well to postpone it for a few months, instead of having it take place at once. They represent that the series of questions, or, as the French say, *questionnaire*, which, in accordance with the custom established in this country in such matters, will have to be communicated to the persons whose evidence will be considered useful, will require time to be studied, in order that each witness may depose on the points on which he is best informed, and that useless repetitions may be avoided. They say also that time will be needed to make arrangements with foreigners whose testimony would be of weight; that the English gentlemen, in particular, whom it would be peculiarly desirable to hear, will probably not be able to present themselves at a brief notice at this epoch of the year, when business, the meeting of Parliament, and the London season give them abundant occupation at home. It is, moreover, urged that, as the French Chambers are about to meet, the debates which will take place in them will turn public attention from the inquiry; and that, consequently, it will fail to attain the object for which it is instituted, which is to enlighten the public about banks of issue, the fixing of the rate of discount, and the causes of commercial crises.

The Bank of France has continued in one of the newspapers the series of articles it commenced in reply to the attacks made on it; and the last lucubration is better than the first ones. It shows that to buy money dear and lend it cheap is impossible; that (as already demonstrated in the ECONOMIST) the sale of the Bank's funded property to raise money might do in a case of emergency, and for once, but could not be repeated often; that the recent drain of specie from France has been caused in a great measure by investments, many of them unprofitable, in foreign countries, &c., &c. To all this, a writer in the *France* replies by the strangest arguments and allegations possible;—so strange are they that one is surprised to see them printed in a serious newspaper. One of them, for example, is that "the special object of credit companies is to favour exchanges, and to supply the relative insufficiency of specie, *by the indefinite creation of new wealth*." He affirms that this is one of the established doctrines of renowned "publicists, statesmen, and financiers, of Turgot, Quesnay, Adam Smith, Lafitte, Say, Bastiat, and of all contemporary economists." But he neglects to cite one act or one passage of either which proves that "wealth can be indefinitely created" by credit companies. If that were true, what prodigious power the Credit Mobilier would possess!

The administration of Finances in this country is exceeding unlucky in one respect; it is vigorously attacked by financial writers of authority in reviews and newspapers, and it is but feebly defended by the scribes of the Governmental press. Its opponents possess abundant knowledge and talent, and its defenders are but scantily supplied with either. In to-day's number of *Le Correspondant*, one of the leading reviews, M. Henry Moreau, the well known economist, makes a masterly examination of the financial situation, and of M. Fould's last report, and he is not satisfied with them, and thinks that the country has no cause for satisfaction. After, for example, giving details respecting the budget of 1863, he expresses the opinion that the deficit will be greater than the 28,000,000f the Minister indicates. For 1864 he counts on a formidable deficit, the amount of which, however, he does not fix, from, first, the supplementary expenses made in Algeria; secondly, the reductions in the sugar duties; and thirdly, the non-realisation of the

Digitized by Google

Mexican *rente*. As to 1865, after a careful examination of the ordinary, extraordinary, and corrected budgets which have been prepared for it, he holds that M. Fould has acted "with some precipitation" in counting on a surplus of 18,000,000f. For 1866 he sees a deficit instead of a surplus, and does not share the confidence of the Ministry as to the payment of the indemnities due from Mexico, China, and Cochin China. M. Henry Moreau, moreover, disputes the correctness of the statement as to the amount of the accumulated deficits at the end of 1863; his calculation is that it was 745,000,000f, not 660,000,000f. In conclusion, he complains of the continual increase in the public expenses, insists on the necessity of a large and effective reduction of the army, recommends prudence in the execution of public works, and draws a contrast between the budgets of England and France which is not favourable to those of the latter. To this vigorous and telling attack what will be the answer? Either none at all, or a feeble, shuffling one in the *Constitutionnel*. Yet, though the financial situation of France is, as all the world knows, not so brilliant as that of such a rich and prosperous country ought to be, it would not be impossible to demonstrate, even in presence of so rude an adversary as M. Moreau, that it is better than it has been, and that there are good grounds for believing that it is destined to improve considerably. Still easier would it be to show that what is bad in the situation is owing to the absurd political *regime* under which France is placed, and not to lack of skill in the financial administration,—at least of late years; that if that situation be not worse than it is, it is owing to the energy with which the present Minister has resisted expenditure not absolutely necessary; and that if reforms which are needed are not made, it is because his hands are tied.

The dividend of the Comptoir d'Escompte for the half-year ending the 31st December, is to be 27f 50c per share. It is larger than from the troubled state of commerce in the last six months was to have been expected. For the whole of the year 1863-4 (the year ends the 30th June) the Comptoir distributed 59f; in 1862-3, 42f; in 1861-2, 39f; and in 1860-1, 44f.

The Colonial Credit Foncier Company opened on Tuesday, under the auspices of the Comptoir d'Escompte, a subscription for 45,000 bonds at 475f, to be paid off by annual drawings in fifty years at 600f, and bearing an interest of 30f per annum. The subscription was to have been kept open to Saturday, but owing to the confidence felt in the investment, and to the patronage of the Comptoir, as many as 34,750 of the bonds were subscribed on the very first day, and the rest were taken in the early part of the day after. The subscription was, however, continued until four o'clock of that day, and then the number of bonds demanded exceeded by 3,213 that to be disposed of.

The Credit Agricole Company, a sort of off-shoot and *protegee* of the Credit Foncier, has obtained in a public competition from the municipality of Paris, the concession of a large cattle market, which is to be established within the walls of the capital, to replace those which have heretofore existed in the town and the environs for the sale of oxen, sheep, calves, and swine. The concession is to run for fifty years, and the concessionaire in return for certain charges, is to levy tolls on all animals taken to market, and is to have the exclusive supply of the forage and other articles necessary for them, at, however, the average market prices, to be fixed by the authorities. The affair altogether is of great commercial importance. Two or three companies are said to be interested in it along with the Credit Agricole.

Another joint stock bank is to be established at Lyons. Its name is to be Societe Anonyme des Depots et Comptes Courants et de Credit Industriel; and its capital is to be 20,000,000f, in 40,000 shares.

Letters from Madrid state that the Spanish Government, after much hesitation, had definitively rejected the proposition of M. Isaac Pereire and the Credit Mobilier to raise it a loan, the conditions imposed being too onerous. It has also, for the same reason, rejected other propositions emanating from other capitalists. These refusals have produced a fall in the Spanish securities patronised by the Credit Mobilier. The Spanish Government, it appears, in order to raise the funds of which it has pressing need, intends to force the people to pay a considerable portion of the taxes in advance.

It is stated in letters from Italy that an English Company is about to commence the cultivation of cotton on a large scale in the island of Sardinia.

M. Renouard, judge of the Court of Cassation, has brought out, *chez* Guillaumin and Co., a third edition of his "Traités des Brevets d'Invention." M. Renouard being one of the most learned jurisconsults of France, and an eminent economist besides, his name alone would be a sufficient recommendation to his work if any were needed; but, in truth, none is necessary, the appearance of a third edition being a proof that the book is considered by the French legal profession and the French public as an able and admirable exposition of the patent law of France. M. Baudrillart has also issued, *chez* Guillaumin, a second edition of his "Manuel d'Economie Politique." It consists of the substance of a series of lectures, which, as deputy of M. Michel Chevalier, he delivered in the chair of Political Economy of the College de France. It explains the general principles of the science with clearness and precision; and with a literary charm which not always, it must be confessed, accompany economic disquisitions.

The following is the market report:—

FLOUR.—At *Paris*, during the past week, business has resumed some activity, but prices are rather lower. The quotations yesterday were between 43f and 47f the sack of 157 kilogs. Six marks disposable were 46f 75c current month; 47f 25c March and April; 48f 75c May and June: four months of May 49f 75c to 50f. Type Paris, the 101 kilogs, 28f 75c.

WHEAT.—Provincial markets have again declined. At *Paris*, yesterday, choice white was 26f; choice red, 25f 50c; first quality, 25f; good sorts, 24f 25c to 24f 75c; ordinary, 23f 25c to 24f the 120 kilogs. Some of these are 50c lower than last week.

COTTON.—At *Havre*, in the week ending Friday, business was languid and prices declined. The sales were 3,571 bales, and the arrivals 3,979. The closing quotations were 10f to 15f lower for United States and Brazil; 10f lower for Egypt, Surat, Tinnevelly, and China,; 5f to 10f for Madras and Bengal. Consequently low New Orleans was 330f the 50 kilogs; good ordinary Broach, 220f; ditto Tinnevelly and Madras, 205f; ditto China, 175f; ditto Egypt, 315f. The stock was 61,765 bales against 36,300 at the corresponding period of 1864, and 58,640 in 1863. Yesterday, Minas was at 295f 50c; Pernambuco, 275f; Jumel, 295f; Surat Ingelhaut, 225f; ditto Oomrawuttee, 215f; Tinnevelly, 200f; Madras, 215f down to 108f; Coconada, 200f; Bengal, 120f; Kurrachee, 135f down to 122f 60c; China, 165f to 175f.

COFFEE.—At *Havre*, in the week ending Friday, the sales were 4,800 sacks Hayti Port-au-Prince, disposable or for delivery, 82f 75c to 84f the 50 kilogs, in bond; 1,520 Cape ditto, disposable, 86f 50c to 87f in bond; 2,950 ditto ditto, for delivery, 86f to 86f 50c; 1,100 Gonaives, disposable, 89f; 25 Saint Marc ditto, 91f; 250 ditto, for delivery, 91f; 750 Rio unwashed, disposable, 74f to 80f; 550 ditto ditto, for delivery, 76f 50c to 78f; 100 ditto washed, disposable, at prices kept secret; 2,450 Malabar, 89f to 90f; 250 sacks, and 250 pochettes Mysore, 86f. The arrivals were about 10,500 sacks and 21 casks. This week, Hayti, 83f; Cape, 86f 50c; Rio, 76f; ditto, for delivery, 79f 50c; Malabar, 88f; Rio, washed, 103f; Gonaives, 97f. At *Nantes*, last week, 3,380 sacks Port-au-Prince, at 82f 50c; 1,180 Gonaives, 88f 50c; 100 Saint Marc, 90f. This week Reunion, 150f duty paid. At *Bordeaux*, last week, the sales were 500 sacks Mysore, 114f; 928 ditto ditto, 114f; 100 ditto Rio, washed, 107f. This week, Bahia, 94f; Mysore, 120f; Costa Rica and Port-au-Prince at prices kept secret. At *Marseilles* last week, the sales were 3,000 sacks Bahia for delivery, 70f; 500 St. Domingo, for delivery, at prices kept secret; 8,000 Maracaibo for delivery, 87f; 400, ditto, disposable, 86f indifferent quality; 150 *tsardes* Mocha, 120f. This week, Port-au-Prince, for delivery, 85f.

SUGAR.—At *Havre*, the week ending Friday, the sales were 210 casks French West India disposable, 50f 50c, bonne quatrieme, the 50 kilogs, duty paid; 4 casks and 30 quarts usine, 55f to 59f; 621 casks Havana, No. 12, 31f 75c in bond. By auction, 730 casks Havana, damaged, 25f to 31f 50c in bond. The arrivals were about 1,500 casks and 1,000 sacks. This week, Havana, 33f 50c. At *Nantes*, last week, the sales consisted of 8 casks French West India at 53f duty paid; 13 ditto, usine, 58f; 38 quarts ditto, ditto, 57f 50c; 51 casks ditto, usine, 59f 50c. This week, French West India, 51f. At *Bordeaux*, last week, 1,600 sacks Reunion, bonne quatrieme, 54f to 59f, duty paid; 4,500 ditto ditto, 54f. 750 casks Havana, No. 12, 31f 50c. This week no sales. At *Marseilles*, last week, 2,400 casks Havana, 32f 50c No. 12; 3,200 sacks Brazil, for delivery, 32f 50c. No sales this week.

INDIGO.—At *Havre*, in the week ending Friday, 1 chest old Bengal and 3 new, 75c above the last estimates. The arrivals were 139 chests. This week no sales. At *Bordeaux*, last week, 15 chests Bengal, 27 Madras, 22 Kurpah at the same prices as the preceding week. This week no business.

HIDES.—At *Havre*, in the week ending Friday, business was somewhat active. Prices were firm: 1,040 dry La Plata, 81f to 95f the 50 kilogs; 1,615 salted ox, 55f; cow, 42f to 42f 50c; 150 Rio Grande, dry, 60f; 500 ditto, salted ox, 55f; 1,400 Valparaiso, drysalted cow, 68f; 4,750 ditto, salted ox, 52f; cow, 42f 50c; 3,000 Pernambuco, drysalted, 68f; 110 French West India, salted, 52f 50c, quality indifferent; 591 New Orleans, salted cow, 37f. In skins, 2 bales dry calf, La Plata, 92f 50c; 5 bales kid, 11f 50c a dozen. A certain quantity of hides and skins damaged were disposed of by auction. The arrivals were about 14,700 hides. This week, Monte Video ox and cow, 100f and 102f 50c Monte Vido dry cow, 95f; ditto mataderos, 48f; ditto ditto, cow, 41f 25c and 42f; Buenos Ayres, salted cow, 48f 50c; Rio Grande, salted ox, 55f; ditto cow, 44f 50c; Pernambuco, salted, 45f; Uruguay, salted, 43f. Yesterday, Monte Video dry cow, 92f 50c; ditto light, 80f; ditto salted mataderos ox, 52f 50c; ditto cow, 42f; Uruguay, salted, 47f and 45f.

WOOL.—At *Havre*, in the week ending Friday, the sales were 195 bales La Plata unwashed, at 1f 55c to 2f 52½c the kilog; 2 Algeria washed, 3f 25c; 31 lambskin La Plata unwashed, for delivery, at 1f 27½c to 1f 30c and 1f 35c. The arrivals were 40 bales of wool and 2 bales of lambskin. This week, Buenos Ayres unwashed, 200f the 100 kilogs; Monte Video lamb, unwashed, 185f and 200f; ditto, ditto, washed, 300f; unwashed, 195f.

TALLOW.—At *Havre*, in the week ending Friday, the sales were 40 casks New York, 49f 75c to 50f the 50 kilogs; 148 ditto La Plata, 50f; 38 ditto inferior, 47f 50c to 48f. No arrivals. This week, La Plata, 50f and 49f. Yesterday, at *Paris*, the price was 105f 70c the 100 kilogs, octroi duty included.

SPIRITS.—At *Paris*, yesterday, 3-6, first quality, disposable, 56f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 72f; beet-root, 66f.

Subjoined is Messrs Sharp and Co's report of bullion movements at Hong Kong, for the fortnight ending Dec. 15.—Gold.—The total amount received is about in value 850,000 dols; and the shipments outwards, including those per Orissa on the 1st, and excluding those to leave per Salsette to-morrow, are about 650,000 dols. The market for this bullion has been remarkably steady, considerable quantities being now absorbed without noticeable depreciation. Silver.—There has come to hand the equivalent of 420,000, dols of which 200,000 dols have been remitted North. Bar silver has been in demand, and sales have been made at an improvement. Dollar Currency.—The arrivals, including two English and one French mail, sum up to 1,080,000 dols; the items on the other side are 350,000 dols only. Discounts and Mortgages.—Money is cheaper, arrangements having been made at eight and seven per cent. Exchange.—The home intelligence has tended very much to check business, and commercial bills have been very scarce, the alteration in value, however, is but insignificant. Exchange and Bullion—Closing Quotations.—On London, 6 months' sight, Bank, 4s 8¾d; on ditto, 3 months' sight, ditto, 4s 7¾d; on Calcutta, 3 days' sight, 224 rs; on Bombay, 3 days's sight, 224 rs: on Shanghae, 3 days' sight, 73 taels; on ditto, 30 days' sight, 74 taels; on Australia, 60 days' sight, 4s 10½d. Bar silver, 8 per cent. per prem; sycee, 6½ per cent. prem; Mexicans, ½ per cent. prem; gold leaf, 22.50 dols per tael; gold bars, 22.45 dols per tael, equivalent 100 touch: sovereigns, 4.38 dols each; discount, 8 per cent.

The following return shows the total export of petroleum from America:—

	1864. gallons.	1863. gallons.	1862. gallons.
From New York	21,335,784	19,547,604	6,72 ,273
Boston	1,693,307	2,019,431	1,071,100
Philadelphia	7,760,148	5,395,738	2,800,978
Baltimore	929,971	915,886	174,830
Portland	70,762	342,082	120,250
Total Exrort from the United States	31,792,972	28,250,721	10,887,701

There was also exported from Cleveland direct to Liverpool 80,000 gallons refined.

The *Shipping Gazette* thus reports the state of the freight market:—"Berth freights from London are somewhat better. The tonnage loading for India and China is 41,000 tons, and for Australia and New Zealand 40,700 tons. Small vessels are scarce, and in request. Coal freights continue firm, and have a tendency to advance for some of the leading ports. There is not much inquiry homewards from the East. Inquiries are beginning to be made for tonnage from the timber ports."

An account of the importations and exportations of bullion and specie registered in the week ended January 25, 1865 :—

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 25th day of January, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,219,315	Government Debt	11,015 100
		Other Securities	3,634,900
		Gold Coin and Bullion	13 569,315
		Silver Bullion	...
	28,219,315		28 219,315

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	11,023,211
Rest	3 485,147	Other Securities	18 053 247
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4,836 799	Notes	8 073,300
		Gold and Silver Coin	747,990
Other Deposits	14,553 933		
Seven Day and other Bills	468,779		
	37,897,658		37,897,658

Dated the 26th January 1865. W. MILLER, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,614 794	Securities	29,173,458
Public Deposits	4,836,799	Coin and Bullion	14,317,215
Private Deposits	14 553 933		
	40,005,526		43,490,673

The balance of Assets above Liabilities being 3,485 147*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£609,054
An INCREASE of Public Deposits of	650 185
A DECREASE of Other Deposits of	104,082
No change in Government Securities.	
A DECREASE of Other Securities of	215 815
An INCREASE of Bullion of	148,988
A DECREASE of Rest of	3,876
An INCREASE of Reserve of	713,673

Nearly all the changes in the above return are favourable. The decline in the other securities, and the augmentation in the public deposits have caused a large increase in the reserve, notwithstanding a small falling off in the other deposits.

Digitized by Google

The addition to the bullion indicates that the coin disbursed for the Government payments at the close of the year and for the dividends is steadily flowing back.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 20 786,515	£ 21,183,376	£ 20,771,236	£ 20 875,825	£ 20,614,794
Public deposits	2 897,554	5 753,063	5 416,863	6,337,246	4,806,799

In the corresponding week of 1855, the state of affairs in the Crimea continued unchanged. Attacks on the outposts of both armies were taking place. The Grand Dukes Michael and Nicholas had set off to join the army in Sebastopol. Lord John Russell had resigned his seat in the Cabinet of the Earl of Aberdeen.

In 1862, M. Fould's budget for the opening financial year in France, including the proposal for the conversion of the 4½ per Cents. into the 3 per Cent. stocks had made its appearance. The contraction of trade, consequent on the American supplies, having first affected England, was being felt throughout Europe; and money was generally declining in value. The increased prosperity of India, and the introduction of greater financial economy, was leading to the return of moneys from the Continent on Government account. Some fears had been excited in this country of further complications with the Federal Government, in consequence of the sinking of the stone-laden fleet in the mouth of Charleston harbour. The attitude of Austria in Italy was also giving rise to some slight alarm.

In 1863, news had arrived of the death of Said Pacha, Viceroy of Egypt. Intelligence had been received of Federal defeats at Vicksburg and at Galveston, Texas. A treaty of commerce had been signed at Paris detween France and Italy. The Ottoman Ministry and the Madrid Cabinet had been reconstituted. The opening of the Metropolitan Railway had been announced. The concession of the Imperial Ottoman Bank had been granted to the Ottoman Bank of London and the Credit Mobilier of Paris.

In 1864, the Austrian troops destined for Sleswig had commenced their march. The Danish Government had requested a delay to enable it to assemble the Rigsraad before replying definitively to the summons of Austria and Prussia. The Prussian vanguard had entered Kiel, and the Diet had been closed by the President of the Federal Council. The Danish Ambassador had withdrawn from Vienna. In Mexico, the success of the French continued uninterrupted. A summary of the French Budget for 1865 had been laid before the Corps Legislatif, and the debate on the Mexican question was still being continued. A sanguinary engagement had taken place between the Russians and Poles near Tyzowa, in the government of Lublin. In America, General Longstreet, who had been reinforced, was fortifying himself near Bull's Gap, and Lee was preparing for the Spring campaign. The New York Legislature had passed a Bill enabling soldiers in the field to vote. The new French loan had been successfully issued. The demand for discount was moderate, and the stock markets were firmer.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 3,622,053*l*; in 1862, a deficiency of 2,279,352*l*; in 1863, a deficiency of 5,120,454*l*; and in 1864, a deficiency of 6,436,633*l*. In 1865, the deficiency is 3,499,314*l*.

Discount and Money Market.—On Thursday, the Directors of the Bank of England reduced their rate of discount from 5½ to 5 per cent., a point at which it has not stood since the commencement of November, 1863.

The movement was fully anticipated, and hence exercised no effect on the stock markets. It was well understood that the position of the Bank accounts was steadily improving, and the demand for discount in the open market was very light in the commencement of the week, bills being held back until the weekly Court should have taken place. Yesterday, the inquiry somewhat augmented, but the rate for the best paper was still below 5 per cent. To-day, the supply of money has again increased, and the demand has been comparatively moderate. The following are the current terms for paper of various dates :—

30 to 60 days	4⅞ per cent.
3 months	5 per cent.
4 months	5¼ per cent.
6 months—Bank bills	5½ per cent.
6 months—Trade ditto	6 per cent.

On the Stock Exchange this morning the rate for loans was 4 to 4½ per cent., but the quotation subsequently declined to 3½ to 4.

The discount houses and joint stock banks have lowered their interest on deposits a half per cent., the following being the present terms :—

Joint Stock Banks	*4 per cent.
Discount houses at call	4 per cent.
Do. with seven days' notice	4¼ per cent.
Do. fourteen days	4½ per cent.

* At the London and Westminster 3 per cent. only on sums below 500*l*.

There were no gold operations at the Bank either yesterday or to-day.

The Bank of France return for the week shows the following changes :—

	£
Increase.	
Bullion	160,000
Treasury balance	20,000
Decrease.	
Circulation	366,000
Current accounts	120,000
Bills discounted	973,000
Advances	20,000

The Committee of the Stock Exchange appointed Thursday last for a special settlement in the shares of the following companies :—Baughparah Tea Estates of Assam, to be marked in the official list for transactions entered into on and after the 7th December last; the Northern Assam Tea, to be quoted for dealings on and after the 3d November; and the Ousah Coffee, to be included in the bi-weekly lists for transactions entered into on and after the 11th November.

On Wednesday, the 1st February, tenders will be received at the Bank of England for Government bills of 300,000*l* on India, of which not more than 120,000*l* will be drawn on Bombay.

The following are the current rates of discount on the Continent, showing a reduction at Amsterdam :—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	4½	4½
Vienna	5	5 ½
Berlin	5	4¾
Frankfort	5	5
Amsterdam	4½	4½
Turin	6	6
Brussels	5	4
Madrid	9	...
Hamburg	...	4
St Petersburg	6½ 3 mths' bills.	8
—	7 6 —	...

English Funds.—There have been no material variations in the Consol market this week, and the final prices to-day were the same as last Friday—viz., 89⅝ to 89¾ for money, and 89¾ to 89⅞ for the account. The daily business continues extremely limited, attention being almost entirely directed to securities bearing a higher rate of interest. Reduced and New 3 per Cents., 88¾ to 88⅞. India 5 per Cents. have improved to 103⅞ to 104⅛.

India bonds are firm at 10s to 14s prem., while Exchequer bills remain unaltered at par to 4s prem.

Foreign Stocks.—The determination of the Madrid Ministry to have recourse to a forced loan has caused a strange reaction in Spanish Passive and Certificates from the rise experienced last week. There appears, however, to be some doubt whether the Cortes will approve the measure, and a refusal will necessarily compel the Government to seek assistance from abroad, and, as an indispensable preliminary, to acknowledge the validity of the outstanding debt. The Confederate loan exhibits a renewed advance at 57 to 59. There has also been an increased demand for Turkish Consolidés, and the price has risen to 50¾ to 51. The foreign loans show no material change. Mexican has been slightly firmer. The general transactions continue limited, partly in anticipation of the

Digitized by Google

settlement commencing to-morrow. The following are the closing quotations of the principal stocks dealt in to-day:—4½ per Cent. Brazilian, 83½ to 84½. Equador New Consolidated, 12 to 13. 7 per Cent. Egyptian, 97 to 99; ditto, 1864, 95½ to 96. 5 per Cent. Greek, 23¾ to 24; ditto coupons, 10 to 10½. 3 per Cent. Mexican, 27⅞ to 28⅛; ditto, 1864, 26½ to 26¾. 3 per Cent. Portuguese, 47 to 47⅛. 5 per Cent. Russian, 90 to 92; ditto, 1862, 89 to 90; ditto, 1864, 90 to 91; 3 per Cents., 54 to 55. Spanish Passive, 32⅜ to 32⅝; Certificates, 14⅓ to 14¾. 6 per Cent. Turkish, 1854, 90 to 91; ditto, 1858, 72 to 72½; ditto, 1862, 70¼ to 70¾; 4 per Cent. guaranteed, 100 to 102. 6 per Cent. Venezuelan, 1862, 47 to 48; ditto, 1864, 42 to 43; and 5 per Cent. Italian, 64¼ to 64½.

Italian loan scrip was last quoted ⅛ to ⅜ prem, being flatter, and Danubian loan, ¾ to ½ dis. Montevidean continues in demand, and has risen to 5 to 5½ premium.

The final price of French Three per Cent. Rentes on the Paris Bourse this evening was 67f 20c, showing a rise of about a quarter compared with yesterday and last week.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day:—

CONSOLS.

RAILWAYS AND OTHER SHARES.—The principal feature in the railway market this week has been the extraordinary fluctuation in London and North-Western stock, on a false announcement respecting the proposed dividend. In the *Times* of Thursday, a statement, apparently official, was published, fixing the payment at the rate of 7¼ per cent. per annum, and the stock subsequently rose to 123. In the middle of the day, however, a letter was received at the stock Exchange from the Secretary of the Company, pointing out that the statement was a fabrication, and an immediate reaction ensued. Notwithstanding this relapse, an advance is still shown over last Friday of nearly 1 per cent. Caledonian is also higher. In other descriptions the tendency has been rather adverse, especially in Great Western, Great Eastern (from the temporary postponement for technical reasons of the dividend), South-Eastern, North-Eastern stocks, and North British. The announcement of the dividend on Metropolitan has not materially affected the quotation, the result of the working having been generally anticipated. Business in this department continues languid, and there appears little sign of a revival of speculation.

Colonial descriptions have been inactive, and occasionally rather flat. Foreign shares have also been dull, almost the only upward movement being a rise in Bahia.

In joint stock bank shares the principal dealings have been in Allianee, a recovery having taken place on the results of the meeting. London Joint Stock have also been firm, and the market generally has shown steadiness. A better demand has prevailed for International Financial shares.

The dealings in the new City of Milan Improvement Company have again been very large, at prices ranging between 3¾ and 4¼ premium. The final quotation this evening was 4 to 4¼.

Subjoined is our usual list of the closing prices of the principal railway shares on last Friday and this day:—

RAILWAYS.	Closing prices last Friday.	Closing prices this day.

FOREIGN EXCHANGES.—In consequence of the reduction of the Bank rate, the quotations this afternoon showed a flat tendency, but without experiencing any material decline.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The past week has been unusually quiet, and we have but one arrival to report, that of the Australasian from New York, bringing 111,000*l* in eagles and bars. The coin was sold at 76s 3½d per oz, owing to a slightly increased demand for it, but we do not think that price could now be obtained. About 42,000*l* in fine gold has been sent into the Bank, and sovereigns to the amount of 30,000*l* have been withdrawn for Alexandria. The Ripon has taken 4,960*l* to Bombay.

Silver.—Our market has been very dull for the last few days, and but little business has been done. We have not any arrivals of silver, but in the absence of any demand the price remains quiet at 61½d per oz standard. The Ripon has taken 97,240*l* to Bombay.

Mexican Dollars.—Since our circular of the 19th inst. there have not been any transactions in this coin. A few inquiries were made to-day on the arrival of the China mail, but the tendency of the market is, we think, to somewhat lower rates.

Exchange on India for drafts by the banks, at 60 days' sight, is lower, and may be quoted as follows:—1s 11¾d for Calcutta and Madras, and 1s 11¾d Bombay.

India Government loan notes remain unchanged, and prices are 109 to 111 for 5½ per Cents., 101 to 103 for 5 per Cents., and 89 to 91 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto, fine, 77s 9½d per oz std; ditto, refinable, 77s 11d per oz std, last price; Spanish doubloons, 74s 6d to 75s per oz nominal; South American ditto, 73s 6d to 73s 9d per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 1½d per oz std; bar silver, containing 5 grains gold, 5s 1⅝d per oz std; Mexican dollars, 5s 0⅜d per oz, last price, nominal; five-franc pieces, 4s 11½d per oz. Quicksilver, 8*l* per bottle; discount 3 per cent.

FAILURES AND MERCANTILE EMBARRASSMENTS.—A petition for the winding-up of the Cappagh Mining Company (Limited) is to be heard before Vice-Chancellor Wood this day.

A petition for the winding-up of the Buller and Basset Mining Company is appointed to be heard in the Stannaries Court on the 1st February.

The suspension of Messrs Southgate and Barrett, book auctioneers, has been announced. It is thought that the liabilities are extensive.

Letters from Liverpool notice the failure of Messrs Ecoles, Cartwright, and Co., engaged in the cotton trade. It is understood that the debts and liabilities are large.

At a meeting of the creditors of Mr James Lunham, of the firm of Messrs J. Lunham and Co., provision merchants, of the Borough, the balance sheet presented by Messrs Coleman, Turquand, Youngs, and Co., showed liabilities amounting to 190,619*l*, and assets to 71,373*l*. An adjournment was ultimately resolved upon to enable a committee to investigate the estate and consider an offer of 7s in the pound.

At a meeting to-day of the creditors of Messrs Hill and

Digitized by Google

Weguelin, Russia merchants, who lately stopped payment, a balance sheet was presented showing liabilities 29,547*l*, and assets estimated to realise 22,520*l*. A committee was appointed to investigate the estate and report at a future meeting.

PUBLIC COMPANIES. — The Warrant Finance Company (Limited) held its first meeting on Friday the 24th inst. The report stated the net profits, up to the 31st ult., at 13,773*l*, out of which the directors declared a dividend of 7s 6d per share, equal to seven and a half per cent. per annum, free of income tax, and carried forward 6,085*l* to next account.

The ordinary general meeting of the shareholders of the Alliance Bank was held on Tuesday last. The report stated that the profits were 66,731*l* 19s 9d; but that the losses sustained during the past three months had absorbed the whole of this total, besides a further sum of 61,733*l* 11s 5d, which had been carried from the reserve fund. After a long discussion, the report was unanimously adopted.

At the half-yearly meeting of the proprietors of the Consolidated Bank, the report was adopted, and a dividend and bonus at the rate of 17½ per cent. per annum, free of income tax, were declared.

Circulars have been issued announcing the amalgamation of the private bank of Messrs Attwoods, Spooner, Marshalls, and Co., with the Birmingham Joint Stock Bank (Limited).

In the report of the Bank of Egypt it is stated that the net profits, after providing for bad and doubtful debts, amount to 20,028*l*, which, with the balance brought forward from the previous half-year, makes a total of 26,301*l*, available for appropriation. The directors recommend a dividend at the rate of 10 per cent. per annum, together with a bonus of 5s per share, free of income tax,

The report of the English, Scottish, and Australian Chartered Bank has been issued. The balance at credit of profit and loss account is stated at 26,267*l*, out of which the directors recommend a dividend of 6 per cent. per annum.

The report of the Oriental Financial Corporation, adopted at the meeting yesterday, stated, that the net profits, from the commencement of business in April last, amounted to 16,975*l*. Out of this sum the directors have appropriated 706*l* to the payment of ad interim interest to 30th June last, at the rate of 8 per cent. per annum, and 3,298*l* for dividend to 31st December, 1864, at the rate of 8 per cent. per annum, leaving the sum of 12,971*l* to be carried forward to next account.

The report of the Joint Stock Discount Company has been issued in anticipation of the forthcoming half-yearly meeting. The reserve fund has been increased to 30,000*l*. It is recommended to pay a dividend at the rate of 6 per cent. per annum, and to carry forward 3,243*l* to next account.

The general meeting of the Financial Corporation was held on Monday last. The report submitted to the proprietors stated the net profits at 19,128*l* 5s 10d, which was apportioned as follows:—4,568*l* 3s 10d for a dividend of 10 per cent. for the past half-year on the paid-up capital; 10,000*l* to the formation of a reserve fund; and a balance of 4,560*l* 2s to be carried to the next account.

At the half-yearly meeting of the London Financial Association, held on the 23rd inst., the report was adopted, and a dividend and bonus at the rate of 15 per cent. per annum were declared.

A meeting of the Imperial Mercantile Credit Association was held on Monday, when the report and statement of accounts were adopted. The balance of net profit was stated at 99,217*l* 9s, which was appropriated as follows:—A dividend, free of income-tax, of 10s per share, 50,000*l*; income-tax, 1,250*l*; balance carried forward to next half-year, 47,967*l* 9s.

The Maritime Insurance Company of Liverpool have issued their report. The interest realised by loans and investments amounts to 7,007*l*, and out of this sum the directors recommend a dividend of 6 per cent. per annum on the ten months' business. The declaration of a dividend out of premiums is deferred until the first year's risks are run off, and the result ascertained.

The directors of the Metropolitan Railway Company have resolved to recommend to the proprietors a dividend for the past half-year at the rate of 7 per cent. per anum on the ordinary stock and new ordinary shares of this company, carrying forward a balance of 7,500*l* to the next half-year's account.

The report of the Universal Marine Insurance Company (Limited) has been issued. The net receipts of the past year for premiums amounted to 278,332*l*, and the claims due from and paid by the company for the past and previous years, after deducting salvage received, were 214,338*l*. The receipts for interest and dividends during the past year, derived from the company's investments in Government and other securities, increased to 9,006*l*, as against 4,403*l* in 1863. The heavy balances which in the years 1862 and 1863 stood at the debit of income and expenditure account, proceeding from the great losses sustained by the company in the years 1860 and 1861, have now been extinguished.

At the meeting of the London, Italian, and Adriatic Steam Navigation Company, a dividend of 5 per cent. was declared. It was stated that calls amounting in all to 7*l* 10s, with the amount of debenture bonds proposed to be issued, would enable the directors to close the capital account of the company.

The Manchester Warehouse and Office Company has been announced, with a capital of 100,000*l*, in 5,000 shares of 20*l* each. It is proposed to erect first-class warehouses and offices in the centre of Manchester, upon a plot of land of upwards of 3,000 square yards in extent, which has been secured upon advantageous terms. Nearly one-half of the shares have been privately subscribed.

The prospectus has been issued of Brill's Brighton Baths Company (Limited), with a capital of 120,000*l*, in 6,000 shares of 20*l* each.

The prospectus of "John West and Company (Limited)," has been issued. The object is to purchase and carry on, under the joint stock principle, the gas meter manufactory of the late John West, now in full operation at Oldham. The capital is 50,000*l*, in 5,000 shares of 10*l* each

The prospectus of the Wholesale and Export Drug Company (Limited) has been issued. The proposed capital is 50,000*l*, in 10,000 shares of 5*l* each, with power to increase to 500,000*l*. It is stated that one-third of the capital is already subscribed.

"Day and Son (Limited)" has been announced with a capital of 160,000*l*, in shares of 10*l* each; 5,000 of which are reckoned as fully paid, being taken by the late proprietors in part purchase of the working stock of lithographic and stationery business, &c.

At the meeting of the East London Bank (Limited), held on Thursday, a dividend of 5 per cent. per annum was declared.

The report of the London and Provincial Marine Insurance Company states that the balance to the credit of the income and expenditure account amounts to 93,132*l*. A bonus of 5 per cent. upon the capital paid up is recommended, in addition to interest on the 1864 account for the last half-year, at the rate of 10 per cent. per annum.

The fourth ordinary general meeting of the Union Bank of Ireland was held yesterday, when the report presented to the shareholders stated the profits at 7,972*l* 19s 3d. A dividend of 10s per share was declared, and 1,972 19s 3d carried to new account.

At the meeting of the Midland Banking Company held yesterday, the directors declared a dividend of 5 per cent. per annum, and added 1,000*l* to the reserve fund.

The half-yearly meeting of the Scottish Australian Investment Company (Limited) was held yesterday, and a dividend of 10 per cent. per annum declared.

The Directors of the Land Mortgage Bank of India announce the issue of debentures yielding 5¾ per cent. The price fixed for every 100*l* bond is 87.

The capital of the Asiatic Banking Corporation is about to be increased to 1,000,000*l*, by the issue of 25,000 new shares of 20*l* each. We understand that the deposits exceed three millions sterling.

The report of the North-Western Bank recommends a dividend at the rate of 10 per cent. per annum.

Mr. Henry Fisher, of the York City and County Bank, to the management of the Midland Bank, Wolverhampton, vice Mr W. Ferguson, who has been appointed to the management of the Bank of Leeds (Limited).

The numbers have been published of eighty first mortgage bonds of the Pennsylvanian section of the Atlantic and Great Western Railway, which were drawn on the 19th instant, and are to be paid off at par on the 1st of April.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is rather more than 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 423 per mark, and the short exchange on London is 13.4 per 1*l* sterling. Standard gold at the English Mint price is, therefore, at about the same price in London and Hamburg.

LETTERS FOR THE IONIAN ISLANDS.—In consequence of the annexation of the Ionian Islands to Greece, an alteration, attended with an increase of postage, has become necessary in the arrangements for the transmission of correspondence between this country and the Ionian Islands. On the 1st February next, and thenceforward, the following rates of postage (British and foreign combined) will be chargeable on letters, newspapers, &c., addressed to the Ionian Islands, if sent via Italy:—Letters: not exceeding ¼ oz, 8d; above ¼ oz and not exceeding ½ oz, 1s 4d; above ½ oz and not exceeding ¾ oz, 2s; above ¾ oz and not exceeding 1 oz, 2s 8d; above 1 oz and not exceeding 1¼ oz, 3s 4d. Newspapers and books: for each newspaper not exceeding 4 ozs in weight, 4d; above 4 ozs and not exceeding ½ lb, 8d; for a packet of printed papers other than newspapers not exceeding 4 ozs in weight, 6d; above 4 ozs and not exceeding ½ lb, 1s; above ½ lb and not exceeding 1 lb, 2s; above 1 lb and not exceeding 1½ lb, 3s; above 1½ lb and not exceeding 2 lbs, 4s; for every additional ½ lb, 1s. The postage on letters may either be paid in advance, or left to be charged on delivery, at the option of the sender; but the postage on newspapers, books, &c., must be prepaid, or they cannot be forwarded. Letters addressed to the Ionian Islands, via Italy, may be registered on payment, in advance, of a registration fee of 6d, in addition to the ordinary postage. All correspondence for the Ionian Islands will be sent via Italy, unless directed to be forwarded by another route. Letters for other parts of Greece will continue, as a rule, to be sent by French packet, via Marseilles, but they may also be forwarded via Italy, if specially so addressed, at the foregoing rates of postage, which are lower than those hitherto charged on letters addressed to Greece proper. Letters, &c., addressed to the Ionian Islands, via Italy, must, as at present, be posted in, or reach London not later than Wednesday morning in each week, and on the mornings of the 3rd, 10th, 18th, and 26th of each month, or when either of those dates falls on Sunday, on the previous evening.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Although the supply of English wheat on sale at Mark lane to-day was small, the demand, both for red and white qualities, ruled inactive, at Monday's prices. Foreign wheat changed hands at previous rates, but the amount of business transacted was limited. Good and fine malting barley was in request, at extreme rates, and there was a steady trade for sweet oats, at full currencies: inferior barley and oats, however, were dull, at about previous quotations. Beans and peas met a slow sale, at late prices. The flour trade was steady, on former terms. This week's imports amount to 550 quarters of wheat, 920 barley, 35,710 oats, 970 sacks and 70 barrels of flour.

Very little change took place in the value of wheat, flour, and maize at Liverpool this morning. The wheat trade at Wakefield was slow, at previous quotations.

The Liverpool cotton market has been again very dull this week, although with no very material change in prices until Wednesday, when, through the forced sales of some speculators, prices gave way, and are now quoted fully 1d to 1½d lower than last week. The total sales of the week reach 35,000, of which 9,000 bales have been taken on speculation and for export, leaving 26,000 bales to the trade. To-day, the market remains very quiet, with prices in buyers' favour, and sales of 3,000 bales.

During the fortnight ending Dec. 28, the cotton trade at Bombay was very quiet. The transactions for the most part were in old Dhollera and Sawginned Dharwar produce, and chiefly on European account. The changes in prices, though by no means important, were mostly in an unfavourable direction. A few parcels of *new* Oomrawuttee cotton had arrived, but the quality of the produce was inferior, the staple being short and weak. The subjoined tables of prices and exports are from Messrs Nicol and Co.'s circular:—

Current Prices of Cotton at Bombay, Dec. 28.

Advices from Calcutta to Dec. 20, state that owing to small arrivals, holders of cotton were firm in their demands; but that there was no activity in the demand for any quality. Old produce was quoted at 24 to 30, and new at 33 to 36 rupees per bazaar maund.

At Madras, during the fortnight ending Dec. 23, there was decidedly more firmness in the cotton trade, and although the business transacted was by no means extensive, prices steadily improved. The latest quotation for Western produce was 15½d; for Salem and Coimbatore, 14¾d per lb. The stock was estimated about 10,000 bales.

The cotton trade at Tinnevelly, from Dec. 3 to Dec. 17, was much firmer, prices having improved 60 rupees per candy from the previous lowest rates. The quotation was 260 rupees per candy.

We have letters from Shanghai to Dec. 8. The supply of cotton on sale at that date was small, yet there was a want of firmness in the trade. No. 1 dry Shanghai was quoted at 15 to 15½ taels per picul.

At Canton, during the fortnight ending Dec. 13, 2,300 bales of cotton changed hands. Shanghai produce realised 18 to 21 taels; Ningpo, 19 to 22 taels; and Japan, 21 to 23 taels per picul.

The transactions in cotton at Hong Kong, during the same period, realised 2,100 bales. Shanghai produce sold at 23 to 24 dols; Ningpo, 26 to 27 dols; and Japan, 27 to 28 dols per picul.

At Yokohama, on the 30th November, the cotton trade was very dull, and scarcely any business was passing either in fine or secondary qualities of produce. Superior descriptions were quoted at 26 to 28 dols per picul. The export since July 1 had been 9,562 bales to Europe, and 5,786 bales to Hong Kong—total, 15,348 bales, against 20,364 bales in 1863.

On the 17th inst., the cotton trade at Alexandria was quiet, but firm. Good fair open-ginned produce was quoted at 25d; fair ditto, 24d per lb. The sales from Jan. 6 to Jan. 17 reached 11,786 bales, and the arrivals 39,000 bales. During that period, the market was quiet: middling to fair roller-ginned sold at 23½d to 24¼d; fully fair ditto, 24½d; fair to fully fair, open-ginned, 24d to 24¼d; good fair to fully good fair, 24¾d to 25¼d per lb, free on board. The following table from the Egyptian Commercial and Trading Company's circular shows the extent of the shipments from Oct. 3 to Jan. 14:—

Exports of Cotton from Alexandria from Oct. 3 to Jan. 14.

Alexandria ...	0 0 0	0 0 0	0 0 0¼	0 0 0

Small supplies of tea, sugar, and coffee have been brought forward at the public sales this week. There has, however, been a great want of activity in the trade, and scarcely any change can be noticed in prices. In the early part of the week, the sugar trade showed signs of improvement, but the demand has since fallen off. Last week, duty was paid in London on 1,232,406 lbs of tea, and the export for the week ending Jan. 19 reached 669,603 lbs, making a total of 1,902,009 lbs, against 1,210,229 lbs last year.

The demand for tea at the leading Chinese ports, at latest dates, was but moderate. Prices, however, were decidedly firm, enhanced quotations having been realised in some instances. The export from Canton, since June 1, had been 8,941,400 lbs; from Amoy, 453,000 lbs; from Fuhchau, 37,782,000 lbs; and from Shanghai, 45,125,889 lbs.; making a total from all ports of 92,302,289 lbs, against 86,460,770 lbs during the same period last season.

At Columbo, during the fortnight ending Dec. 30, there was less activity in the demand for coffee. Native produce, however, was held at enhanced rates, whilst plantation produce changed hands at fully late prices. Native coffee, unpicked, was quoted at 41s; picked and dried do., 47s 6d per cwt; and plantation, 12s to 12s 9d per bushel. Annexed is Messrs Fryer, Schultze, and Co.'s table of shipments:—

Messrs Niebuhr and Co., writing from Akyab on the 17th ult., state that the rice season had just commenced, *new* Laroong and Latoorec produce having arrived in limited quantities, but that the demand at that date was chiefly for shipment to Chinese and Indian ports. The accounts respecting the crop of Necrancie rice were very satisfactory.

Wool, hemp, and flax are without change in value from last week. *New* jute moves off steadily, at full prices; but old qualities are a dull inquiry,

A report from Shanghai in reference to the silk trade, dated the 8th ult., says:—The settlements are only estimated at 300 bales; the high demands of the dealers, and poor selection now in the stock, as well as an advanced rate of exchange, having caused more caution on the part of operators. There has been no change in prices, and as the quantity of unsold silk is reduced to a limited

Digitized by Google

amount, without the prospect of any considerable supply for the remainder of the season, the Chinamen continue firm. About 300 bales have been brought down from the interior, so that there is no alteration in the estimate of stock. From Japan 883 bales have arrived. The latest advices from Yokohama report that the supply was coming forward less freely, and this, added to a reduced rate of exchange, had caused prices to advance to $705 per picul for best Mybash. The unsold stock was estimated at 1,500 bales; against 8,530 bales in 1863; 7,000 bales in 1862; and 19,000 bales in 1861.

The following table from Messrs Arles, Dufour, and Co.'s circular, shows the extent of the deliveries of silk through the Condition House at Lyons during the last ten years:—

	Throwns. bales.	Raws. bales.	Total weight. kilogs.
1855	27,370	8,645	3,000,000
1856	25,800	9,600	2,850,000
1857	19,595	8,700	2,067,000
1858	27,390	10,955	2,953,000
1859	24,500	9,310	2,523,000
1860	26,300	13,500	2,817,000
1861	20,580	10,150	2,215,000
1862	26,950	13,365	2,992,000
1863	24,370	12,240	2,669,000
1864	25,540	11,890	2,922,000

Last year, 920,242 lbs of silk passed the condition house at Zurich, against 975,992 lbs in 1863, and 1,100,983 lbs in 1862.

From the 7th to the 27th of December, 2,300 chests of indigo were disposed of at Calcutta, at public sale, and 600 chests by private contract. The tendency of prices was somewhat in favour of buyers. The shipments, from Nov. 1 to Dec. 20, were 6,170 chests, of which 4,572 chests were to Great Britain, and 1,062 chests to France.

Metals and oils have continued quiet, at about previous quotations. Tallow, in the early part of the week, was much firmer, new P.Y.C. being quoted at 41s 9d to 42s per cwt., on the spot; but the price is now 41s 6d per cwt.

Very little news of interest has reached us from New York this week, either as regards financial or commercial matters. The leading feature seems to have been a steady demand for Government securities, at full quotations. Gold touched 124, and after falling to 122¼, closed on the 10th inst. at 123 per cent. prem. In the various departments of trade, the business doing was very moderate, at about previous quotations. The stock of bullion in the banks on 7th inst. was 4,030,560*l*.

THE COTTON TRADE.

LIVERPOOL—January 27.

Cotton was in improved demand in the early part of the week, and in some instances prices slightly advanced; but since Tuesday the business has been very limited, and the market closed heavily yesterday, with a further decline in quotations, notwithstanding the reduction of the Bank rate to five per cent. American has been in comparatively fair request, but very freely offered, and closed with a decline of ¼d per lb in the middling and better qualities. In Sea Island, of which the choice is larger, more business has been done, at full prices. Brazil is quoted about ¼d below last week. Pernam continues in demand, while Bahia, Maceio, and Maranham are still comparatively neglected. Egyptian, in the early part of the week, was in good request, and advanced ¼d to ⅜d per lb, but during the last two days has been very heavy and pressed for sale, and the quotations now show a decline of ½d to ¾d from last week's rates. Smyrna, owing to the continued heavy arrivals, has been much pressed, and prices show a decline of 1d to 1½d, with considerable irregularity. The demand for East India has again fallen off materially, and it has been very difficult to sell, even at a reduction generally of 1d per lb. Scinde and Bengal have further declined during the past two days, and are selling at much easier rates. China and Japan have been freely offered, and the demand is insufficient to take off the large quantity offering, at a further decline of ½d per lb.

The transactions, to arrive, have been limited to a few purchases of Egyptian at irregular and declining rates. The sales of the week amount to 35,220 bales, including 1,900 on speculation, and 6,860 declared for export, leaving 26,460 bales to the trade. The sales to-day are about 3,000 bales.

The quantity of East India cotton afloat is now about 218,000 bales, against 306,000 bales last year.

LONDON—Jan. 27.

The following is a portion of the circular issued by the London Cotton Brokers' Association:—

The market has been very dull this week, but with little alteration in prices until yesterday, when they were very irregular, some descriptions having declined ½d, and others as much as 1d to 2d per lb. There have not been any transactions in Surat; the few parcels in stock being firmly held; Tinnevelly, Coimbatore, and Salem go off very slowly in retail lots at about previous rates. In the early part of the week there was some demand for better qualities of new Western, and for these very full prices were obtained, but business has since been checked by the firmness of holders, who refuse to submit to any decline; the lower qualities still continue difficult of sale, even at a reduction in price. Coconada has declined 1d per lb; Bengal, Rangoon, and Scinde are ¼d to ½d per lb lower, while China and Japan are not easily saleable, even at ½d decline on last week's prices. The most recent sales of Smyrna have been at a reduction of fully 2d per lb from those made early in the week.

NEW YORK—JAN. 9.

Since the close of last week, cotton has declined in value 3 cents per lb. The trade is decidedly heavy for all qualities, and the amount of business doing limited. The following are the prices:—

	NEW YORK CLASSIFICATION. Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c

Middling	116	117	117	118
Good middling	120	121	122	123

MARKETS IN THE MANUFACTURING DISTRICTS

For the time of year, a fair average business has been transacted in goods, and the quotations generally have been well supported. The iron trade has continued heavy, and, in some instances, the quotations have had a drooping tendency. The demand for coals has been unusually active.

MANCHESTER, Jan. 26.—Prices, on the whole, have had a further downward tendency, from want of sufficient business, and the position and prospects of the cotton market. At the beginning of the week greater steadiness was observable, and a number of small purchases were made for present use, but since Tuesday afternoon sellers have been less firm, and buyers have reduced their terms for such offers as they had been before disposed to make. To-day, no change of consequence has resulted either from the reduction of the Bank rate or the receipt of India and China letters. A few leading makers continue engaged on 8¼ lb shirtings for China, but either for home or export no other special demand can be noticed. Yarns are lower about ½d per lb.

BRADFORD.—Transactions have been very limited in all the better sorts of fleece wools, but skin wools, and britch and other low sorts have been in fair request. Prices are a little unsteady. Carded yarns continue to be asked for, and the home trade spinners are not wholly without orders. Prices are still irregular, but spinners would have to offer ruinous prices to secure large orders. Little business is doing in pieces, and prices must be quoted the turn easier.

LEEDS.—The spring trade is gradually developing, and there is a good bulk of cloth delivering direct to the warehouses. Cloth dressers and finishers are well employed, as are also the great bulk of the manufacturers. The range of prices keeps very steady.

HUDDERSFIELD.—The attendance of buyers has included representatives of Canadian as well as London and country houses, but the general tone of the market has been quiet. In the wool trade there is a pretty steady demand, but it is only of a character to meet the immediate requirements of the manufacturers.

ROCHDALE.—The flannel trade keeps rather quiet. The Yorkshire goods trade is steady. The flannel manufacturers are tolerably well employed, and they are firm in their prices.

LEICESTER.—There has been a fair amount of business doing in regular goods in the hosiery trade, and business is being pretty generally resumed at the warehouses. Yarns hold up in price, and the market continues steady. There is not much doing in wools, but high prices are maintained.

NOTTINGHAM.—There is a little more doing in lace goods both for the continental and the home market. All silk goods are higher in price, in consequence of the rise in the raw material. We have more business doing in hosiery, particularly in goods suitable for the home trade. Yarns remain firm in price.

WOLVERHAMPTON.—The demand for iron continues very quiet, and very few works have sufficient to keep them fully employed. Pig iron is almost unsaleable.

DUNDEE.—Only a limited business has been done privately in flax, tow, and codilla, on the spot, and the sales reported are rather under last week's prices. Jute is in fair request, especially the better qualities. There is little change in the demand for linens, and prices of various qualities are rather lower than last week, but the large previous forward sales keep manufacturers independent of the present demand, and this helps to sustain the value of goods here.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Jan. 9.—The demand for flour and wheat continues in a most inactive state, but without leading to any material changes in prices as compared with our last report. For corn, however, the market is firm, at full currencies. Annexed are the prices of flour, wheat, and corn now current:—Flour—Superfine State and Western, $9.70 to $9.90; extra State, $10 to $10.30; choice State, $10.35 to $10.40; common to medium extra Western, $10.25 to $10.60; extra round hoop Ohio, $11.20 to $11.30; Western trade brands, $11.35 to $12; extra St Louis, $11 to $15; common Southern, $10.80 to $12.10; fancy and extra ditto, $12.15 to $15; common Canadian, $10.20 to $10.35; good to choice and extra, $10.40 to $12 per bushel. Wheat—No. 2 Chicago spring, $2.30. Corn—New Jersey ye low, $1.80 per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Very limited quantities of English wheat have been received up to our market this week, coastwise and by land-carriage. For both red and white qualities, the demand has ruled steady, and the quotations have been well supported. The imports of foreign wheat have been scanty. Fine dry samples have commanded full currencies. In other kinds, the transactions have been trifling, at barely stationary prices. Fine barley, both English and foreign, has continued in request, but without improvement in value. Inferior qualities have moved off heavily, at low currencies. There has been a steady inquiry for malt, the arrivals of which have been tolerably extensive, at quite last week's quotations. The quantity of oats on sale has increased, yet the oat trade has been somewhat firm, at extreme rates. Beans have come freely to hand. In the few sales effected, prices have been supported. Peas have been almost nominal. Both English and foreign flour has continued steady in price. The various local markets have been tolerably firm for wheat, fine barley, and oats, at full quotations. In most other articles, the quotations have been on a very moderate scale.

The continental markets continue to be well supplied with wheat. For the most part sales have progressed slowly. Most descriptions of spring corn have realised about previous rates. In America, all kinds of produce have realised full prices, although the export demand has been much restricted.

In Scotland, wheat, barley, and oats have moved off steadily, at full quotations. Otherwise, the trade has been in a sluggish state.

The Irish markets have been but moderately supplied with produce. Generally speaking, the trade has ruled inactive, at about previous quotations.

At Mark lane to-day, the supply of English wheat on sale was small, yet the demand ruled inactive, at Monday's currency. Foreign wheat changed hands to a limited extent, at late rates. Good and fine malting barley was in request at extreme rates, but inferior qualities sold heavily, at about previous quotations. Good and sound oats moved off steadily, at full currencies; inferior produce, however, commanded very little attention. Beans and peas met a slow sale, at late rates. The flour trade was steady, on former terms.

The annexed return shows the stocks of English, foreign, and colonial produce in London at the close of 1864, compared with the three previous years:—

Mr George Dornbusch reports the arrival off coast of 16 cargoes of wheat, 19 maize, 13 barley, 3 rye, 2 beans, 9 linseed, 1 rape seed, and 2 oil cake. Wheat has moved off slowly at, in some instances, 6d per quarter less money. All other kinds of produce have met a dull sale. Cotton seed has changed hands at 7*l* 2s 6d to 7*l* 7s 6d per ton.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of this day's Markets see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—The market has been rather more steady with diminished supplies, but no improvement can be quoted in prices. Yesterday rather a quiet tone again prevailed. About 1,435 casks West India had been sold in three days, including part of 296 casks Barbadoes, by auction, at 30s 6d to 33s 6d. 85 casks 1,055 bags other sorts: grainy Demerara, 35s 6d to 37s per cwt. Some business is reported for Mauritius afloat for France. The deliveries continue to increase, being 4,323 tons last week, during which period the landings amounted to 2,419 tons; leaving the stock at the close 108,433 tons; against 75,680 tons in 1863.

Mauritius.—3,014 bags by auction nearly all sold: brown, 26s 6d to 28s 6d; grey and yellow, 29s 6d to 32s; grainy and crystallised, 31s to 38s. Two floating cargoes have sold for France, No. 12 to 12½, at 25s per cwt.

Bengal.—About 4,000 bags Gurpatta date are reported privately at 27s 6d to 32s 6d.

Natal.—2,233 bags muscovado sorts sold at 23s 6d to 32s 6d per cwt.

Foreign.—By private contract 600 casks Cuba have sold at 31s to to 31s 6d. 1,500 boxes Havana at 34s 6d. 1,800 bags clayed Manilla at 28s. 1,700 boxes Havana at auction partly sold at 33s 6d to 36s. 709 casks 189 barrels Porto Rico, partly found buyers at 27s to 31s 6d. 2,000 boxes Havana have sold on the spot at 33s 6d to 34s 6d. A floating cargo is reported for the United Kingdom, No. 8½, said to be at or about 20s 6d per cwt.

Refined.—The market is unchanged, with a moderate inquiry prevailing.

Molasses.—200 puncheons Demerara have sold at 12s to 12s 6d per cwt.

Rum maintains its former position, but the demand has been less active than of late.

Cocoa.—The market is quiet, and 654 bags Trinidad, by auction, found buyers at 52s 6d to 70s per cwt for grey to good red, being some decline upon the common qualities; while middling to good obtained about the previous value.

Tea.—There has not been much business of importance transacted by private contract, and the market continued inactive since the sales concluded on Monday, when 7,416 packages sold, making 31,800 packages out of 39,571 in the catalogues. Nearly all this quantity was printed "without reserve." Common dusty-leaf Congou brought 6½d to 7½d; common red and black-leaf Congou, 10½d to 1s 1d; medium Kaisow, 2s 1d to 2s 1½d. Fair quality Canton scented orange pekoe, 1s 10½d; and common scented caper, 9⅜d per lb. Two breaks of common Oolong, 7d to 7½d. A few coloured Japans and Shanghai greens were realised at a slight decline.

Coffee.—The Dutch Trading Company's first sale this year, fixed for the 15th February, will contain 87,200 bags, or a smaller quantity than generally expected, and the market is firmer in consequence. Native Ceylon has slightly advanced, several parcels being sold privately, and 85 casks 1,628 bags by auction mostly realised 69s to 71s for good ordinary to fine ordinary quality. 491 casks 387 barrels and bags plantation realised 79s to 85s for fine fine ordinary good to middling. 132 packages East India partly sold; Neilgherry at 80s 6d to 84s. 65 bales Mocha were bought in: mixed long berry at 92s to 94s. 27 half-bales greenish at 85s per cwt. A full amount of business has been done privately. The stock is reduced to 11,040 tons, against 11,410 tons last year, and 8,570 in 1863.

Sago.—200 boxes bold grain were taken in at 20s per cwt.

Rice.—The public sales of soft grain have been large. 11,642 bags Necrancie Arracan chiefly sold at rather lower rates, viz., 8s 9d for fair quality slight weevily. The sound portion of 16,447 bags Bassein was taken in at 9s 6d. 1,609 bags good Moulmien realised 9s 6d. 2,083 bags Bengal were chiefly bought in above the value, from 13s 6d to 14s for good middling white. Privately the transactions have been upon a moderate scale, including fair Necrancie Arracan at 9s, short prompt, and good Rangoon at 9s 6d per cwt, usual conditions.

Imports and Deliveries of Rice to Jan. 21, with Stocks on hand.

Spice.—The public sales have passed off without change in prices. 78 cases nutmegs, by auction, realised 10d to 3s 1d for low small to superior bold brown quality. 18 cases mace chiefly sold at 1s 2d to 1s 7d; mouldy, &c., 11d to 1s. Some business has been done in pimento privately, on former terms. 1,220 packages Zanzibar cloves sold at 3⅞d; one lot, 4d; sea-damaged, 3⅜d to 3⅞d. 549 bags Singapore white pepper sold steadily at 5⅜d to 5⅞d. 1,916 bags Singapore black were partly disposed of at 3⅜d. 683 bags Penang were taken in at 3⅜d per lb for Trang. 301 bags rough Bengal ginger sold at 30s. 60 boxes cassia lignea, at 84s per cwt for middling quality.

Saltpetre.—No business has been done privately, and the market remains very very flat. 908 bags Bombay, offered by auction, were bought in at 32s per cwt; refraction 6¾ per cent.

Imports and Deliveries of Saltpeter to Jan. 21, with Stocks on hand.

Deliveries last week 266 tons.

Drysaltery Goods.—Gambier continues firm. 23s paid to arrive, 22s 9d to 23s 6d on the spot. Bengal turmeric has risen to 25s per cwt. 300 tons red Sanders wood, by auction, chiefly sold at 4*l* 17s 6d to 5*l* 2s 6d per ton.

Shellac.—This article remains steady.

Metals.—The markets are still quiet. Scotch pig iron last sold at 49s 6d to 49s 7½d per ton, mixed Nos. cash. Several contracts have been made in spelter on the spot and to arrive, at 18*l* 2s 6d to 18*l* 5s, and a shade over. Foreign tin remains inactive: Straits, 87*l* per ton cash. Copper and British rather lower.

Hemp.—Manilla is quiet this week. Petersburg clean has been steady, at the quotations.

Jute.—The public sales on Wednesday comprised 11,447 bales, of which a portion sold at rather lower rates, excepting some of the new crop at 22*l* 10s to 28*l* 15s. Desirable marks of the new crop obtained previous quotations. Others went cheaper: ordinary to fine, 13*l* to 25*l* 10s per ton.

Linseed is rather firmer. Calcutta, 58s to 59s; Bombay, 59s 6d. A cargo of Azoff seed, on the coast, has sold at 58s 3d per quarter.

Oils.—A limited business has been done in olive. Considerable sales of cocoa-nut are reported: Ceylon, 38*l*; Cochin, 39*l*. Palm continues scarce at 36*l* 10s per ton for fine Lagos. Sperm is held for much higher rates. The last sale effected was 50 tuns colonial at 72*l* per tun. Linseed oil is devoid of animation, selling at 32s 9d to 33s on the spot.

Digitized by Google

Rape is quiet: foreign refined, 45*l* 10s to 46*l*; brown, 41*l* 10s to 42*l* per ton.

PETROLEUM.—Refined, 2s 0½d to 2s 1½d per gallon; crude, 18*l* per tun.

TALLOW.—The market has shown quietude, with rather weaker prices towards the end of the week. New Petersburg Y.C., 41s 6d; March, 42s 3d to 42s 6d; October to December, 43s 3d to 43s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, January, 24.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market was rather quiet to-day, 137 casks 1,223 bags West India, 1,241 bags Bengal, and 1,631 bags Natal, sold at the previous value. 1,395 bags Madras were taken in at high prices. The week's business in West India amounts to 1,745 casks. Privately, 450 casks Cuba are reported at 30s per cwt.

COFFEE.—124 casks, 101 barrels and bags plantation Ceylon sold at full prices. 45 casks 621 bags native, at 69s to 69s 6d. 320 bags Jamaica, at 67s to 71s 6d. 38 cases 838 bags East India: Malabar, 71s 6d; Cochin, 80s; Singapore, 60s to 76s per cwt.

RICE.—10,035 bags Madras, by auction, about one-fourth part sold at 11s 3d; the remainder withdrawn at 12s per cwt.

SPICES.—252 bags pimento, offered by auction, sold at 2⅛d to 2¼d per lb.

GAMBIER.—1,210 bales, by auction, chiefly sold at 22s 6d to 23s per cwt.

OIL.—130 casks cocoa-nut, by auction, part sold: Ceylon, 39s; Sydney, 32s 9d to 36s; Cochin bought in at 40s. Of 314 casks palm oil, a small portion realised 36s 6d per cwt.

TALLOW.—446 casks Australian, by auction, sold at 37s to 41s 3d. 312 pipes 86 casks 200 barrels South American, only partly sold at 42s to 42s 3d per cwt, for fair quality in pipes.

ADDITIONAL NOTICES.

REFINED SUGAR.—There is no alteration worth noting either in British or foreign markets as respects refined sugar. 25 tons H. R. No. 2 were sold at 29s in barrels, and 50 tons of R. S. R. No. 1 at 29s 6d in barrels, f.o.b. in Holland.

GREEN FRUIT.—Market continues depressed. Some parcels oranges from St Michael, Terceira, Valencia, and Sicily, sold by Keeling and Hunt at public sale went from 1s to 2s per package lower. The price of lemons well supported; stock light. Barcelona nuts can be had on easier terms. Black Spanish without alteration. Para scarce.

DRY FRUIT.—The past week has been characterised by an utter dulness in the dried fruit market. Quotations unchanged.

ENGLISH WOOL.—The trade rules dull at present. Prices in favour of the buyer, though not sufficient to alter quotations.

SEEDS.—The seed trade during the week has been confined to small purchases for immediate wants. Red clover seed maintains its value, and the additional supplies are small.

COLONIAL WOOL.—The market firm with rather more inquiry.

FLAX.—Market quiet.

HEMP.—More business done during the week, both on the spot and forward delivery.

SILK.—The silk market rather less active this week, without any change in prices.

LEATHER AND HIDES.—The leather trade has again amounted to about an average during the past week. At Leadenhall on Tuesday the attendance of buyers was small and the transactions limited, but the supply was moderate, and prices unaltered. Good crop hides, 40 and 45 lbs, the lightest English butts, light English shoulders, bellies, and English horse hides were the articles in the shortest supply, and most in request.

METALS.—A continuance of quiet in all branches of our market has prevailed this week. Copper has become easier to buy, although transactions have not been much promoted by the change. Tin is neglected. Iron dull of sale, with prices favouring buyers. Lead and tin plates but little inquired for, whilst prices are unchanged.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	44	3
Fat by ditto	2	2
Yellow Russia	43	3
Melted stuff	32	6
Rough ditto	18	0
Greaves	18	0
Good dregs	7	0

METROPOLITAN CATTLE MARKET.

MONDAY, Jan. 23.—The total imports of foreign stock into London, last week, amounted to 5,695 head. In the corresponding week in 1864 we received 1,722; in 1863, 2,696; in 1862, 797; in 1861, 598; in 1860, 2,424; and in 1859, 1,873 head.

The supply of foreign stock in our market to-day was very moderate, and sales progressed steadily, at very full prices, to in some instances, a slight advance. The arrivals of beasts from our own grazing districts were moderately good, and in fair average condition. Good and prime breeds moved off freely, on rather higher terms. Otherwise, the beef trade ruled steady, at full prices. A few very superior Scots and crosses realised 5s 6d; but the general top figure was 5s 4d per 8 lbs.

We were very scantily supplied with sheep, but the quality of each breed was tolerably prime. The mutton trade was by no means active; nevertheless, Downs and half-breds realised more money—the extreme quotation being 6s 2d per 8 lbs. Clipped breeds sold at 4s 10d to 5s per 8 lbs. Long-wooled sheep were firm in price. Calves—the supply of which was limited—moved off steadily, at full quotations. There was a slow sale for pigs, at late currencies., viz., from 3s 4d to 4s 6d per 8 lbs.

SUPPLIES.

	Jan. 25, 1864.	Jan. 23, 1865.
Beasts	4270	4010
Sheep	14030	13980
Calves	96	234
Pigs	330	350

THURSDAY, Jan. 26.—The supply of beasts in our market to-day was moderate, and in fair average condition. Most breeds were in request at Monday's currency. The best Scots sold at 5s 2d per 8 lbs. With sheep we were scantily supplied. The mutton trade was steady at full prices. Downs and half-breds realised 5s 10d to 6s per 8 lbs. The show of calves was limited, and the veal trade ruled inactive on former terms, viz., from 4s 4d to 5s 6d per 8 lbs. Pigs commanded very little attention, at from 3s 4d to 4s 6d per 8 lbs whilst milch cows were very dull.

Per 8 lbs. to sink the offal.

HOP MARKET.

BOROUGH, Monday, Jan. 23.—Our market is firm, with a steady demand for every description of our own produce. Fine foreign command a ready sale at extreme prices, but second and inferior qualities, of which our present imports principally consist, are a shade easier. Mid and East Kents, 160s, 130s, 200s; Weald of Kents, 120s, 140s, 155s; Sussex, 116s, 135s, 145s; Yearlings, 110s, 126s, 140s.

FRIDAY, Jan. 27.—The trade for hops of good and fine quality rules firm, and previous quotations are well supported. For inferior produce, the demand is in a sluggish state, and prices have a drooping tendency.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Jan. 23.—The arrivals coastwise and by rail have been moderate, but rather more plentiful from France and Belgium. The following are this day's quotations:—Yorkshire Flukes, 100s to 130s; Yorkshire Regents, 80s to 90s; Yorkshire Rocks, 65s to 70s; Kent and Essex Regents, 75s to 90s; ditto Rocks, 60s to 70s; Perth, Forfar, and Fifeshire Regents, 60s to 65s; ditto, ditto Rocks, 55s to 60s; Belgian whites, 50s to 65s per ton.

FRIDAY, Jan. 27.—The trade for potatoes is slow, at 60s to 130s per ton.

HAY MARKETS.—THURSDAY, Jan. 26.

SMITHFIELD.—Meadow hay, 4*l* 10s to 5*l* 10s; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 12s per load. Trade quiet.

CUMBERLAND—Meadow hay, 4*l* 10s to 5*l* 10s; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 12s per load. A slow demand.

WHITECHAPEL.—Meadow hay, 4*l* 10s to 5*l* 10s; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 12s per load. Trade steady.

COAL MARKET.

FRIDAY, Jan. 27.—Wallsend, Haswell, 19s—Hetton, 19s—Harton, 16s 9d—Heugh Hall, 17s 9d—South Kelloe, 17s 9d—Tunstall, 16s 6d—North Pelton Gas, 14s. Ships at market, 47; sold 6; gas contracts, &c., 18—24 sold; unsold, 23; ships at sea, 55.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 27.—The East India sales in progress since Tuesday last are proceeding satisfactorily, as the attendance of home and foreign buyers is very good, and prices of all the better descriptions have slightly advanced on the closing rates of the preceding public sales in November last. The quantity to be offered will be about 15,000 bales, and the sales will be continued until Wednesday or Thursday next.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 14th of January, on 11,786 miles, to 570,570*l*, and for the corresponding week of last year, on 11,460 miles, to 540,471*l*, showing an increase of 326 miles, and of 30,099*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,287 miles, to 465,994*l*, and for the corresponding week of 1864, on 8,045 miles, to 440,016*l*, showing an increase of 242 miles, and 25,978*l* in the receipts.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Jan. 23.—In the share market to-day, both the transactions and the movements in the closing prices were few, and the latter were generally towards depression. In English railways, Great Northern (A stock) further advanced ½, Lancashire and Yorkshire relapsed ¼, and Great Western (Newport) declined 1, Great Eastern ½, Great Western (original) and Midland ¼ each, and North-Eastern (Berwick) a further ½. In colonial, Great Western of Canada (6 per cent. bonds) receded 2, East Indian, Delhi (stock), Punjaub, and Great Indian Peninsular ½ each, and ditto (shares of both descriptions) ¼ each. In foreign, Dutch-Rhenish and Great Luxembourg improved ⅛ each, and Western and North-Western of France declined ½. In British mines, East Bassett closed 1 lower. In foreign mines, Vallanzasca Gold receded ⅛.

TUESDAY, Jan. 24.—In the share market to-day, the tendency at the close was again slightly downwards, the dull tone being mitigated by a few instances of improvement in British and foreign railways, banks, foreign mines, and miscellaneous shares. In English railways, North-Western advanced ¼ and Metropolitan (new) ⅛; and Blackwall and Brighton declined ½ each, Manchester, Sheffield, &c. ½, Great Eastern a further ½, and North-Eastern (Berwick) a further ¼. In colonial, Grand Trunk of Canada (2nd preference) receded 2, ditto (1st preference) 1, ditto (stock), ditto (3rd preference), ditto (deferred), Bombay and Central India, and Great Southern of India ½ each, Buffalo and Lake Huron ¼, and Punjaub a further ½. In foreign, Namur and Liege improved ⅛; Dutch-Rhenish relapsed ⅛, and Lombardo-Venetian receded ⅛. In American, Atlantic and Great Western (all descriptions) receded 1 each, and Erie shares (paid up) ½. In British mines, East Caradon declined ½, and East Wheal Russell and Grenville ¼ each. In foreign mines, Vallanzasca Gold recovered 2; and Montes Aureos were fractionally lower.

WEDNESDAY, Jan. 25.—In the share market to-day, the amount of business was small, and the changes in the closing quotations were too few or too evenly balanced to affect the tone in any of the descriptions. In English railways, Manchester, Sheffield, &c., recovered ¼; Great Western (Hereford) and North Staffordshire improved ½ each, and Metropolitan receded ½. In colonial, Bombay and Central India, Eastern Bengal, and Punjaub recovered ½ each; and Delhi shares declined ⅛. In foreign, Bahia advanced ⅛, and Central Argentine and Namur and Liege (preference) ¼ each; and Pernambuco declined ½. In American, Virginia (6 per cent.) improved 7; and Atlantic and Great Western (New York section, of both descriptions) and ditto (Pennsylvania First Mortgage) further declined 1 each. In British mines, West Chiverton advanced 2½; and East Bassett and North Roskear declined 2 each, Great Laxey ½, and East Grenville ¼. In foreign mines, Vancouver Coal left off ½ lower, and Port Phillip ¼ lower.

THURSDAY, Jan. 26.—In the share market to-day, the business was again of small amount, and the few variations from yesterday's final quotations had no material effect on the tone. In English railways, North-Western and Midland improved ¼ each. In colonial, Great Indian Peninsular (new) improved ½, and Grand Trunk of Canada (4th preferance), and ditto (deferred) receded 1 each, and Delhi (shares) a further ½. In foreign, Great Luxembourg receded ⅛. In American securities and foreign mines, no movement occurred in the closing prices. In British mines, East Grenville recovered ⅛ and East Lovell improved ½.

FRIDAY, Jan. 27.—The railway market is inactive to-day, and with the exception of a rise of ¼ per cent. in Great Western, and a decline to the same extent in Caledonian, the principal stocks are quoted the same as yesterday

SAUCE.—LEA AND PERRINS' WORCESTERSHIRE SAUCE.

This delicious condiment, pronounced by connoisseurs is prepared solely by Lea and Perrins.

"THE ONLY GOOD SAUCE."

The public are respectfully cautioned against worthless imitations, and should see that Lea and Perrins' names are on wrapper, label, bottle, and stopper.

Ask for LEA AND PERRINS' SAUCE.

*** Sold wholesale and for export by the Proprietors Worcester; Messrs Crosse and Blackwell; Messrs Barclay and Sons, London; &c., &c., and by Grocers and Oilmen universally

THEATRE ROYAL, DRURY LANE.

Managers, Messrs Edmund Falconer and F. B. Chatterton. The Free List entirely suspended.

Re-appearance of Mr Phelps. Grand Morning Performance of the Pantomime on Wednesday and Saturday at Two o'clock.

On Monday, January 30th, and during the week, the performances will commence with Shakespere's play of HENRY THE EIGHTH, terminating with the Fall of Wolsey. Cardinal Wolsey, Mr Phelps, supported by Messrs Walter Lacy, H. Marston, E. Phelps, Barrett, Sinclair, Spencer, Fitzjames, &c.; Miss Atkinson, Mrs Zanderhoff, &c. Doors open at half-past six, commence at seven, and terminate at eleven.

Morning Performances of the Pantomime on Wednesday, and Saturday, of the next week. Children and Schools at reduced prices to the following parts of the Theatre:—Dress circle, first circle, and stalls, for morning performances only. The Grand Christmas Comic Pantomime, written by E. L. Blanchard, Esq., entitled, HOP O' MY THUMB. The gorgeously beautiful character of the decorations, inclusive of more than the usual amount of Scenical Surprises and Transformation Wonders, are ensured by the fact of their being entirely designed and for the most part executed by the celebrated artist, William Beverley, whose eminent services have been retained this Christmas exclusively for the Theatre Royal, Drury Lane. The general action of the Pantomime arranged by, and the whole produced under the direction of, Mr Robert Roxby. Characters in the opening:—Miss Lydia Thompson, Miss E. Falconer, Miss Hucspeth; Mr G. Belmore, Tom Matthews, Mr Fitzjames, Mr Meagreson, Mr G. Weston, Master Percy Roselle, &c. The Harlequinade will include the services of those popular pantomimists (forming a double company)—Harry Boleno and Mr C. Lauri, Clowns; Mr W. A. Barnes and Mr J. Morris, Pantaloons; Mr Cormack and Mr S. Saville, Harlequins; Mdme. Boleno and the Misses Gunnis, Columbines; and the talented One-legged Dancer, Signor Tescano, and Mdlle. Deteto, four years of age, who will introduce her celebrated imitations a la Perea Nena. The masks, devices, and dresses, from designs by the humorously renowned Dykwynkyn. The dances and action of the ballet arranged by Mr Cormack—Comic scenes, tricks, &c., invented by H. Boleno and Cormack. The music selected and arranged by Mr J. Barnard—Machinery by Mr J. Tucker and assistants—Gas effects by Mr J. Hinkley—Properties by Mr Needham and assistants—Dresses by Mr S. May and Mrs Lawler.—Box Office open from Ten till Five daily.

On Monday Morning, Jan. 30th, at Two o'clock, Mr Howard Glover's Grand Benefit Concert.

NEW THEATRE ROYAL ADELPHI.

Sole Proprietor and Manager, Mr B. Webster.

Miss Bateman in a new character.

On Monday, and during the week, THE IRISH TIGER. Messrs Stephenson, Eburne, Romer, Miss K. Kelly. (At 8) Sheridan Knowles admirable play of THE HUNCHBACK. Julia, Miss Bateman, supported by Messrs George Jordan, Swinbourne, Billington, Stuart, Ashley, Eburne, Romer, J. L. Toole, and Miss H. Simms. And DARK DOINGS IN THE CUPBOARD BY THE KNOTTING 'EM BROTHERS. Messrs J. L. Toole, P. Bedford, Mrs A. Mellon Commence at 7.

TEETH AND PAINLESS DENTISTRY.—Messrs LEWIN, MOSELY, and SONS, 30 Berners street, Oxford street, and 448 Strand (opposite Charing Cross Railway Station), established 1820, beg to direct attention to their method of supplying Artificial Teeth on a system of Painless Dentistry. These Teeth are cheaper, more natural, comfortable, and durable than any yet produced. They are self-adhesive, affording support to loose teeth, rendering unnecessary either wires or ligatures, require but one visit to fit, and are supplied at prices completely defying competition. Consultation free. Teeth from 5s. Sets, 5, 7, 10, and 15 Guineas, warranted. For the efficacy, utility, and success of this system, vide LANCET.

*** No connection with any one of the same name.

NO MORE GREY HAIR.—MELANOGENE, the superlative dye of DICQUEMARE, senior, Rouen, for instantaneously dyeing in any shade of colour the hair and the beard, without danger to the skin, and free from smell. This dye is superior to all that have been employed hitherto Manufactory at Rouen, Rue St Nicholas, 39; Depôt for London, Messrs HOVENDON and SONS', 5 Great Marlborough street, W., and 57 and 58 Crown street, Finsbury square, E.C.

COUNTRY AND TOWN Residences, Landed Estates, Investments, Hunting Seats, Fishing and Shooting Quarters, Manors, &c.—BEAL'S REGISTER of the above, published on the first of each month, forwarded per post, or may be had on application at his Offices, 209 Piccadilly, W. Particulars for insertion should be forwarded not later than the 28th of each month.

WOTHERSPOON and CO., Glasgow and London.

TO MERCHANTS AND SHIPPERS.
The increased demand for
DINNEFORD'S FLUID MAGNESIA
(for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer
Mr WHITE, 228 Piccadilly, London.
Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

NEW PATENT.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.
WHITE, MANUFACTURER, 228 Piccadilly London.

ANOTHER CURE OF COUGH BY DR LOCOCK'S PULMONIC WAFERS.—"8 Wilson terrace, St Leonard's street, Bromley, E.—I can myself testify that they have relieved me of a most severe cough, so bad that I was unable to lie down, and I shall do my best to recommend them.—WM. NICHOLAS." They give instant relief to asthma, consumption, coughs, colds, and all disorders of the breath, throat, and lungs. Price, 1s 1½d, 2s 9d, and 4s 6d per box. Sold by all druggists.

THE BRADFORD OLD BANK,
Limited.
Capital, £1,000,000.

DIRECTORS.

Alfred Harris, Esq., Chairman.

C. H. Dawson, Jun., Esq.	B. B. Popplewell, Esq.
W. E. Forster, Esq., M.P.	H. W. Ripley, Esq.
Henry Harris, Esq.	W. M. Selwyn, Esq.
John Jowitt, Esq.	H. W. Wickham, Esq., M.P.

Alfred Harris, jun., Esq., Managing Director.

Report of the Directors to the proprietors at their first annual general meeting held on Monday, Jan. 23, 1865:—

In meeting the shareholders for the first time, the directors have much pleasure in presenting a balance sheet, which they believe will be considered highly satisfactory.

The estimate which was formed of the future prospects of the bank, when the terms of its purchase from Messrs Harris and Co. were agreed upon, has been more than realised by the results of the year's working.

Consequent upon the distribution of shares among new connections, a large increase of business has flowed into the bank. The transactions of the customers of the late firm of Harris and Co. have also been on a more extended scale; and there has been a satisfactory increase in the number and amount of the deposit accounts in the bank.

It will be seen from the appended balance sheet that the net profits of the bank for the year, available for division, amount to £39,511 3s 1d:—viz., £17,004 9s 6d in the half-year ending June 30, and £22,506 13s 7d in that ending December 31.

The directors recommend that this sum be appropriated as follows:—

	£	s	d
In liquidation of preliminary expenses.....	554	17	9
In payment of a dividend of 25s per share on 14,670 shares, £10 paid	18,337	10	0
To reserved fund	15,510	0	0
Balance carried to next half-year.....	5,108	15	4
	39,511	3	1

The above-named dividend of 25s per share (which it is proposed to declare free of income tax), is at the rate of 12½ per cent. on £10 paid for the entire year; or 19¼ per cent. on a like sum for the time it has actually been paid up by the shareholders.

So much of the stability of a bank depends upon the possession of a reserved fund, that the directors feel no hesitation in recommending the amount of £15,510 as stated, to be appropriated for that purpose. There is already a sum of £5,490 standing to the credit of this account, arising from premiums on shares issued. The fund now, therefore, will stand £21,000.

The balance of profit, viz., £5,108 15s 4d, is carried forward to the next half-year's account.

The question of a site for new bank premises has occupied the serious attention of the Directors. It is found impossible to carry on with comfort and convenience to the public, or to the bank, the increased business in the present confined premises; and the Directors are making every effort to remedy this evil, though, as yet, no suitable site for new premises has been met with. This matter will continue to have the best attention of the Directors, until some satisfactory arrangement is made.

In accordance with clause 38 of the Deed of Settlement, the Directors are prepared to receive applications for a portion of the reserved shares, at a price of not less than £30 per share, including £10 paid thereon; the premium realised by the disposal of such shares to be placed to the credit of the reserved fund.

In conclusion, the Directors congratulate the shareholders on the result of the first year's working of the bank, and feel every reason to look forward to future years of continued prosperity. Their policy has been that of safe extension; every account offered has been carefully considered, and none have been entertained where any reasonable doubt of security was apparent. This policy they propose to continue, being convinced that a safe and legitimate business will be found more remunerative in the long run, than an unduly inflated one.

The three Directors who retire this year in accordance with the Company's Deed of Settlement, are C. H Dawson, jun., Esq., W. E. Forster, Esq., M.P., and A. Harris, Esq., who are eligible and are recommended for re-election.

ALFRED HARRIS, Chairman.
H. W. RIPLEY, Vice-Chairman.

BALANCE SHEET.

Balance in Barnett and Co.'s hands...	34,149	7	0
	1,091,322	19	11

I do hereby certify that the foregoing balance sheet contains all particulars required by the regulations of the Company, that I have examined the same with the accounts and vouchers relating thereto, and that the same exhibits a true and correct view of the Company's affairs. JOHN CAW, Auditor.

15th January, 1865.

The foregoing report and statements having been read to the meeting by the Managing Director, it was unanimously resolved:—

1. That the report of the Directors now read, be adopted and circulated among the proprietors, together with the proceedings of to-day's meeting.

2. That a dividend of 25s per share (clear of income tax) be declared, payable on the 1st of February.

3. That C. H. Dawson, jun., Esq.; W. E. Forster, Esq., M.P.; and Alfred Harris, Esq., who retire by rotation, be re-appointed Directors.

4. That Mr John Caw be elected Auditor for the current year.

5. That the thanks of the meeting be presented to the Chairman and the other Directors, for their valuable services during the past year.

ALFRED HARRIS, Chairman.

St George's Hall, Bradford, Jan. 23, 1865.

FIFTH REPORT OF THE

ALLIANCE BANK
(Limited).
Subscribed capital, £4,000,000.

At a General Meeting of the shareholders, held at the London Tavern, on Tuesday, the 24th January, 1865, the following report was presented:—

The Directors beg to submit to the shareholders a statement of the business of the bank for the half-year ending the 31st December last.

The gross profits, including £6,580 14s 9d brought forward from the previous half-year, amount to £185,896 17s 8d, which, after deducting current expenses, interest on current and deposit accounts, and rebate on bills discounted but not yet due, leaves a net balance of £66,731 19s 9d.

The numerous and extensive failures of mercantile houses during the last three months of the past year have pressed with special severity on this Company, and the Directors regret that the losses to be provided for on accounts now in liquidation will absorb the profits for the half-year, and a further sum of £61,737 11s 5d, which has been carried from the reserve fund to the profit and loss account.

In addition to these losses, the Directors think it their duty to state that there are transactions not yet matured in connection with a heavy account, which may possibly entail a large additional loss. The bank, however, holds securities, which it is hoped may be realised favourably; but whatever loss may arise will be dealt with separately, and written off the reserve fund.

Under these circumstances the declaration of a dividend cannot be recommended.

It is satisfactory to the Directors to be able to state that after a most careful scrutiny by themselves and the Auditors they have every reason to believe that the current business of the bank is in a sound condition, and they look forward with confidence to the future prosperity of the institution.

Of the 10,000 shares authorised by the extraordinary meeting in August last, to be issued at £20 per share premium, 9,766 have been applied for and allotted, and the amount of premium received thereon has, in accordance with the resolutions passed at that meeting, been added to the reserve fund.

The Directors have to record with regret the death of Mr De Castro, and the resignation of Mr G. P. Robinson, who has left England for India; thus causing two vacancies in the Direction.

THE ALLIANCE BANK, (Limited).

REPORT of the Directors of the Consolidated Bank (Limited), presented to the proprietors at the Half-yearly Meeting, held 24th January, 1865.

The Directors submit the statement of accounts and balance sheet of the Bank for the half-year ending 31st December, 1864.

During that period, the capital of the Company has been slightly increased by the sale of 593 shares, to make the total issue 150,000 shares, representing £600,000 paid up.

	£	s	d
The net profits of the bank during the half-year (after deducting current expenses, rebate of interest on bills not due, interest accrued to customers, income tax, and directors' remuneration, and making ample provision for bad and doubtful debts) amounted to	62,351	2	9
The balance left unappropriated on the 30th June was	6,976	6	20
The premium on shares sold	4,158	17	0
Making a total of	73,486	12	7

	£	s	d
From which it is proposed to carry to reserved surplus fund	15,000	0	0
And premium on shares	4,158	17	0
To declare a dividend for the half-year at the rate of 10 per cent. per annum, and a bonus of 3s per share (being an additional 7½ per cent. per annum) free of income tax	52,500	0	0
To carry forward to next account	1,827	15	7
	73,486	12	7

	£	s	d
The reserved surplus fund, which stood on the 30th June at	38,500	0	0
Will, by the addition of six months' interest	762	10	0
And the appropriations now recommended	19,158	17	0
Be increased to	58,421	7	0

This Meeting will be asked to confirm the election by the Board of Mr William Smith as a Director of the Bank, to supply the vacancy occasioned by the resignation of Mr Benjamin Wilson, in the month of August last.

Matthew Curtis, Thomas Fairbairn, Edward Ryley Langworthy, Ivie Mackie, John Pender, M.P., and James Aspinall Turner, Esqrs., are the Directors who retire by rotation; being eligible, they offer themselves for re-election.

According to the provisions of the Deed of Settlement the Auditors offer themselves for re-election by the shareholders at this Meeting.

J. P. HEYWOOD, Chairman.

THE DIRECTORS OF THE FINANCIAL CORPORATION (Limited)

are prepared to receive applications for the position of FINANCE MANAGER.—To a Gentleman possessing the necessary qualifications liberal terms will be given. Confidential communications to be addressed to C. Walford, Esq., Managing Director, 14 Leadenhall street, E.C.

THE LAND MORTGAGE BANK INDIA
(CREDIT FONCIER INDIEN) Limited.

Capital £2,000,000. In 100,000 Shares of £20 each.
Paid-up, £400,000.

Debenture issue of 1864, bearing 5 per cent. interest, payable half-yearly, redeemable at par within thirty years, by half-yearly drawings, and secured by the whole of the invested funds in India, which must always be equal to the amount of debentures current, by the uncalled-up capital of the bank, and by the entire assets of the Company.

Half the above issue of £500,000 having been subscribed for at £83 6s 8d per £100 bond, the Directors are prepared to receive applications for the balance, after deducting £100,000 reserved for India, at £87 for every £100 bond, at which price they will yield 5¾ per cent. interest, independently of the advantage to be derived from the redemption of the bonds at par by the half-yearly drawings, which on the average drawing amounts to an additional half per cent. The bonds bear coupons payable 1st January and 1st July in each year, and the first half-yearly drawing will take place on the 1st January, 1866.

Applications to be made at the offices of the Company, 17 Change alley, E.C., where all further information may be obtained.

THIRD HALF-YEARLY REPORT,

Presented at the general meeting held at the Baltic, South Sea House, Threadneedle street, on Monday, the 23rd January, 1865.

The Directors have now to report to the shareholders the result of the operations of the association for the half-year ending 31st December, 1864.

After deducting the current expenses of the half-year, and rebate of interest at the rate of 6 per cent. per annum, the Directors are enabled to recommend the payment of a dividend at the rate of 5 per cent., with a bonus at the rate of 10 per cent. per annum, free of income tax; there will then remain a balance of undivided profits of £40,063 8s 6d to be carried forward to next half-year.

The dividend and bonus together amount to £1 2s 6d per share on the old, 15s 9d on the new shares—henceforth the distinction between the old and the new shares will cease, the same amount (£15 per share) being now paid up on each description.

By the Articles of Association two Directors retire annually in January; in conformity with this regulation Messrs J. Borradaile and J. Walker go out of office, but, being eligible, offer themselves for re-election.

The auditors, Messrs John Ball and Richard B. Wade, also offer themselves for re-election.

First report of the Directors submitted to the Ordinary General Meeting of proprietors, at the London Tavern, on Monday, the 23rd January, 1865,

JOHN CHAPMAN, Esq., in the Chair.

"From the statement of accounts which the Directors have now the pleasure of submitting to the shareholders, comprising the operations of the united companies, from the 1st June to the 31st December last, it will be seen that after payment of the current expenses, allowing for rebate of interest on bills and loans not due, and making ample provision for all contingencies, there remains a balance of net profit amounting to £99,217 9s.

"The Directors recommend this sum to be appropriated as follows:—

	£	s	d
Dividend (free of income tax) of 10s per share	50,000	0	0
Income tax	1,250	0	0
Balance carried forward to next half-year	47,967	9	0
	99,217	9	0

"The accounts will in future be made up half-yearly—viz., to 30th June and 31st December.

"In accordance with the articles of association, the Directors appointed C. J. H. Allen, Esq., and John Young, Esq., as auditors, until the first ordinary meeting of proprietors, on whom the election of auditors will then devolve.

"Mr Allen and Mr Young are eligible for re-election.

"The dividend will be payable on and after the 30th instant."—By order,

W. C. WINTERBOTTOM, Secretary.

FIRST HALF-YEARLY REPORT of the WARRANT FINANCE COMPANY (Limited).

At a General Meeting of the shareholders, held at the London Tavern, on Tuesday, the 24th day of January, 1865 (A D. de Pass, Esq., Chairman, Wm. McAndrew, Esq., Deputy-Chairman), the following report was presented:—

The Directors have the pleasure to submit to the shareholders their report on the business of the Company for the first half-year of its operations.

After providing for every charge on the business up to the 31st ult., there remains a balance of profit of £13,773 6s 11d, out of which the Directors recommend the payment of a dividend of 7s 6d per share, equal to £7 10s per cent. per annum, free of income tax; this will leave £6,085 16s 11d to be carried forward.

It has been the first object of the Directors to maintain a strong financial position, during a time of great mercantile depression, by undertaking none but the soundest business, and steadfastly avoiding commitments for lengthened periods. Although this policy has comparatively restricted the business of the Company it has resulted in almost entire immunity from loss on transactions amounting, in the aggregate, to upwards of £900,000.

In the exercise of the power conferred on them by the Articles of Association, the Directors appointed Messrs Quilter, Ball, and Co. to audit the accounts now presented; and as the appointment of auditors for the ensuing year rests with the shareholders, Messrs Quilter, Ball, and Co. offer themselves for re-election.

AUDITORS' REPORT.

The accounts have been examined and audited, and the securities inspected by us, and we find them to be correct. QUILTER, BALL, and CO.

No. 3 Moorgate street, London, E.C., Jan. 11, 1865.

The Secretary having read the report and notice convening the meeting, the Chairman intimated that the seal of the Company had been affixed to the register of transfer.

It was resolved unanimously:—

1. That the report now read be received and adopted.
2. That the dividend of 7s 6d per share be paid to the shareholders on and after the 25th January, 1865.
3. That Messrs Quilter, Ball, and Co. be the Auditors of the Company, and that their remuneration be £105 per annum.
4. That the best thanks of the Meeting be given to the Directors and officers for the manner in which they have managed the affairs of the Company.

(Signed) A. D. DE PASS, Chairman.

AGENTS IN INDIA.

Messrs Gillanders, Arbuthnot, and Co., Calcutta.
Messrs Ewart, Latham, and Co., Bombay.

Report of the Directors to the First Ordinary General Meeting of Members, held at the London Tavern, Bishopsgate street, on Friday, the 27th January, 1865:—

The Directors beg to submit to the shareholders the following report, and the accounts audited to the 31st December, 1864:—

The gross profits from the commencement of the business in April last have amounted to £21,762 13s 2d which, after deducting expenses of management, rebate of interest on bills, and all other charges, and carrying 10 per cent. to the credit of preliminary expences and office furniture, leaves a balance of £16,975 18s 11d. Out of this sum the Directors have appropriated £706 3s to the payment of ad interim interest to 30th June last, at the rate of 8 per cent. per annum, and £3,298 12s 8d for dividend to 31st December, 1864, at the rate of 8 per cent. per annum, leaving the sum of £12,971 3s 3d to be carried forward to the next account.

The operations in India are upon a satisfactory basis, and are capable of considerable extension, but the commercial uncertainty which has existed during the last few months has induced the Directors to restrict business.

The closed accounts from thence for the past year have not yet been received, and they will therefore appear in the next statement.

The business which has been undertaken, otherwise than in connection with the East, has principally consisted in advances against the Deposit of Collateral Securities, besides which "The London Engineering and Iron Ship Building Company, Limited," has been successfully introduced for the object of taking over the business of Messrs Westwood, Baillie, and Co. The Borakai Tea Company, Limited, has also been brought forward by this Corporation.

As it is necesary that a clause in the Articles of Association should be altered to meet the regulations of the Stock Exchange, which require that Companies shall not invest in their own shares, notice of an Extraordinary Meeting will be given for the purpose of effecting that object, and at the same time of introducing clauses increasing the qualification of Directors, and giving additional powers to the Corporation for raising money on Debentures, and for other purposes.

KINAHAN'S LL WHISKY
v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d, at the retail houses in London; by the agents in the principal towns in England; or wholesale at 8 Great Windmill street, W. Observe the real seal pink lable, and cork branded "Kinahan's LL Whisky

NUNN'S MARSALA OR BRONTE
WINE, 25s per dozen, £7 4s per six dozen, £12 15s per quarter-cask. Rail paid to any station in England. This wine will be found of superior quality, is soft and old, and, though full flavoured, entirely free from heat or the slightest approach to acidity THOS. NUNN and SONS, Wine, Spirit, and Liqueur Merchants, 21 Lamb's Conduit street, W.C. Price lists on application Established 1801

DEANE'S TWO-HOLE BLACK PENS
which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exact y twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

CONSUMPTION, COUGHS, COLDS, ASTHMA BRONCHITIS, NEURALGIA, RHEUMATISM, SPASMS, &c.

CAUTION—"In Chancery."

CHLORODYNE.

VICE-CHANCELLOR WOOD stated that Dr J. Collis Browne was undoubtedly the Inventor of Chlorodyne. Eminent Hospital Physicians of London state that Dr J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr Browne's.—See TIMES, July 13, 1864. The Public, therefore, are cautioned against using any other than DR J. COLLIS BROWNE'S CHLORODYNE.

This Invaluable Remedy produces quiet refreshing sleep—relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretion of the body.

From J. M'Grigor Croft, M.D., M.R.C., Physician, London, late Staff Surgeon to H.M.F. "After prescribing Dr J. Collis Browne's Chlorodyne for the last three years, in severe cases of Neuralgia and Tic-Doloreux, I feel that I am in a position to testify to its valuable effects. Really in some cases it acted as a charm, when all other means had failed." No home should be without it. Sold in bottles, 2s 9d and 4s 6d. Sent free on receipt of stamps, by J. Davenport, 33 Great Russell street, W.C., Sole Manufacturer.

Observe particularly, none genuine without the words "Dr J. Collis Browne's Chlorodyne" on the Government stamp.

SECRETARY—John Henchman, Esq.

Offices—17 Duke street, Westminster.

The line authorised by the "Metropolitan and St John's Wood Railway Act, 1864," has been laid out for the purpose of affording to the residents of St John's wood, Belsize park, the Finchley road, Kilburn, Hampstead, and their vicinity the advantages of direct railway communication with the heart of the city of London, and with other parts of the metropolis.

An agreement has been entered into with the Metropolitan Railway Company to work and maintain the line, to provide engines, carriages, and plant of every description, and to defray all outgoings connected with the working, for 50 per cent. of the gross receipts.

The necessary steps have been taken to enable the Company to apply in the next Session of Parliament for powers to extend the line to a central part of Hampstead. The proposed station at Hampstead will be as near the surface and as easy of access as the existing stations on the Metropolitan Railway.

With regard to the anticipated profits, it is only necessary to point to the densely populated and rapidly growing district which the line will serve, and to the small capital required for its construction, which afford reasonable promise of its becoming soon a greater success than the Metropolitan Railway, whose shares, even in its now incomplete state, are at a considerable premium.

Arrangements have been made which will secure the completion of the line within the shortest possible time and the payment of interest at the rate of £5 per centum per annum on the amount of capital from time to time called up.

Applications for shares to be made to the Secretary or the brokers of the Company. A deposit of £1 on each share applied for must be paid to Messrs Herries, Farquhar, and Co., St James's street, or to Messrs Robarts, Lubbock, and Co., 15 Lombard street, previously to the application being sent in, and a further sum of £1 on allotment. Should no allotment be made the deposit will be repaid in full.

For further particulars reference should be made to the full advertisements in the daily papers of the 23rd inst., or to the prospectus.—By order,

JOHN HENCHMAN, Secretary.

Offices, 17 Duke street, Westminster, Jan., 1865.

METROPOLITAN AND ST JOHN'S WOOD RAILWAY COMPANY.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men as the safest, speediest and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other kind.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy.

Dr GRANVILLE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light-Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.

SOLE CONSIGNEES:
ANSAR, HARFORD, and CO., 77 Strand, London, W.C.

NOTICE.

COMMERCIAL HISTORY AND REVIEW OF 1864.

As part of an early Number of the Economist, *we shall issue a Supplement under the above title, containing a careful Digest of the leading Merchants' and Brokers' Circulars in the different branches of trade, Lists of New Companies, Returns of Prices, Accounts of the Banks of England and France, &c. The object of the Supplement being to place in possession of our readers a Commercial History of* 1864 *worthy of preservation and adapted for reference.*

In accordance with the suggestions of many subscribers, it is intended to publish the series of articles on the "Money Market for Men of Business" separately, carefully revised, and with a Preface.

The Investor's Manual *is now sold separately, price* 9*d stamped,* 8*d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price,* 6*d. In addition to the information formerly given, it is intended in the next number of the* Manual *to give such a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

FINANCE COMPANIES.

The public are much puzzled as to Finance Companies. In the spring they were considered as infallible sources of enormous profits. Their shares were at great premiums, though money was dear, and likely to be dearer. Now, when a period of enterprise seems to be beginning, their shares are low in comparison with other shares, and on the basis of the dividends lately announced. This time last year simple people stared at these companies as if they had discovered the philosopher's stone. Now, they stare at them with an uneasy suspicion, as though there may be something wrong and hidden after all.

It is not a very pleasant task writing upon these great companies. They resent censure, and a certain portion of the public resents their praise. And those who, like ourselves, have to say both good and evil are, as indeed has happened, apt to excite the dislike of the Companies and the dislike of their adversaries. There is, however, no option; it would be undue timidity in the Economist if it omitted to give a distinct opinion upon the present state of their peculiar success.

There is no wonder that the public are puzzled as to this trade, for it is in the nature of it somewhat of a *secret* trade. The accounts which have been published certainly do not, and in great part cannot and ought not, to state very accurately how the large sums set down to the credit of profit and loss have in fact been made. The nature of the business involves this. Roughly we may divide the business of Finance Companies thus:—

1st. The *large* brokerage, if we may use that phrase; the commission paid for the introduction of companies, the negotiation of large loans—the getting in fact of *great* sums of money in the market.

2ndly. The purchase of shares and stock either in loans and companies so introduced, or in others with a view to profit.

3rdly. The granting of loans at high interest on securities substantially good, but either not so realisable or so intelligible as to suit common bankers. A Finance Company dealing with permanent money, money sure not to be asked for during the period for which it is lent (and a Finance Company never ought to deal with any other), may take with propriety securities which cannot be turned into cash for considerable periods, and with a careful staff of managers they can look into the details of out of the way securities quite inscrutable to the ordinary banking and bill-broking mind. They can deal with difficulties of loans and difficulties of intellect that common money dealers cannot deal with.

But all these three kinds of business—the two first especially—are in their nature rather confidential and secret. High brokerage is a very dangerous matter to talk of. The person who paid it does not like to admit it, and the person to whom it is paid should not boast of it. It is sure to excite competition, and sure not to be pleasant to his customers. On this very matter, it came out somehow that the Land Securities Company had paid an introduction fee of 10,000*l* to the International Financial, and there was much dissatisfaction at its magnitude. No branch of finance business has given rise to more dissatisfaction than this, but there is none which is more legitimate. Among the multitude of undertakings, the public want a guide; and any Finance Company which carefully, faithfully, and wisely gives that guidance will succeed. If the Directors never bring out any Company which they do not themselves think really good,—if they are people who think right,—who think good Companies good and bad Companies bad,—that Company will be useful, it will obtain success, it will earn high fees. The function is most obviously liable to abuse in bad hands, but that does not hinder its being of excellent and now-a-days timely service in good hands. Some of the profits earned by Finance Companies in this and other ways have been called "preposterous," but, as has been observed in a very well-informed and able article in the *Edinburgh Review*, profits equally "preposterous" have been earned by private persons in the same sort of business, and the proof is the best proof—the "colossal fortunes" of individuals who do that business. The business of intro

Digitized by Google

duction, of bringing out new loans and companies, is a business of *warranty*, and those who have good names will always sell them, and as they are few, will always sell them well.

The *Edinburgh Review* justly observes further "that the "main object of the new system of investments is to *lend* money "abroad with a higher rate of interest than it can be lent at "home;" that a high rate of interest is not always the consequence of bad security, but sometimes also of "unknown "security." The business of a Finance Company is to *know* and to guide those who do not know.

The "large brokerage" business therefore, though rather secret, is very useful, and the same may be said of share dealing. The business of buying shares is like the business of buying indigo. The speculator in all markets used to be considered as a person who was pernicious because he caused fluctuations in price; and this really is the case with *bad* speculators, with speculators who ruin themselves. They speculate at a "high price," force it higher, and so do harm, besides being ruined by the infallible fall. But the good speculator buys at a low price and sells at a high price, and so equalises price by making both the fall less and the rise less than they would be without him. The principles are as good on the Stock Exchange as in Mincing lane; the judicious speculator is in both markets valuable.

But this business is peculiarly secret. The Chairman of the International very justly said that he could not tell that the Company were holders of any shares without affecting the market—without depreciating the property he wanted to sell. This part of the business cannot be told, any more than the high brokerages.

Even the third kind of business cannot be explained altogether. To the report of one of the inferior Companies, the auditors have appended this note:—"We have examined and "audited the accounts up to the 31st December, 1864, and "find them to be in accordance with the books of the Com-"pany, and duly substantiated by vouchers. We think it "right to observe that a large amount of the transactions on "which the profits have been calculated is still pending, and "as it is impossible to say what some of the securities held "in connection therewith may realise, we are of opinion that "the balance of profits exhibited by the accounts should be "cautiously dealt with." We can well understand the necessity for that sort of caution, and even in the great Companies which have the pick of this business, there must be many securities most likely right, but still pending, but not easily describable in a report or at a meeting of shareholders.

This necessary secrecy involves three conequences:—

1st. That the Board of Directors should be one of which the constitution almost secures implicit confidence. That confidence *must* be given. As we have shown, the business cannot be told; and the attempt, therefore, of little people to start little Finance Companies is merely mischievous. They cannot hope to get the confidence inseparable from an essentially confidential business. The public have to trust the Directors, and the public is justified in requiring not only good men, but known men.

We throw it out as a suggestion for consideration whether in all cases it would not be well to have frequent changes in the direction. We own we think a certain number of new names not unfrequently would give more confidence to the public than the incessant repetition of the same excellent names. There is no audit like that of a new active *objecting* director, and we should like to see in all these Companies a few of that sort.

2ndly. It should be known that their accounts are made up on a sound principle; and now, we are sorry to say, all we know, that not unnaturally perhaps, but most unfortunately, they are made up on a wrong principle. The Directors feel the delicacy of their position. They hold a mass of miscellaneous securities, and their profit depends on the valuation of those securities, and they like to be able to give a clear answer when they are asked the inevitable, the critical question, "How do you value your securities?" In all cases they now say that they value them "at the price of the day," and we boldly answer that no estimate of profit made so is worth the paper on which it is written. Public securities go up and down from a hundred causes, and a dealer in them who, while he still holds, reckons their depression as loss and their rise as profit, will one time account himself a pauper and then a millionaire. Sensible people will never attach much value to profit and loss accounts made up on that principle; all dividends, however good, will never raise the price of the shares proportionately, because they are declared on a faulty principle. Both the gains and the losses are paper figures; the profit may vanish if the shares be kept, and the loss may be evaded in the same manner. And not only can no *just* profit or loss account be so made up, but no *steady* one. The profits will one year be raised by general prosperity and rise in shares by what we call the "good luck of the "world;" the next it will be depressed by diffused bad causes,—by general ill luck.

This is not a new doctrine. We wrote the same on the 9th of May, 1863, when these Companies were being formed. We refer to the passage now partly because it shows we are not forging principles *after events*, and partly because it contains a suggestion for the future:—"Thirdly. There is great "danger that in such a business too high a dividend may be "easily declared. If we take the cost price of shares and "stock and the actual price, there will in sanguine times be a "great profit, while in declining times there will be a cor-"responding loss. The mere momentary rise in the price of "shares is no guide. At first, we believe, the Credit Mobilier "regarded it as a criterion, but now they have ceased to "regard it. We would venture to lay down as a rule that "no share unsold should ever be estimated at *more* than cost "price, and that the only credit to profit and loss should be "actual realised profits. If, however, there should be a like-"lihood that the price at which the shares will be sold will "be *less* than the cost price, there should be a debit to profit "and loss. Actual gains should be the source of dividend, "but we should not divide all of them. We may and should "anticipate future losses, but never future profits." At any rate, we are sure the present rule is utterly bad, and that the Directors must take the responsibility of valuing the shares at a proper and just value, and not publish a balance sheet full of fictitious gains and fictitious losses. This involves trust in the Directors; but, as we have shown, that confidence is the essence of the business,—these Companies had better be wound up if there is not such trust.

Thirdly. A large balance might always be carried on by these Companies. They cannot give the confidence they require without a steady dividend, and it is evident that while they make much in good times, they will make less, if anything, in bad times. High brokerages can only be made when loans are rife and Companies thick; share dealing is not profitable in a falling market; dealing in "difficult" securities is very difficult in stringent times. A large rest is necessary to a steady dividend, and without a steady dividend no Company can be liked.

Even with a steady dividend, these Companies probably will always feel the unfavourable consequences of the secret nature of their business—of the difficulties of publishing without losing it. In the spring, these Companies were thought to be better than Companies of ordinary *communicable* business. This idea was essentially unrealisable. But, with good Directors, good accounts, large rests, *and high principle*, these Companies may be very useful to the public and very profitable to themselves.

RUMOURS OF PEACE.

During the past week the public mind has been a good deal disturbed by vague rumours of the probability of an early, if not almost immediate, termination of the American conflict. The dread, rather than the wish, has in this instance, we think, been the fosterer, if not the father, to that thought. Fear is often more sanguine than Hope in the anticipations it is prone to form; and so many merchants are under engagements entered into, and hold produce purchased, under the idea that the war would last for at least a year or two longer, that they are naturally enough "tremblingly alive" to the slightest indications which appear to show that the very basis of their calculations may turn out to have been altogether a mistake. Large owners of cotton at half-a-crown a pound may be nervous at the bare possibility of a catastrophe which would reduce the value of the stocks one-half, and might entail something like ruin upon the weaker among them.

We believe that there is little real warrant for this *extreme* alarm, or for the expectation of any sudden or speedy change in the position of affairs. Of course it is undeniable that the prospects of the Confederates have scarcely ever looked so gloomy, nor the hopes and boasts of the Northerners been so justified by the success and real progress of their arms. The

Digitized by Google

masterly and daring march of Sherman across Georgia, his capture of Savannah, his reported and very probable intention of fighting his way up through the Carolinas to join Grant, and the great likelihood, in case of his success, of the capture of Richmond, all seem to intimate both that the Federals have at length found a really competent commander, and that another severe blow and heavy discouragement is hanging over the Confederate cause. Then, again, the last successes at Savannah and Wilmington have, it is believed, put an end to blockade-running on any extensive scale, and have thus cut off some of the warlike supplies of the Southerners, and far more of the comforts and luxuries of their daily life. The blockade, so long set at naught by daring adventurers, will now become really effective, and will add materially to the difficulties as well as to the hardships which the Secessionists have to endure. And, finally, there are sundry indications that the South is not quite as unanimous as it was; that ill-fortune has produced its natural result of ill-temper though not of discouragement; that a few senators are found to oppose the Government, and plenty of journalists to abuse it. It is even said that Mr Lincoln is endeavouring to take advantage of the Southerners in their extremity by tempting some of the States into separate negotiations, and that one or two of them have manifested a disposition to at least nibble at the bait.

All this may be perfectly true, and much of it is indisputable, but it does not warrant the inferences that have been drawn from it, nor make us fancy for one moment that an easy peace is probable. In the first place, these are few symptoms of actual *discouragement* among the Confederates. They are under a cloud; and the fortune of war has of late gone heavily against them. But they have still large armies in the field; they have still the ablest generals of the Republic in their ranks; the animosity of feeling and incompatibility of temper, which—far more than the Slave question or any distinct and specific grievance—lay at the root of this internecine strife, have been tenfold exacerbated and embittered by the wrongs and devastations and outrages they have endured from Federal armies, and are now, we fear, pretty nearly irreconcileable. And it must be remembered that though men *grow tired* of a war waged under ordinary conditions and for ordinary objects, and are willing, when weary of the toil or cost or danger of such a strife, to lay down their arms and make the best terms they can; yet the case is very different when men are fighting for independence of masters they at once hate and despise; when no terms can be obtained by peace, to which in their sight continued war would not be preferable; and when the ravages of the enemy have destroyed their property and left them destitute. Men will often avoid war in order to escape the risk of ruin; they will often terminate a war in order to prevent the consummation of inchoate ruin; but when the ruin is complete few men feel inclined to submit to or negotiate with the destroyer;—and in this unhappy war many men, originally prudent and moderate, have been made desperate.

Then, too, we must remember that all the leaders in the Southern Confederacy are men too deeply compromised to have any future at all, except what ultimate success may yield them; that they are heart and soul in the cause,—all ambitiously, some religiously, devoted to it; that they wield the resources of the State, and have vast powers under their amended Constitution; and that no one knows so well as they what these resources are when confined to defensive warfare. They have still ample food, and ample ammunition, and ample warlike stores of nearly every sort; and with these, as Frederick the Great used to say, war may be waged so long as an adult man remains. They may still enrol the able-bodied slaves in their ranks, and if they do this they may continue the war for ever; and we believe the feeling to be pretty general among them that they might as well emancipate the blacks themselves as suffer the Yankees to do it for them. Lastly, though numbers on both sides may be sick of the conflict,—though thousands in the North as well as in the South would be willing enough to end it, if terms of accommodation could be devised,—and though hundreds of thousands everywhere bitterly regret that it was ever entered upon;—yet, so far as we can learn, no Southerner is one whit inclined to ask for a peace on conditions which bring him or his State again under Northern rule, and no leading Federal is prepared to offer peace on the condition of accepting a dissolution of the Union. The original object of the war has not lost its original dearness to either of the combatants. Peace at the price of submission has no charms for the Confederates. Peace at the price of disruption has no charms for the Northerners. Both parties wish for peace, but neither is as yet disposed to pay the price at which alone it can be purchased. Both parties may be weary of the war, but both are a long way from that exhaustion which alone can compel them to forego it.

VISCOUNT AMBERLEY.

ALL Englishmen must regard the first political appearance of Lord Russell's eldest son as an event of some political interest. It is one perfectly legitimate result of the hereditary principle which has so strong a hold on English political and social life, that men who have done great public services to the country gain a vantage ground amongst the people not only for themselves but for their children;—that the sons of trusted leaders have themselves far easier access to public favour, far more chance of themselves becoming trusted leaders in their turn, than other men of equal character and even higher abilities. No doubt there is a set-off to this advantage in the undue expectations which the possession of a great name may tend to excite among thoughtless people; but, on the whole, the English nation is not exigeant, and gives very easy credit to men of good name and visibly good intentions, for the power as well as the will to serve them well. Almost every one will be desirous to draw a favourable augury from Viscount Amberley's speech at Leeds for his political prospects, and Liberals, at least, will see with pleasure that his political mind is at present even more fully occupied with the sins of commission and omission committed by the aristocracy and landed gentry against the working classes, than with the shortcomings of the working classes themselves,—with the dangers of narrow and exclusive tenets and imperious actions, than with the dangers of democratic ignorance and passion. It is natural and well that it should be so; and if his conceptions on the subject of Reform are a little vague and confused, and somewhat injured by that curious alternation of vehement youthful Radicalism with nascent Whig caution, which give a curious effect of "two voices" to a part of his speech, no one will be disposed to criticise too narrowly.

Lord Amberley speaks modestly of "his special historical "connection" with the subject of Reform, but we are not quite sure that this has been altogether favourable to his power of dealing with the subject. Mr Darwin has shown us how the hereditary principle operates to strengthen and exaggerate constitutional peculiarities of habit or organisation which, if they yield new power over the circumstances of the surrounding world, become a "natural advantage," tending to form and perpetuate a species, but if otherwise, tend on the contrary, and inevitably, to annihilation. Something of the same kind happens in special cases of rather artificial habits of thought, which have arisen from the exigencies of one set of circumstances, and have to be applied, in an even exaggerated form, to emergencies of quite a different kind. The Russell type of thought on Reform is of this nature. It is almost a constitutional peculiarity. It consists in a certain marked disposition to believe that all representative reform must go in the same groove with that of 1832, or else be a mockery,—in a deep-seated impression that the one glorious political privilege to which a Briton is heir, is absolute equality with the ten-pounders of the old Reform Act. The Russell theory of Reform tends to what we may call a diseased value for the mere *vote*, the *machinery* of representation, and a total disregard of the purpose for which that vote is given, the actual representation of the various English types of thought and opinions. It inspires an artificial appetite for "equality at the poll," and never thinks of the purpose for which alone equality at the poll is desirable,—equality in Parliament. This is like the secondary passion for money as the mere *instrument* of power or enjoyment, which the miser so soon contracts, and which so completely overpowers and obliterates the end for which money was originally desired. The Russell estimate of representative rights begins and ends with the *vote*. The vote is transfigured in the Russell imagination as the be-all and end-all of the representative system. This peculiarity is painfully visible in Lord Amberley, and we fear it may render his "historical connection" with the subject rather a disadvantage to him at the present crisis, when thinking Englishmen are desirous of making the Parliament a more true *representation*

Digitized by Google

of the English people, but are not very much concerned as to either equality or inequality at the poll, so long as a fairer representation of the mind and energy of England can be attained. Lord Amberley considered it, says the report of his speech, "the natural state of a free people to be in possession of votes, and, when any large body of that people was "not admitted to that privilege, he thought there ought to "be some strong and sufficient reason given for that deprivation." The imagination of the speaker never really got beyond the "votes." "The possession of votes" is the criterion of political humanity, just as one might say the possession of reason is the criterion of intellectual humanity. That was the idea natural to Lord Amberley's "historical connection" with the subject, and it runs through his whole speech. It does not even once occur to him that the people of England might be less perfectly represented,—that the representation of the people of England might in certain cases be wholly distorted,—by their abstract "possession of "votes," in case those votes are so accumulated as to ensure a vast number of repetitions of the same interest and the same ideas, and no image at all of the competing minorities of thought and action. We do not blame Lord Amberley for this bold and almost morbid concentration of attention on the vote, to the exclusion of the *purpose* of the vote. We believe, however, that the influences to which he owes this unfortunate inability to look beyond the machinery, will disqualify him for any great service in the next Reform movement, and trust that he will devote his youthful energy and kindly enthusiasms to subjects on which his imagination is less embarrassed by an unfortunate "historical connection" with fixed ideas.

MR MASSEY'S APPOINTMENT.

It would be scarcely just to criticise the India Office for filling up the vacancy left through the illness of Sir Charles Trevelyan by an appointment from this country. The reasons for and against that course happen for the moment to be so nicely balanced, that a Minister could hardly be expected to forego patronage so valuable when such forcible arguments could be adduced for continuing to exercise it. We are not inclined, however, to let the appointment pass without a comment, as if the selection of an English politician for the office were a mere incident in the regular system of Indian administration, and we therefore point out once more the mischiefs which may occur if a practice, originally intended to be the exception, is suffered to become the rule. As an exceptional measure intended to meet a temporary but urgent difficulty, the appointment of an English financier to reorganise and refill the Indian Treasury was no doubt judicious. It was necessary to attempt new and somewhat startling things, to make large reductions, to impose new taxes, and to simplify the entire system of account. The Indian officials were scarcely competent to that work. They were disinclined by the instinct of a bureaucracy to reductions in the civil departments and by habit of thought to economy in the military strength, while they were penetrated with the idea, now reviving again, that the limits of taxation in India had been reached. Above all they could not reform the system of accounts. It has been said, and we believe truly, that the last civilian appointed secretary to the Bank of Bengal, Mr Grey, a man who has since displayed real financial ability, did not when appointed know what an endorsement meant, and the story is a fair illustration of that ignorance of the machinery of finance which rendered all the ability of the service useless to the Treasury. It was necessary to send out a new man trained in another school, and the experiment, as we all know, turned out a great success. The reductions were found easy, the new taxation possible, the accounts susceptible of order and explanation. But when the work had been done, when order had been introduced and an equilibrium re-established, the Treasury should have been left once more to the departments, controlled only by the Viceroy. To keep on sending out Chancellors was to reintroduce disorder, for it is not in human nature for a man specially selected and invested with special powers to perform a special work not to wish to do something specially striking. He cannot help desiring to justify his own *raison d'etre*, and India offers so large and so tempting a field to the inventive mind, that merely to keep the machine going, and going easily, seems intolerably tedious. The financier feels like an inventor who wants to stop the work of a great factory till he has made some driving wheel a little more perfect. This is a very dangerous instinct in a country like India, where the Administration is changed every five years, where nothing therefore is ever allowed to harden into a habit, and where it is possible, by merely shifting taxes, to acquire at any time a local reputation for wisdom. The experiment of an income tax has in this way been foiled, the people never had time to educate themselves to the burden which they were constantly told should be removed next year. Again, the selection of an English official for the post almost of itself disqualifies all local officials. The civilians will not prepare themselves for an office they can never fill, and the regular work of the department is almost exclusively administrative. There is a Financial Commissionership or two which allows of originality, but apart from these an Indian officer of the revenue is in the position of an English Treasury clerk. The ideal Chancellor, a man who should combine financial ability with fullness of local knowledge, is, therefore, almost unattainable, to the great injury of the Empire. If the office were thrown open ambition would soon tempt the civilians to qualify themselves for it, and we should gradually obtain a school of men intimately familiar with the country, yet able to produce a reasonable budget, to look beyond service interests in the matter of reduction, and to tax without too much respect to Anglo-Indian tradition.

We objected, therefore, to the appointment of Sir Charles Trevelyan, and should object to the appointment of his successor but for one or two accidental circumstances. As a rule, the appointment of an English financier is an embarassment to the Viceroy, who ought to preside over finance as over every other department of the State; but at this moment India is ruled by a civilian Viceroy, a man of special qualities no doubt, but still entirely unversed in financial principles, and not entirely unfettered by the traditionary prejudices of his order. It is highly expedient that he should have by his side a man familiar with English politics, English ideas, and English methods of doing business, a man who looks at things without Indian predilections, and who possesses some of the audacity in reform which an Indian career seems so often to impair. Mr Maine, the legal member, is able and successful, but he is a jurist rather than an administrator, never held office in England, and is unfamiliar with business outside the limits of his studies. An official is required who is also a man of the world, not so much to control finance as to introduce an English atmosphere into the Council Chamber, to act on the Viceroy's mind as a cool breeze would upon his body. That is evidently the view of Sir Charles Wood, or he never would have selected Mr Massey for the appointment. Entirely unknown in finance, that gentleman is a capital man of business, accustomed to the most harassing of all work, making things clear to assemblies, and familiar with every kind of departmental labour. He will probably succeed, and there is a work before him which will allow in a singular degree of the use of his special aptitudes. He ought to be sent for three months to each of the minor Presidencies. The work of the Finance Minister has hitherto been done chiefly in Bengal, but if we mistake not, the greatest need for him now exists in Madras and Bombay. In the latter Presidency particularly, there is a state of things growing up which requires watchfulness, and perhaps reorganisation. A formal proposal by the Governor of a Presidency, himself a civilian, for an increase of salaries to the extent of half a million a year at one blow, is, to say the least of it, an unusual phenomenon. Even to make such a proposal is to spread discontent at its rejection over a whole Presidency, and to grant it would have involved fresh taxation. The true solution, if the need is not temporary,—which we doubt,—is to employ fewer men on better salaries; but Sir Bartle Frere and Bombay generally require looking after. Then in Madras there is a fierce resistance to reductions in the army, which needs fresh English energy to overcome, and abuses exist there which could scarcely spring up under the eye of the Central Government. Mr Massey will, if he is wise, find much to accomplish before he reaches Calcutta, and he is probably as well qualified to accomplish it as if he had proved himself competent to the financial post he is nominally to fill.

CURIOSITIES OF AUSTRIAN STATE ADMINISTRATION.

VIENNA, 14th January.

THIS complex of a dozen different countries, speaking half a dozen different languages, yclept Austria, affords more material for study, in a political and economical point of view, than any other State on the face of the globe. The diversity of national rights, interests, and feelings has given rise to complications, jealousies, and difficulties of the most bewildering kind. A stranger, in search of information, will feel greatly puzzled at the outset by the variety and, on many occasions, by the contradictory nature of what he hears, and must take considerable pains before what at first appears an almost incomprehensible chaos will assume shape and distinct features. As his powers of perception develop themselves, he will become aware of such anomalies and curiosities as cannot fail to give zest to his studies; he will feel a growing desire to acquaint himself with the structure of a Government wielding the destinies of this conglomeration of peoples, and ruling them in many respects so queerly and so clumsily. It would be impossible to enter here upon an examination of a crowd of questions connected with this subject, and I must confine myself to a few statements of facts which speak volumes, and ought to be looked after by those whose business it is to work out the weal of Austria.

The administration of the State may be called a bureaucratic institution, so thoroughly is everything carried on by rote and rule, so sedulously is every movement watched over and interfered with by an official staff of prodigious proportions; the number of functionaries, independent of 19,000 coastguard and excisemen, is estimated at 52,300, with salaries ranging from ten pounds to eight hundred pounds, the majority of whom, conscious that the State might do very well without them, appear to conclude that the State exists for *their* sake. Their employment, to a great extent, consists in controlling one another; the inadequacy of their salaries creating the necessity of guarding them against the temptations which poverty entails. Hence an elaborate mechanism of superintendence which is carried on through many steps up to the High Court of Control at Vienna, where it finally culminates. Some idea may be formed of the amount of unproductive labour bestowed on working this cumbrous machinery when we find this army of functionaries condemned to write letters consuming nearly double the amount of paper used by the whole of the rest of the community. Mr I. Ieiteles, in his most meritorious work on Austrian Public Economy, states that the official correspondence passing through the post office, free of postage, in 1861 weighed 35,000 hundredweight, consisting of 22 million of letters, against 20,520 hundredweight of private correspondence, independent of 60,961 hundredweight of official parcels against an equal amount of private parcels. It is very properly remarked that the letter-writing propensity of the officials, which has been vastly on the increase of late years, is intensified by their franking privilege, which causes the post office an annual loss of 4,400,000 florins. It is consolatory to hear that a resolute spirit of reform is manifesting itself among the younger generation of officials, but nothing effectual can be done before the representatives of the old system shall have gradually withdrawn from the scene. Fortunately, the attention of the Reichsrath will be given to improvements in this direction.

The Chambers of Commerce are electorial bodies, naming their deputies to the Provincial Landtag, which nominates the members of the Reichsrath. Everybody carrying on some trade, from a bank or manufactory down to a beer or greengrocer's shop, is a member of the Chamber of Commerce; and the real men of business, therefore, find themselves in so small a minority that they take but little interest in the proceedings of the Chamber. Squabbles about shop matters form the staple of the discussions, and there exists so much confusion in the subdivision of the members, that a question concerning the wine trade may happen to be referred to a committee of button makers.

The military and civil pensions paid by the Treasury reach the goodly sum of two millions sterling, and the taxes within the last 12 years have been nearly doubled; the consequence is an enormous increase in the cost of living, so that Vienna, from being one of the cheapest capitals of Europe, has become one of the dearest.

Dalmatia, which under Roman and Venetian rule was a rich and well-cultivated province, presents little now but barren hills and a dreary waste, and even the culture of the olive, which used to be its main produce, has been abandoned, because it is impossible to obtain legal possession of any property there, no books or documents of register for titles being in existence.

One gigantic social evil must now be touched upon, which, like a cancer, eats into the heart's blood of Austria, and is sapping the foundation of society, and that is the gambling system organised and fostered by the Government. Lotteries right and lotteries left, lotteries for the upper ten thousand, and lotteries for the million, in such numbers that Mr Ieiteles, in his book noticed before, calculates that the days of the year do not suffice to give one to each separate drawing of prizes. The State has set the example of contracting loans on the lottery principle, the sum borrowed being paid back at stated periods, prizes of large amounts being awarded to the lucky winners in lieu of interest. People lend their money without interest in the hope of drawing prizes, and hundreds of millions of florins, instead of fructifying in the hands of industry, are thus laid fallow. Many owners of private estates have, on the same plan and on the security of their property, been allowed to borrow many millions, the shares of all these loans being dabbled in on 'Change, so that, while the produce markets are deserted, the Stock Exchange is resorted to by all classes, and resounds with the clamour of jobbers and gamblers. Besides these lotteries there are a number of Government lottos, the tickets of which are sold all over the Empire and bring the State a net revenue of seven hundred thousand pounds sterling, in consideration of which the happiness of thousands of families is blighted, and a passion for gambling created ruinous to honest labour and industry. Oh! for the pen of Sydney Smith, to picture the misery of the wretched victims as they may be seen in the back streets of Vienna, sneaking away to their hungry families from the lotto shop which swallowed their last kreutzer!

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 2nd inst. The return for the previous week is added:—

DEBTOR.

	Feb. 2, 1865. f	c		Jan. 26, 1865. f	c

	1,286,065,500	33	.....	1,281,477,410	49

The changes in the situation of the Bank to-day compared with last week are insignificant:—a decline of 3,655,000f in the metallic reserve, an increase of nearly the same in the notes in circulation, and an augmentation of 8,696,000f in the discounts.

On the Bourse the great bankers and credit companies still abstain from encouraging speculative operations, and consequently a certain degree of discouragement is felt. The following are the quotations:—

	Jan. 26. f	c		Feb. 3. f	c

The last number of the ECONOMIST was seized at the Post Office by the Bureau de la Presse. Nevertheless, I am told, numerous copies have found their way to Paris,—a fact which proves how foolish seizures are. Indeed, as a rule, the numbers of the ECONOMIST which are taken into custody by the Bureau de la Presse people, are more read than those which are left free.

The Superior Council of Commerce met the other day to revise its resolutions relative to merchant shipping. On the suggestion of M. Behic, Minister of Commerce, it resolved, as I am informed, that foreign-built ships, instead of being admitted free of duty, as was at first proposed, shall pay 2f the ton,—which for a 1,000 ton ship will make 80*l* English. The duty is not high certainly, but what is the use of imposing it? It will not be a protection to French shipbuilders; it will yield nothing worth having to the revenue; and it will be purely and simply an unnecessary charge on the ship importer.

M. Wolowski, of the Institute, the celebrated Professor of Political Economy, who has taken a very active part in the controversy about Banks of Issue, publishes a remarkable article on the subject in the last number of the *Revue des Deux Mondes*. In it, as in his book *La Question des Banques*, and in the discussions of the Academy of Moral and Political Sciences, and of the Society of Political Economy, he insists that there ought to be only one Bank of Issue in a country, in order to secure the unity of paper circulation, which he thinks of the highest importance, which he holds to be a scientific progress on variety of issues, and to which he says all countries are tending. He also, in the course of his article, argues against the doctrine of fixity of interest, and in favour of the capital of a national bank being invested in Government stock. On the two latter points he will obtain general concurrence, but on the former he will encounter much opposition both from economists and practical men. At the conclusion of his article, M. Wolowski quotes the following letter written to him in December last by Mr Gladstone:—

"I find that it was on the 8th October that I wrote to you, expressing, among other points, my opinion that the distinction which you have drawn between the business of banking and the practice of issue was both a sound and a vital one, and that I was glad you had adopted the proper means, namely, by publication, of impressing your views upon the public. I may venture at this time to add that, with your views upon the Act of 1864, you will be glad to hear that, during the recent period of pressure, the government of the Bank of England has been courageously and wisely conducted, and that the essential principles of that statute may be considered to have gained in strength from our recent experience.—I have, &c., "W. GLADSTONE."

The Government publishes in the *Moniteur* correspondence from Mexico, in which are these facts:—The Commission of Finances had drawn up the ordinary budget amounting to 30,000,000 piastres, but it was considered advisable to increase it to 40,000,000,—a sum which the country is capable of paying. Another commission was continuing the investigation into the claims made by Frenchmen on the Mexican Government. The works of the railway from Vera Cruz to Mexico was being carried on with such activity, that there was no doubt that they would be completed before the period fixed. Progress was being made in the construction and repair of ordinary roads. The metrical system of weights and measures was about to be introduced, and schools of agriculture and commerce were to be established. The great extent of States being found inconvenient, the country was to be divided into districts of the size of French departments. The works in the mines had become more active. In November, a sum equal to 80,000*l* English was coined at the Mint of Guanajuato; a quantity of silver had arrived at Mexico for Pachuca; and about 480,000*l* were to be dispatched by English packets from Tampico.

The Government has just decided that communes and charitable establishments shall not be allowed to invest their funds in Credit Foncier bonds, though the law on the Credit Foncier says that they *may* be authorised to do so. They must consequently, the Minister says, continue to place them in 3 per cent. stock.

According to Customs returns issued to-day, the total value of the imports taken for consumption in France, in the year 1864, was 2,480,214,000f; in 1863, 2,426,379,000f; in 1862 2,198,555.000f; and 1861, 2,442,328,000f. The total value of the exports of French productions was, in 1864, 2,909,429,000f; in 1863, 2,642,559,000f; in 1862, 2,242,681,000f; and in 1861, 1,926,260,000f. In the imports, the principal articles were hides, skins and furs, silk, wool, sugar, timber, cotton, coal. Of cotton, the value was 315,606,000f in 1864, which was 53,000,000f more than in 1863, and 189,000,000f more than in 1862. In exports, the principal articles were silk, wool, and cotton tissues; articles in skin and leather; turnery, mercery, and buttons; ready-made clothes and linen, wines and brandies.

As to the precious metals, which are not included in the preceding totals, the value of them (comprising a small sum for copper and platina coin) was in imports, in 1864, 733,500,000f; in 1863, 532,603,000f; 1862, 536,418,000f; and 1861, 491,586,000f; and the exports were, in 1864, 655,406,000f; in 1863, 587,818,000f; 1862, 455,910,000f; and 1861, 502,480,000f.

M. de Lesseps, chairman of the Suez Canal Company, has addressed a letter to the Chambers of Commerce, announcing that water communication is now open between the Mediterranean and the Red Sea. "In a barque containing from twenty-five to thirty persons," says he, "we traversed in twenty-four hours the 94 miles which separate the two seas." He adds: "The moment has arrived at which commerce ought to prepare for the opening of the maritime canal to navigation;" and he requests the Chambers to send to Egypt delegates to examine, in conjunction with the Company, the means of effecting transports in barges and boats *en attendant* that opening.

Some few of the old shareholders of the Orleans Railway not having profited within the period fixed by the privilege of subscribing for the new shares, the Board of Directors has decided that the subscription shall be kept open for them to the 15th April next.

The Comptoir d'Escompte commenced yesterday payment of the dividend of 27f 50c for the first half of the year 1864-5.

The important company for building ships and steam-engines, formed under the name of Company des Chantiers et Ateliers de l'Ocean, by the amalgamation of M. Arman's and M. Norman's establishments at Bordeaux and Havre, has declared a dividend of 50f for 1864.

The market report is as follows:—

FLOUR.—At *Paris*, transactions are difficult, and yesterday the quotations were: choice, 46f 50c the sack of 150 kilogs; first quality, 45f; good, 44f; other sorts, 42f to 43f; six marks, current month and disposable, 46f; March and April, 46f 75f. Type Paris, the 101 kilogs, disposable, 28f 50c; March and April, 28f 75c to 29f.

WHEAT.—At *Paris*, yesterday, choice was 26f the sack of 120 kilogs; choice red, 25f 50c; first quality, 25f; other sorts, 24f 50c down to 23f.

COTTON.—At *Havre*, in week ending Friday, business was languid, owing to news from England, and prices declined. The sales were 4,033 bales and piculs, and the arrivals 3,034 bales. The closing quotations were 5f lower for United States, Brazils, French West India, Coconada, Bengal, and sawginned Dharwar, 10f lower for Jumel, and unchanged for Surat, Kurrachee, Tinnevelly, Madras, and China. Consequently low New Orleans was 325f the 50 kilogs; good ordinary Broach, 320f; ditto Madras and Tinnevelly, 205f; China, 175f; Jumel, 295f The stock was 60,035 bales (of which 590 bales were from the United States): at the same date last year it was 35,630 bales. This week, the market has been very dull in consequence of rumours of peace in America, and prices have fluctuated. Yesterday, American was 290f; Madras, 170f and 175f; Bengal, 120f; Kurrachee, 105f; China, 150f to 155f, and for delivery 140f.

COFFEE.—At *Havre*, in the week ending Friday, business was animated: 100 sacks Hayti, 83f the 50 kilogs in bond; 300 ditto ditto, for delivery, 83f; 900 Cape, disposable, 86f 50c; 200 Gonaives, for delivery, 89f; 1,800 Rio, unwashed, disposable, 74f 50c to 80f; 2,482 ditto, for delivery, 75f 50c to 79f 50c; 120 Rio, washed, for delivery, 105f; 108 Santos, 80f to 83f; 400 Bahia, 81f; 550 Costa Rica, 88f to 94f; 285 Malabar, 88f to 91f; 92 ditto *tries*, 61f. By auction, some damaged Port-au-Prince, Cape, and Rio were sold. The arrivals were about 1,250 sacks and 50 casks. This week, Rio, 83f 25c, and 85f in bond; Bahia, 81f; Hayti, 83f and 75f; Gonaives, 89f; Mysore, 85f to 88f; Malabar, 74f to 87f; Costa Rica (high duty), 92f; Guatemala, bad taste, 61f to 62f. At *Nantes*, last week, some Reunion, *feve ronde*, 150f the 50 kilogs, duty paid; 3,600 sacks Santos at Belle Isle, waiting for orders, taken for Hamburg at about 79f in bond. No sales this week. At *Bordeaux*, last week, 3,400 sacks Port-au-Prince, for delivery, and 4,400 Costa Rica, disposable, at prices kept secret; 928 bags Mysore, 114f; 195 Rio, washed, 100f; 100 ditto, 110f; 108 ditto, 108f; 120 ditto, 106f; 108 ditto, 90f 50c; 80 ditto, not washed, 105f; 525 Mysore, 120f; 170 Bahia, 94f; 35 Mocha, 152f 50c to 155f; 110 Salem, 132f 50c. Nothing done this week. At *Marseilles*, last week, prices were firm, and the sales were 300 sacks Port-au-Prince; for delivery, 85f; 1,600 Bahia, 63f; 4,400 Rio, for delivery, 75f; 1,000 bags Mysore, in store, 100f. This week, holders demand higher prices, but no transactions are recorded.

SUGAR.—At *Havre*, in the week ending Friday, business was animated, and the tendency of prices was downwards. The sales were 780 casks Havana, at 32f and 30f, No. 12, the 50 kilogs, in bond; 300 canisters Java, 29f, No. 12; by auction, 792 Havana, damaged, were disposed, of at 25f to 33f 50c. The arrivals were 825 sacks. This week, Havana, 30f 50c, No. 12, in bond. At *Nantes*, last week, 3,200 sacks

Digitized by Google

Reunion, 53f, bonne quatrieme; 800 in disembarkation, on sample, 53f 25c; and 136, 55f; about 500 casks French West India, 50f and 51f; 14,615 sacks Mauritius, 30f 50c for No. 12½ of Holland, floating conditions; 1,797 baskets Java, at prices not stated, but about equal to those of Reunion. This week, Reunion on sample, 57f, equal to 53f, bonne quatrieme; and at 60f. The cargo of Havana of the Russian ship Brasileira, now at Falmouth, has been taken at prices not stated. At *Bordeaux*, last week, 7,540 sacks Mauritius, for delivery, 53f 50c, bonne quatrieme. This week, Havana, 31f 50c, No. 12; French West India usine, 63f. At *Marseilles* last week, 277 casks French India, bonne quatrieme of Havre, 33f; 606 casks Havana, by French ship, 32f 50c, No. 12. This week, Reunion, for delivery, 53f, bonne quatrieme of Nantes.

HIDES.—At *Havre*, in the week ending Friday, business was active: 3,100 dry La Plata, at 80f for light to 102f 50c the 50 kilogs; 6,700 salted ditto saladeros ox, 60f to 61f; cow, 46f to 48f 25c; 4,192 ditto ditto mataderos ox, 48f to 52f 50c; cow, 41f 25c to 42f; 700 Uruguay salted ox, 56f 50c; 4,950 ditto ditto cow, out of which 2,000 at 47f, and the remainder 43f to 45f; 5,000 dry Rio Grande, at prices kept secret; 11,300 ditto, salted ox, 52f to 55f; cow, 43f 75c to 46f 50c; 1,450 Valparaiso salted ox, 52f; cow, 43f 75c to 46f 50c; 3,000 Pernambuco salted, for delivery, 45f. In skins, 500 horse, Monte Video salted, 42f 50c; 3 bales kid, La Plata, 12f 50c a dozen. The arrivals were, 7,420 hides. This week, Uruguay cow, 43f 50c to 48f; Rio Grande, 46f 50c; Valparaiso salted cow, 46f; Monte Video ditto ditto, 43f 50c; New York salted ox, 40f.

INDIGO.—At *Havre*, in the week ending Friday, business was insignificant: 2 chests Bengal, at prices kept secret. The arrivals were 12 chests from England. This week, Bengal at a premium of 25c, Guatemala at prices kept secret. At *Bordeaux*, last week, sales were rather active: 90 chests Bengal, 26 Kurpah, 22 Madras; but without improvement in prices. This week, Kurpah and Madras at prices not stated.

WOOL.—At *Havre*, in the week ending Friday, the sales were 90 bales La Plata unwashed, 1f 62½c to 2f 45c the kilog; 39 bales washed, 3f. The arrivals were 37 bales. This week, Buenos Ayres unwashed at prices kept secret; Monte Video washed, 2f 85c; ditto unwashed, 202f 50c the 100 kilogs.

TALLOW.—At *Havre*, in the week ending Friday, business was somewhat animated: 510 casks La Plata, disposable, in the port, at 48f 50c to 50f the 50 kilogs; 130 ditto, for delivery, at 49f. The arrivals were 1,408 casks from New York. This week, La Plata, superior, 50f 50c; and ordinary, 50f. At *Paris*, yesterday, the 100 kilogs, octroi duty included, were 104f 20c.

SPIRITS.—At *Paris*, yesterday, 3-6, first quality, disposable, was 51f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 73f; beet-root, first quality, 90 deg., 66f.

Correspondence.

THE ALLIANCE AND CONSOLIDATED BANKS.

TO THE EDITOR OF THE ECONOMIST

SIR,—Your article in last week's impression on the London and Westminster, Consolidated, and Alliance Banks, though remarkable in the main for its good sense and fairness, in one or two points calls for some remark, and I trust you will give a small space in your next number for this letter.

In reference to the large amount of interest paid by the Alliance Bank, I would observe, that it is reasonable to assume that they paid on a much larger amount of deposits during the six months than was shown in the balance sheet; and were obliged, from the peculiar position in which the bank was placed, to keep large funds in hand, at more than ordinary cost.

It should be noted also that no correct estimate of the rate per cent. paid by the Union Bank can be made, until the amount under acceptance is separated from the cash deposits.

The Consolidated Bank, as regards its business, cannot be classed as a *new* bank, it having been formed by the fusion of Messrs Hankey and Co., Heywood and Co., (two of the oldest private banks in London), and the Bank of Manchester, a joint stock bank of many years standing:—some five or six of the partners in the old firms becoming directors in the new bank, and thus giving it a Board of experienced bankers to direct it; therefore, to compare the Alliance Bank with the Consolidated is manifestly unfair.—I am Sir, your obedient servant,

AN ALLIANCE BANK SHAREHOLDER.

[With respect to the allegation in the above letter that the Alliance Bank paid interest during the half-year on a much higher amount of deposits than it possessed on the 31st December, it is to be observed that their aggregate liabilities both of acceptances and deposits are almost *the same* at the 31st December as at the 30th June. Considering the nature of the last autumn, we could not *assume* that the Directors had increased their acceptances. If they did, they ought to explain it.—ED. ECON.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Right Honourable the Lords of the Committee of Privy Council for Trade have received, from the Secretary of State for Foreign Affairs, a copy of a Greek Royal Decree, assimilating, with certain exceptions, the Customs' Tariff of the Ionian Islands to that which is now in force in Greece. The following are the exceptions maintained by the decree in question:—Export duties on currants and oils, 18 per cent. ad valorem. Export duties on wines, 6 per cent. ad valorem. Avelanedes (valonia), exported from Corfu, 6 per cent. ad valorem. Soap, exported from Zante, 8 per cent. ad valorem. Native produce and manufactures exported, 1½ per cent. ad valorem. The existing import duties on wines and spirits transported from one island to another are maintained. It is not permitted to import salt from the islands into the ports of Continental Greece.

An account of the importations and exportations of bullion and specie registered in the week ended February 1, 1865:—

Gold imported into the United Kingdom.

The Secretary of State has decided that the new British dollar for China shall have a milled and not a lettered edge. It is found that to place a lettered edge upon the dollar would require a complicated and expensive addition to the coining presses, which would be very difficult to work and liable to disorder. At present it is uncertain whether any of the dollar will be coined here for shipment. Captain Kinder and staff will most probably leave England by the mail, and arrive at Hong Kong about the end of June.

Subjoined are the traffic returns of some of the American railways for December:—

	Miles Open.	1864. dols.	1863. dols.	Increase. dols.
Atlantic and Great Western	322	357,556	200,936	56,620

		40,242
3. Railway-borne coal exported coastwise or to foreign parts, or the coast	2,721	
Ditto by rail beyond districts	...	
Ditto by canal ditto	306	
		3,027
4. Sea-borne coal brought into port and exported in same ships		3,557
Total quantity of coal conveyed beyond limits of coal duty district during January, 1865		68,441
Ditto January, 1864		77,436
Decrease		8,995

The *Shipping Gazette* reports the state of the freight market as follows:—The tonnage loading on the berth for India, China, and the Cape of Good Hope is 41,700 tons, and that for Australia and New Zealand 42,800 tons. Medium-size vessels continue in request, but there is a full supply of large tonnage. Coal freights to the East are well maintained. Several vessels have been taken up this week for coals to the West Coast of South America.

The following returns show the state of the note circulation of the United Kingdom during the four weeks ending Jan. 7, 1865, compared with the previous month:—

	Dec. 10, 1864.	Jan. 7, 1865.	Increase.	Decrease.
	£	£	£	£
Bank of England	19806138	19571118	...	235029
Private Banks	3058541	2959367	...	90174
Joint Stock Banks	2754143	2737440	...	16703
Total in England	25618822	25267925	...	350897
Scotland	4626796	4325591	...	301205
Ireland	5872705	5661026	...	211679
United Kingdom	36118323	35254542	...	863781

And as compared with the month ending the 9th of Jan., 1864, the above returns show a decrease of 752,149*l* in the circulation of notes in England, and a decrease of 731,103*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks the following is the state of the circulation:—The English private banks are below their fixed issue 1,553,419*l*, the English joint stock banks are below their fixed issue 488,917*l*,—total below fixed issue in England 1,742,336*l*: the Scotch banks are above their fixed issue 1,576,320*l*; the Irish banks are below their fixed issue 693,468*l*. The average stock of bullion held by the Bank of England in both departments during the month ending the 4th Jan. was 14,116,259*l*, being an increase of 162,742*l* as compared with the previous month, and an increase of 3,284*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month:—Gold and silver held by the Scotch banks, 2,378,119*l*; gold and silver held by the Irish banks, 2,216,413*l*; total 4,594,532*l*; being a decrease of 99,451*l* as compared with the previous return, and an increase of 236,655*l* when compared with the corresponding period of last year.

The following is the portion of Mr F. M. Page's circular, showing the Export of Specie to the East, through Alexandria, in 1863 and 1864:—

	1864. £	1863. £
Sundry	8,748	2,823
Alexandria	6,047,254	5,291,100
Aden	244,861	159,689
Ceylon	79,632	116,921
Bombay	10,113,473	10,618,501
Madras	978,197	503,771
Calcutta	3,681,092	899,169
Singapore	965,780	796,501
China	2,199,156	3,076,364
Total	24,318,189	21,455,844

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 1st day of February, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,384,365	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,734,365
		Silver Bullion	...
	28,384,365		28,384,365

BANKING DEPARTMENT.

	£		
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	11,023,211
Rest	3,514,283	Other Securities	18,920,772
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	5,541,452	Notes	7,852,315
Other Deposits	14,447,994	Gold and Silver Coin	726,859
Seven Day and other Bills	466,428		
	38,523,157		38,523,157

Dated the 2nd February 1865.

V. MILLER, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,998,478	Securities	30,040,983
Public Deposits	5,541,452	Coin and Bullion	14,461,224
Private Deposits	14,447,994		
	40,987,924		44,502,207

The balance of Assets above Liabilities being 3,514,283*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£383,684
An INCREASE of Public Deposits of	704 653
A DECREASE of Other Deposits of	105,939
No change in Government Securities.	
An INCREASE of Other Securities of	867,525
An INCREASE of Bullion of	144,009
An INCREASE of Rest of	29,136
A DECREASE of Reserve of	242,026

The increased demand for money consequent upon the reduction of the Bank rate accounts for the diminution in the reserve. On the other hand, the absence of any withdrawals of gold for export, and the ordinary influx of sovereigns from the provinces at this time of the year, have caused an augmentation in the bullion. A rather considerable increase is shown in the other securities.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding date with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	20 785,015	21,427,554	20,709,154	21,162,626	20,998,478
Public deposits	3 740 512	5,788,441	5 351,617	6,748,867	5,541,452
Other deposits	10 583,727	14,179 917	13,352,278	13,372,981	14,447,994
Government securities	11,538,652	11,301,802	10 602,879	11,124,584	11,023,211
Other securities	14,590,176	17,435 550	19,297,374	20,214,750	18,920,772

Coin and bullion	12,799,624	15,956,903	13,692,136	13,303,243	14,461,224
Bank rate of discount	5 p. c.	2½ p. c.	5 p. c.	8 p. c.	5 p. c.
Price of Consols	91¾	93½	92⅞	90⅝	89½
Average price of wheat	70s 11d	60s 2d	47s 11d	40s 8d	38s 6d
Exchange on Paris (short)	25 5 10	25 12½ 20	25 17½ 25	25 25 35	25 15 20
— Amsterdam ditto	11 16 16½	11 16 16¾	11 14½ 15	11 17½ 17¾	11 14 15
— Hamburg (3 months)	13 5¾ 5¾	13 7 7⅛	13 7 7⅛	13 7⅛ 8⅛	13 7 7⅛

In the corresponding week of 1855, the Aberdeen Ministry had resigned. Sir De Lacy Evans had received the thanks of the House to the British army in the Crimea, at his place in the House of Commons.

In 1862, the death of 200 men had resulted from the falling-in of the shaft of the Hartley Colliery in Northumberland. A meeting had been held in Manchester to protest against the Indian protective duties of 10 per cent. on cotton goods and 5 per cent. on yarns. 1,600,000*l* Victoria 6 per Cent. debentures had been subscribed for, at prices between 102*l* 16s and 102*l* 16s 6d. Sales of stock by the English public were depressing the Government funds, notwithstanding the abundance of money. The opening of the French Chambers had taken place, and the French 4½ per Cent. conversion scheme of M. Fould was under discussion.

In 1863, the Russian conscription in Poland had caused the outbreak of the Polish insurrection. The rate of discount in London had been advanced to 5 per cent.

In 1864, the Austrian and Prussian armies had crossed the Eyder into Schleswig. The King of Denmark had left for the army. The Danes had evacuated the Kronneworke, and were retiring along the whole line of the Eyder. Sweden had protested at Vienna against the decision of the two great German Powers to occupy Schleswig. A severe engagement had taken place, in which the Danes had been repulsed. An embargo had been placed on all German shipping in Danish ports. The Prussians had been repulsed with some loss in an attack on Misunde. The Polish insurrection was on the increase in the Government of Lublin. Some advantages had been obtained by the Spanish troops in San Domingo. The French had gained a decisive victory over the Mexicans at Morelia. In America, preparations were being made for a spring campaign against Richmond. The Maryland Legislature had nominated Mr Lincoln for the Presidency. The news of the first engagement of the Danish war had caused considerable dulness on the Stock Exchange.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 4,006,449*l*; in 1862, a deficiency of 3,255,633*l*; in 1863, a deficiency of 5,945,076*l*; and in 1864, a deficiency of 6,841,769*l*. In 1865, the deficiency is 4,472,778*l*.

Digitized by Google

DISCOUNT AND MONEY MARKET.—The inquiry for money was quiet in the early part of the week, but to-day there has been an increased demand to meet the payments falling due on the 4th of the month, the engagements on this occasion being exceptionally heavy. At the Bank, however, the applications were on a moderate scale. In the open market, few transactions have taken place below 5 per cent., even for the best paper. An impression, however, appears to prevail that there will be increased ease next week. The following are the current charges for paper of various dates :—

30 to 60 days	5 per cent.
3 months	5 per cent.
4 months	5¼ per cent.
6 months—Bank bills	5¼ per cent.
6 months—Trade ditto	5½ per cent.

On the Stock Exchange money has been more wanted, partly owing to the general demand and partly from the payment of 230,000*l* into the Bank on account of Cpae debentures. A large proportion of the advances lately granted by the Bank also fell due to-day. Loans on Government securities have consequently been charged from 4½ to 5 per cent.

The following are the rates of interest allowed on deposits :—

Joint Stock Banks	*4 per cent.
Discount houses at call	4 per cent.
Do. with seven days' notice	4¼ per cent.
Do. fourteen days	4½ per cent.

* At the London and Westminster 3 per cent. only on sums below 500*l*.

There were no gold operations to-day at the Bank. Yesterday, a sum of about 42,000*l* was sent in.

The Stock Exchange Committee have appointed Thursday, 2d February, a special settling day in the shares of Hewett and Co. (Limited)—no quotation asked for—for transactions entered into on and after 24th September last.

The Committee have further allowed the new debentures of the Cape of Good Hope Government to be officially quoted; and the shares of the Fairbairn Engineering Company to be quoted in the daily lists instead of the twice a-week lists.

Applications were received at the Bank of England on Wednesday last, for 300,000*l* Government bills on India. The proportions allotted were—on Calcutta, 162,700*l*; on Bombay, 120,000*l*; and on Madras, 22,000*l*. The minimum price was 1s 11¼d per rupee on Calcutta and Madras, and 1s 11⅜d on Bombay. Tenderson Calcutta and Madras, at 1s 11⅜d receive about 27 per cent., and on Bombay at 1s 11⅜d, about 41 per cent. Above these prices applicants receive in full.

The return from the Bank of France this week, rather unfavourable, the following being the changes :—

	£
INCREASE.	
Bills discounted	340,000
Circulation	165,000
Current accounts	173,000
DECREASE.	
Bullion	143,000
Advances	20,000
Treasury balance	120,000

Annexed are the current rates of discount in the chief cities of the Continent, showing a decline in Frankfort and Amsterdam :—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	4½	4½
Vienna	5	5
Berlin	5	4¾
Frankfort	4	4
Amsterdam	4½	4½
Turin	6	6
Brussels	5	4
Madrid	9	...
Hamburg	...	4
St Petersburg	6½ 3 mths' bills.	8
—	7 6 —	...

ENGLISH FUNDS.—Consols have been heavy throughout the week, owing partly to realisations by the public, and partly to the increased demand for money. The closing prices on Friday last was 89¾ to 89⅞ for the account, whence a gradual decline took place to 89⅜; the market then showed a little less weakness, and the final price this afternoon was 89⅝ to 89½. For money, the last quotation was 89⅝, buyers. Reduced and New 3 per Cents. left off at 88½ to 88⅝, and India 5 per Cents. at 103⅜ to 103½, or a half per cent. lower than last week.

India bonds and Exchequer bills exhibit no material alteration, the former closing at 10s to 15s premium, and the latter par to 4s premium.

The subjoined notification has been issued by the Bank of England :—

Bank of England, Feb. 1, 1865.

Notice is hereby given, that in order to prepare the dividends due on the 5th of April, 1865, the balances of the several accounts in the following funds will be struck on the night of Wednesday, the 1st March, 1865, viz. :—New 3*l* per cent. annuities, reduced 3*l* per cent. annuities, annuities for 30 years, annuities for terms of years, India 4*l* per cent. stock. On Thursday, the 2nd March, the above-named funds will be transferable without the dividend due on the 5th April next.

Bank Stock.—Shut, Wednesday, 15th March, 1865. Open—Thursday, 6th April, 1865.

FOREIGN STOCKS.—In the foreign market, the chief fluctuations have been in Turkish Consolidés, which at one period advanced to 54, on the reported reorganisation of the internal debt of the Empire. A reaction subsequently took place, which was hastened by a telegram to-day that the negotiations for this project had been at least temporarily suspended. The final price this evening was 52⅛ to 52⅜. The news of the capture of Fort Fisher has caused a decline in Confederate bonds to 54 to 56. Spanish Passive and Certificates show no recovery from the fall of last week. Peruvian stocks were at one time dull, on the expected outbreak of further hostilities with Spain, but afterwards rallied. Italian Five per Cents. are firmer, on the success of the new loan.

Italian scrip left off at par to ¼ premium; Montevidean, 5 premium; Egyptian, 1¾ to 2¼ premium; and Danubian Principalities, par.

The Italian loan of 8,000,000*l* has been entirely placed, about 2,500,000*l* here and the rest abroad. It is also stated that a large amount has been already paid in full. The able manner in which this has been conducted reflects great credit on the capacity and sound judgment of the contractors.

The closing quotations of French Three per Cent. rentes on the Paris Bourse this evening was 67f 15c, showing a rise of an eighth compared with yesterday, but a slight decline from last week.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day :—

CONSOLS.

	Money xd. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills.

RAILWAYS AND OTHER SHARES.—The railway market this week has shown increased buoyancy, and in several of the leading stocks an improvement has occurred, especially in Lancashire and Yorkshire, London and North-Western, Great Western, South-Western, North-Eastern descriptions, Great Northern, and Caledonian. On the other hand, a decline has taken place in Midland, notwithstanding the increased dividend announced, and in South-Eastern. Metropolitan remains without change. Business generally in this department continues limited.

In the colonial market, Indian guaranteed stocks have been in demand and higher, while Canadian were rather dull. Foreign shares are well supported, particularly the French railways, Dutch-Rhenish, and South Austrian and Lombardo-Venetian.

The new City of Milan Improvements shares have again

Digitized by Google

been actively dealt in, but the price at one period declined to 3⅛ premium. A rally afterwards took place to 3½ to 3¾.

In the joint stock bank market the principle feature is a rise in Imperial Ottoman. There has been no material change in London and County shares to-day, notwithstanding the very favourable character of the late meeting.

International Financial shares closed this afternoon at 2 to 2¼ premium, ex div.; General Credit, 2⅞ to 3⅛ prem.; and Credit Foncier and Mobilier of England, which have been in good demand, at 3¾ to 43 prem.

Subjoined is our usual list of the closing prices of the principal railway shares on last Friday and this day:—

RAILWAYS.	Closing prices last Friday.	Closing prices this day.
Bristol and Exeter	91 2	...

FOREIGN EXCHANGES.—The rates continue to show no material variation, but the general tendency is towards flatness.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—We have several arrivals of gold to report this week; they comprise:—The Etna, from New York, with 27,000*l*; the New York, from New York, with 6,000*l*; the Asia, from Boston, with 22,500*l*; the Atrato, from West Indies, with 81,000*l*; the Monarch, from Melbourne, with 104,000*l*; the Star of Peace, from Melbourne, with 44,000*l*; the Lincolnshire, from Melbourne, with 35,500*l*; the Omar Pasha, from Melbourne, with 17,000*l*; the Royal Dane, from Melbourne, with 8,000*l*—making a total of 345,000*l*. The demand for export has been sufficiently active to absorb this amount, with the exception of 78,000*l*, which has been sent into the Bank. The Tasmanian has taken 13,000*l* to the West Indies.

Silver.—The Atrato has brought about 100,000*l* from the West Indies, and the bars have realised the same price as those by the previous packet, viz.:—Fine, 61⅜d per oz standard; Dore, 61⅛d per oz standard. There is not much demand at present for India from this market; transactions have, however, taken place for shipment at Marseilles, at 61⅛d per oz standard. The demand for Holland has absorbed all the silver offering here, at 61⅜d per oz. standard.

Mexican Dollars.—A large amount of this coin was expected to arrive by the Atrato; this vessel. however, only brought about 20,000*l*, a very considerable sum having been kept back at Tampico for shipment by the French steamer. Under these circumstances, the fall in price which was anticipated has not taken place; and those brought by the packet, together with a portion of the recent arrivals, have been sold at 60⅜d per oz. The Pera has taken about 60,000*l* to the East.

Exchange on India for drafts by the banks at 60 days' sight remains as last week, viz., Calcutta and Madras, 1s 11⅛d; Bombay, 1s 11¼d. The Council drafts sold yesterday realised lower quotations, applications at 1s 11¼d on Bombay receiving 41 per cent., and on Calcutta and Madras at 1s 11⅜d, 27 per cent.

India Government loan notes are a shade easier, and we quote them—109 to 110 for 5½ per Cents., 101 to 102 for 5 per Cents., and 89 to 91 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto, fine, 77s 9½d per oz std; ditto, refinable, 77s 11d per oz std, last price; Spanish doubloons, 74s 6d to 75s per oz nominal; South American ditto, 73s 6d to 73s 9d per oz; United States gold coin, 76s 3½d per oz, last price. Silver—Bar silver, 5s 1⅜d to 5s 1½d per oz std; bar silver, containing 5 grains gold, 5s 1⅜d per oz std; Mexican dollars, 5s 0⅜d per oz, last price; five-franc pieces, 4s 11½d per oz, none here. Quicksilver, 8*l* per bottle; discount 3 per cent.

The amount of specie that will be taken by the outgoing steamer with the India and China mails to-morrow is 90,781*l*, chiefly in silver for China and the Straits.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The directors of the Unity Joint Stock Bank have issued a circular, in which they set forth their views with respect to the course of conduct pursued by the liquidators; and state their proposals for legally effecting a dissolution of the Company.

The adjourned meeting of the creditors of Mr James Lunham, trading as Messrs James Lunham and Co., was held on Tuesday last. The liabilities were placed at 165,000*l*, and the assets at 78,000*l*. A composition of 9s 6d in the pound was offered, payable by instalments at one, three, five, eight, and ten months. The estate is to be liquidated under the supervision of Mr Bird, of Messrs Coleman, Turquand, and Co.'s, assisted by a committee of creditors.

Creditors of the Plantation Company of Western India (Limited) are required to send the particulars of their claims to the official liquidator by the 4th February, the 10th having been appointed by Vice-Chancellor Stuart for adjudicating upon them.

Mr Arthur Cooper, of the firm of Cooper Brothers and Co., has been appointed by Vice-Chancellor Kindersley official liquidator of the Xerex Wine Shipping Company (Limited).

Mr Frederick Winney has been appointed official liquidator of the Darjeeling Brewery Company (Limited), creditors of which are required to send in their claims by the 17th of May.

Formal notice has been given that a petition for the winding up of the General Rolling Stock Company (Limited) is to be heard before Vice-Chancellor Stuart on the 10th inst.

PUBLIC COMPANIES.—The meeting of the Anglo-Italian Bank took place on Monday, when the directors' report was adopted.

The report of the directors of the Eastern Bengal Jute Manufacturing Company (Limited), recommending a dividend of 10 per cent. per annum, was unanimously adopted at a meeting held on Monday last.

The Hull Joint Stock Timber Company (Limited) has been formed with the object of taking over the business of Messrs Charles Heaven and Co., who possess a large timber trade in the ports of Hull and West Hartlepool. The capital is 120,000*l* in 12,000 shares of 10*l* each, of which it is not expected more than 5*l* per share will be called.

The proposed dividend of the Midland Railway will be at the rate of 7¾ per cent. per annum, against 7 per cent. in the corresponding half-year of 1864.

The meeting of the shareholders in the Humber Iron Works and Ship-building Company (Limited) was held on Wednesday, when resolutions were unanimously passed adopting the report of the directors, and authorising the purchase of the Canada Works at Birkenhead, and a reconstruction of the Company.

It is said that the Contract Corporation have made arrangements with Messrs Watson and Overend, contractors, for these gentlemen to join the board with the acquisition of their business. The dividend to be recommended at the forthcoming half-yearly meeting will be at the rate of 10 per cent. per annum.

The directors of the Bristol and Exeter Railway have resolved to recommend a dividend for the half-year ended the 31st of December last, at the rate of 5½ per cent. per annum, leaving an available balance of 4,900*l*.

The Lancashire and Yorkshire Railway directors have decided on recommending a dividend for the half-year at the rate of 6 per cent. per annum.

At the half-yearly meeting of the London and County Bank held on Thursday, W. Nicol, M.P., in the chair, the report of directors stated that, after making provisions for all charges, and for bad and doubtful debts, and presenting a gratuity to each officer, the net profits for the half-year amount 126,431*l* 17s 4d, which, with 21,726*l* 16s 2d brought forward from last account, gave the sum of 148,158*l* 13s 6d as available for distribution. The directors recommended the payment of the usual dividend of 6 per cent. for the half-year, together with a bonus of 12 per cent., making 18 per cent. for the six months, or at the rate of 36 per cent. per annum, leaving 18,629*l* 12s 3d to be carried to the profit and loss new account. The report was adopted, and the dividend declared as recommended.

The South-Eastern Banking Company's report, for presentation at the half-yearly meeting, was issued on Thursday. The

Digitized by Google

accounts show a gross profit of 14,117*l*, and, after deducting expenses, &c., there remains 4,845*l*. A dividend is recommended at the rate 6*l* per cent. per annum, free of income tax. It is also proposed to hold an extraordinary meeting for the purpose of authorising the alteration of the name of the company to the "Counties Joint Stock Bank," and to increase the capital by the issue of new shares of 25*l* each.

The Gas Products Utilising Company (Limited) held its first meeting on the 2nd inst., Mr A. A. Croll in the chair, when the report and balance sheet presented to the meeting were adopted, and resolutions unanimously passed that 1,000*l* should be carried to a reserve fund; that a dividend at the rate of 10 per cent. per annum, free of income tax, be declared; and that the balance of 539*l* 10s 10d be carried forward to the next half-year.

In accordance with a resolution passed at the general meeting of the shareholders of the Ocean Marine Insurance Company, the board of direction has been increased by the addition of the following gentlemen :—Mr John Gilchrist (director of the Commercial Banking Company of Sydney in London), Mr W. E. Gledstanes (Messrs Gledstanes and Co.), Mr R. F. Remington (Messrs Crawford, Colvin, and Co.), and Mr. Henry W. Segelcke (Messrs Hartsman and Co.)

The report of the London Tavern Company, issued previously to the meeting on the 6th instant, includes operations for the nine months ending the 31st of December. The net profit is stated at 4,029*l*; which, added to the 686*l* brought from the last account, leaves a sum of 4,715*l* at the disposal of the Company. The directors propose a dividend at the rate of 10 per cent. per annum, together with a bonus of 1s per share, free of income tax, which will leave 106*l* to be carried to the next account.

The proposed dividend of the London and Blackwall Railway is at 4⅛ per cent. per annum, against 4 per cent. in the corresponding half-year of 1864.

The report of the North-Western Bank (Limited), late Messrs Moss and Co., of Liverpool, shows the result of the operations from the commencement on the 18th of April last to the 31st of December, 1864. The net profits, after payment of all preliminary expenses, and after making provision for bad and doubtful debts, represent the sum of 24,251*l*. It has been arranged to appropriate this total as follows :—To dividend at the rate of 10 per cent. per annum (free of income tax) on 54,000 shares at 6s 3d per share, 16,875*l*; to the reserve fund, 7,000*l*; and to profit and loss account, balance carried forward, 340*l*.

The report of the Thames and Mersey Marine Insurance Company (Limited) recommends a payment of 6s per share, free of income tax, being 2s per share dividend, or at the rate of 10 per cent. per annum, and 4s per share bonus, making in all 20 per cent. per annum on the paid-up capital of the Company

The General Credit and Finance Company of London have published their report. The directors recommend that an additional dividend of 10s per share, free of income tax, be now declared, amounting to 125,000*l*, and making, with the 2s paid in August, a total dividend of 12s for the year, or at the rate of 15 per cent. on the whole capital of 1,000,000*l*.

The report of the Manchester and County Bank for the half-year recommends a dividend of 12s per share, being a little more than at the rate of 8½ per cent. on the capital.

The report of the Provincial Banking Corporation announces that the amalgamation of the Bank of Wales with this corporation is upon equal terms, and takes effect from the 1st of January instant. The directors recommend the payment of a dividend at the rate of 5 per cent. per annum, which will absorb 2,344*l*, leaving a disposable balance of 776*l*. It is not proposed to make a call at present.

The report of the Mediterranean Extension Telegraph Company recommends the payment of a dividend at the rate of 8 per cent. per annum on the preference shares, subject to income tax, being the usual dividend, and 5s per share, equal to 5 per cent. per annum on the original capital, free of income tax.

The directors of the Merchant Shipping Company have declared an *interim* dividend at the rate of 6 per cent. per annum.

The proposed dividend of the Great Southern and Western (Ireland) is at 4½ per cent. per annum against the same rate in the corresponding half-year.

The first report of the York Street (Belfast) Flax Spinning Company recommends payment of a dividend of 6s per share, free of income tax, being equal to 10 per cent. per annum on the paid-up capital, 3,000*l*.

The Telegraph to India Company having received the half-yearly payment of 1,250*l* from the Telegraph Construction and Maintenance Company for the rental of the Company's line in Egypt to the 31st of December, recommend that a dividend at the rate of 5 per cent. per annum, free of income tax, be paid to the shareholders for that period, on and after the 15th inst.

Arrangements have been made for the purchase of the shares and bonds of the Royal Danish Railway Company (South Schleswig Company) at par. A meeting has been convened preparatory to a meeting at Flensburg on the 4th of March, and a report or circular will be forthwith issued.

At a meeting of the directors of the Electric and International Telegraph Company, held on the 27th ult., it was resolved to recommend to the proprietors, at the general meeting to be held on Friday next, to confirm a dividend of 4 per per cent. for the last half-year.

The Australian Agricultural Company announce a dividend of 5s per share, payable on the 14th instant.

The British India Tea Company have declared an *ad interim* dividend at the rate of 8 per cent. on 14*l* per share capital called up for the six months ending the 31st December.

The report of the Marine Investment Company, to be submitted at the first annual general meeting on Monday next, states that there will be a dividend of 10 per cent. free of income tax, in addition to the 5 per cent. already paid.

At the half-yearly meeting of the City of London Brewery Company, held on Wednesday, Sir James Duke, M.P., presiding, a further sum of 31,432*l* 10s, in addition to the *ad interim* dividend paid in August last,—22,500*l*,—was now divided, making together 9½ per cent. for the year. The gross profit on the working of the business for the past year was stated to amount to 64,469*l* 16s 5d. Ten per cent. of the net profit was added to the reserve fund.

The report of the Fore Street Warehouse Company (Limited), presented to-day, stated that the net profits have been 23,232*l* 12s 9d. A dividend at the rate of 10 per cent. per annum was declared.

The proprietors of the National Bank held their annual general meeting on Tuesday last. The report showed a sum of 104,009*l* 4s 10d net profits. A dividend at the rate of 8 per cent. per annum was declared, with a bonus of 16s per share.

The half-yearly meeting of the Joint Stock Discount Company took place on Tuesday, when the directors' report, recommending a dividend at the rate of 6 per cent. per annum, was adopted.

At the meeting of the London and South-Western Bank, held on Tuesday last, a dividend of 6 per cent. per annum, free of income tax, was declared.

A meeting of the London, Hamburg, and Continental Exchange Bank was held on the 31st ult. The directors' report, which was adopted, stated that the gross profits of the fourteen months of its existence amounted to 24,745*l*. The petition by a shareholder to wind up the Company was withdrawn.

At the first ordinary meeting of the London and Glasgow Engineering Iron Ship-Building Company, held on Tuesday, an interim distribution of 6s 6d per share, equal to 6 per cent. per annum, was declared.

At the meeting of the Ocean Marine Insurance Company, held on Monday, the usual dividend of 5s, and a bonus of 1*l*, per share, both free of income tax, were declared.

A dividend for the half-year, at the rate of 6 per cent. per annum, was declared at the meeting of the English, Scottish, and Australian Chartered Bank, held on Monday last.

At a meeting of the Bank of Egypt this afternoon, the proposed dividend at the rate of 10 per cent. per annum was declared, together with a bonus of 5s per share.

The Merchant Shipping Company have presented the shareholders with a brief account of the manner in which their ships have been employed during the last six months. The interim dividend will be at the rate of 6 per cent.

The prospectus of the London and Provincial Mortgage Bank of England (Limited), with a capital of 200,000*l*, in 8,000 shares of 25*l* each, has been issued. The Company proposes

Digitized by Google

to afford increased facilities for the transfer of freehold and every description of landed property.

The Registered Land Company (Limited) has been started for the purpose of facilitating the negotiations of titles to landed estates, under the provisions of the Land Registration Act. The proposed capital is 1,000,000*l*. The first issue will be 500,000*l* in 25,000 shares of 20*l* each.

MISCELLANEOUS.—The Land Mortgage Bank of India (Limited) have notified that half of the debenture issue of 1864 for 500,000*l*, bearing 5 per cent. interest, and redeemable at par within thirty years by half-yearly drawings, having been subscribed for at 83*l* 6s 8d per 100*l* bond, the Directors are prepared to receive applications for the balance, after deducting 100,000*l* reserved for India, at 87*l* for every 100*l* bond, at which price they will yield 5¾ per cent. interest, independently of the advantage, estimated at ½ per cent., to be derived from the redemption of the bonds at par.

The following announcements have been made relative to Spanish American securities:—

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is rather more than 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 423 per mark, and the short exchange on London is 13.3¾ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 1-10th per cent. dearer in Hamburg than in London.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended January 28, 1865:—

	Quantities Sold. qrs bush	Average Price. s d
Wheat	72,510 5	38 6
Barley	71,913 2	29 0
Oats	7,804 5	19 3

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria, cap. 14:—

Corresponding week in	Quantities Sold. Wheat.	Barley.	Oats.	Average Prices. Wheat.	Barley.	Oats.
	qrs bsh	qrs bsh	qrs bsh	s d	s d	s d
1861	59,711 0	63,324 1	12,879 4	56 7	40 7	23 1
1862	56,008 0	65,914 3	16,4 2 7	60 3	36 8	21 10
1863	65,8?8 1	71,670 2	14,347 7	48 4	35 8	20 9
1864	94,495 7	73,444 1	13,741 2	41 3	32 5	18 9

Annexed is a list of the towns from which no returns are now made:—Cheshire—Congleton, Macclesfield, Stockport. Lancashire—Blackburn, Bury, Rochdale. Derby—Chesterfield. Nottingham — Mansfield, Retford. Leicester — Loughborough, Hinckley, Lutterworth. Northampton—Peterborough, Daventry, Wellingborough, Kettering. Warwickshire—Warwick, Stratford-on-Avon. Worcester—Bromsgrove, Kidderminster, Stourbridge, Evesham. Gloucester—Cheltenham, Dursley, North Leach, Stroud. Somersetshire—Somerset, Shepton Mallet, Wellington, Wivelscombe. Monmouthshire—Newport. Devonshire—Oakhampton, Tiverton, Honiton. Cornwall—Falmouth, Callington, Liskeard, St Columb. Dorsetshire—Poole. Hampshire Christchurch. Rutland — Oakham. Hereford — Leominster, Hereford, Kingston. Surrey — Croydon, Kingston, Dorking. Essex—Chipping Ongar, Saffron Walden, Braintree. Kent—Chatham and Rochester, Dover, Gravesend, Ashford. Sussex—Brighton, East Grinstead, Battle, Arundel, Hastings, Midhurst, Shoreham. Bedford—Leighton Buzzard, Luton. Berkshire—Abingdon, Maidenhead, Newbury, Wallingford. Bucks — Buckingham, High Wycombe, Newport Pagnel. Oxfordshire—Banbury, Henley, Witney, Chipping Norton. Cambridge—Newmarket. Norfolk—Swaffham. Lincolnshire—Barton-on-Humber, Bourne, Grantham, Grimsby, Horncastle, Market Raisen, Caistor, Alford, Holbeck, Long Sutton. York—Barnsley, Bedale, Bradford, Doncaster, Knaresborough, Pickering, Richmond, Ripon, Selby, Skipton, Thirsk, Rotherham, Otley, Thorne. Cumberland—Wigton, Maryport, Workington. Wales—Brecon, Mold, Bangor, Cowbridge, Tunbridge, Corwen, Welshpool, Llangefni, Llandillo, Knighton, Swansea.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

At Mark lane to-day, the supply of English wheat on sale was very moderate. Attention, however, was chiefly directed to the better qualities, which changed hands at the full prices of Monday: inferior samples were very inactive, but not cheaper. In nearly all descriptions of foreign wheat, sales progressed slowly, at previous quotations. Good and fine barley and oats were in request, at extreme rates; but for inferior produce, the trade was very inactive. Beans were firm in price, and the few English peas on offer realised former rates. The flour trade was steady, at Monday's quotations. This week's imports are small, viz., 40 quarters of wheat; 5,770 barley; and 15,710 quarters of oats.

At Liverpool, this morning, the trade for wheat and flour was very inactive, at late rates. Maize, however, declined in value 3d per quarter. At Wakefield, the wheat trade was dull; but there was a steady demand for good and fine barley, at full currencies.

The cotton market has been very irregular this week. On Saturday, through forced sales, a decline of 1d to 2d was submitted to on low qualities. On Monday the market was firmer, but on Tuesday the tone decidedly improved. Prices of the qualities most depressed on Saturday advanced 1d to 1½d per lb. On the receipt, however, of the American advices, the demand was checked, and prices at once receded ½d. Since then, the market has been daily drooping, and we must reduce our quotations 1d to 1½d from last Friday. The total sales of the week reach 31,590 bales, of which 6,540 bales have been taken on speculation, 4,680 bales for export, leaving 20,370 to the trade. To-day the market is quiet, with sales of 4,000 bales. Prices easier.

The following table is from Messrs Ellison and Haywoods' monthly circular of the Liverpool cotton trade:—

Weight of Cotton Delivered to European Spinners, In Millions and Tenths of Pounds.

	1864.	1863.	1862.	1861.	1860.
Great Britain	574.2	470.2	429.2	956.1	1,126.9

Total	956.2	855.9	750.5	1,681.6	1,744.7

The preceding figures give the amount of cotton taken by consumers from the ports. The real consumption we estimate as follow:—

Great Britain	561.2	470.2	451.7	1,007.4	1,083.6
Continent	367.7	372.4	325.2	700.0	717.8
Total	928.9	842,6	776.9	1,707.4	1,801.4

Trade in the several descriptions of colonial and foreign grocery produce is still very inactive. With the exception of a firm market for Indian teas, and a steady inquiry for good and fine qualities of coffee, at full prices, the transactions this week have, for the most part, been limited to the immediate wants of buyers, and, in some instances, a further reduction has taken place in the quotations. The alterations from Friday last, however, are by no means important, sugar—the principal article in which prices have given way—having declined to the extent of 6d per cwt on inferior descriptions.

We extract the following table from Messrs Trueman and Rouse's circular:—

Imports and Stocks of Sugar and Coffee at the Principal European Ports, for the Twelve Months ending Dec. 31, 1863 and 1864.

	Sugar. Imports. 1863.	1864.	Stock, 31st Dec. 1863.	1864.

The consumption of foreign sugar in the United States last year was 192,660 tons, against 231,308 tons in 1863, 241,411 tons in 1862, 241,240 tons in 1861, and 296,950 tons in 1860. The total consumption of foreign and domestic cane sugar in 1864 was 222,660 tons, against 284,308 tons in 1863, 432,411 tons in 1862, 363,819 tons in 1861, and 415,281 tons in 1860. The following figures show the leading ports whence the supplies of produce were derived in the last two years:—

Imports of Sugar at New York in 1863 and 1864.

From—	1863. tons.	1864. tons.
Cuba	137,232	123,420

Imports of Sugar into the United States in 1863 and 1864.

	1863.	1864.
Total	243,137	214,099

In the trade for English wool, there has been a great want of activity, and the small amount of business done has been at lower prices. Colonial wool, however, in the private contract market, commands previous rates.

Advices from the Cape of Good Hope state that the transactions in wool in December, both on English and American account, were large. At Cape Town, coarse unwashed produce realised 6d to 7d; fine ditto, 8d to 8¾d; washed ditto, 14d to 16½d; whilst at Port Elizabeth, the following were the prices current at latest dates:—Fine unwashed wool, 7d to 7½d; choice ditto, 7¾d to 8¾d; fine fleece, washed, 13d to 15d; and fine steam scoured, 16d to 18d per lb. Freights to London:—From Cape Town, ¾d; from Mossel Bay, ⅞d per lb.

The markets for hemp, flax, jute, and coir goods has ruled

Digitized by Google

heavy, but the principal alteration in prices is confined to jute, which has fallen about 5s per ton. Clean Russian hemp is quoted at 30*l* to 32*l* 10s per ton.

Annexed are Messrs Grant, Hodgson, and Co.'s observations in reference to last month's tobacco trade:—In the early part of last month, an improved business was done in most descriptions of American tobacco; subsequently there was less activity, and purchases, in most instances, were confined to limited quantities and selections for immediate consumption. Sales sum up to a fair average extent, and may be estimated at 1,604 hhds,—viz., 718 hhds Kentucky leaf, 436 strips, 6 tierces Virginia strips, and 444 hhds Maryland and Ohio. Buyers have chiefly directed their attention to good and fine sorts, both for cutting and spinning purposes, prices for which have been fully supported, and decidedly firmer than middling and common descriptions. A very large portion of last year's importations has now been sampled, and we now confirm our previously expressed opinion as respects home trade qualities,—viz., that several marks, both of leaf and strips, hitherto holding a prominent position in the market, are very carelessly prepared and put up, much mixed in character, and questionable in condition. Old imports have consequeutly been more sought after, and a fair exrent of sales effected. For exportation, an improved demand may be reported; the sales effected have been principally of good and fine sorts of Western leaf, at previous rates; some small lots of common and ordinary were taken at lower prices. Imports—1,364 hhds. Deliveries—1,046 hhds, against 1,314 hhds in the corresponding month of last year. Stock—19,438 hhds, against 18,886 hhds in 1864, 20,323 hhds in 1863, 27,051 hhds in 1862, 20,711 hhds in 1861, 18,233 hhds in 1860.

The quarterly public sales of cinnamon were held on Monday, and consisted of 2,042 bales Ceylon produce. The demand ruled heavy, at a decline in prices of 2d to 6d per lb. First pile realised 1s 8d to 2s 10d; second ditto, 1s 5d to 2s 3d; third ditto, 1s 4d to 1s 10d; fourth ditto, 10d to 1s 5d per lb. About 1,500 bales were disposed of.

The public sales of Banca tin in Holland having been postponed, the tin market has been very firm, at enhanced quotations—Banca having realised 97*l*; and Straits, 92*l* cash. Scotch pig iron is firm, at 50s cash, mixed numbers; and spelter commands more attention, at 19*l* per ton, on the spot. The stock of spelter on the 1st inst. was 10,344 tons, against 11,181 tons on January 1, current year, and 6,177 tons on Febrnary 1, 1864 The subjoined table relates to Banca tin in Holland:—

Sperm oil has sold readily, and an important advance has taken place in its value, the present quotation being 80*l* per tun. Other oils, however, have continued inactive, at about previous rates. Tallow moves off slowly, at 41s 6d for new P.Y.C. on the spot.

Owing to the recent Federal victories, a heavy fall took place in the value of gold at New York during the week ending Jan. 22; the quotation at one period was as low as 201¾, and closed at 206 per cent. The market for Government stocks was flat, and prices were rather lower. In the produce markets, there was a great want of activity, and the quotations had a drooping tendency. The stock of bullion in the banks on the 14th ult. was 4,272,000*l*.

THE COTTON TRADE.

LIVERPOOL—FEBRUARY 3.

The cotton market was unfavourably affected on Saturday by rumours from New York of peace negotiations, and in the early part of the week prices were much depressed. On Tuesday and Wednesday morning a decided increase of animation appeared, with a temporary recovery in prices to a considerable extent; but the market again became comparatively quiet, and closed yesterday with a marked declined from last week's rates. American has been in improved demand, particularly by the trade, but declined 1¼d in the commencement of the week, and closes about 1d below last week's quotations. In Sea Island a fair business has been done, without change in prices. Brazil declined heavily, and rallied again, but is still 1½d per lb down; Pernam has been in request; with very little done in Bahia and Maranham. Egyptian is quoted at an average decline of 2d, whilst in the early part of the week a concession of 3d was generally submitted to. Smyrna has fallen 1½d per lb, and is much pressed for sale. East India descriptions have fluctuated considerably; great depression having prevailed on Monday and Tuesday, when the lowest sales were effected, there has been some material recovery since, though not altogether maintained yesterday, and prices close ½d to 1d below last week's rates; in fair Madras the decline is about 1½d per lb. China and Japan have been in good request, but close ¾d to 1d per lb lower than on Friday last.

The transactions, to arrive, have been confined to Egyptian, at irregular prices, the last quotations being on Wednesday fair open, January shipment, 22d and 21½d.

The sales of the week amount to 31,590 bales, including 6,540 on speculation, and 4,680 declared for export, leaving 20,370 bales to the trade. The sales to-day are about 4,000 bales.

LONDON—FEB. 3.

The following is a portion of the circular issued this week by the London Cotton Broker's Association:—The market has been very dull throughout the week (with the exception of Wednesday, when there was an active demand), and prices have been very irregular. There have been scarcely any transactions in Surat, but we quote prices of this description 1d lower; Coimbatore and Salem are difficult of sale at 1d to 1½d decline; Tinnevelly and Western sell in small lots at 1d below last week; Coconada has fallen only ½d; Bengal and Scinde are in fair request at 1d reduction; China is ½d, and Japan 1d lower; Smyrna has again suffered the greatest depreciation, having been sold at a further fall of 2½d per lb.

MARKETS IN THE MANUFACTURING DISTRICTS

For the time of year a fair average business has been transacted in most kinds of goods, and prices generally have ruled steady. Iron has moved off slowly, and the quotations have been with difficulty supported. Coals have sold briskly, at fully previous rates.

MANCHESTER, Feb. 2.—The market has this week been subject to sudden and violent changes. On Saturday, business was proceeding to a fair extent, when a sudden interruption arose from the peace rumours brought by the Etna. On Monday and Tuesday, various and irregular prices were quoted, but buyers did not begin to operate till Tuesday afternoon. On Wednesday forenoon, the market became very animated, many considerable orders being placed, particularly in China shirtings. On American news being then telegraphed with further rumours of peace propositions, and gold down to about 200, a dead pause again ensued. Buyers have since been slowly recovering, making inquiries, but not eager to act except where price offers a plain temptation. Whilst supplies of manufactures are running bare, supplies of cotton are running full for the present, but the future fulness of cotton supplies is in turn questioned and believed; hence the alternate excitement and depression.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—Prices of wool are very irregular, and there is little fairly to test them. Some sorts are depreciated more than others, but down wools keep tolerably firm. The demand for yarns seems to lessen rather than increase. Pieces—Prices are very little altered, but still unsteady.

LEEDS.—For well-made black cloths there is a fair sale, and the manufacturers of such are well employed. Good black unions maintain their position and are not difficult to sell at late quotations.

ROCHDALE.—The export demand is dull, and Canadian buyers report that their stocks are heavier than usual at this part of the year, and they consequently purchase sparingly and generally of goods to make up assortments. There is still a fair amount of Yorkshire goods brought to this market, and, though the demand is slow, prices are steady. The same may be said as to the prices of wool and flannels.

LEICESTER.—Business is becoming more buoyant in the hosiery warehouses, although the season has not yet sufficiently advanced for thorough activity. In the country districts trade is without much change. Yarns are high in price, and what is made is to order. There is no material change in wools, and prices remain extremely high.

NOTTINGHAM.—Business is yet quiet in the lace trade. Some small orders have been in the market for America and the Continent. Silk is rising, and silk goods are not in much demand. Yarns are rather easier.

CARDIFF.—The steam coal trade continues active. The Continental inquiry is good, more especially from the Italian and French markets, and as soon as the winter season is over a large quantity is likely to be sent to the Baltic. Quotations are firm, and for superior qualities there is no difficulty in obtaining the current rates.

BIRMINGHAM.—The trade of this town is steadily improving; the country orders are coming in more freely than usual at this early period of the year, and in the foreign department a good amount of business is being done.

GLASGOW.—Iron.—The market for pig iron is lifeless, the transactions having been upon a most limited scale. G.m.b., No. 1, 50s 9d; ditto, No. 3, 49s 9d; Gartsherrie, No. 1, 56s; ditto, No. 3, 52s; Eglinton, No. 1, 50s; ditto, No. 3, 49s; Coltness, No. 1, 55s; Calder, 54s; Glengarnock, 53s.

HUDDERSFIELD.—Piece-dyed black doeskins, at about 4s per yard, have sold freely, and considerable orders for these goods are now in the manufacturers' hands. Hairlines, mixtures twists, diagonals, &c., in subdued colours, are again the favourite styles in fancy trouserings. The shipping demand has been very quiet.

BELFAST.—Extreme dulness still prevails in the linen trade, but the American trade is exceptionally active. There is no change to note in yarns. Demand continues languid, and the transactions are of a retail character. Prices are, however, well maintained.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Jan. 17.—The trade for flour, wheat, and maize is still very quiet, with a small business doing in export. Annexed are the quotations:—Flour—Superfine State and Western flour, $9.70 to $9.90; extra State, $10.10 to $10.20; choice State, $10.25 to $10.30; common to medium extra Western, $10.15 to 10.55; extra round hoop Ohio, $11.05 to $11.20; Western trade brands, $11.25 to $12; extra St. Louis, $11.40 to $15; common Southern, $10.70 to $12; fancy and extra, ditto, $12.15 to to $14.75; common Canadian, $10.20 to $10.25; good to choice and extra, $10.30 to $12 per barrel. Wheat—Prices quite nominal. Corn—White Southern, $2; mixed Western, $1.90 to $1.92; new yellow Jersey, $1.80 to $1.85 per bushel.

NEW YORK, Jan. 21.—Flour, wheat, and maize have been in limited request, since our last, at lower prices.

EXPORT of BREADSTUFFS from the UNITED STATES to GREAT BRITAIN and IRELAND since September 1, 1864.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat, coastwise and by land-carriage, have been on a limited scale. For both red and white qualities, the demand has ruled inactive; nevertheless, compared with the previous week, no change has taken place in the quotations. The imports of foreign wheat have been very moderate. Selected samples have changed hands slowly, at full currencies; but all other kinds have moved off heavily, at barely stationary prices. The inferior qualities have ruled almost nominal. Malting barley, though in fair average supply, has commanded full prices. Grinding and distilling sorts have sold slowly, at late rates. The malt trade has been in a sluggish state, at late quotations. The supply of malt has rather increased. Good sound oats have realised extreme rates, with a fair demand, but heated qualities have sold heavily. There has been a slight improvement in the demand for beans, at full prices. Peas, however, have commanded very little attention. We have no change to notice in the value of either English or foreign flour. The trade may be considered in a healthy state.

Most of the country markets have been inactive for nearly all kinds of produce. Prices, however, have been mostly supported. The markets on the Continent have been somewhat heavy for wheat, at barely late currencies. Most descriptions of spring corn have realised previous rates. The shipments of produce from America continue on a limited scale.

The Scotch markets have been scantily supplied with wheat; nevertheless, sales have progressed slowly, at late currencies. Barley and oats have sold at full prices.

In Ireland, only moderate supplies of wheat have been on offer. The trade, however, has been in a sluggish state. Fine barley and oats have changed hands steadily, at full prices. Otherwise, the trade has continued heavy.

At Mark lane, to-day, the supply of English wheat on sale was small, yet the trade was slow; selected qualities, however, were decidedly firm in price, and inferior parcels supported Monday's currencies. In foreign wheat, only a moderate business was transacted, at Monday's quotations. Good and fine malting barley was in request, at extreme rates; but for inferior barley the trade was slow, at about stationary prices. Good and sound oats moved off steadily, at full quotations; inferior samples, however, were dull. Beans were firm in price, but the trade for peas ruled inactive, at late rates. The flour trade was steady, on former terms.

Mr George Dornbusch reports the arrival off coast of 22 cargoes of wheat, 14 maize, 26 barley, 2 rye, 1 millet-seed, 12 linseed, 2 rapeseed, 2 cotton-seed, and 1 oil-cake. Great heaviness has prevailed in the trade generally, and prices have had a drooping tendency.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has become quiet, but prices are unchanged. There were 2,878 casks British West India disposed of to yesterday (Thursday) afternoon, including the portion of 1,000 casks: also 441 bags realised by auction. Demerara, 26s to 28s 6d; Jamaica, 28s to 31s 6d; grainy sorts, 32s 6d to 36s 6d; white, 11s 8d duty, 39s 6d to 40s. A limited demand still prevails for exportation, but the home refiners are buying to a moderate extent. There were delivered last week 4,359 tons, and 2,535 tons landed, leaving the stock at the close 106,609 tons, against an average of 66,000 tons in the three preceding years at the same date.

Mauritius.—A floating cargo has been sold for the United Kingdom, No. 12¼ at 25s. The public sales have comprised 3,755 bags, of which the greater part sold: brown, 24s to 28s 6d; grey and yellow, 30s 6d to 33s; grainy sorts, 31s 6d to 34s 6d per cwt.

Natal.—844 bags muscovado sorts sold at 25s to 33s per cwt.

Siam.—658 bags sold at 36s 6d to 37s per cwt for good strong greyish (11s 8d duty).

Other Foreign.—A floating cargo of Cuba muscovado has sold at 20s 9d, for a near port. 300 casks, on the spot, at 31s. 1,100 boxes Havana at 29s 9d to 33s; white at 41s. 1,080 boxes Havana, offered by auction, part sold at 34s 6d to 36s; the remainder taken in at 39s 6d. 780 casks 53 barrels Porto Rico chiefly sold: grocery, 32s to 35s 6d; brown and grey, 29s to 31s 6d. Privately, 500 casks, at 29s 6d to 31s 9d. 210 casks Cuba were bought in at 27s to 33s. 1,390 bags Guatemala went at 28s to 32s per cwt.

Refined.—There has not been any change in the market, which is steady, with moderate transactions.

MELADO.—52 puncheons offered by auction sold at 14s 6d to 17s per cwt.

COCOA.—A limited business has been done this week, and prices are without further alteration to report. The stock of colonial is 9,830 bags; against 14,500 in 1864. Of foreign it amounts to 9,750 bags, against 6,640 bags in 1864, and 11,140 bags at the same date in 1863.

COFFEE.—The supply of native Ceylon has increased, and the ordinary kinds are rather cheaper. 295 casks were chiefly bought in, but 3,512 bags partly sold at 69s to 72s for ordinary to good. 365 casks 202 barrels and bags plantation sold steadily, at 79s to 89s 6d, fine ordinary to good. 33 casks 328 barrels and bags Jamica, low to good, 62s 6d to 89s. 510 cases, &c., 1,971 bags East India chiefly sold: pale to good, 73s 6d to 88s; ordinary to fine ordinary Madras, 72s to 78s 6d; Cannon's Mysore, 81s 6d to 88s per cwt. There have not been any floating cargoes reported.

RUM.—There has been a steady inquiry, with considerable sales of Penang, at 1s 5d proof, including some parcels of old import. Cuba has sold at 1s 7½d to 1s 8d; current quality of Demerara in puncheons at 1s 9d per proof gallon.

TEA.—The sales of Indian growth comprised 4,755 packages, which sold from Tuesday to Thursday inclusive. Quotations ruled irregularly. Fine descriptions went at full rates. Assam Company's souchong brought 1d per lb advance. Several sales of China growth are declared for Tuesday next.

RICE.—By auction, 5,800 bags damaged Bassein sold at 7s to 8s. A large business has been transacted in soft grain during the past ten days, chiefly at 9s 3d to 9s 6d per cwt for good Necrancie Arracan. Offers have been made for new, to arrive, at high prices, which are refused.

IMPORTS and DELIVERIES of RICE to Jan. 28, with STOCKS on hand.

	1865.	1864.	1863.	1862
Imports .....tons	13870 ...	10020 ...	2810 ...	5070
Deliveries	4430 ...	3000 ...	4200 ...	4450
Stock	50650 ...	52970 ...	62720 ...	30550

SPICES.—The markets generally are quiet. Of 93 bags Penang white pepper by auction, two lots good sold at 5¾d to 5⅞d. Business reported privately at 5¾d. 1,358 bags Singapore black pepper were bought in at 3⅝d. 266 bags heavy greyish Malabar sold at 4⅛d to 4⅜d. 744 packages Zanzibar cloves found buyers at ⅛d reduction at 3⅝d to 3⅞d. 2,176 bags pimento went off steadily at previous rates, from 2d to 2¼d. 52 cases brown nutmegs were chiefly sold at 11d to 1s 6d, with bold at 2s 7d. 9 cases 5 casks mace part sold at 11d to 1s 1d per lb. 600 cases cassia lignea was partly disposed of: ordinary coarse, at 77s; mouldy and broken, 74s to 76s. 376 cases wormy Cochin ginger sold at 58s. 237 bags rough Bengal part sold at 29s to 29s 6d per cwt.

CINNAMON.—The quantity on Monday comprised 2,071 bales Ceylon, and about 1,500 bales sold at 3d to 6d decline on firsts, and 1d to 4d per lb on other sorts: 1st quality, 1s 8d to 2s 10d; 2nd ditto, 1s 7d to 2s 3d; 3rd, 1s 3d to 1s 10d; 4th, 10d to 1s 2d.

SAGO.—1,127 boxes by auction chiefly sold at the former value: good bold, 19s to 19s 6d; small, 18s to 18s 6d; medium, 18s to 18s 6d per cwt.

SALTPETRE.—A few parcels of Bengal have been sold privately, on lower terms: refraction 8 at 30s 6d, 4⅜ to 2½ at 31s 6d to 31s 9d per cwt, cash and short prompts. The market is now dull.

IMPORTS and DELIVERIES of SALTPETRE to JAN. 28, with STOCKS on hand.

	1864	1863	1862	1861
Imports .....tons	690 ...	780 ...	2250 ...	2750
Deliveries	900 ...	780 ...	940 ...	1250
Stocks	7200 ...	7160 ...	5125 ...	4630

Deliveries last week 261 tons.

COCHINEAL.—The public sales this week have comprised 615 bags, which three-fourths met with buyers, at full prices to 1d advance. Honduras silvers, 3s to 3s 4d; blacks, 3s 4d to 4s 8d; Teneriffe silver, 3s 1d to 3s 3d; black, 3s 4d to 4s 8d per lb.

OTHER DRYSALTERY GOODS.—47 bales Bengal safflower, by auction, sold steadily at 4*l* 2s 6d to 6*l* 7s 6d. Terneric is rather dearer, good Bengal selling at 26s to 26s 6d per cwt. A few orders have been executed in Cutch, on previous terms.

Digitized by Google

METALS.—The principal feature to notice this week has been the sudden advance established upon foreign tin, owing to the Netherland Trading Company having postponed their sale. Straits last sold at 91*l* to 92*l* cash. Other metals are rather more in demand. Scotch pig iron last sold at 50s 6d, mixed Nos., cash. The stock of spelter is 13,344 tons, against 6,177 tons at the same date in 1864. Business is reported at higher rates, viz., 18*l* 15s to 19*l* per ton on the spot.

HEMP.—A considerable quantity of Manilla changed hands last week, at 28*l* to 31*l* 10s per ton, roping to good Sorsogon.

JUTE.—The small supply brought to auction on Wednesday went off flatly, good ordinary quality obtaining 14*l* 15s to 15*l* per ton.

LINSEED.—Our import for the week is 17,059 quarters, consistiug of 14,179 quarters from the East Indies, and 2,880 quarters from Odessa. There are also large arrivals on the coast from the Black Sea. Our market is consequently a shade lower than last week. There are sellers of Calcutta on the spot at 58s sound bags, and 6d less c. f. and i., at which small sales have been made. Bombay would still command 59s 6d. For arrival, we have no business to report. For cargoes of Black Sea, on the coast, 57s 6d would be accepted.

OILS.—Olive remains dull, and quotations may be considered nominal. Sperm is dearer, having sold at 80*l* per tun. No alteration can be quoted in common fish oils. 50 tons fine palm have sold at 36*l* 10s. A large business has been done in cocoa-nut: Cochin, 39*l* to 40*l*; Ceylon, 39*l*. Linseed oil is slightly lower: On the spot, 32*l* 10s; for delivery to June, 33*l* to 33*l* 5s. Rape dull. Foreign refined, 45*l* 10s to 46*l*; brown, 41*l* per ton.

PETROLEUM.—American refined 2s to 2s 1d per gallon.

TALLOW.—A quiet tone has pervaded the market this week, and prices are lower. 1st sort Petersburg Y.C., 41s 3d; March, 41s 9d to 42s; October to December, 43s per cwt.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market closes without alteration. 3,251 bags Mauritius and 104 casks 554 bags West India sold at previous rates; also 309 bags Natal. 1,151 bags Gurpatta date Bengal realised 28s 6d to 31s 6d. Week's business in West India 3,529 casks.

COFFEE.—582 cases Neilgherry by auction sold at 66s to 79s per cwt.

COCOA.—486 bags Trinidad only partly sold at 56s to 71s. 350 bags Surinam chiefly sold at 60s to 65s. 49 bags Grenada, 51s 6d to 52s. 169 bags Guayaquil, 68s to 69s per cwt.

RICE.—691 bags hard white Bengal offered by auction sold at 12s 9d to 13s 3d per cwt.

PIMENTO.—190 bags sold at 2¼d.

OIL.—120 casks sperm offered by auction chiefly sold at 79*l* 10s to 80*l* per ton.

TALLOW.—193 pipes South American partly sold at 41s 6d. 108 barrels at 42s 6d per cwt. for fine.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been very quiet this week. Prices rather in favour of buyers. For export, some few sales have been made in crashed at 31s. Dutch crashed at the beginning of the week was rather firmer, owing to sales having been made of about 1,500 tons, for forward delivery, but closes easier.

GREEN FRUIT.—Market without alteration. Some parcels oranges from St Michael, Terceira, Valencia, and Palermo, sold by Keeling and Hunt at public sale, went at prices similar to those obtained last week. Lemons firm, and any of good quality in request. More inquiry for Seville sours. Almeria grapes cleared out of first hands. Barcelona and chesnuts dull. Para scarce and wanted.

DRY FRUIT.—Currants continue without demand, and though several parcels were brought forward at auction, no good result was obtained. Valencia raisins are again lower. For Turkey red and Eleme the sale is limited. Figs dull.

ENGLISH WOOL.—Very little doing at lower prices.

COLONIAL WOOL.—The market remains firm, with good demand.

FLAX.—Market quiet.

HEMP.—Market steady, but little business doing in Russian this week. Manilla very firm and good qualities scarce.

SILK.—The market rather quieter, but prices very firm.

TOBACCO.—The market has presented more firmness for good and choice descriptions, and holders disinclined to make sales unless at full quotations. Medium, good, and fine export qualities have found buyers to a fair extent at steady prices; common and ordinary dull of sale, at prices in favour of buyers.

LEATHER AND HIDES.—The leather trade has been dull throughout the past week, but as the weather has prevented any drying, the supplies of fresh leather at Leadenhall on Tuesday were small. The demand presented no new feature, and prices generally were unaltered.

METALS.—A continued heaviness has prevailed in some metals, with improvements in others. Copper is dull and neglected, but tin, on the contrary, has rallied materially on the announcement that no public sale of Banca will take place until June. Spelter also has stiffened in price, the stock on 1st inst. being 10,344 tons. Lead and tin plates steady, but the latter rather more depressed.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	44	3
Fat by ditto	2	2
Yellow Russia	43	3
Melted stuff	32	6
Rough ditto	18	0
Greaves	18	0
Good dregs	7	0

METROPOLITAN CATTLE MARKET.

MONDAY, Jan. 30.—The total imports of foreign stock into London, last week, amounted to 6,697 head. In the corresponding week in 1864 we received 2,166; in 1863, 3,011; in 1862, 660; in 1861, 513; 1860, 1,434; and in 1859, 2,010 head.

For the time of year the supply of foreign stock on sale to-day was somewhat extensive. Both for beasts and sheep the demand ruled inactive, at barely previous rates. Fresh up from our own grazing districts the arrivals of beasts were moderate as to number, and the quality of the stock was prime. The supply from Scotland comprised 336 head in excellent condition. The demand for nearly all breeds of beasts was in a somewhat inactive state, and in some instances prices favoured the butchers to the extent of 2d per 8 lbs. The general top figure for beef was 5s 4d, but some very superior stock realised 5s 6d per 8 lbs. The supply of sheep on sale was small. The general quality of the stock being very middling, good and prime Downs and half-breds moved off steadily, at fully late rates; but inferior breeds were in slow request, on former terms. The general top figure was 6s 2d per 8 lbs. Half-bred tegs and long-wolled sheep, carrying valuable skins, changed hands at high prices. Calves were in moderate supply and steady request at late rates. The top price was 5s 6d per 8 lbs. Pigs were in fair average request, at previous quotations.

SUPPLIES.	Feb. 1, 1864.	Jan. 30, 1865.
Beasts	4460	4330
Sheep	13710	12450
Calves	51	186
Pigs	440	450

THURSDAY, Feb. 2.—To-day's market was but moderately supplied with beasts, both as to number and quality. Nearly all breeds moved off slowly, at Monday's currency. The general top figure was 5s 4d per 8 lbs. The show of sheep was limited, nevertheless sales progressed slowly, at present quotations. The best Downs, in the wool, realised 6s 2d per 8 lbs. We were scantily supplied with calves, which met with a dull inquiry at late rates,—viz., from 4s 4d to 5s 6d per 8 lbs. Pigs and milch cows were very dull, but not cheaper.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	6 to	4	2	Prime Southdown sheep	6	0 to	6	2

HOP MARKET.

BOROUGH, Monday, Jan. 30.—The transactions in our market have been somewhat limited. Prices for the best qualities show no variation, but inferior descriptions are a shade easier.

BOROUGH, Friday, Feb. 3.—As regards good and fine English hops, the trade is decidedly firm, and previous quotations are well supported. The best descriptions of foreign produce are taken off steadily at full currencies; otherwise, the trade is dull at barely stationary prices. Mid and East Kents, 110s to 200s; Weald of Kents, 105s to 155s; Sussex, 100s to 140s; Yearlings, 100s to 140s; American, 100s to 140s; Bavarian, 110s to 200s per cwt.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Jan. 30.—The arrivals coastwise have been more liberal, but owing to the sharpness of the weather the prices of the former week were fully maintained. The following are this day's quotations:—Yorkshire Flukes, 120s to 130s; ditto Regents, 90s to 100s; ditto Rocks, 70s to 75s; Kent and Essex Regents, 80s to 95s; Perth, Forfar, and Fife Regents, 65s to 70s; ditto Rocks, 60s; French and Belgian whites, 50s to 55s per ton.

FRIDAY, Feb. 3.—These markets are well supplied with home-grown, and moderately with foreign potatoes. On the whole, the trade is steady at the annexed quotations:—Yorkshire Regents, 80s to 100s; Flukes, 110s to 135s; Scotch Regents, 70s to 80s; Rocks, 60s to 70s; Dunbar Regents, 90s to 105s; Kent and Essex Regents, 80s to 100s; Foreign, 55s to 65s per ton.

HAY MARKETS.—THURSDAY, Feb. 2.

SMITHFIELD.—Meadow hay, 4*l* 4s to 5*l* 10s; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 15s per load. Fair supply.

CUMBERLAND—Meadow hay, 4*l* 4s to 5*l* 10s; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 14s per load. Trade steady.

WHITECHAPEL.—Meadow hay, 4*l* 4s to 5*l* 10s; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 12s per load. A moderate demand.

COAL MARKET.

FRIDAY, Feb. 3.—Wallsend: Haswell 19s 6d—Hetton 19s 6d—East Hartlepool 19s—Eden Main 17s 6d—Cowpen Hartley 15s—Davison's West Hartley 15s—Hasting's Hartley 15. Ships at market, 17; sold, 8; gas contracts, &c., 7—15; unsold, 2; ships at sea, 50.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 3.—The East India sales, which commenced on the 24th ult., were brought to a close on the 1st inst. Of the total quantity offered, say 15,600 bales, about 1,900 or 2,000 bales have been withdrawn. The better descriptions have realised an advance, whilst all inferior ones

Digitized by Google

have suffered a decline if compared with the prices current at the last November sales. The sundry kinds of wool will be offered from the 6th inst. until the 10th, and the quantity announced is 22,500 bales and ballots.

CORN.

(From our own Correspondent.)

Friday, Feb. 3.—There was a moderate attendance at market to-day. Wheat in limited demand, and without change in price. Flour nominal. Indian corn fully 3d lower; Galatz, 26s to 26s 3d. Beans, oats, and oatmeal rather easier.

The Gazette.

Tuesday, Jan. 31.

BANKRUPTCY ANNULLED.

Edward Lane, Fish street hill, provision merchant.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 21st of January, on 11,786 miles, to 583,355*l*, and for the corresponding week of last year, on 11,460 miles, to 550,205*l*, showing an increase of 326 miles, and of 33,150*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,287 miles, to 477,361*l*, and for the corresponding week of 1864, on 8,045 miles, to 448,488*l*, showing an increase of 242 miles, and 28,873*l* in the receipts.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Jan. 30.—In the share market to-day, a majority of the transactions were for the account, and the closing prices were generally higher in English railways, a similar tendency in a slight degree affecting foreign railways, American securities, and miscellaneous shares; but British mines and banks were slightly disposed to heaviness. Of the English lines, Caledonian advanced 1½, Great Northern, ditto (A stock), and South Devon 1 each. In colonial, East Indian improved ½. In foreign, Paris and Orleans improved ¼, and Dutch-Rhenish and Lombardo-Venetian ¼ each. In American, United States Five-Twenties advanced 2½, Virginia (5 per cent.) 1½, and ditto (6 per cent.) 1; and Erie shares (paid-up) declined 1½. In British mines, East Caradon were ½ better, Clifford Amalgamated 2 lower, and East Wheal Russell and North Wheal Crofty ½ each. In foreign mines no material alteration occurred.

TUESDAY, Jan. 31.—The share market to-day closed with a tendency towards improvement in English and colonial railways, American securities, and banks, the lower quotations in many instances being due to their being ex div.; and the other descriptions showed no material alterations. Of the English lines, Caledonian, Great Northern (A stock), North-Eastern (York), and Great Western (original) advanced a further ½ each; ditto (Newport), 1, Great Eastern ½, Lancashire and Yorkshire a further ¼, and South Devon further 2; North-Western and South-Eastern relapsed ¼ each, and Metropolitan ½; and Brighton and Manchester, Sheffield, &c., are now quoted ex div. In colonial, Calcutta and South-Eastern improved 1, Bombay and Central India (F shares) and Great Indian Peninsula (shares) ¼ each, ditto (stock) and Eastern Bengal ½ each, and East Indian a further ½. In foreign, Mexican advanced ¼, and Dutch-Rhenish a further ⅛, and Lombardo-Venetian relapsed ⅛. In American, Erie shares (paid up) recovered ½; and Illinois Central (shares) and Pennsylvania Railroad (second mortgage) improved 1 each, and United States 5-20's further 1½. In British mines, Great Wheal Vor receded ½, and Great South Tolgus ¼, and Devon Great Consols and East Caradon are now quoted ex div. In foreign mines, General, Linares, and Lusitanian are quoted ex div.

WEDNESDAY, Feb. 1.—In the share market to-day, dulness was the prevailing feature, and, with the exception of a further slight tendency towards improvement in American securities, there was no material change of tone in any of the descriptions. Of English railways, Manchester, Sheffield, &c., North Staffordshire, and North-Eastern (Leeds) improved ½ each, ditto (York) a further ¼, Lancashire and Yorkshire a further ½, and South Devon a further 1; Great Western relapsed ¼, and Metropolitan further declined ½, and South-Eastern ¼. In colonial, Bombay and Central India advanced ½, and Great Indian Peninsula a further ½; and Great Western of Canada (5½ per cent. bonds) receded 2. In foreign, Paris and Mediterranean improved ½, and Belgian Eastern Junction ⅛. In American, Virginia (6 per cent.) advanced 1, Illinois Central (shares) a further 1, and United States 5-20's further 2½; and Erie shares and Marietta Railroad bonds are now quoted ex coupons. In British mines, Nangiles declined 1, and East Caradon ½; and Marke Valley are quoted ex div. In foreign mines, Linares improved ¼, and East del Rey and Vallanzasca Gold ⅛ each.

THURSDAY, Feb. 2.—In the share market to-day there was again no change of tone in any of the descriptions, except a further buoyant disposition in American securities. Of the English railways, Great Northern (B stock) improved 1½, Great Western (Newport) 1, North-Eastern (Berwick) ½, ditto (York) a further ¼, and South Devon a further 1. In colonial, Madras (5 per cent.) improved ½, and Grand Trunk of Canada ¼, and Atlantic and St. Lawrence receded 1. In foreign, Western and North-Western of France advanced ½, Ottoman ¼, and Lombardo-Venetian ⅛; and Great Luxembourg declined ½. In British mines, West Bassett advanced 2½. In foreign mines East del Rey further improved ⅜, and Cobre Copper declined 1.

FRIDAY, Feb. 3.—The railway market was dull to-day. As regards the principal stocks, the only movements were a reduction of ½ per cent. in Metropolitan and Great Northern, and ⅜ in London and North-Western.

THE PALL MALL GAZETTE:

An Evening Newspaper and Review.

It is difficult to describe the plan of an enterprise like the PALL MALL GAZETTE without seeming to boast or to decry the efforts of others. But we are unwilling to lose the advantage of a few words of explanation, and we therefore trust the candour of the reader for a just interpretation of our meaning.

The PALL MALL GAZETTE will contain all the news proper to an Evening Journal. But, addressed as it will be to educated men and women, the space of the Paper will not be occupied by trifling chronicles, nor by that excess of words which adds nothing to the interest of newspaper records, while it destroys their significance. Literary considerations alone would determine us to have our News Reports written in plain English; but beyond these there is the fact that the lessons to be found in many an accident of human life or social polity are lost in the turgid language in which they are commonly narrated.

Events made known by the Morning Papers may be discussed in the PALL MALL GAZETTE of the same day, but they will not be reported anew. Trustworthy advices from the Money Market will be included in the News of the Day.

The rest of the Paper (by far the greater part) will be made up of original articles upon the many things which engage the thoughts, or employ the energies, or amuse the leisure of mankind. Public Affairs, Literature, the Arts, and all the influences which strengthen or dissipate Society, will be discussed by men whose independence and authority are equally unquestionable, and who are accustomed to regard the public expression of opinion as a serious thing. This is the chief aim of the PALL MALL GAZETTE: to bring into Daily Journalism that full measure of thought and culture which is now found only in a few Reviews.

At the same time, we by no means intend to make the Paper pedantic or solemn. Humour is too powerful, as well as too pleasant, to be left out of the design, which will lose none of the advantages of occasional trifling. If a thing can be said better in verse than in prose, it will be said in verse. Epigram, but not spite—burlesque, but not vulgarity—will be readily admitted into its columns; and since a joke is often as illustrative as an argument, good jokes will be welcome too.

It will be understood that this Advertisement is rather a proclamation of idea and of effort than of promise. But the proclamation is not made before a large number of able writers have accepted the idea, and pledged themselves to the effort.

Office of the PALL MALL GAZETTE,
14 *Salisbury street, Strand, W.C.*

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men as the safest, speediest and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other kind.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy.

Dr GRANVILLE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light-Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.

SOLE CONSIGNEES:
ANSAR, HARFORD, and CO., 77 Strand, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

THE MAGIC DONKEYS.—Roars of Laughter.—These wonderful animals go through their extraordinary evolutions daily at 252 Strand, from 10 till 5. The pair sent post free for 14 stamps. Magic Punch and Judy, with the dog Toby, post free for 20 stamps. H. G. Clarke and Co, 252 Strand.

CONSUMPTION, COUGHS, COLDS, ASTHMA BRONCHITIS, NEURALGIA, RHEUMATISM, SPASMS, &c.
CAUTION—"In Chancery."

CHLORODYNE.

VICE-CHANCELLOR WOOD stated that Dr J. Collis Browne was undoubtedly the Inventor of Chlorodyne. Eminent Hospital Physicians of London stated that Dr J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr Browne's.—See TIMES, July 13, 1864. The Public, therefore, are cautioned against using any other than DR J. COLLIS BROWNE'S CHLORODYNE.

This Invaluable Remedy produces quiet refreshing sleep—relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretion of the body.

From J. M'Grigor Croft, M.D., M.R.C., Physician, London, late Staff Surgeon to H.M.F. "After prescribing Dr J Collis Browne's Chlorodyne for the last three years, in severe cases of Neuralgia and Tic-Douloreux, I feel that I am in a position to testify to its valuable effects. Really in some cases it acted as a charm, when all other means had failed." No home should be without it. Sold in bottles, 2s 9d and 4s 6d. Sent free on receipt of stamps, by J. Davenport, 33 Great Russell street, W.C., Sole Manufacturer.

Observe particularly, none genuine without the words "Dr J. Collis Browne's Chlorodyne" on the Government stamp.

HOLLOWAY'S PILLS are decidedly the best remedy for all disorders of the stomach and bowels, the liver and kidneys. They act with so decided an effect and yet so gently that people of the most delicate constitutions may take them with the most perfect confidence. The do not contain a single grain of mercury or other noxious substance, being composed exclusively of rare balsams. They are, therefore, equally safe and efficacious, and as a family medicine nothing yet invented or discovered can be compared with them for a moment. With these inestimable Pills at hand, together with the printed directions affixed to each box, no other medical advice or assistance can be needed in any ordinary case of sickness.

INSTANT RELIEF OF COLDS, ASTHMA, AND COUGHS IS GIVEN BY DR LOCOCK'S PULMONIC WAFERS.—From Mr J. W. Dale, chemist, Queen street, Portsea: "I consider them invaluable for coughs, colds, asthma, &c." Perfect freedom from coughs in 10 minutes is secured by DR LOCOCK'S PULMONIC WAFERS. They give instant relief, and rapid cure of asthma, consumption, coughs, and all disorders of the breath and lungs. Price, 1s 1½d, 2s 9d, 4s 6d, and 11s per box. Sold by all Medicine Vendors.

To Iron Shipbuilders, Ironfounders, and others.—Valuable Land on the North Shore of the river Tees.

TO BE SOLD BY TENDER, BY order of the Honourable Charles Alexander Gore, one of the Commissioners of Her Majesty's Woods, Forests, and Land Revenues, either together or in the two following Lots, all those PLOTS and PARCELS of LAND, situate on the North side of the river Tees, in the parish of Billingham, in the county of Durham, and extending from the Billingham lane landing place (constructed under the provisions of the Middlesborough Improvement Act, 1858), to, or near to, Haverton Hill, containing in the whole, by recent estimation, 66a 1r 19p, be the same more or less.

This valuable tract of land is situate nearly opposite the town of Middlesborough, and is within one mile of Port Clarence, and about four miles from Stockton-upon-Tees. It has a frontage of about 2,532 feet to the river Tees, adjoining some of the best deep water shipping berths upon the river; and it is proposed to be intersected by a line of railway to the West Hartlepool Harbour and Railway Company's line, and also by a carriage road 30 feet wide, extending from the Billingham lane landing place to, and communicating with, Haverton Hill, and with an intended road to Port Clarence, and to be bounded on the east by a road 40 feet wide, leading from a proposed landing place upon the river Tees to Haverton Hill.

Tenders may be made for the whole of the land, or for either of the following lots:—

Lot 1. All those plots or parcels of land, containing together 37a 3r 34p, or thereabouts, having a frontage of about 940 feet to the river Tees on the south, and being intersected by the said proposed road and railway for the distance of about 928 feet.

This lot abuts partly upon the proposed road from the proposed landing place upon the river to Haverton Hill, and partly upon another parcel of reclaimed land. The quantity, as stated above, is exclusive of the sites of the said road and railway.

Lot 2. All those plots or parcels of land, containing together 28a 1r 25p, or thereabouts, adjoining lot 1 on the west, and having a frontage of about 1,592 feet to the river, and being intersected for the distance of about 422 feet by the proposed road and railway.

This lot abuts for its whole extent on the South-west upon the Billingham lane landing place, and for its whole extent on the East upon lot 1. The quantity, as stated above, is exclusive of the sites of the said road and railway.

Lithographed plans of the land, with printed particulars and conditions of sale, may be obtained at the office of Her Majesty's Woods, Forests, and Land Revenues, 1 Whitehall place, London; or at the offices of Messrs Dodds and Trotter, Solicitors, Stockton. Sealed tenders, to be endorsed "Tees Tender," will be received by the Hon. Charles Alexander Gore, Whitehall place, London, S.W., not later than 11 o'clock a.m. on the 24th day of February next.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT, AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates.

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instructions on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

At the Annual Meeting of the Proprietors, held on Thursday, the 2nd February, 1865, at the London Tavern, Bishopsgate street, the following report for the year ending the 31st December, 1864, was read by the Secretary.

William Nicol, Esq., M.P., in the chair.

REPORT.

The Directors have the pleasure to submit to the shareholders the balance sheet of the Bank for the half-year ending 31st December last.

They have satisfaction in reporting that, after payment of all charges, interest to customers, making provision for bad and doubtful debts, and presenting a gratuity to each officer, the net profits amount to £126,431 17s 4d, which, with £21,726 16s 2d, brought forward from last account, produces the sum of £148,158 13s 6d, for appropriation.

The Directors recommend the payment of the usual dividend of 6 per cent. for the half-year, together with a bonus of 12 per cent., making 18 per cent. for the six months; these payments will absorb £129,529 1s 3d, and leave £18,629 12s 3d to be carried forward to profit and loss new account.

The Directors regret to announce the decease of their late esteemed colleague, James Laming, Esq., and report that they have elected Nathaniel Alexander, Esq., of Great Winchester street, East India merchant, to fill the vacancy thus created.

The Directors retiring by rotation are—
John William Burmester, Esq.
John Fleming, Esq., and
William Champion Jones, Esq.,
who, being eligible, offer themselves for re-election.

The dividend and bonus (together £3 12s per share) free of income tax, will be payable at the head office, or at any of the branches, on after Monday, the 13th inst.

We, the undersigned, have examined the foregoing balance sheet, and have found the same to be correct.—
(Signed), WILLIAM NORMAN, R. H. SWAINE, JOHN WRIGHT, } Auditors.
London and County Bank, Jan. 26, 1865.

The foregoing report having been read by the Secretary, the following resolutions were proposed, and unanimously adopted:—

1. That the report be received and adopted, and printed for the use of the shareholders.

2. That a dividend of 6 per cent., together with a bonus of 12 per cent., both free of income tax, be declared for the half-year ending 31st December, 1864, payable on and after Monday, the 13th instant, and that the balance of £18,629 12s 3d be carried forward to profit and loss new account.

3. That John William Burmester, Esq., be re-elected a Director of this Company; that John Fleming, Esq., be re-elected a Director of this Company; that William Champion Jones, Esq., be re-elected a Director of this Company.

4. That William Norman, Richard Hinds Swaine, and John Wright, Esqrs., be elected Auditors for the current year.

5. That the thanks of this meeting be given to the Board of Directors, for the able manner in which they have conducted the affairs of the Company.

6. That the thanks of this meeting be presented to the Auditors of the Company, for their services during the past year.

7. That the thanks of this meeting be presented to William McKewan, Esq., and to the principal and other officers of the Bank, for the zeal and ability with which they have discharged their respective duties.

(Signed) W. NICOL, Chairman.

The Chairman having quitted the chair, it was resolved, and carried unanimously—

8. That the cordial thanks of this meeting be presented to William Nicol, Esq., M.P., for his able and courteous conduct in the chair.

(Signed) W. CHAMPION JONES, Deputy-Chairman.

Extracted from the minutes.
(Signed) F. CLAPPISON, Secretary.

LONDON AND COUNTY BANKING COMPANY.

Notice is hereby given, that a Dividend on the capital stock of the Company, at the rate of 6 per cent. for the half-year ending 31st December, 1864, with a bonus of 12 per cent., will be paid to the Proprietors, either at the head office, 21 Lombard street, or at any of the Company's branch banks, on and after Monday, the 13th inst.—By order of the Board,

W. McKEWAN, General Manager.
21 Lombard street, Feb. 2, 1865.

Issue of New Shares.

ASIATIC BANKING CORPORATION.

By virtue of the powers conferred upon them by their Charter of Incorporation, and under the authority of the Lords Commissioners of Her Majesty's Treasury, the Directors have decided to increase the capital of the Bank from its present paid-up capital of £500,000 to £1,000,000 sterling by the issue of 25,000 new shares of £20 each, of which 12,500 shares will be issued at par to the proprietors registered in the books of the Corporation in London and Bombay respectively on the 31st day of January instant, in the proportion of one new share for every two shares resistered as above stated.

Of the remaining 12,500 shares 1,200 will be issued in accordance with a resolution of the shareholders on the 6th June last, leaving 11,300 to be offered to the public. Of these 11,300 shares 6,300 shares will be disposed of in Bombay at a premium, and the remaining 5,000 shares are now offered to the public in London at a premium of £15 (fifteen pounds) per share, to be paid as follows, viz.:—

	£	s	d		
On allotment	2	10	0	on account of	Capital.
and	7	10	0	—	Premium.
On 30th June, 1865	2	10	0	—	Capital.
and	7	10	0	—	Premium.
On 31st Dec., 1865.	5	0	0	—	Capital.

and the remaining instalments at such times and in such amounts as may be determined upon by the Court. Upon the first instalment of each share paid on account of capital, interest will be allowed at the rate of £10 per centum per annum from the date of such payments until the 30th of June next, after which date they will participate proportionately in the dividend which may be declared upon the original shares; *and upon the 31st of December next the holders of new shares will have the option of paying up the amount then remaining due on their shares, and having so done will receive the same dividend thereon as may be paid upon the original shares.* The premium received on the issue of 11,300 shares will be appropriated to the formation of a reserve fund.

The deposits of the Bank already exceed Three Millions Sterling, and the last quotation in Bombay of the existing shares was 175 per cent. premium, or equal to £35 per share premium, being equivalent to about £23 premium on the new shares.

Forms of application may be obtained at the offices of Messrs Foster and Braithwaite, 68 Old Broad street, Brokers to the Corporation, or at this office.

4 Lombard street, London, E.C., Jan. 25, 1865.

FORM OF APPLICATION FOR NEW SHARES.
ASIATIC BANKING CORPORATION.
Incorporated by Royal Charter.

THE ANGLO-ITALIAN BANK

(Limited).

Capital £1,000,000, in 20,000 shares of £50 each.

DIRECTORS.

PRESIDENT—His Excellency the Baron Ricasoli.

VICE-PRESIDENTS—Sir James Hudson, G.C.B.; John Lubbock, Esq., F.R.S.

Charles Bell, Esq.	G. Garden Nicol, Esq.
Robert Benson, Esq.	Sir J. P. Lacaita, K.C.M.G.
Julius Bordier, Esq.	Commendatore Devincenzi.
Charles H. Goschen, Esq.	Sabino Leonino, Esq.
Ippolito Leonino, Esq.	

GENERAL MANAGER—John Alexander Jackson, Esq.

First report, presented at the General Ordinary Meeting, held on Monday, the 30th day of January, 1865, at the London Tavern, Bishopsgate street.

The Directors have the pleasure of submitting to the proprietors the first annual balance sheet of the Anglo-Italian Bank.

Although the Government readily accorded to your Directors the necessary permission to open a bank in Italy, still the legal formalities consequent thereon, toge her with the difficulty in finding suitable offices, and competent managers for the different branches, were productive of considerable delay, so that the office at Turin was only opened for business on the 1st of October, and the branch at Milan on the 1st of December, 1864.

A branch will be opened at Florence in a few days, and the Directors also intend to commence business at Naples as soon as possible, a manager and staff having been already appointed.

Acting under the power given them by the Articles of Association, the Directors have appointed Local Committees for Turin and Milan. The following gentlemen, representing some of the most influential firms in those cities, have consented to act in this capacity, viz.:—For Turin, Signor Giuseppe Dupré (Dupré pere et fils), Signor Vincenzo Denina, Signor Gaetano Piaggio, Signor Gaetano Spinelli (Fedele Berné and Co.); and for Milan, Signor Giulio Belinzaghi, Signor Pietro Brambilla (Brambilla and Co.), Signor Giuseppe Oneto (Oneto, Cavajani and Co.), Signor Giovanni Noseda (Noseda and Burocco).

The Directors think themselves most fortunate in having secured the co-operation of these gentlemen.

The gross profits up to the 31st of December have amounted to £25,102 6s 7d; deducting £8,420 5s 5d for expenses, and £4,652 13s 4d for rebate, at 7 per cent. per annum, there remains a sum of £12,029 7s 10d, out of which after the payment of 6s per share by way of interest, free of income tax, being at the rate of rather more than 6 per cent. per annum, amounting to £5,500 10s, your Directors recommend that £2,831 13s 1d be written off from preliminary expenses, and £2,000 placed to a reserve fund, leaving a balance of £1,697 4s 9d undivided profit to be carried to the next account.

In exercise of the power conferred on the board by the Articles of Association, the Directors have added the following gentlemen to their number, viz., Sir J. P. Lacaita, K.C.M.G., Member of the Italian Parliament; Sabino Leonino, Esq., of the firm of Leonino Brothers, of Genoa, and Commendatore Devincenzi, President of the Royal Commission for the Cultivation of Cotton in Italy, and Member of the Italian Parliament.

Sir Jas. Hudson, J. Lubbock, Esq., and R. Benson, Esq., retire from office by rotation, but are eligible, and offer themselves for re-election.

The accounts have been audited by Mr Tucker, Actuary of the Pelican Life Insurance Company, and Mr A. Ricardo, appointed by the Council for that purpose. It will rest with the proprietors to appoint Auditors for the ensuing year.

THE ANGLO-ITALIAN BANK (Limited).

BALANCE SHEET, 31st December, 1864.

Cr. CAPITAL AND LIABILITIES.	£	s	d

Examined and found correct.

ALBERT RICARDO, } Auditors.
ROBERT TUCKER, }

The Secretary having read the notice convening the meeting, and the report having been taken as read,

It was resolved unanimously—

"That the report and accounts now presented be approved and adopted, and a dividend of 6s per share be now declared."

"That Sir James Hudson, John Lubbock, Esq., and Robert Benson, Esq., be and are hereby re-elected Directors of this Company.

"That Robert Tucker, Esq., and Albert Ricardo, Esq., be appointed Auditors for the ensuing year, at a remuneration of £50 each.

"That the thanks of the meeting are due, and are hereby given, to the Directors for their attention to the interests of the Company."

(Signed) JOHN LUBBOCK, Chairman.

WM. COLES, Secretary.

16 Leadenhall street, January 23, 1865.

YORKSHIRE BANKING COMPANY.

The Half-yearly Meeting of shareholders of this Bank was held on the 1st February, 1865, in the large room of the bank, in Leeds, when there was a large attendance of proprietors. James Audus, Esq., the Chairman, occupied the chair, and there were also present the other Directors, viz.:—Mr Leeman, Mr Makin Durham, Mr Kitson, Mr North, and Mr Christopher Simpson.

Mr Scott, the General Manager, having read the notice convening the meeting, the following reports of the Directors and Auditor were also read:—

The Directors have much pleasure in meeting the shareholders, to present their usual report.

	£	s	d
The profits for the half-year ending the 31st December last, amount to £20,866 12s, out of which it is proposed to pay the usual dividend of one guinea per share (free of income tax), amounting to	15,254	9	0
To add to the new share fund	13,727	10	0
Or equal to £2 10s per share on 5,491 shares.			
Carrying the surplus	1,904	13	0
to the credit of the bad and doubtful debt fund.			

The average value of money having ruled high during the past six months, the bank has been enabled to employ its resources to more than ordinary advantage; and whilst the Directors cannot but congratulate the shareholders on the result, as shown in an increase of £3,517 13s 8d over the previous half-year's profits, they at the same time deem it right to suggest such a result can scarcely be expected to be maintained on decreased rates of interest.

With the sum now proposed to be added to the new share fund, that fund will amount to £50,791 15s, or within £6,863 15s of its completion.

The following is the statement of liabilities and assets, as certified by the Auditor, who also makes a separate report, which is annexed:—

LIABILITIES.	£	s	d
Shareholders, for capital stock	152,344	10	0
Dividends unpaid.....	176	19	0
New share fund.....	37,064	5	0
Deposits and credit balances	1,201,138	15	8
Interest on deposit receipts and rebate of discount on bills	10,867	9	5
Notes in circulation.....	113,300	0	0
Bad and doubtful debt fund	3,708	3	6
Reserved surplus fund	50,000	0	0
Profit and loss account	30,866	12	0
	1,599,556	14	7

ASSETS.	£	s	d
Bills, securities, and cash in hand	563,727	3	8
Amount invested in consols	100,000	0	0
Amounts advanced on current accounts and in bankers hands.....	910,804	4	0
Freehold property and furnishings	24,320	11	5
Stamps on hand	704	15	6
	1,599,556	14	7

In terms of the 64th Clause of the Deed of Settlement, it will devolve on this meeting to elect an Auditor for the year ensuing. Mr H. W. Blackburn, being eligible, offers himself for re-election.

JAMES AUDUS, Chairman.

AUDITOR'S REPORT.

By the 64th Clause of your Deed of Settlement, the Auditor is empowered from time to time, if he thinks necessary, to make a separate report to the shareholders of the bank.

During the eight years that I have had to look after your interests, no necessity has ever arisen for making a separate report; nor is there anything in the affairs of the bank at the present time requiring such notice.

My reasons for departing from the usual course on this occasion arise out of the disastrous and wide-spread ruin caused by the suspension of the Leeds Banking Company, which to the outside world was apparently as prosperous as the Yorkshire Banking Company.

Twice in each year there is laid before you a balance sheet and statement of the assets and liabilities of the bank, certified by me, and for which I am individually responsible as a public and professional auditor. In the case of the Leeds Banking Company no statement of assets and liabilities was laid before the shareholders, nor was any public professional auditor appointed to verify the correctness of the accounts of the bank.

The same irregular course of proceeding applied to the mode of managing the business of the bank. Mr Greenland allowed no interference with his management on the part of his Directors, not even those who were specially appointed to confer with and assist him in such management. Your Manager, Mr Scott, takes upon himself no such responsibility, but shares it with his Directors, with some of whom he is in daily communication, and once a week the affairs of the bank are brought before the whole Board.

The great source of loss and disaster to the Joint Stock Banks that have hitherto suspended has arisen from the unlimited discount and re-discount of bills. In the Yorkshire Banking Company no such transactions are known; the bills received from and discounted for customers remain in the hands of the bank until they arrive at maturity, when they are sent up to London for collection; so that the bank is never unprepared to meet any demands made upon it, having ample resources in its own coffers to provide for any call or emergency.

The liabilities of the bank on endorsements never at any time exceed £10,000.

The past due bills have not averaged more than £3,250 for the past four years, and if any loss is likely to accrue therefrom, it is always provided for in the bad debt fund before the half-yearly balance sheet is settled. At the present time the past due bills amount to £4,135.

The bad debt fund is always in excess of the known bad or doubtful debts of the bank at the time of each half-yearly making up of the accounts.

Besides the regular and periodical investigations of your Auditor, an Inspector is constantly employed in visiting the branches of the bank, and when not so engaged, is carrying on an inspection and oversight of the accounts at the head office.

The system of check and audit is, I believe, as perfect as human foresight can make it.

The vigilance exercised by the Directors, the General Manager, and the Branch Managers (most of whom are, as shareholders, largely interested in the success of the bank), and the ample securities taken for overdrawn balances, have placed the bank in a position of security second to none, as is shown by the small amount of its bad debts during the term of my audit, and by the remunerative results of its business.

The statement of the assets and liabilities of the bank certified by me is appended to the Directors' report in the usual way.—I have the honour to be, your obedient servant,

HENRY. W. BLACKBURN.
Public Accountant, Bradford.

Leeds, Jan. 26, 1865.

The Chairman then addressed the meeting and said:—You have now heard the report of the Directors, and you have also heard the special report which your Auditor has felt it his duty to make to you under the circumstances of the late failure of the Leeds Banking Company. I have but few remarks of my own to offer to you, because I could not add to the weight of the figures themselves and the statements of Mr Blackburn; but I congratulate you most heartily, that after such a blow, as the failure of the Leeds Bank might be expected to give to all confidence for the moment, this bank showed the elasticity and strength of its resources by passing through the fire unscathed. We might have looked for suspicion on the part of the public, but none such was shown, either in Leeds itself or at any of our branches; and I was surprised, and so were my co-directors, to find that instead of our deposits being withdrawn, as one might almost have expected, they rather increased than otherwise. The Directors are glad that the Auditor has thought it his duty to make this special report of the way in which the business of this bank is conducted, because we are not blind to the natural fears which the Leeds Bank mismanagement created throughout Yorkshire, and we quite concur with the Auditor that you are entitled to know how your own affairs are managed. I have been for above twenty years your Chairman, and have too large a stake in the prosperity of this bank, and so have my brother Directors, to give the reins into the hands of any Manager. We have a great respect for our Manager, but we think for ourselves. We do not understand being directors only in name and not in reality, and we therefore require to see and know all that is going on from week to week. As Mr Blackburn has told you, we have no re-discounting, but our bills remain in the case until due, ready to meet any emergency that may happen. This is the course we shall continue to pursue. Our profit for the last half-year enables us to carry a large sum to the new share account, and I have no doubt that if I am spared to meet you next August, it will be to announce that we have then saved out of the profits the whole of the new capital and to create the 5,491 new shares. In the meantime I have to express my unbounded satisfaction at the prosperity which has attended us, and my fullest confidence that, by pursuing the prudent course we have hitherto done, this bank will continue to retain the same confidence in public estimation, and be productive of the same advantages to you as shareholders as have hitherto attended us. I have now to move the adoption of the report.

Mr Edward Brown, of Bath, seconded the adoption of the report, and suggested that the remarks which had been made by the Chairman should be printed with the two reports, and circulated among the shareholders.

This suggestion, as well as the reports, were unanimously adopted by the meeting.

Resolutions were then passed approving the dividend, and also the appropriation of the surplus profits towards the new share fund, as proposed by the directors' report.

Mr Blackburn, the Auditor, was unanimously re-elected, after having first answered several questions put to him; and a very cordial vote of thanks was passed to Mr Scott, the general manager, for the efficient manner in which he has conducted the bank's concerns for so many years. A similar acknowledgment was paid to the managers of the various branches.

The meeting separated with a unanimous vote of thanks to the Chairman and Directors.

REPORT OF THE DIRECTORS OF THE

LONDON, HAMBURG, AND CONTINENTAL EXCHANGE BANK (Limited),

submitted to a Meeting of Proprietors, at the premises of the bank, 79 Lombard street, on Tuesday, the 31st January, 1865.

Gentlemen,—In fulfilment of the promise held out in their circular of the 16th ult., the Directors have called you together to submit to you a statement of the bank's position. This statement is now before you, and the Directors trust that you will consider it much more favourable than you may have been led to expect from the wild and unfounded rumours so industriously circulated for the past few months.

The long-continued pressure in commercial circles from which we are now emerging, will account for many of these rumours, from which we have suffered in common with other institutions, much stronger, in every sense, than our own.

In the face of great difficulties, you will not expect that the business of the bank, during the interval which has elapsed since our last meeting, has maintained the development and extent which its earlier career promised; but if that business has been of necessity curtailed, the Directors can, at any rate, state that no losses have been incurred by the bank in its recent transactions; and that the losses that now appear, though heavier than were anticipated at your last meeting, have been, in reality, the consequence of previous transactions.

The Directors find that the gross profits of the bank for the fourteen months of its existence amount to £24,745 3s 2d, of which £9,494 5s 3d has been earned during the past four months.

The losses during the entire period amount to £8,652.

The Directors believe that they will be able shortly to announce that they have filled the vacancies caused since the last meeting by the retirement of two of your Directors from the Board by gentlemen of high commercial position; they are also in treaty with a gentleman of great experience and ability to fill the vacant post of manager.

The petition by a shareholder to wind up the company, which was the subject of the circular before referred to, was shortly after withdrawn, and the admission of the solicitors to the petition, that there was no ground for such a proceeding, proves how unjustifiable was the attempt thus made to damage the credit of the bank.

The Directors have every confidence in the future career of the bank, and hope to see it ere long strengthened in credit and capital. They trust this brief statement will serve to dissipate the doubts and anxieties which appear to have weighed on the minds of many of the shareholders, and induce them to give the bank their confidence and support more freely than they have hitherto done.

The shareholders will now be able to see for themselves that their property has not been depreciated to the extent indicated by the late very low quotations of the bank's shares.—By order,

H. SUCKLING, Secretary.

ABRIDGED REPORT for the Year 1864.

The Directors of the National Bank have much pleasure in presenting to the proprietors the Thirtieth Annual Report of the state of the Society, made up to the close of 1864.

The following accounts in the usual form exhibit the state of the Company's affairs at the close of 1864:—

ASSETS AND LIABILITIES—THE NATIONAL BANK, December 31, 1864.

Examined and found correct,

J. N. McKENNA,
ROWAND RONAND,
T. W. KOUGH,
JOHN O'MEARA.

Since these accounts were made up a dividend at the rate of £8 per cent. annum on the capital of the bank, and an extra dividend of 16s per share have been struck on the old shares of the Company, £30 paid up, and a pro-rata dividend of £1 per share has been declared on the new issue, £15 paid up, which will be payable at the head office and branches of the Company on and after 8th February next.

In the half-yearly report issued by the Directors in July last, they announced that it was their intention to adhere to the same rate of dividend until the new shares were paid up to the amount of £30 per share, so that the shareholders of both classes might equally participate in the increased profits which have accrued in consequence of the increased capital and reserves.

There has been a call of £5 per share made on the new shares during the present month. The next call will be made in April, and the sixth call (which will bring the amount of the paid-up capital to £30 per share on the new shares, and thus assimilate them to the old) will be made in July next.

When this last-mentioned call shall have been made, the Directors propose to convene two Special General Meetings of the proprietors, to sanction the issue of 10,000 other new £50 shares, £30 paid up, for which the provision will be transferred from the rest.

These shares, paid up to £30 each, the Directors propose should be presented free of charge and by way of bonus to the proprietors of the Bank for the time being, in the proportion of one new share, £30 paid up, for every four shares held by each shareholder respectively.

This operation, when carried out, will increase the paid-up capital of the Bank to one million and a half sterling, and will leave the undivided profits, it is estimated, at nearly half a million.

The Directors believe this mode of augmenting the stock of the company, and thereby the revenue of the shareholders, is preferable to a sudden distribution of increased dividends or cash bonuses, and they advise the proprietors thus early of their intention, because the rate of profit is already so far in excess of the rate of dividend that it is proper the Directors should explain how they propose to distribute their increased revenue.

Approved by the Court,

ROWAND RONALD, Chairman.
M. J. POWER, Secretary.

N.B.—The Dividend and Extra Dividend, free of income tax, will be payable on and after Wednesday, 8th proximo.

THE LONDON AND PROVINCIAL MORTGAGE BANK OF ENGLAND (Limited).

SECRETARY.—T. N. Cathrall, Esq.

Temporary Offices—35A Moorgate street, E.C.; and 196 Strand, London, W.C.

This Company is established to provide a want long felt, whereby freehold and every description of land and property may be made easily negotiable, and greater facilities given to secure immediate advances on this class of securities.

The Credit Foncier, a Company similar to the London and Provincial Mortgage Bank of England, at their last meeting declared that their net profits for the six months ending August 27, after paying all expenses, amounted to £42,219 5s 11d, or equal to 10s per cent. per annum on the amount of capital called up.

The great delay, difficulty, and heavy charges entailed in the present mode of obtaining an advance by the mortgage of property will by this Company be avoided, and a more simple and expeditious system afforded.

A bank, with the possession of large resources, and having on its staff competent and able advisers in every capacity, will be in a position to give immediate attention to every proposal.

In addition to the ordinary business of advancing money on mortgage, this Company will act as agents to investors and borrowers, and a register will be kept of all sums available for investment and sums wanted to be borrowed. A commission will be charged on each transaction; and from this source considerable profits will be realised.

The bank will also act in the capacity of financial agents, advancing on the mortgage of county and borough rates, which are duly secured by Acts of Parliament or Royal Charter, for the purposes of erecting county asylums, workhouses, gaols, cemeteries, and other public buildings, in the various counties and towns of England.

The capital of the Company being invested on security of unquestionable character, it is intended to issue mortgage debentures at fixed rates of interest, payable half-yearly, for long or short periods, at the discretion of the investors, who will thus have ample security; and the Directors have reason to rely upon receiving large resources in this form.

Important negotiations are now pending with gentlemen of the highest commercial position for the formation of influential connections in the North of England.

Prospectuses and forms of application for shares may be obtained at the offices of the Company, of the Broker, of the Solicitors, and of the Bankers.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, 30th Aug., 1851.

Paid-up capital, £1,500,000; reserved fund, £444,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Madras, Ceylon, Hongkong, Singapore, Mauritius, Melbourne, and Sydney, on terms which may be ascertained at their office. They also issue Circular Notes and Letters of Credit for the use of Travellers by the Overland Route. They undertake the agency of parties connected with India, the purchase and sale of Indian Securities, the safe custody of Indian Government Paper, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of Remittances between the above-named dependencies.

They also receive Deposits of £100 and upwards, repayable on a notice of 10 days, and allow interest thereon at 1 per cent. below the Bank of England minimum rate of discount, rising and falling therewith, but not rising above 5 per cent. Deposits subject to longer notices of repayment bear higher rates, which may be ascertained at their office.

Office hours 10 to 3. Saturdays, 10 to 2.

Threadneedle street, London, 1865.

SOCIETIE FINANCIERE D'EGYPTE.

CALL OF £4 PER SHARE, MAKING £10 PER SHARE PAID.

Notice is hereby given, that in consequence of the extensive development of the affairs of the Societie, the Council of Administration have decided upon making a CALL of £4 per share, payable on the 27th February next, in Paris or Alexandria, at the offices of the Societie, and in London at the offices of the Agents of the Societie, the Imperial Mercantile Credit Association (Limited).

The proprietors resident in England are therefore required to pay the amount of said Call, on or before the 27th February next, to the Imperial Mercantile Credit Association (Limited), 35 Bishopsgate street, Within; and interest at the rate of six per cent. per annum will be charged from that date on all calls remaining unpaid.

The amount of £4 per share now called will not rank for dividend with the £6 previously paid until after the 30th April next, but interest will be allowed up to that date at the rate of 5 per cent. per annum.

Proprietors are required first to deposit their certificates at the offices of the Agents to the Societie, for which they will receive a call letter, to be presented to the Bankers when the call is paid, after which the certificates will be stamped and returned to the proprietrs upon the production of the Bankers' receipt.

THE LAND MORTGAGE BANK OF INDIA (CREDIT FONCIER INDIEN) Limited.

Capital £2,000,000, in 100,000 Shares of £20 each.

Paid-up, £400,000.

Debenture issue of 1864, bearing 5 per cent. interest, payable half-yearly, redeemable at par within thirty years, by half-yearly drawings, and secured by the whole of the invested funds in India, which must always be equal to the amount of debentures current, by the uncalled-up capital of the bank, and by the entire assets of the Company.

Half the above issue of £500,000 having been subscribed for at £83 6s 8d per £100 bond, the Directors are prepared to receive applications for the balance, after deducting £100,000 reserved for India, at £87 for every £100 bond, at which price they will yield 5¾ per cent. interest, independently of the advantage to be derived from the redemption of the bonds at par by the half-yearly drawings, which on the average drawing amounts to an additional half per cent. The bonds bear coupons payable 1st January and 1st July in each year, and the first half-yearly drawing will take place on the 1st January, 1866.

Applications to be made at the offices of the Company, 17 Change alley, E.C., where all further information may be obtained.

The Consolidated Bank, 7 Fenchurch street.

Report of the proceedings at the Third Ordinary General Meeting of Shareholders, held at the London Tavern, on Tuesday, 31st January, 1865.

William Charles Brown, Esq., in the Chair.

The Secretary read the notice convening the Meeting and the following report of the Directors:—

1. In submitting the annexed statement of accounts, the Directors have pleasure in congratulating the proprietary on a result which they are of opinion will, when the late severe commercial crisis is considered, be regarded as satisfactory.

2. The balance of gross profits made during the six months ending the 31st ult., after reserving an amount as provision against loss in respect of bad debts, greatly exceeding that which it is believed will ultimately be found necessary, has been £46,172 13s 10d. This amount, after deducting rebate on bills not due and the current expenses, has enabled the Directors to increase the reserve fund to £30,000, to declare a dividend at the rate of 6 per cent. per annum, amounting to 3s 6d per share,* and to carry forward £3,243 2s 11d to profit and loss new account.

3. In consequence of the stoppage of the Leeds Banking Company, of whose endorsements this Company at one time held a very large amount, the extreme difficulty in negotiating the best mercantile and financial paper, and the extent of monetary embarrassments which seriously threatened to terminate in a panic, the Directors decided, after the most anxious consideration, that it was in the interest of the proprietors that the Company should be immediately placed, not only in a position to meet every contingency, but in one of undoubted strength; and that this desirable result would be best secured by making a call. The Directors trust that this will be considered a sufficient reason for a step which, in any but the most exceptional times, might have appeared both inconsiderate and unnecessary. The prompt manner in which the call was met by the shareholders proves that they fully appreciated the propriety of the measure.

4. The Directors have elected Mr A. W. Rixon to one of the vacant seats of the Board.

5. Owing to the unavoidable absence abroad of Mr J. P. Judd, one of the Company's Auditors, the Directors have appointed Mr C. J. H. Allen in his place, which appointment, if approved of, will require confirmation by the shareholders.

6. The Company's register on the 1st January of this year included no less than 2,150 shareholders, comprising the names of a large number of the leading merchants and traders of London and the provinces, and the Directors have no doubt that the position of the Company, supported by so influential a constituency, must continuously improve.

ITALIAN COMPANY OF THE MERIDIONAL RAILWAYS.

By resolution of the Board of Directors, a General Extraordinary Meeting of Shareholders, in conformity with Article 25 of the Statutes of the Company, is convoked for Saturday, the 25th February next, at Twelve o'clock.

The meeting will be held at Turin, at the Offices of the Company, via La Marmora, Palazzo La Marmora, Borgonuovo, 8.

ORDER OF THE DAY.

Approbation of a convention, concluded with the Government, modifying the lines and conditions of the primitive concession.

The deposit of shares, according to Article 22 of the Statutes, may be made from the 10th February to the 14th of the said month:—

At Turin.....At the Offices of the Company.
At Genoa .....At the General Bank.
At Milan.....With M. Giulio Belinzaghi.
At Leghorn .....With M. R. Bastogi, junior.
At Florence.....At La Banca Toscana di Credito per l'Industria ed il Commercio.
At Naples.....At the National Bank.
At Paris .....At La Société du Credit Industriel et Commercial.
At London.....With Messrs Baring Brothers.

The formalities to be fulfilled for the deposit of the said shares were announced in the "Gazetta Ufficiale del Regno d'Italia" of the 14th January, and the shareholders can consult it, at the offices of the bankers charged to receive the shares, and also at the offices of the Company at Turin, and at the direction of the works at Naples.—(Signed), BONA, Director General.

BAY OF HAVANA AND MATANZAS (Cuba) RAILROAD SEVEN PER CENT. LOAN of £100,000, 1863.

The Half-yearly Interest on the above Bonds, due on the 15th February, will be Paid on that day, and any succeeding day, at the counting-house of Messrs J. Henry Schroder and Co., 145 Leadenhall street, between the hours of Eleven and Two o'clock. The Coupons must be left for examination two clear days before applying for payment.

London, February 1, 1865.

LONDON, CHATHAM, AND DOVER RAILWAY.

LOANS ON DEBENTURES.

The Directors of the above Company are prepared to receive LOANS on DEBENTURES of £100 and upwards, secured either on the general undertaking or upon the Metropolitan Extensions, for three or five years, at 6 per cent. per annum.—By order,

W. E. JOHNSON, Secretary.

Victoria Station, S.W.

METROPOLITAN RAILWAY COMPANY.—LOANS on DEBENTURE.

The Directors of this Company are prepared to receive Tenders for Loans on Debenture Bonds, in sums of not less than £1,000, for a term of three or five years, dating from 15th January last, with interest from date of payment, at the rate of 4½ per centum per annum, to replace bonds falling due.—By order,

JOHN HENCHMAN, Secretary.

Offices, 17 Duke street, Westminster, S.W.

PETERBOROUGH, WISBEACH, and SUTTON RAILWAY.

The Directors of this Company are prepared to receive Loans on Security of Debentures, for 3, 5, or 7 years, bearing interest at the rate of 5 per cent. per annum, payable half-yearly in London.

The interest on the above debentures will be paid by the Midland Railway Company, in terms of the Act of Parliament, which makes the debenture interest the first charge on the gross receipts of the line prior to deduction of working expenses.

H. DUDLEY COOPER Secretary.

41 Parliament street, London.

GREAT WESTERN RAILWAY.

Notice is hereby given, that the next General Half-yearly Meeting of the proprietors of this Company will be held, pursuant to Act of Parliament, in London, at the Paddington Station, on Thursday, the 2nd day of March next, at 1 o'clock, for the election of seven Directors, in the place of the same number retiring by rotation, and for the general purposes of business.

The Directors retiring are eligible for re-election, and, in compliance with a bye-law, notice must be given in writing to the Secretary, on or before the 15th instant, of the names of any proprietors to be nominated for election as Directors at the said half-yearly general meeting.

And notice is hereby also given, that the following matters will be submitted for the consideration and sanction of the proprietors (that is to say):—

An agreement between the Great Western Railway Company and the Metropolitan Railway Company as to the use of the Metropolitan Railway by the Great Western Railway Company, and for other purposes.

An agreement between the Great Western Railway Company and the London and North-Western Railway Company as to the Great Western Railway Company becoming joint owners with the London and North-Western Railway Company of the undertaking of the Shrewsbury and Welshpool Railway Company, and for other purposes.

An agreement with the Hammersmith and City Railway Company for a lease of their undertaking, and to make and enter into all such arrangements as may be necessary for that purpose, and for modifying, altering, and cancelling the existing arrangements with the Hammersmith and City Railway Company.

An agreement with the Vale of Neath Railway Company for an amalgamation of the undertaking of that Company with the Great Western Railway Company, and to make and enter into all such arrangements as may be necessary for that purpose.

To consider and approve of "A Bill for conferring further powers on the Great Western Railway Company for the construction of works, and the acquisition of lands, and otherwise in relation to their own undertaking, and the undertakings of other companies and persons, and for other purposes."

To authorise the raising of £1,000,000 for the general purposes of the Company, under the powers of the Great Western Western Railway Act, 1864, by the creation of shares or stock upon such terms and conditions as may be submitted to the Meeting.

The Chair will be taken at 1 o'clock precisely.

The Transfer Books of Stock and Shares will be closed on and from the 16th inst., and will not be opened until after the said half-yearly general meeting on the 2nd of March next.

RICHARD POTTER, Chairman.
W. FENTON, Deputy-Chairman.

Paddington Station, Feb. 1, 1865.

PROPRIETARY SCHOOL, GRAVESEND.

Head Master, Mr M. GUTTERIDGE, B.A.

The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French, and the practice of good Handwriting.

Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.

For terms and prospectuses, apply at the School.

DEANE'S TWO-HOLE BLACK PENS
which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

HOUSE FURNISHING.—
Persons commencing housekeeping, or making additions thereto, are invited to visit the great FURNISHING ESTABLISHMENT of Messrs DRUCE and CO., 68, 69, and 58 Baker street, and 3 and 4 King street, Portman square, the largest showrooms and furnishing galleries in the kingdom, containing a superficial area of 48,000 ft (upwards of an acre in extent), where they can make their own calculations for furnishing a whole house or a single room from the goods before them, which are all marked in plain figures, without the annoyance of being importuned to purchase; or, if preferred, estimates will be given free of charge. From the extent of the premises the immense stock has been arranged in various departments, in the most convenient manner for inspection and selection, and purchasers are invited to view the elegant and extensive assortment of fashionable drawing room, dining room, and chamber furniture, Brussels and other carpets, new fabrics for curtains, &c., particularly a large collection of beautiful buhl and marqueterie cabinets, tables, &c., from Paris, at extremely low prices; also 500 easy chairs, settees, and ottomans, 60 sideboards, 50 sets of dining tables, in fine mahogany, oak, and walnut, manufactured by first-rate workmen of the best seasoned material; capital dining room chairs, covered with real morocco leather, 21s 6d each; 100 bedsteads in various woods and metals, with the superior bedding, 150 wardrobes and chests of drawers. N.B.—A servant's bedroom well and completely furnished for 84s. List of bedding and bedsteads, and drawings of furniture, sent post free. Messrs Druce and Co. give a written warranty to all purchasers, and, if required, a reference to persons who have furnished from their establishment. Arrangements made for the delivery of furniture in the country. Down quilts from 5s 6d each.

RUPTURES—BY ROYAL LETTERS PATENT.
WHITE'S MOC-MAIN LEVER
TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer
Mr WHITE, 228 Piccadilly, London.
Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

NEW PATENT.
ELASTIC STOCKINGS, KNEE
CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.
WHITE, MANUFACTURER, 228 Piccadilly London.

NOTICE.

COMMERCIAL HISTORY AND REVIEW OF 1864. *As part of an early Number of the* ECONOMIST, *we shall issue a Supplement under the above title, containing a careful Digest of the leading Merchants' and Brokers' Circulars in the different branches of trade, Lists of New Companies, Returns of Prices, Accounts of the Banks of England and France, &c. The object of the Supplement being to place in possession of our readers a Commercial History of* 1864 *worthy of preservation and adapted for reference.*

In accordance with the suggestions of many subscribers, it is intended to publish the series of articles on the "Money Market for Men of Business" separately, carefully revised, and with a Preface.

The INVESTOR'S MANUAL *is now sold separately, price* 9*d stamped,* 8*d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price,* 6*d. In addition to the information formerly given, it is intended in the next number of the* MANUAL *to give such a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE IMPORTANT INQUIRY INTO THE BANK OF FRANCE.

THE *Conseil Superieur du Commerce*, who are to inquire into the present policy and action of the Bank of France, have issued a series of questions which we print elsewhere; but these are so very general, and afford scope for so very much discussion, that it may be useful if we state shortly what the questions at issue really are. In England we are quite used to the eager animosities of currency discussion, but they are rather new in France. Now, however, "Peel's Act" is capable of causing hatreds on the French side of the Channel as it did on the English twenty years ago: the "rate of interest" has created division; the "plurality of banks" has broken up many old alliances. An impartial Englishman used to bear differences of opinion on the currency like all accustomed differences, cannot but feel a melancholy interest in the revival of animosities which were once felt in England, but which now he feels no longer.

The points of the present inquiry are as follows:—

First—and this is the point of *European* importance—it is contended by M. Pereire and others that the present policy of the Bank of France is erroneous. After a long series of experiments in other policies,—after spending many millions in useless purchases of gold,—after permitting, by a long inaction, the metallic reserve to run low,—the Bank of France has at last adopted the true policy. It raises the rate of interest, and it raises it considerably, at the early stages of a metallic drain. But, unfortunately, this remedy, like all good remedies for great diseases, is a severe remedy. *It hurts.* A vast number of persons object to being hurt. The little traders of Paris say, "Why should we pay the Bank "of France more just when things are going down,— "just when we are beginning to lose? Just when other "commerce declines, that of the Bank improves, and *we "pay for it.*" This feeling will last as long as human nature. It is the objection of the sick baby to the remedy which cures it. But in France, where the subject is but new, the objection is especially strong, and men of name, means, and influence, are found to head it. The other points of the French inquiry are mainly important to France alone; they are important to others only because her welfare is important to others. But the elevation or non-elevation of the rate of discount by the Bank of France is a matter of European importance, and is most important to England. Lombard Street has often been perturbed because the Bank of France was long too lax, and then began tactics of irregular stringency.

Secondly. M. Pereire has also proposed that there should be another great bank of issue in Paris besides the Bank of France, and in some sort on a level with it. And this of course opens the great question, is it advisable in the abstract, and where we begin *de novo*, to grant a monopoly? ought there to be one issuer or many? and likewise peculiar questions incident to the state of Paris and of France. As we lately explained, we differ from M. Wolowski and his school on the abstract question. When you want to plant and develop a paper currency in a country, we maintain that the system of local issues is, where it can be applied, by far the most rapid, by far the most searching, by far the most effectual for that end. But in Paris there is no question of a new introduction of paper: paper has been already introduced. The great economy of the use of the note for the use of the franc has been attained. There is no further economy to be gained by the change of one note for another. On principle, when a monopoly of paper issue has from whatever cause been established and has attained its end, has substituted the paper for the coin, it is desirable that the State should enjoy the fruits of it, and that it should not be again disturbed. The wished-for economy has been gained, the bank ought to farm it for the State, and the State, that is the public, ought to enjoy the revenue from it.

There is great danger, too, in the quarter from which the proposal to establish a new bank emanates. It comes from the same people who object to a rise in the rate of discount when necessary. There is a certain notion among many merchants that "good bills ought always to be discounted at a reason-

Digitized by Google

"able rate;" there is a notion on the Bourse of Paris and elsewhere, that you ought always to be sure of money on good shares—shares in substantial undertakings—at easy rates. Such views are perpetual in a business community: they will last while there are such communities. But it is in the highest degree dangerous to found a bank to develop such views. A bank which should issue notes on shares and other Bourse matters, and pay no, or but a secondary, regard to paying those notes in gold, would be one of the most mischievous institutions imaginable. A bank which, *on principle*, did not raise the rate of interest when it should, would be a perplexing impediment to a good bank which did raise that rate.

Thirdly and lastly. There is the question of provincial or departmental banking and issue, and this is one of the highest difficulty and importance, on which it is not possible for foreigners unacquainted with the special tastes and dangers of the rural districts in France to speak with decision in detail. Principles may be laid down, but these are necessarily of a general character, and of the difficult details incident to their application Frenchmen alone can judge wisely. But an Englishman can say this with confidence, that there is no part of our rural economy in which England is so superior to France as in the number and the diffusion of her banks. Every town of the least importance in England has two or even three. Every small town has always in a rich part of the country one, if not two banks; in all parts of the country such banks have an agency. In France, there is no such diffusion—cheques on running accounts are unknown throughout the provinces. The Bank of France is bound by law to establish a branch in every department, but in a great number of instances it has seen, and wisely seen, that for many years it would not pay to do so. The result may be broadly stated, while *all* English money comes to London, and makes it a great monetary centre; little French money comes to Paris, and so it is an inferior monetary centre. It is probably true that, from a variety of causes, many of the departments of France are poor in comparison with many English counties. It is most certain that the whole rural organisation of France differs widely—differs totally—from that of England. But the poorer France, is the more necessary it is that she should economise her capital—that she should use the most effective means of economy—that she should lend her capital to the great centres where it can be made most use of, where it can be employed most profitably.

The development of banking in England and Scotland was, as a matter of fact, affected by the system of country issues. The surplus form of credit—the bank note—with us, as every where, preceded the more complicated form, the bank deposit and the cheque book. The country issues developed credit, the *idea* of credit, the *use* of credit, speaking roughly, throughout England; and gradually a much better system, a system of deposit banking, has grown out of it. But in France the departmental banks failed in 1848. The notes of the Bank of France could be made legal tender, because it was one and well known; those of the departmental banks could not, because they were many and little known. Accordingly there was a run upon them; they either failed or merged in the Bank of France. After such an experiment, there would be grave difficulty in recurring to a system which had such an ending. We may lay down as a principle, that every credit currency permitted in France should be such as *could be made a legal tender the day after a revolution*. If February, 1848, is forgotten in the laws, it will be remembered in their practice. This condition may narrow our choice of permissible expedients, but we must accept it, because it is inevitable.

But one thing is clear. Every thing that can be done ought to be done to diffuse banking in France,—to concentrate in Paris the money now diffused in the provinces. This is the latent truth which M. Pereire dimly perceives,—this is the great end for which he imperfectly works. He wishes to make Paris a greater monetary centre than it now is. And this is to be effected—as far as it is to be effected—not by the multiplication of metropolitan notes, but by the concentration of provincial capital.

THE MEANING OF THE MOVEMENT IN RUSSIA.

THERE is a curious analogy between the situation of Russia as revealed in the debate in the Diet of the province of Moscow and that of France in the latter years of Louis XIV. De Tocqueville, it will be remembered, pointed out in a work which, though less widely read than his "Democracy in "America," is even fuller of suggestive truths, that long before the Revolution the bureaucracy, or, as it was called, the King's Service, really administered France. The Intendants and sub-Intendants, as they were styled, were as powerful as Prefets and sous-Prefets are now, were always fighting the nobles, and had, before the death of Louis XV., completely destroyed their power, except as owners of the soil and members of a class privileged and exempted from taxation. When, therefore, the governing power in Paris made it an object to sweep away feudalism they found the work easy, for the proprietors, already defeated by the officials, and aware that the peasantry regarded them with dislike, were unable to resist, and were in fact deprived of all their privileges and most of their possessions by the events of a single month. The Russian nobles, it would appear, are afraid that they may be about to undergo the same fate. The decree of emancipation now carried into full effect has deprived them completely of their legal prerogatives, the new system of conscription strips them of their illegal but tremendous power of selecting recruits, they have failed in many provinces to induce the peasants to pay rent for the village lands, and many of their number have been entirely impoverished. Those who survive find themselves owners of large tracts of unsettled land, forests, mines, and other property, which will only gradually become valuable. Meanwhile, the official caste dislikes them, is perpetually issuing "circular orders" in the interest of the peasantry; and there is, in Count Orloff's opinion, danger that in time the Czar will govern without assistance, supported only by a million bayonets—that "the "Emperor will be not only the first but the only gentleman in Russia." That is a remarkable expression, coming as it does from the lips of a noble in high favour at Court, who holds the office of Grand Chamberlain, and who represents the family so well known in Russian annals for its wealth, its decision, and its ferocity. The saying was received with enthusiasm by the Diet, and to judge from the whole tenor of the debate, represents clearly the secret fear of the nobility, whose political stronghold is this Moscow assembly.

The Russian aristocracy, however, think they have still one chance of regaining if not their old position, at least one of very considerable prosperity and prestige. Despite the imperfection of all Western knowledge as to the true course of Russian affairs, there can be little doubt that the Imperial Treasury is very seriously embarrassed. The extent of that embarrassment can only be decided by those who are acquainted with that first mysterious datum, the true conditionof the State paper currency of Russia, *i.e.* by about three persons not at all likely to speak out, but there is evidence enough to prove that it is very serious. The official financiers, with every disposition in the world to make the best of the thing, have not ventured to publish a statement for the past year, have acknowledged that they expect a considerable deficit for the next, and have resorted to the ruinous expedient of a large lottery loan. Moreover, the revenue is so collected as not to admit of very large increase without a change of system which the officials are very reluctant to commence. Free trade would no doubt create a considerable income, but then free trade implies many other kinds of freedom. and just at this moment the Government has so many difficulties to meet that it is inclined to keep all the power it can manage to retain. New taxes, again, are very difficult to raise. It has always been somewhat of a puzzle to us as economists to understand why a genuinely absolute Government, *i.e.* a Government released from the dread of insurrection by popularity with the masses, should have such exceeding fear of new taxes, but experience demonstrates the fact, which is true in India and France, no less than in Russia. Should the Government of St Petersburg not be relieved by unexpected occurrences, it will be necessary for it to summon some kind of popular body, either a Representative Chamber or a great Council of Notables invested with certain prerogatives of taxation, or some other corporation, so to speak, which may stand between the throne and the people in the matter of money raising.

In that Council the nobles hope they may play a considerable part. They alone in Russia are educated, they alone have personal access to the great State officials, they alone

Digitized by Google

compose a body which, should the people ever prove intractable, may mediate between them and the Emperor. They think, therefore, that if instead of being swallowed up in the general body of representatives they can secure a "High "Chamber" or hereditary House of Lords, they may gain a very high position. It will be necessary to conciliate them. It will be difficult to send them to Siberia untried. It will be hard to refuse to listen to their criticisms on oppressions carried out, not for the benefit of the State, but of the Civil Service. They will in fact stand nearer to the throne than the officials, and there will be a great disposition to allow them, as they require no pay, to replace the salaried class, thus at once elevating them to the position occupied by the landed gentry of Great Britain. They desire in short, as their power over their peasant has been taken away, to obtain a great political position, and naturally enough look to this country for hints. They press on each other the danger of being ground between the two stones of the mill, the throne and the peasantry, and on the Emperor the danger of standing utterly alone. Influenced by these ideas, the nobles of Moscow, by a nearly unanimous vote, have accepted an address praying the Emperor to call a Council consisting of two Chambers, one to be composed of hereditary nobles—a Council authorised not to make laws, but to tell His Majesty the truth, now kept from him, as they openly declare, by the bureaucracy.

This address, it would seem, is not altogether acceptable to the Crown. The nobles have a prescriptive right to debate, and a guaranteed right of petition, but the Russian Court is very rarely at a loss. The nobles had, it appears, at previous sittings excluded certain members of the Diet, or persons who claimed to be members, from their right to vote, and the Senate, which is a strictly official body, took advantage of this circumstance to annul all the proceedings of the Session, thus making the address informal. This relieves the Emperor from the necessity of a reply, but still the main points of the situation remain unaffected by an order purely formal. These points are, that the Russian Court is in such want of money that it may be compelled to summon some kind of representative body to its aid; that the nobles hope to make part of this body; and that they will, if they succeed, direct their efforts towards the local management of their districts, to become, according to the honesty of their purposes, either an administrative oligarchy or a body of dignified country gentlemen. We cannot wish them success until we know more of their real intent, but their movement is interesting enough to demand careful study, and far more accurate reporting than it has yet obtained. If they succeed, there will still be three countries in the world—England, Russia, and Austria—in which an hereditary aristocracy retains, besides its social influence, a direct and important share in politics and administration.

THE DIFFERENCE BETWEEN CANADA AND THE UNITED STATES.

Parliament has opened with little more than that degree of political animation with which its proceedings are usually conducted during the second week of August, after the great majority of its members have fled to the moors of Scotland or the Continent. The Queen's Speech was necessarily one of no interest; but we doubt if there has been a single session since the Reform Bill, when neither the leader of the House of Commons nor the leader of Opposition has uttered a single word, and the debate on the Address has been put up to open competition amongst the Irish members. The only discussion of the smallest interest was Lord Derby's criticism on the conduct of the United States in relation to Canada, and especially with regard to the Convention of 1817, regulating the naval force on the Lakes, and Lord Russell's reply. As the official correspondence has since been published, and it is now tolerably evident that the irritability of the Federal *Government*, though probably not of the Northern people, has been much exaggerated by public rumour and Lord Derby, it may be well in the interests of both truth and peace to give a concise account of the circumstances which led to the notice for terminating that Convention, and of the present position of affairs, which, as regards the attitude of the administration, is certainly not so threatening as was supposed.

On the 19th October, a party of men, from twenty to thirty in number, starting from Canada, and apparently commanded by Lieutenant Bennett H. Young, who was afterwards acknowleged by Mr Jefferson Davis as regularly commissioned by him, entered the State of Vermont, robbed the three banks in the place of 200,000 dols, caught horses to mount the party, fired on a crowd of unarmed citizens, wounding three men, one of whom died from the wound, and set fire to one of the hotels. The whole affair occupied only three-quarters of an hour, and the raiders immediately started for Canada, where thirteen of them were arrested. On the 21st October, Mr Seward was quite satisfied with the energy of the Canadian authorities, expressing the President's "sincere satisfac- "tion" with their proceedings. On the day on which the raid occurred, however, Lord Lyons had been dining at a house in New York, at which he met General Dix, who was called out during dinner, and on his return informed Lord Lyons of the violation of the American territory by a band of Confederates from Canada, and that he had given orders to pursue them even into Canada, were it necessary, for their apprehension, citing the cutting out of the Caroline by the Canadian loyal forces during the rebellion in Canada as a precedent. Of course Lord Lyons remonstrated, and for this time apparently with effect, for General Dix promised to telegraph at once instructions "to enjoin upon the Federal officers the greatest "caution with regard to the British territory." But about a month before the St Albans raid, on the 17th September, a very similar and about equally successful effort had been made on Lake Erie by a Confederate expedition, also from Canada, to plunder the property of the United States, and attempt to set free the Confederate prisoners on Johnson's Island. Two steamers were seized and subsequently scuttled by the Confederate band, a good deal of plunder obtained, and a good deal of alarm caused, though the ultimate object of the plan, the liberation of the prisoners, was not attained. Under these circumstances, Mr Seward called the attention of the British Government, through Mr Adams, to the insecurity of the Canadian frontier, in a despatch dated three days after the second (or St Alban's) infringement of the American frontier by a Confederate expedition from Canada. The despatch is written in very good temper and a very moderate spirit, not free from anxiety, not wholly free, perhaps, from irritation, but still very much more conciliatory and respectful in tone than many of Mr Seward's former despatches. It gives the six months' notice required before either Great Britain or the United States can increase their force on the Lakes from the number of cruisers allowed to each nation by the convention of 1817 in the following words:—"It is now my "duty to instruct you to give notice to Earl Russell, in con- "formity with the Treaty reservation of that right, that at the "expiration of six months after you shall have made this "communication, the United States will deem themselves at "liberty to increase the naval armaments upon the Lakes, if "in their judgment the condition of affairs in that quarter "shall then require it, and you will be careful to advise us "of the day on which this notice is given. You will assure "the Earl, however, that this proceeding is adopted only as a "necessary measure of national defence, and not only with no "purpose of hostility, but on the other hand with a desire, "no less earnest than heretofore, to preserve the most friendly "relations with Great Britain. Moreover, this Government "will in every case direct its best efforts to prevent invasion "of British territory, whether by way of popular retaliation "or otherwise." And Mr Seward's tone is accurately reflected in the note presented by Mr Adams to Lord Russell a month later. It will be observed that the notice is not a notice of positive intention, but only of conditional intention to increase the force on the Lakes in case the condition of affairs on the Canada border shall in their judgment require it. Mr Seward also suggests that the United States Neutrality Act of 1838 would give the British Government more power to arrest illegal expeditions planned on British territory than the present Foreign Enlistment Act, which he thinks has failed. Lord Russell's reply is exceedingly firm and wise. He points out that with regard to expeditions fitted out in England, the difficulty has always been not so much insufficiency of power, as insufficiency of evidence to prove the real object of the expedition to the satisfaction of a Court of Justice. This would apply just as much to the American Act of 1838 as to our own Foreign Enlistment Act. He thinks, however, it would not apply equally to expeditions fitted out so near the American territory as Canada. The subject is undergoing the most diligent examination by the law officers of the Crown, and should the Government of Canada fail to put an end to these expeditions, and further means of repression be

Digitized by Google

found desirable, "Her Majesty's Government will not hesitate "to propose them." With regard to the Convention, of course Lord Russell merely remarks that the United States have a perfect right to increase their force on the Lakes after due notice, that the British Government may do the same, but that he hopes, at least after the restoration of peace, the old arrangement will be returned to. This hope Mr Adams had, however, anticipated by asserting very strongly on the 31st October that as soon as need for additional force had ceased, the old arrangement would be gladly re-enforced. Of course Lord Russell points out good-humouredly the utterly untenable character of objections urged by the American Government against our giving a right of asylum to the "active "enemies" of the United States. No doubt, this may result in the planning of illegal expeditions, but it is a right which no free nation will refuse to political refugees.

Nothing further of any moment occurred, except rumours (tending to alarm still further the authorities of the United States) of widely-spread plots to burn towns near the Canadian frontiers, till Judge Coursol dismissed the St Albans raiders, denying that he had any jurisdiction, and General Dix reissued the unfortunate order (within three days cancelled by the President) to pursue raiding parties, if necessary, over the Canadian frontier. The correspondence, probably, does not show us completely the effect of this transaction on the United States Government. The Canadian goodwill was so cordially manifested, and the means taken to repair the effect of Judge Coursol's decision was so prompt, that it probably had an opposite effect to what we feared. There is no evidence of increased irritation—rather, on the contrary, of a sincere wish to let the Canadian efforts to prevent these raids operate without embarrassing them by any unseasonable display of bad temper at Washington. On the whole, so far as we have the means of judging by this correspondence, we find nothing at all to justify the strong language used by Lord Derby in the House of Lords. That two great outrages were committed from Canadian territory is certain; that the air was full of rumours of plots afterwards, and that the inhabitants of the American States bordering on Canada were grievously alarmed, and memorialised their Government to take more effectual means for their protection, is also certain. And under such circumstances we doubt whether it would have been possible for the American Government to act otherwise than they did in giving notice to increase their forces on the Lakes, if it should appear needful, so long as the war lasted. We have been formally assured that there is no intention whatever to terminate the old arrangement finally. The American Government express their wish to return to it as soon as possible, and there is no reason to doubt their sincerity. We confess we think Lord Russell's reply on this head to Lord Derby was complete, and that the correspondence just published shows, on the whole, a more moderate and reasonable spirit than any in which our Foreign Minister has been engaged with Mr Seward since the beginning of the war. That may not be saying much. But there is certainly less reason to fear any serious quarrel on this subject than the various rumours and the vague representations of the Press had led us to fear.

AMERICAN IRRITATION AND ITS DANGERS.

When two neighbours quarrel, the position of a third party who has relations with both becomes always uncomfortable, and usually perilous; and this without any blame on his part, or more than natural unreasonableness or one-sidedness on theirs. The neutral has to encounter not only the general irritation with which combatants regard neutrals, but the liability of strict neutrality to be resented by either belligerent when its practical operation is to give an advantage to the other, as well as a constant pressure from both sides to stretch some point of municipal or international law to their respective advantage. The most conscientious adherence to strict right and justice avails the unhappy neutral nothing. The most patient endurance of incivilities, and even injuries, from right and left avails him nothing. By swerving from righteousness, he might contrive to offend only one neighbour; by adhering to it, he is certain to offend both.

This is precisely our position with regard to the Federals and Southerners. Each party is striving for what it has most passionately at heart,—for what, if not actually existence, has grown to be regarded as only slightly less dear than existence. The South is struggling for independence of a Government which it abhors. The North is struggling for the preservation of the Union which it loves. Each party, naturally enough, but with equal injustice, deems its cause so sacred and its object so invaluable as to warrant it in trampling upon every regulation of ordinary law and usage, and in claiming that other nations should hold pretty nearly the same estimate of this cause, and should, for the sake of aiding it, both disregard their own interests and depart from their habitual practice, and alter their deliberate laws. Between the two, our position has been singularly difficult. We are sure we have done our best. We are sure we have borne much. We have acted as friendlily towards one belligerent as we could do without positively wronging the other. We have been far more patient than is our wont under much rudeness and much vehemently expressed ill-temper. We have made every allowance for excited feeling and bitter disappointments. Naturally enough, we have incurred the angriest animosity from the belligerent for whom we have done most and from whom we have borne most. For one vessel laden with arms and warlike stores that has entered a Southern port, twenty have entered Northern ports. Nine-tenths of the Federal forces have been clothed and armed with British imports. Nine-tenths of the Confederate soldiers who have fallen have been slain by guns made in the United Kingdom. As a set-off against this, two vessels built in our harbours escaped the meshes of our law or the vigilance of our Government, and have since destroyed many Federal merchant ships and mortified much Federal pride. In one of these cases, however, it is now admitted that our law would not have warranted any interference, and in the second case, it is now well known that, though still somewhat doubtful about the law, the Government sent down orders to arrest the vessel, which escaped only by a clever stratagem. In the case of the Alexandra, a parallel adventure, the Government seized the vessel, were cast in a court of law, and had to pay heavy damages for their interference. In the case of the celebrated Rams, though it was affirmed at the time, and all but admitted afterwards, that neither law or fact would justify the proceeding, our Government were so scrupulously anxious to avoid giving the slightest ground for umbrage to the United States that they ventured to seize them, and commenced a costly action against the builder;—the end of the matter, however, was that, after much legal consideration, it was thought wise to abandon the proceedings they had commenced, and to purchase the vessels they had seized.

Once, and once only, since this miserable strife began have we acted with anything like promptitude or pe emptoriness in reference to Federal injuries or affronts, and that was in the Trent affair, when the insult was so great and so indefensible that even Mr Seward was obliged to confess—at the end of a long despatch saying what he would have done had he been able—that he could do nothing else than at once concede our demand. For the rest, it must be remembered that we have made few and very mild complaints, and have met with still scantier redress and still milder reparation, in reference to the cases of British subjects who have been kidnapped and imprisoned,—feeling, as we have done, how very difficult has been the position of the United States in these matters. The vulgar and irrelevant ill-humour displayed by Mr Seward in his answer to Lord Wharncliffe's well-meant effort to alleviate some of the evils of war, we laid it more at the door of the man than of the nation, though that man was Secretary of State for Foreign Affairs; for we remembered that Mr Lincoln had almost always been decent and humane. And when Mr Webb, the United States Minister at the Court of Brazil, went out of his way to express a silly and indecent wish that the outrage just perpetrated on Brazil had been perpetrated upon England instead, we contented ourselves with feeling that such a piece of impotent malevolence would have closed the official career of any European Minister at once and for ever. Nor should it be forgotten that, when pressed by remonstrances and complaints of the frequent seizures of British ships by Federal cruisers, on very questionable grounds, the invariable answer of Earl Russell has been:—"Wait for the decision of "the American prize courts; they have always hitherto been "fair, and I have no doubt they will do you justice."

The plain truth, however, is that "the head and front of "our offending," the real reason why the Federals are so angry with us, and why it is so impossible for us to pacify them, is that their views and ours as to the wisdom and

Digitized by Google

righteousness of the war in which they are engaged, are so radically at variance. They do not profess to have much ground for complaint against our Government; but they think they have much against our people. We cannot look at things through their spectacles, and they cannot understand why we should not, nor forgive us because we do not. It is true that one or two of our most famous and able orators, not a few of our writers, and several of our journals, have embraced their cause, repeated their pleas, echoed their extravagances; but, notwithstanding, they have a conviction, half instinct, half observation, that the English *nation*, as a whole, is not on their side, does not wish them success, does not share their passions, does not approve of their proceedings. The fact is so: we cannot deny it: we cannot alter it. And it is this which irritates them;—it is an irritation which unhappily it is simply impossible by all our efforts and all our caution to allay.

Thus only can we explain the last measure of the United States,—the resolution of the Senate, which is supposed to represent the wise and moderate element of the American people, to give notice for the termination of the Reciprocity Treaty with Canada. There is no *rational* motive—no motive, we mean, of which *temper* is not the root—for this measure. It is needless, and will be injurious to the States. The Reciprocity Treaty has been of such manifest benefit to the Americans—even apart from its having put an end to the perpetual quarrels between our citizens and theirs about fishery and other rights—that the American Chamber of Commerce at Detroit lately addressed a most candid and unanswerable memorial to their own Government remonstrating against the abolition of a treaty that had worked so well for *them*.

If the Government of the United States persist in their apparent intention of abrogating these treaties, it will be difficult for Great Britain to regard the proceeding in any other light than as either an intimation of intended or expected hostility, or as an expression of ill-temper which requires to give itself vent even at the sacrifice of important interest. But we hope better things.

COMPARATIVE TAXATION OF IRELAND.

The Irish have a vague, chronic, general, but very strong impression that they are an ill-used and trampled upon people. No doubt there was but too much ground for this impression in former days. The facts have long since been remedied or reversed; but the persistent habit of mind generated by those facts still, and not unnaturally, survives;—as was made manifest enough in the debate on the address on Tuesday night. The notion takes a variety of forms and breaks out in many places. Sometimes there is an idea that more jobs are perpetrated in and for England and Scotland than in and for Ireland;—the impression on this side of the water is just the opposite one, but that makes no difference to the complainants. Sometimes it is alleged that places are given to Englishmen for which Irishmen are equally or better fitted, and of which they are far more eagerly desirous and more pressingly in need. Sometimes the complaint is that little comparative attention is paid in Parliament to Irish members or devoted to Irish subjects, although, till a few years ago, Ireland directly or indirectly occupied nearly half the available nights of every session. Last year a new view took possession of the Hibernian mind. It dawned upon Irishmem that Ireland was *overtaxed* in comparison with Great Britain; that she paid more to the revenue than was bargained for by the Act of Union, more than her fair share in reference to population, greatly more than her share in reference to wealth. It was true that Ireland had been long exempted from many taxes which Great Britain pays, and is thus exempted in some cases still; that no taxes are levied in Ireland which are not also levied in Great Britain; that some corresponding taxes are heavier here than there, and that none are lighter;—still the impression remained upon the Irish mind; the Corporation of Dublin made a special report upon the subject; and a Parliamentary Commission was appointed to examine "whether these things were so." The Commission did not report: probably they shrunk from the labour of analysing their materials, or they could not agree upon their verdict; but they presented an awful amount of perplexed financial figures and appendices. Out of these and out of Dr Neilson Hancock's very clear report upon the facts, we shall endeavour briefly to show our readers where the truth really lies.

There are two separate questions—one very important, the other comparatively insignificent and uninteresting;—*first*, Has Ireland contributed more than her share of the national taxation as that share was fixed by the Act of Union?—And *secondly*, Does she now contribute more than she ought to do in reference to the comparative wealth of the two countries? The first question is of the least moment, and far the easiest to answer. We will give only results, for the complicated details through which those results are arrived at would be merely confusing and unintelligible.

The debts of the two countries were not consolidated till 1817, when they stood as follows:—

	£
Separate Debt—Great Britain	688,820,032
— Ireland	107,380,158
	796,200,190

At the time of the Union, the separate debts had stood thus:—

	£
Great Britain	420,305,944
Ireland	26,841,219
	447,147,163

By the Act of Union it was settled that all the future joint expenses of the Empire should be paid in the proportion of 15-17ths by Great Britain and 2-17ths by Ireland. But as the British debt exceeded this proportion by 218,996,802*l*, it was of course just that that amount should be considered as a *separate* debt due by Great Britain, and should be charged distinctly upon her revenues, or compensated by special taxes to be laid upon her. Now, was it so compensated? Yes, and more than compensated, inasmuch as between 1801 and 1817, when the separate debts were consolidated, Great Britain had contributed more than her 15-17ths of the revenue, by a sum of 123,737,239*l*, which, with interest, if converted into stock as the surplus arose, would have amounted in 1817 to 244,996,000*l*, or 25,669,598*l* more than sufficed to extinguish the original excess of British debt.

During the whole period since the Union, taxes and Excise duties on many articles and under many heads have been levied in Great Britain but *not* in Ireland, and on some articles heavier duties have been occasionally levied in Great Britain *than* in Ireland. Thus bricks, beer, soap, candles, glass, printed calicoes, and a host of other articles were exempted from taxation in the favoured sister island;—spirits, malt, &c., were more lightly taxed there. Since 1825 Ireland paid no assessed taxes, and her Stamp duties were far lighter. For a long period, too, she was exempted from our heavy income tax, and even now she pays some parts at a lower rate. Parliamentary returns, showing all these matters in detail, give the uncompensated taxation of Great Britain—the yield, that is, of taxes paid *here* and not paid *there*—from 1801-1843, thus:—

	£
Taxes	420,427,731
Excise—District duties	264,171,318
— Differential duties	103,846,470
	788,445,519

No returns exist since 1843 to show the same excess of taxation up to the present time, but it has been calculated, independently of differential duties, to amount to more than 160,000,000*l*. In all, therefore, Great Britain has contributed to the National Exchequer in the course of the last sixty-three years, 948,445,519*l*, or nearly *one thousand millions*, against which injured Ireland has nothing to set off.

Next. Does Ireland pay more to the revenue than she agreed to pay by the Act of Union, viz., 2-17ths, or between *one-eighth* and *one-ninth* of the whole? On the contrary, she pays only *one-tenth*. Thus, according to a Parliamentary return of March, 1862 (and corrected by the addition of the post office):—

	£
Gross revenue of the United Kingdom, 1861	70,283,674
Revenue received from Ireland	7,142,335

Or, if we take Dr Neilson Hancock's correction—

	£
Gross revenue	68,830,573
Irish share	6,842,090

Or, if we take the loose calculation of the Dublin Corporation, who *guess* that Ireland paid 1,000,000*l* more than is credited to her:—

	£
Gross revenue	70,283,674
Irish share	7,842,090

Digitized by Google

Now, 2-17ths of 70,283,674*l* would give 8,270,000*l*. Ireland, therefore, pays from a million to a million-and-a-half yearly less than she covenanted to pay.

We now come to the second question, as to which we can speak with much less confidence. Is the proportion contributed by Ireland to the National taxation larger than it ought to be in reference to her capacity to bear it? In proportion to her *numbers* we know it is far smaller. In 1861, her population was just *one-fifth* of the whole of that of the United Kingdom, and her taxation was *one-tenth*.

The only method we have of estimating the comparative wealth of the two countries is by means of the income-tax returns. By these we find in 1863 that the amount of property and income assessed was

	£
Great Britain	294,000,000
Ireland	23,400,000

If this were an accurate gauge, Ireland ought fairly to have paid 5,575,000*l* instead of 7,842,000*l*, 6,842,000*l*, or 7,142,000*l*, as she is variously stated to have paid in 1861. But the return quoted is not an accurate gauge (though *how far* inaccurate we cannot say)—for two reasons:—*first*, the assessment is differently made in the two countries, *viz.*, on the annual value in England and on the Poor-law valuation in Ireland, which is stated to be 25 per cent. under the real value. Dr Neilson Hancock affirms that at all events 12½ per cent. may fairly be added to the *land* assessments in Ireland. If this be so (16,337,000*l* at 12½ per cent.=2,042,000*l*), it would raise the Irish income from 23,400,000*l*, to 25,442,000*l*, and the contribution that Ireland ought to pay from 5,575,000*l* to 6,057,000*l*. In the *second* place, holdings are very small in Ireland, and as a rule it is believed that the proportion of persons whose income are under 100*l* a year, and therefore escape the property tax, is greater in Ireland than in England. Taking all these matters into our estimate—and it is a case for nothing but an estimate—it is probable that the taxation of the two countries,—wealth, wages, numbers, and realised property all considered,—is not unfairly adjusted.

This much at least is certain, and surely ought to satisfy the Irish,—that the amount of *special* British taxation—*i.e.*, of taxes from which Ireland is exempted—is nearly *four* millions a year. Thus in 1862, it was:—

	£
Railways, stage carriages, &c.	619,769
Land tax	1,128,139
Assessed taxes	2,037,825
Difference in Schedule B 3d instead of 4½d	151,000
	3,936,000

SAVINGS' BANKS RETURN.

THE following return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending January 28, 1865:—

	Total Amount received by the Commissioners.	Total Amount paid by the Commissioners.
SAVINGS' BANKS:—	£ s d	£ s d
In money and interest credited	72,565 10 4	159,831 18 0
To transfer certificates from Post Office Savings' Banks to Savings' Banks	218 16 9	...
By transfer certificates from Savings' Banks to Post Office Savings' Banks	...	6,072 1 11
Total	72,784 7 1	165,903 19 11
POST OFFICE SAVINGS' BANKS:—		
In money and interest credited	182,964 7 3	...
To transfer certificates from Savings' Banks to Post Office Savings' Banks	6,072 1 11	...
By transfer certificates from Post Office Savings' Bank to Savings' Banks	...	218 16 9
Gross Total	189,036 9 2	218 16 9

	£ s d
Total amounts on January 28, 1865, at the credit of—	
The Fund for the Banks for Savings	38,950,241 19 9
The Post Office Savings' Banks fund	5,184,480 14 8
Total	44,134,722 14 5
Ditto—by last monthly account	44,039,024 14 10

QUESTIONS PROPOSED BY THE CONSEIL SUPERIEUR DU COMMERCE IN ITS INVESTIGATION OF THE CURRENCY QUESTION.

On Monetary Crises.

1. What were the causes of the monetary crisis of 1863-4? 2. What analogies and what differences did that crisis present with preceding ones? 3. Have monetary crises a tendency to become more frequent? Have they a tendency to become more general? 4. What in a country are the causes that regulate the rate of interest? 5. What are the causes which during the last ten years have influenced the price of the precious metals? 6. What are the causes which have recently reduced the amount of disposable capital? 7. Has there been a decline in the formation of savings, or a bad direction given to savings? 8. Has there been an insufficiency of capital or an excess of enterprise? 9. Has the establishment of several Finance Companies on the joint stock form exercised any influence on monetary embarrassments? 10. Are the existence and the organisation of such Companies calculated to delay or hasten causes of crisis? 11. What influence has the participation of French capital in foreign enterprises exercised on the home market? 12. What advantages or what inconvenience does the quotation at the Bourse of Paris of foreign securities and foreign loans present? 13. What during the last ten years have been the imports and exports of the precious metals? Are there any indications that the information collected by the Board of Customs on the matter can be made more complete? 14. Has the displacement of specie taken place on a large scale? 15. To what does that displacing give rise? Does it exercise a marked influence on the transactions in, and the lending of, money? Are there any means of destroying or limiting that action?

On Paper Money.

16. What is the utility of paper money? 17. Is the part played by that money tending to become very important? 18. Is it by issues of notes payable to bearer at sight, or by means of compensations by transfers, current accounts, cheques, &c., that credit has a tendency to extend? 19. Can the employment of paper money take an indefinite extension? If not, in what limits shall it be confined?

On the Conditions of a good Paper Money.

20. Under what conditions does the employment of paper money present no inconveniences? 21. Is the constant convertibility of notes indispensable? 22. Does the unity of the bank note promote the circulation of it? 23. What are the inconveniences and advantages of the plurality of banks, whether general, or of limited circumscription?

On the Establishments which Issue Paper Money.

24. Does the Bank of France fulfil all the conditions required for a bank of issue? If not, what modifications would be desirable in its organisation? What advantages or what inferiority does the organisation of the Bank of France present in comparison with the organisation and the *regime* of banks, whether of issue or deposit, in other countries, particularly the Banks of England, of the United States, of Hamburg, and of Holland? 26. Is there advantage or inconvenience in separating the Issue department from the Discount department? 27. If the notes of the Bank of France were made a legal tender, as is the case with those of the Bank of England, would it have the effect of promoting the circulation of them? 28. What number of signatures ought a bank to require for its true security in the discount of bills? 29. Ought the issue of notes to be limited? Ought the issue to be proportionate to the metallic reserve of the capital?

On Banking Operations.

30. At what level ought to be maintained the metallic reserve of the Bank of France, in order to assure the convertibility of notes? 31. What are the causes which tend to reduce or augment the metallic reserve, and the means to be employed to maintain the level of it? 32. What is the part played by, and the destination of, the capital of the Bank? Ought the capital to be increased? What would be the effects of the increase? 33. Ought the Bank to sell wholly or in part the Government stock it possesses? What would be the effects of a sale? 34. Ought the capital of banks of issue to be in general a guarantee capital, or can it be usefully employed in the business of the bank? 35. What, for banks of issue, and in particular for the Bank of France, are the advantages and inconveniences of advances on deposit of securities? 36. Is the elevation of the discount the only efficacious means of maintaining or reconstituting the metallic reserve? 37. Is it possible to prevent variations of discount or to confine them within certain limits? 38. Is it possible to impose on a privileged bank a fixed rate of discount or even a maximum? 39. What are the advantages and inconveniences of small notes, especially as regards the maintenance of the metallic reserve? 40. Which of the following means of defending the metallic reserve presents the least inconvenience to commerce:—The raising of discount, the refusal of a certain number of bills, the graduating of the rate of discount according to the periods the bills have to run? 41. Does the present development of international transactions cause a certain dependence one on the other of the metallic reserves of all banks of issue? 42. What are the consequences of that dependence? Is it possible to put an end to it, or to restrict it?

Agriculture.

THE SITUATION EXAMINED.

THERE are few managers of landed property in this generation who have combined so largely the theoretical and the practical as Mr John Grey, so long known as of Dilston, the steward of the Greenwich Hospital estates in Northumberland. To large and sound views as to the true use and right management of land as property, Mr Grey has united an intimate knowledge of the details of practical husbandry. He has often been referred to by ourselves and other writers on agricultural topics as a reliable authority on what may be called the questions of the day as regards agricultural land, and we find that he has been recently giving sound advice to farmers on their actual position, which, all surrounding circumstances considered, is not a satisfactory one. As we have frequently said, there is nothing in the low price of grain which should prevent successful farming and profitable grain-growing in England, provided the farmers are free to cultivate their farms in the best way their knowledge of husbandry would dictate, and without any other impediments than such as

Digitized by Google

are incident to the nature of their pursuit. But the really pressing difficulties are not to be relieved by any such nostrums as the conversion of arable into pasture land, by partial abandonment of grain-growing, and the like. These are the remedies we frequently hear suggested by landowners. Mr Grey's large experience leads him to tell another story. Speaking the other day at the Hexham Farmers' Club, in reference to "the changes which had taken place in the prices of agricultural produce, and the means they might be able to devise to meet that change,"—on which subject he had been invited to read a paper, but, in his 80th year he preferred to make a speech. Mr Grey reminded his audience that he had several years ago suggested to them the propriety of looking a-head in connection with our large imports of agricultural produce. Formerly they calculated on selling their wheat at 60s per quarter, and were satisfied to obtain 5d per lb for fat meat: now wheat was at 40s per quarter or less, and meat had gone up to 8d or 9d per lb. And there is every reason to believe that foreign supplies of corn will continue to keep our market prices low for the future. Corn was easily brought from distant countries without any material diminution of its value; while cattle in their transit were costly and liable to great risks. He had long ago told them that the condition of a farmer must be indicated by the extent of his breeding flock or herd, and the condition of his live stock generally. Now, the change had come to which farmers must accommodate themselves. The labouring classes generally and the manufacturing and trading classes in particular had greatly benefited by abundance of food and good wages, incident to an importation of corn, advanced in the last 20 years from an annual average of a million and a half quarters to eleven millions of quarters. Farmers must adapt "themselves as well as they could to a different mode of cultivation, which would go to modify in some degree the consequences of the reduction in the price of grain." Some people said the land must be laid down to grass, but "that was a very fallacious solution of the question." Certain portions of many farms, perhaps of most, may, without doubt, be usefully converted into permanent grass. That, however, must be well and advisedly done, and the expense of so laying down land to grass was by no means small. On this point Mr Grey made many practical suggestions. "But they must extend their views very much beyond that, because all practical farmers are aware that they cannot provide the quantity of cattle required for the consumption of this country without bestowing on their lands a considerable amount of cultivation. *They must have a rotation of crops;* they must have hay and straw, as well as root crops, to keep the quantity of cattle."

As we have often said, it is by the increase of stock on arable land that the demands of our community must be supplied, not by grass grazing. This can only be effected by growing good crops of grain. The best land, of course, is easily well cultivated, but secondary and inferior lands must be treated better than they usually are. In such a year as the last, said Mr Grey, many of them must have sown crops of grain, "which did not more than pay for carrying in and thrashing them." He had seen such, and it struck him at the time, that upon a farm where 30 or 40 acres of oats were sown upon poor land, so small a return was obtained from it, that if only one-half had been sown with corn, and the other half had had applied to it guano or some other suitable manure, the farmer would have had as much upon that part of the farm as he would have had upon the whole without it, and it would be in much better condition next year than now..... There was nothing so bad as the starving system.....It was not much to say, "I will have a certain number of acres in corn, but if the corn land was not in good condition, where is the profit?" He followed this up by making sundry practical recomendations for increasing the growth of green crops, and so growing a smaller acreage of grain with larger acreable returns from the land being in higher condition than at present.

In reference to grass land, even when good, he said: "It was frequently said, but he thought it was an error, that the grazing farm was much more easily managed than that in tillage. Instead of being more easily managed, he thought the greatest amount of judgment was necessary to manage to the greatest advantage the stock alone. A man must not only know the description of stock most suited to his soil, what kind it will bring to perfection with the greatest ease, and in the shortest time; and in the management of that stock he must exercise a very great amount of judgment and attention." In reference to noblemen and gentlemen who are called good landlords because they never turn out their tenants, Mr Grey asked the very pertinent question, "What sort of tenants they were?" Generally "good landlords" of that kind are amongst the greatest obstacles to agricultural improvement and successful farming.

HOME-MADE OR PURCHASED MANURE.

A CORRESPONDENT writing from Cheshire, refers to what he conceives to be a contradiction in our recent remarks on the farming of Hertfordshire, that is we refer in one place to the necessity of combining improved cultivation with stock-keeping in modern farming, and afterwards quote a passage from the prize essay in which the marketing of produce and the purchase of manure may be rendered more profitable than making meat and manure at home. The contradiction is only apparent, arising, perhaps, from the difficulty of explaining in detail the two different farming systems in our necessarily limitedspace. The explanation is that the first proposition, *i.e.* that stock farming and good culture must be combined, is a general rule applicable to 99 one-hundredths of English agricultural land. That which Mr Evershed mentioned as existing in certain parts of Hertfordshire, where to sell the hay, straw, and roots, as well as the grain, has been found more profitable than to make meat and manure at home, is a local and special exception.

That part of Hertfordshire which lies within 20 or 25 miles of London is not naturally land of great fertility, and certainly is not generally favourable to feeding stock or to forcing on young stock, while it lies within reach of the best market in the world for what we may designate raw agricultural produce, namely, hay of all kinds, straw and roots. It was the district thus situated and circumstanced to which Mr Evershed's remark, quoted by us, applied.

A considerable part of this district consists of meadow land, and speaking from an experience of many years, and after a somewhat persistent disregard of neighbours' warnings, "that stock will not pay you," we do not hesitate to say that there is no way in which the meadow land of South Herts can be made to give so good a return per acre—taking one year with another—as by sending the hay to London and bringing back good stable manure. So more may be made of straw by sending it to London, bringing back manure, than by consuming it at home either as litter or as forage. No doubt the wear and tear is great, but then there is a saving in other directions as compared with a system by which the hay and straw are consumed on the farm. Where mangold and swede turnips can be sold in ordinary seasons at from 18s to 21s per ton, as is the case in South Hertfordshire, it is obvious that, if manure can be obtained otherwise than by feeding stock, it will be more profitable to sell the roots than to consume them. It is true that many of the farmers combine the plan of marketing the greater part of their produce, with some stock, for the after-grass of the meadows has to be fed, and a moderate dairy, well managed, is found to be profitable. Sheep will get fat on the after-grass in moist seasons and where the land is drained and in good condition, but in dry seasons, and upon the inferior land sheep bought in after haymaking make but small return for a three or four months' run over the meadows. It is certain that much feeding of the meadows lessens the produce of hay, though it may improve its quality, and that the hay-farmer finds it most for his interest to have as little stock as possible on his meadows after January until the hay has been carried. A bulky hay crop is his object, and that he will get in South Herts, provided there be a fair amount of rain and the land has been pretty well manured. A dressing should be given every third or fourth year.

The following is our correspondent's letter, with the general principles of which we entirely agree:—

TO THE EDITOR OF THE ECONOMIST.

SIR,—In some remarks you offer in your last week's number on the farming of Hertfordshire, I meet with two passages curiously contradictory of one another.

You state your belief, on the one hand, "that it is only by the combination of improved cultivation with stock-keeping of some kind that farming can be made profitable"; on the other, you assert, on the authority of Mr Evershed, that "the marketing of produce and the purchase of manure may be made much more profitable than making meat and manure at home."

The question raised is one of superlative importance to the present race of farmers.

Assuming a rotation of crop to be essential to the successful cultivation of the soil, corn must alternate with roots.

The latter must, as a rule, be consumed on the farm.

The fattening of cattle as well as sheep has become very profitable. Straw, whether as fodder or litter, enters largely into the economy of beef making.

Further, the low price of grain has led to its use in fattening stock to an extent quite unprecedented.

The manure heap is enriched accordingly.

As the result then of a highly profitable process, such as cattle feeding has become, home-made manure is produced on the spot cheaper, and, if not better, quite as good as any that can be imported, not excepting that supplied by the horsekeepers of our large towns.

In that very highly cultivated district more immediately surrounding Edinburgh, the custom has long been to dispose of the turnip crop to the city cowkeepers (who remove it at their own expense) at a price per Scotch acre ranging from 18*l* to 25*l*. As a consequence the whole of the produce has been "marketed," and the whole of the manure imported.

Edinburgh is an excellent market, and farmers have grown rich on this traffic. Yet even the Mid-Lothian farmer has been induced, by the extraordinary prices of beef and mutton, to consume a large proportion of his turnip crop at home.

Depend upon it, Sir, with the present relative prices of straw and manure, the farmer who makes the exchange at the cost, to him so heavy, of horse-power, wages, and wear and tear of gear, takes means sure enough, though being cumbrous and costly, of enriching his farm and impoverishing himself. Such at least are the convictions, derived from a dearly-bought experience, of a TENANT-FARMER.

Jan. 5, 1864.

We may mention that a species of market-garden farming is extending itself in the Southern districts of Hertfordshire. Farmers, who, from contracting with large horse-keeping establishments in London, have a great force of manure, grow brocoli, white turnips, green peas, and other garden vegetable crops, with

Digitized by Google

considerable profit, and in so doing, they enrich their land and prepare it for growing large grain crops.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 9th inst. The return for the previous week is added :—

DEBTOR.	Feb. 9, 1865. f c		Feb. 2, 1865. f c
Capital of the bank	182,500,000 0	.....	182,500,000 0
Profits, in addition to capital	7,007,295 24	.....	6,994,470 23

Expenses of management	221,8 0 6	.....	208,008 18
Sundries	6,754,389 71	.....	6,550,813 50
	1,287,921,267 81	.....	1,286,065,500 33

The return of the Bank shows to-day a considerable increase in the stock of coin and bullion compared with that of last Thursday —not less than 20,786,000f. In the discounts there is unfortunately a large decline—15,032,000f. As to the note circulation, it has fallen off 6,459,000f, and the deposits have increased by 9,609,000f.

In consequence of the position in which the metallic reserve stands to the liabilities, the Bank has this day reduced its discount from 4½ to 4 per cent., and the interest for advances from 5½ to 5.

The Bourse continues without activity, and for the reason stated in preceding letters—the abstention of great bankers and credit companies. Subjoined are the quotations :—

The inquiry ordered by the Government into the system of banks —the laws regulating the rate of interest, the causes of commercial crises, &c.—was opened by the Superior Council of Commerce on Tuesday. The sitting was, however, confined to the adoption of a string of questions to be submitted to persons willing to give evidence. The inquiry it appears is not to be conducted very actively, as the next sitting is only indicated for the 17th. It is not at present certain *dit on* that the evidence will be allowed to be published in the newspapers as soon as given. In that case it will fail to attain the object for which it is destined—the enlightenment of the public; for in this country a mass of such matter presented in a huge blue book has attractions for only a limited circle.

An objection has been made to what was said in my last letter on the part played by M. Wolowski in the controversy about banks of issue, on the ground that it leads to the conclusion that he is the sole defender in this country of the unity of issue. The language used does not admit of that interpretation; but, as the matter is regarded in these parts as of some little importance, it may be well to state distinctly that, though M. Wolowski is a very active and very able defender of the doctrine of unity of issue, he is by no means the sole one. That doctrine was supported in the famous discussions on banks in the Academy of Moral and Political Sciences, and in the Senate, and it is advocated in the remarkable series of articles about banks now being published in the *Semaine Financiere*. Even M. Isaac Pereire, in his pamphlet, points out a plan by which, in the event of unity continuing to triumph over plurality of issue, unity might be made useful to the public,—namely, by the formation of new establishments, charged, in return for good and valid guarantees, to issue notes of the Bank of France,—the said notes being ceded to them on terms which would procure them an advantage.*

I have been favoured with the perusal of the resolutions relative to mercantile shipping which was adopted by the Superior Council of Commerce after an elaborate investigation into that matter, but which have not yet been issued to the public. These resolutions demonstrate with great power of argument the advisability and even necessity of allowing ships and materials for shipbuilding to be imported into France free of duty, also of abolishing tonnage and differential duties. After passing such sensible resolutions, it is to be regretted that the Council in an after sitting should have thought fit (as you were informed last week) to modify the first one by adopting an import duty of 2f the ton on ships, a duty bad on principle, and utterly useless as a protection to French shipbuilders, or as a source of revenue.

For some weeks past the wholesale and retail trades of Paris have been in a very depressed state, and the consequence of it is that in January as many as 160 bankruptcies were declared, a greater number than for a long time past. In December there were 121, and in November 92.

Messrs Arles Dufour and Co., of Lyons, in a circular on the silk trade, dated the 3rd, announce that neither the pacific news from America, nor the exhaustion of stocks from the extreme East, nor the fears of the next crop in Europe, have been able to maintain activity in transactions; but that, nevertheless, all holders display great firmness, owing to the rarity of all sorts of silks.

The following is the amount of the imports and exports of precious metals during the whole year of 1864, compared with the two preceding years :—

	1864, francs	1863. francs	1862. francs
GOLD IMPORTED.			
Bullion	110,093,766	83,266,419	119,011,128
Coin	353,902,257	286,467,015	282,815,419

SILVER.

	Imports—Bullion. francs.	Imports—Coin. francs.	Exports—Bullion. francs.	Exports—Coin. francs.
England	24,939,234	14,520,356	6,964,702	19,240,828
Belgium	5,320,016	15,378,840	10,221,752	19,254,668
Russia	...	...	...	500,000
Zollverein	432,367	35,739,318	203,327	6,349,100
Spain	...	85,596,765	940	1,122,015
Kingd.of Italy	26,443,864	39,426,244	1,883,600	8,698,400
Switzerland	...	...	...	552,421
Turkey	...	...	...	72,200
Egypt	...	...	...	4,873,400
British India	...	...	64,975,800	67,802,000
China	...	...	6,396,400	6,709,000
United States	...	291,600	...	...
Other countries	6,278,941	13,361,849	43,460,145	40,565,059
	63,414,422	204,314,972	134,106,666	175,739,091

Turning the preceding totals for 1864 into English money, we find that:—

	£
The imports of gold were	18,559,840
The exports of gold were	13,749,477
Excess of imports	4,810,363
	£
The exports of silver were	12,393,830
The imports of silver were	10,709,175
Excess of exports	1,684,655

Deducting the excess of silver exports from the excess of gold imports, it appears that during the year 1864, the stock of precious metals increased by 3,125,608*l*. As to the amount sent to the East, it was 2,378,724*l* in gold, and 194,936*l* in silver to Egypt; 5,311,112*l* in silver to British India; and 524,216*l* in silver to China, the whole being 8,408,988*l*.

Subjoined is the market report:—

FLOUR.—At *Paris*, the long-continued depression has discouraged holders so much, that they no longer attempt to struggle against it; and they are consequently bringing their stocks to market. Yesterday, quotations ranged from 42f to 46f the sack of 157 kilogrammes. Six marks disposable, were 46f; March and April, 46f 25c; and May and June, 48f.

WHEAT.—At *Paris*, yesterday, sales were difficult, and prices had a downward tendency:—Choice white, 25f 50c; red, 25f; first quality, 24f 50c; current sorts, 24f; and other sorts, 22f to 23f.

COTTON.—The sales at *Havre*, in the week ending Friday, were 3,863 bales and piculs, and the arrivals 6,605. The closing quotations were 10f to 15f lower for United States sorts; 17f to 20f lower for Brazil and French West India; 15f to 20f for Surat and Tinnevelly; 15f to 25f for Madras; 15f Bengal; 25f China; 20f Egypt. Low New Orleans was consequently 210f the 50 kilogs; good ordinary, in Broach, 200f; in Tinnevelly, 185f; in Madras, 180f; in China, 150f; and in Jumel, 275f. The stock was estimated at 65,420 bales; at the corresponding date of last year it was 35,250. The sales this week have, on the whole, not been numerous, but prices are firm. Yesterday, Madras, for delivery, was 180f and 185f; Jumel, 275f; Oomrawuttee, 202f 50c; China, 160f.

COFFEE.—At *Havre*, in the week ending Friday, the sales were 100 sacks Hayti Port-au-Prince, disposable, 83f the 50 kilogs in bond; 2,000 ditto, for delivery, same price; 900 Gonaives, disposable and for delivery, 89f; 100 Cape, disposable, 87f; 200 ditto, for delivery, 86f 50c; 100 St Marc, for delivery, 91f; 1,000 Rio, not washed, disposable or in the port, 75f to 83f; 501 Bahia, 81f; 100 Ceara, 82f; 25 Costa Rica, 92f (high duty); 25 Malabar, 90f; a quantity of Guadaloupe habitant, for delivery, 145f duty paid; and a small lot of ditto bonifieur, 150f. By auction, various lots of different sorts of damaged were sold; also 11 sacks Mysore sound, in bond, 68f. This week, Gonaives, for delivery, 90f in bond, and 89f; Cape, 87f; Hayti, for delivery, 82f and 83f; Rio, 75f to 82f; Jeremie, 82f; St Marc, for delivery, 91f; Costa Rica (high duty), 89f 50c to 91f; Mysore, 87f 50c. At *Nantes*, last week, 80 bales Reunion, fève ronde, 152f 50c the 50 kilogs duty paid. No sales this week. At *Bordeaux*, last week, 100 sacks Rio washed, 108f; 79 Mysore, 113f 50c; a small lot of Guadaloupe, for delivery, 157f 50c; and some bonifieur ditto, 161f 25c. This week, La Guayra, 165f to 210f; and Rio washed at prices not given. At *Marseilles*, last week, there were no sales, owing to holders having demanded a considerable augmentation in price, and there have been none this week.

SUGAR.—At *Havre*, in the week ending Friday, business was not active: 100 casks French West India, disposable, 40f 50c, bonne quatrieme, duty paid, the 50 kilogs; 4 ditto, 57f 50c on sample, and a small lot at 53f; 1,000 casks Havana, disposable or in the port, 30f 50c, No. 12, in bond; and some small lots at 31f. The arrivals were unimportant. This week, Havana, No. 12, 30f and 31f; Cuba, 49f. At *Nantes*, 300 sacks Reunion, 52f on sample; 211 ditto, old, 57f, equal to 53f bonne quatrieme; 66 at 55f; a small lot of French West India, 52f; 1,700 casks Havana, for delivery, at prices not stated. This week, Reunion, 50f on sample, equal to 51f 50c bonne quatrieme; and some at 52f 75c bonne quatrieme, and on sample 53f 75c; French West India at prices equal to 49f 75c bonne quatrieme, also some at 46f 25c; Mauritius, at Falmouth for orders, 30f 25c No. 12, floating conditions, cash. At *Bordeaux*, last week, a small lot of French West India, 51f, bonne quatrieme; some Guadaloupe, usine, 63f; 3,580 sacks Reunion, 52f 50c, bonne quatrieme; 5,542 at 53f ditto; 1,500 Mauritius, 53f ditto; 375 casks Havana, 31f 50c, No. 12 of Holland. This week, French West India, 49f, bonne quatrieme. At *Marseilles*, last week, 3,000 bales Reunion, 53f, bonne quatrieme: 3,400 ditto, 52f 50c, same basis. By auction, a quantity of damaged Havana. This week, Reunion, 52f 50c, bonne quatrieme of Nantes; French West India, 33f, bonne quatrieme of Havre (conditions of Marseilles).

INDIGO.—The demand at *Havre*, in the week ending Friday, was more active, about 100 chests having been disposed of, part of them for Russia. The prices obtained were at the estimates to 50c above. The arrivals were 123 serons Guatemala, and 12 chests Bengal, the latter were of the new crop. The estimates of the brokers for that crop are established on the same basis as in 1864. This week, Bengal at a premium of 50c, and by auction at 8f 50c and 10f 80c the half kilogramme. At *Bordeaux*, last week, the sales were 34 chests Madras, 20 Bengal, 24 Kurpah, 4 Vellore, at established prices. No sales this week.

HIDES.—Sales at *Havre*, in the week ending Friday, were active: 1,960 dry La Plata, 72f 50c for light to 107f 50c the 50 kilogs; 538 Monte Video salted mataderos cow, 42f; 778 Uruquay salted cow, 48f; 1,200 ditto ditto, damaged, 43f 50c to 44f; 700 Rio Grande salted cow, 46f 50c; 2,375 Pernambuco, drysalted, 57f; 600 Valparaiso salted ox, 52f; 2,576 ditto cow, 46f; and 291 New York salted ox, 40f. There was also a public auction of different sorts of sound and damaged, at which out of 4,000 offered, 3,733 were sold. The arrivals were extraordinarily numerous, exceeding 78,000, and numerous bales. This week, Rio Hacha, dry, 60f; Valparaiso salted cow, 46f 50c and 47f; Rio Grande salted ox, 55f; Monte Video dry ox, 115f; ditto cow, light, 75f and 80f; Rio Janeiro ox, 52f; cow, 44f; Monte Video horse, salted, 42f 50c; Calcutta calf, 100f.

WOOL.—The sales at *Havre*, in the week ending Friday, were 100 bales La Plata, unwashed, 1f 75c to 2f 42½c the kilog; 9 ditto, washed, *a froid*, 2f 85c; 34 washed, *a chaud*, 6f 25c; 24 Bombay, washed, at prices kept secret. The arrivals were about 1,300 bales. This week, Peru, washed, 2f 5c and 3f 5c.

TALLOW.—At *Havre*, in the week ending Friday, the sales were 90 casks La Plata, disposable, 50f to 51f; and the arrivals exceeded 2,600 casks. This week, La Plata, for delivery, 50f; and Buenos Ayres, 49f 50c. At *Paris* yesterday, the 100 kilogs, octroi duty included, were 104f 20c.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, was 51f to 52f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 73f; beetroot, first quality, 62f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The *Shipping Gazette* thus reports the state of the freight market:—High-classed ships are more in request for outward cargoes from London to India. The tonnage on the berth for India, China, and the Cape of Good Hope is 39,000 tons, and that for Australia and New Zealand 48,000 tons. Goods have been shipped as low as 5s and 7s 6d per ton for Calcutta, but there is now a firmer feeling, and rates hardening. Improved rates are offering for Bombay. Coal freights to India are firm, and the tonnage offering for Aden, Bombay, and Galle, does not meet the requirements. Homeward chartering from the East is almost at a standstill.

Statement of deposits at the Mint of the United States, the Branch Mint, San Francisco, Assay office, New York, and Branch Mint at Denver, during the fiscal year ending June 30, 1864:—

Dated the 9th February 1865. GEO. FORBES, Deputy-Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,743,805	Securities	29,908,102
Public Deposits	6,252,892	Coin and Bullion	14,511,611
Private Deposits	13,814,063		
	40,810,760		44,419,713

The balance of Assets above Liabilities being 3,608 953*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£254,673
AN INCREASE of Public Deposits of	711,440
A DECREASE of Other Deposits of	633,931
No change in Government Securities.	
A DECREASE of Other Securities of	132,881
AN INCREASE of Bullion of	50,388
AN INCREASE of Rest of	94,670
AN INCREASE of Reserve of	362,582

Notwithstanding the increased demand for money, a rather considerable augmentation has taken place in the reserve, while some addition has also been made to the bullion. The decrease in the other deposits is more than compensated by the influx of Government money.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during

Digitized by Google

a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

— Hamburg(3months)	13 5⅞ 6¼	13 7½ 7⅝	13 7½ 7⅝	13 8 8¼	13 7½ 7⅝

In the corresponding week of 1855, the formation of a new Ministry under Lord Palmerston had followed the resignation of the Aberdeen Cabinet. The Russian ports in the Black Sea had been declared to be in a state of blockade.

In 1862, a proposition had been made to certain houses in London to borrow 4,000,000*l* on behalf of the French Government, for three months, at 4 per cent. per annum, with ½ per cent. commission, against the deposit of 3 per cent. rentes. The first issue of Government paper currency in India had been effected. The Committee charged with the examination of M. Fould's plan for the conversion of the 4½ per cent. rentes into 3 per cents., had reported in favour of the scheme. The money market in London had become unsteady, chiefly owing to the rumours of the impending loan on French rentes.

In 1863, the refusal of the Duke of Coburg to accept the throne of Greece had been announced. The manifesto of the new Pasha of Egypt had been received with general satisfaction. The conduct of Mr Christie in Brazil was the subject of much discussion. The money market had become easier.

In 1864, the war in Schleswig was being continued. The allies had taken Fahrdof, and the Danes had evacuated the Dannewerke, leaving behind 60 guns, besides material of war. The Austrians had pursued the Danes to Flensburg. Austria had announced her secession from the treaty of 1852. Duke Frederick had been proclaimed in Flensburg. The Maories had suffered a severe defeat in New Zealand. The Queen of Spain had consented to the marriage of the daughter of the Duke de Montpensier to the Count of Paris. The Russian police had apprehended 1,000 persons in Warsaw and the provinces. Austria and Prussia were pressing Turkey to send an army to the Principalities, where great excitement prevailed. In America, General Longstreet, who had been reinforced, was advancing on Knoxville. The Confederate cavalry, under Forrest, had been defeated. At New York, a heavy decline in stocks had taken place. The Austrian Minister of Finance had opened a subscription for a new lottery loan of 40 millions of florins. The English funds had slightly improved on account of rumours of an armistice between the Germans and Danes. The demand for discount was moderate.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 4,519,673*l*; in 1862, a deficiency of 2,285,105*l*; in 1863, a deficiency of 5,551,971*l*; and in 1864, a deficiency of 6,819,707*l*. In 1865, the deficiency is 4,973,828*l*.

DISCOUNT AND MONEY MARKET.—An active demand for money has prevailed throughout the week, and the rate for the best short paper has risen to 5 per cent. This afternoon, although the supply was rather more ample, no business was done under the Bank minimum. The reduction of the Bank of France to 4 per cent. has not hitherto affected our market. Annexed are the current charges for paper of various dates :—

30 to 60 days	5 per cent.
3 months	5 per cent.
4 months	5½ per cent.
6 months—Bank bills	5½ per cent.
6 months—Trade ditto	6 per cent.

On the Stock Exchange this morning there was a good inquiry for short loans at 4½ to 5 per cent., but later in the day they were offered at 4 to 4½.

The following are the rates of interest allowed on deposits :—

Joint Stock Banks	*4 per cent.
Discount houses at call	4 per cent.
Do. with seven days' notice	4¼ per cent.
Do. fourteen days	4½ per cent.

* At the London and Westminster 3 per cent. only on sums below 500*l*.

About 10,000*l* in bar gold was taken from the Bank yesterday for exportation. There were no operations to-day.

On Wednesday, the 15th instant, tenders will be received at the Bank of England for Government bills of 300,000*l* on India, of which not more than 120,000*l* will be drawn on Bombay.

The Committee of the Stock Exchange have appointed to day a special settling day in the shares of the Norwegian Charcoal Iron Company, for bargains on and after the 1st September, 1864, not to be marked in the list at present. The Committee also ordered the shares of the Anglo-Egyptian Bank (Limited) to be quoted in the official list.

The settling day of the Italian Five per Cent. State domain loan has been fixed for the 16th instant, the scrip to be marked as 10*l* paid or fully paid.

The return of the Bank of France this week is more favourable than for some time past, and sufficiently explains the reduction in the rate of discount yesterday. The following are the changes —

	£
INCREASE.	
Bullion	832,000
Treasury balance	13,000
Current accounts	384,000
DECREASE.	
Circulation	260,000
Bills discounted	600,000
Advances	40,000

The following are the rates of discount in the chief cities of the Continent, showing a decline at Paris and Hamburg :—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	4	4
Vienna	5	5½
Berlin	5	4⅝
Frankfort	4	4
Amsterdam	4½	4½
Turin	6	6
Brussels	5	4
Madrid	9	...
Hamburg	...	3
St Petersburg	6½ 3 mths' bills.	8
—	7 6 —	...

ENGLISH FUNDS.—The public continue to realise stock, and the floating supply being therefore large, prices have again fallen. The monthly settling took place to-day, and business was comparatively limited, attention being chiefly directed to the arrangement of the account. At the official close, Consols were quoted 89 to 89⅛ for money, and 89⅜ to 89½ for the new account in March, a fall on the week of about ⅜ per cent., but after regular hours a somewhat better feeling prevailed, and a rally took place of an eighth. Reduced and New 3 per Cents. were quoted 88¼ to 88⅜, and India 5 per Cents., 103⅝ to 103⅞.

Indian bonds remain without change, at 10s to 15s prem., while Exchequer bills are rather firmer at par to 5s prem.

FOREIGN STOCKS.—The market has been dull throughout the week, and the changes have been mostly in an adverse direction. Turkish Consolides have again fallen a quarter per cent., although the price this afternoon, 51⅞ to 52⅛, was rather better than at one period of the day. Spanish Passive and Certificates showed increased heaviness in the early part of the week, but subsequently rallied, on a telegram that the Madrid Government had determined to relinquish the plan of a forced loan. The late improvement in Italian Five per Cents. has not been maintained, and the Anglo-Sardinian stock has fallen 1 per cent. The Confederate loan has recovered to 55 to 57. In the afternoon the quotations generally showed a tendency to improvement.

Italian Scrip after receding to 1⅛ dis., closed to-day at 1 to ¾ dis. The Danubian loan is quiet at par to ½ premium, and the Egyptian at 1¼ to 1¾ premium.

French Three per Cent. Rentes left off this evening at 67f 20c, showing a fractional advance compared with yesterday and last week.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day :—

RAILWAYS AND OTHER SHARES.—The principal movement in the railway market this week has been a heavy fall in Great Northern, the announcement of the proposed dividend causing general disappointment. Compared with last Friday, the price is about 4 per cent. lower. Partly in sympathy, and partly from the increased demand for money and the decline in the funds, most of the other leading descriptions have receded, especially Great Western, North-Eastern stocks, and South-Eastern, South-Western, and North British were comparatively steady. Metropolitan is only fractionally lower.

In the colonial market, dulness has prevailed, and several of the Indian and Canadian railways are quoted at a slight reduction. The principal changes in foreign shares are a decline in Great Luxembourg and South Austrian and Lombardo-Venetian, and an improvement in Paris and Lyons.

The closing prices of shares in new undertakings are as follows:—Metropolitan District Railways, 2 prem.; General Irrigation of France, 2¼ to 2½ prem.; and City of Milan Improvements, 3⅜ to 3⅝ prem.

International Financial shares left off at 2⅛ to 2¼ prem., after having been 1⅞ to 2; General Credit, 2⅞ to 3¼ prem.; and Credit Foncier and Mobilier of England, 3⅛ to 4⅛ prem.

Subjoined is our usual list of the closing prices of the principal railway shares on last Friday and this day:—

FOREIGN EXCHANGES.—In consequence of the reduction in the rate of discount by the Bank of France, the quotations have been rather firmer.

A telegram this evening reports the exchange at Calcutta at 2s 1⅞d; at Canton, 4s 8½d; and at Shanghai, 6s 6d.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The arrivals since our last are—The Edinburgh, from New York, with 81,500*l*; the China, from New York, with 142,000*l*; the City of Baltimore, from New York, with 54,000*l*; the Magdalena, from Brazils, with 47,500*l*; the Delta, from Alexandria, with 20,000*l*. The export demand is active, and the whole of the above has been sent abroad, together with 35,000*l* withdrawn from the Bank of England. The shipments comprise—215*l* for Galle, 1,220*l* for Madras, 49*l* for Calcutta, per Pera; and 400*l* per Parana, for Brazil.

Silver.—Our market is very inactive, the demand for the East being very moderate. One or two limited sales have been effected for the Continent and for Bombay, at 61⅜d per oz standard. The Pera, which left Southampton on the 4th instant, took only 15,600*l* for Calcutta, and 500*l* for Shanghai. 8,000*l* has been shipped per Parana to the Brazils.

Mexican dollars are without inquiry, and we quote the price 60⅜d per oz. The shipments per Pera, on 4th inst., were as follows:—24,620*l* to to Singapore, 44,620*l* to Hong Kong, and 3,800*l* to Shanghai.

Exchange on India may be quoted 1s 11¾d for drafts at 60 days' sight by the banks on Bombay, Calcutta, and Madras.

Indian Government loan notes are rather dearer, and may be quoted 109 to 111 for 5½ per Cents., 101 to 103 for 5 per Cents., and 89 to 91 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto refinable, 78s per oz std, last price; Spanish doubloons, 74s 6d to 75s per oz, nominal; South American ditto, 73s 6d to 73s 9d per oz; United States gold coin, 76s 4½d per oz, last price. Silver—Bar silver, 5s 1⅜d to 5s 1½d per oz std; bar silver, containing 5 grains gold, 5s 1⅝d per oz std; Mexican dollars, 5s 0⅜d per oz, last price; five-franc pieces, 4s 11½d per oz. Quicksilver, 8*l* per bottle; discount 3 per cent.

The shipments of gold from Melbourne since the last mail are telegraphed at 29,625 ounces, or about 118,500*l*.

FAILURES AND MERCANTILE EMBARRASSMENTS.—Notice has been given that a petition for the winding up of the Alexandra Park Company (Limited) is to be heard before the Master of the Rolls this day.

Mr H. L. Evans has been appointed official liquidator of the Littlehampton, Havre, and Honfleur Steam Ship Company (Limited).

Petitions for the winding up of the General Rolling Stock Company (Limited), and also the Rolling Stock Company of Ireland (Limited), are to be heard before Vice-Chancellor Wood on the 18th instant.

PUBLIC COMPANIES.—The Credit Foncier and Mobilier of England have invited subscriptions for a nominal capital of 800,000*l*, the first issue to consist of half the amount in shares of 20*l* each, for establishing the General Irrigation and Water Supply Company of France. This new undertaking possesses a concession from the Emperor of the French, conferring the exclusive privilege for ninety-nine years of supplying water from the river Verdon to Aix (Provence), in the South of France. Provision has been made for the payment of interest on the paid-up capital at the rate of 8 per cent. per annum during the three years the works are being constructed.

A company is in course of formation for the purpose of purchasing the business known as Reuter's Telegraph Agency. It is anticipated that the contracts at present held by Mr Reuter will of themselves ensure a remunerative result to the association.

The first ordinary meeting of the London Mercantile Discount Company took place on Wednesday. The report stated that on making provision for bad and doubtful debts, the whole of the profits were absorbed, and that there remained a balance of 2,978*l* to be carried to the debit of the next year's account.

At the meeting of the National Provincial Marine Insurance Company, held on the 8th instant, the director's report was adopted. Interest at the rate of 6 per cent. per annum was declared, and the balance of 39,237*l* carried forward.

The report to be presented at the ensuing meeting of shareholders of the Contract Corporation, shows a balance of profits of 5,043*l*, and the directors propose to declare a divident at the rate of 10 per cent. per annum, free of income tax, which, with the distribution last Midsummer, will give a division for the year of 12½ per cent.

The second annual general meeting of the shareholders of the Mercantile and Exchange Bank was held at Liverpool on Wednesday last; and the report, which was adopted, after referring to the late monetary pressure, the heavy losses sustained by customers, and increased through the transactions of the late manager, stated that the gross earnings for the half-year amounted to 35,108*l* 15s 9d. The bad debts, however, exceeded the net profits, and, as the position of some accounts were still doubtful, it was considered best that the sum of 30,000*l*, entered into the debit of profit and loss, should be reserved to provide, if necessary, for any further deficiency. The amount written off in the balance sheet for bad and doubtful debts represented 88,483*l*.

The English and Foreign Credit Company (Limited) held its first general meeting on Monday last, Mr George Sheward in the chair. The accounts showed that, after making an

Digitized by Google

allowance for the preliminary expenses, for the discharge of current liabilities, and for rebate (556*l*) on current transactions, there remained 5,836*l* devoted to the payment of a dividend of 5s per share, absorbing 3,553*l*, and leaving a balance of 2,282*l* to be carried forward to the year 1865.

At the second annual general meeting of the shareholders of the General Credit and Finance Company of London, held on the 6th inst., a dividend was declared of 10s per share, free of income tax, (amounting to 125,000*l*), and making, with the 2s paid in August, a total dividend at the rate of 15 per cent. on the whole capital of 1,000,000*l*, leaving a balance of 22,440*l* to be carried forward to next year's account.

At the eighth annual meeting of the Atlantic Telegraph Company, held on Thursday, it was stated that the Company had made, in round numbers, 7,000*l* by interest on capital, which had enabled them to discharge all current expenses and outstanding incumbrances, so that they were now out of debt. It is hoped that the cable will be ready for laying in June or July next.

At the half-yearly meeting of the proprietors of the Metropolitan Railway held on Wednesday last, the report and accounts were adopted, and a dividend at the rate of five per per cent. per annum upon the preference shares, and at the rate of seven per cent. per annum upon the ordinary stock and new ordinary shares, was declared. This left a disposable balance of 7,777*l* 3s 8d.

The directors of the Great Northern Railway Company have resolved to recommend to the proprietors, at the general meeting to be held on the 25th instant, a dividend for the half-year ending December 31, at the rate of 8*l* 15s per cent. per annum on the original stock of the Company—giving for the half-year 4*l* 7s 6d per cent. to the original stock; 3*l* per cent. to the B stock; 5*l* 15s per cent. to the A stock. These rates will make the dividend for the whole year, 1864, as follows:—7*l* 2s 6d on the original stock; 6*l* per cent. on the B stock; and 8*l* per cent. on the A stock.

The proposed dividend on the Dublin and Belfast Junction Railway is at the rate of 3½ per cent. per annum, against 4 per cent. in the same period of 1863.

The directors of the London and South-Western Railway Company have resolved to recommend to the proprietors at the half-yearly general meeting on the 16th inst., that the dividend for the half-year ending the 31st December, 1864, be at the rate of 5½ per cent. per annum on the ordinary capital stock of the Company.

The directors of the Hull and Selby Railway, in their half-yearly report, recommend the following dividends to be declared out of the balance to the Company's credit of 34,010*l*.—2*l* 9s 6d per 50*l* share, 1*l* 4s 9d per half-share, and 12s 4½d per quarter-share, less income tax, for the past half-year ending 31st of December last.

The half-yearly report of the directors of the Mid-Kent Railway Company, to be submitted on the 13th inst., recommends the usual dividend of 6½ per cent. per annum.

It is stated that the report and balance sheet of the Estates Bank will propose that, after placing 2,000*l* to reserve fund and writing off 20 per cent. of the preliminary expenses and the whole of the current expenses, a dividend be declared at the rate of 7½ per cent. per annum on the paid-up capital.

The Bank of Wales held its fourth general meeting on Saturday last, at which Mr J. N. Daniell presided. The report and balance sheet submitted to the meeting showed that the gross profit for the last six months amounted to 10,374*l* 10s 3d, and after deducting current expenses and other necessary allowances, there remained a balance of 1,940*l* 3s 7d, out of which the directors recommended 1,808*l* 15s to be appropriated to the payment of a dividend at the rate of 5 per cent. per annum for the half-year. The report was adopted and the dividend declared payable on the 13th inst.

The report of the directors of the International Hotel states that the directors recommend a dividend at the rate of 4*l* per cent. per annum, amounting on the present paid-up capital to the sum of 1,613*l*, leaving a balance of 886*l* to be carried over to the next half-year.

The Worcester City and County Banking Company have declared a dividend at the rate of 10 per cent. per annum.

The report of the Liverpool Financial Association states that a large, but not divisible, profit has accrued through the purchase of properties which have since improved in value. The balance, however, actually to the credit of profit and loss is 3,426*l*, out of which the directors recommend the return of 2s 6d per share free of income tax, being equal to 6 per cent. per annum on the paid-up capital for the half-year, leaving a balance in hand of 893*l*.

A prospectus has appeared of the General Provident Assurance Company for the first issue of 10,000 shares of 10*l* each, the capital being specified at 500,000*l*. It is stated that the undertaking "was originally formed under the old Joint Stock Companies Act, and has hitherto been successful." Its present income is nearly 20,000*l* per annum.

The details of the Metropolitan District Railway have been issued. The capital is 3,600,000*l*, and the first issue 2,250,000*l*, in 22,500 provisional scrip certificates of 100*l* each. The amount to be paid on application is 3*l* per share, with a further sum of 7*l* on allotment. This line, it is stated, completes the inner Metropolitan Railway system, as sanctioned by Parliament after a lengthened inquiry. It is intended to proceed vigorously with the immediate construction of the portion of the line between Westminster station and Cannon street, so that it may be opened to the public contemporaneously with the Thames Embankment.

Cleaver's Patent Portland Cement and Suffolk Brick Com- Company (Limited) propose to raise a capital of 60,000*l*, in 12,000 shares of 5*l* each.

The first ordinary general meeting of the South-Eastern Banking Company took place on Monday last. The available balances amount to 4,845*l*. A dividend was declared at the rate of 6 per cent. per annum.

At the meeting of the London Tavern Company, held on Monday last, a dividend was declared at the rate of 10 per cent. per annum, together with a bonus of 1s per share, both free of income tax.

At the meeting of the Provincial Banking Corporation (Limited) the available balance was stated at 3,120*l*; a dividend was declared at the rate of 10 per cent. per annum.

The first ordinary meeting of the Estate Company was held on Thursday. The net profits on the ten months' operations were stated at 9,614*l*, out of which a dividend of 15 per cent. per annum was declared, 4,000*l* carried to the reserve fund, and the balance, 804*l*, carried forward.

The first ordinary general meeting of the Credit Foncier of Mauritius took place on the 10th inst., when a dividend of 6s per share was declared, and 2,196*l* carried forward to next account.

The report of the directors of the Victoria Station and Pimlico Railway Company, submitted to the proprietors at yesterday's meeting, recommended a dividend at the rate of 5½ per cent. per annum.

The Turin and Savona Railway Company have notified that interest at the rate of 6 per cent. per annum is now payable on the shares of this Company, having respectively 20*l* and 14*l* per share paid thereon.

The shares of the London and Provincial Mortgage Bank of England (Limited) are quoted at ¾ to 1¼ prem.

MISCELLANEOUS.—Particulars have been published of sundry bonds of the Imperial Moorish Loan, which were drawn on the 1st inst., and are to be paid off at par on the 22nd.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 423 per mark, and the short exchange on London is 13.4¼ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 1-10th per cent. dearer in London than in Hamburg.

Wales—Brecon, Mold, Bangor, Cowbridge, Tunbridge, Corwen, Welshpool, Llangefni, Llandille, Knighton, Swansea.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of English wheat on sale at Mark lane to-day was small. Good and fine dry samples sold readily, at quite Monday's currency, but for damp produce the trade was dull, on former terms. For foreign wheat there was very little demand, yet prices ruled firm. Barley of good and fine quality was in moderate request, at full currencies, and fine oats commanded rather more money than on Monday; but inferior descriptions, including beans, peas, and flour, met a slow sale, at late rates. This week's imports are small, viz., 50 quarters of wheat, 5,560 of barley, and 19,670 quarters of oats.

At Liverpool this morning, wheat was in fair request, at full prices, and the demand for flour being somewhat more active, a slight advance took place in the quotations. Indian corn improved in value 3d per quarter. At Wakefield, the wheat trade was dull, on rather easier terms.

The Liverpool cotton market on Saturday was excited, and prices advanced about ¼d to ½d per lb. On Monday the excitement increased, the sales reached 15,000 bales, and prices further

Digitized by Google

advanced ¼d in Surats, and nearly 3d in Egyptian. A quieter feeling has since prevailed, with a desire to realise; consequently the late advance has been nearly, if not entirely, lost. The present dulness may, to a great extent, be attributed to the large stock on hand, amounting to 536,660 bales. The total sales of the week reach 58,280 bales, of which speculators have taken 14,810 bales, exporters 1,390 bales, leaving 37,080 bales to the trade. The imports of the week amount to 74,530 bales, and the export to 4,830 bales. We quote middling Upland, 21¾d; Orleans, 22½d; fair Dhollera, 17½d; Broach, 16½d; Bengal, 9d; Scinde, 8½d; and China, 12d. To-day the market closes quiet and dull. Sales only 2,000 bales.

Advices from Bombay are to the 13th ult. During the fortnight preceding that date, a somewhat extensive business was transacted in cotton, but at, in most instances, a slight reduction in prices. The dealings, as far as European houses were concerned, were chiefly in *new* Oomrawuttee and Dhollera produce, whilst the operations of native merchants were, for the most part, in old Dhollera qualities. The arrivals of *new* cotton had been tolerably large, and the quality of the supplies was good. For delivery in March, *new* Broach had been disposed of at 501, and *new* Surat at 510 rupees per candy. The following table of prices and exports are from Messrs Nicol and Co's circular:—

CURRENT PRICES of COTTON at BOMBAY, Jan. 12.

	Market Value. Per candy, 784 lbs.	C.F.I. Exchange 2s 1½d per R.

1858	324,675	13,993	19,542	...	103,731	461,941

From Tinnevelly, to Dec. 9, we learn that the cotton trade was dull, at 240 rupees per candy. The selection of cotton on sale was poor.

At Calcutta during the fortnight ending Jan. 5, a small amount of business was transacted in cotton, at reduced quotations, viz., at from 20 to 30 rupees per bazaar maund for Bengal produce.

A moderate business was transacted in cotton at Alexandria during the week ending Jan. 26, the sales having amounted to 14,670 bales. According to the Egyptian Commercial and Trading Company's circular, good middling to fair roller-ginned produce was quoted at 22.50d to 23.25d; fully fair ditto, 23.50d; fair to fully fair, open-ginned, 23.50d to 24d; good fair to fully fair, 24.50d to 25d per lb, free on board.

The state of trade at Bombay in December last was somewhat active, as far as Manchester goods were concerned. The amount of business done was tolerably large, and although telegrams from England caused the market to be somewhat unsettled at periods, prices steadily improved, and nearly all descriptions of yarn and cloth commanded enhanced quotations. The following prices of grey shirtings on the 31st December last are from Messrs Rennie, Scovell, and Co.'s circular:—

GREY SHIRTINGS.

No	Inches.			lbs	oz	Per Piece. s	d
12	39	14 by	11	6	0	13	10½
18½	39	14	14	7	0	17	1

49	44 to 45	16	16	9	8	25	0
57	50	16	17	10	6	27	9

With the exception of a slight improvement in the demand for sugar, the state of trade in the Mincing lane markets shows no recovery from the recent depression; indeed, in some quarters, there is a tendency to increased heaviness; but it is chiefly confined to tea, which at the public sales of China produce, held during the week, has been disposed of at reduced prices as regards certain qualities. The coffee trade has also ruled inactive, notwithstanding that small supplies have been brought forward.

IMPORT and DELIVERY of TEA in London, from Jan. 1 to Jan. 31, 1864 and 1865, with STOCK on hand on Feb. 1, 1864 and 1865.

The total consumption of coffee in the United States last year was 109,086,703 lbs, against 79,719,641 lbs in 1863, 88,989,911 lbs in 1862, 187,045,786 lbs in 1861, and 177,111,923 lbs in 1860. The total receipts in 1864 reached 145,304,257 lbs, whilst in 1863 they amounted to only 75,261,417 lbs, in 1862 to 98,558,680 lbs, but in 1861 they were 182,244,627 lbs, and in 1860 185,779,689 lbs. The following tabular statement shows the principal countries whence the imports at New York in 1863 and 1864 were derived:—

From	1863. lbs	1864. lbs
Bengal	44,923,153	84,803,670

Wool, hemp, flax, and jute have been dealt in to a limited extent, at barely late rates. According to Messrs Armistead and Co.'s circular, the stock of jute in London, Liverpool, and Dundee, including the supplies afloat to those ports, is now 42,359 tons, against 52,280 tons last year; and 26,108 tons in 1863.

The silk trade is quiet, and, in some instances, prices have receded from the late highest point. The following table, showing the state of the London silk warehouses, is from Messrs Durant and Co.'s circular:—

STATE of the SILK WAREHOUSES.

	Sold Stock. Feb. 1, 1865. bales.	Sold Stock. Feb. 1, 1864. bales.	Unsold Stock. Feb. 1, 1865. bales.	Unsold Stock. Feb. 1, 1864. bales.

In reference to the state of the leather trade, last month, Messrs Powell and Co. write as follows:—The leather trade experienced a decided improvement at the commencement of the new year, and although the activity has not been steadily maintained, the transactions of the month reach about an average, with scarcely any change in prices. The limited inquiry for heavy sole leather, especially South American butts, is still the most remarkable feature of the trade, while the consumption of light sole leather continues to be particularly large.

The total shipments of indigo from Calcutta, last year, amounted to 2,928,865 lbs, against 2,966,098 lbs in 1863; 2,144,303 lbs in 1862, and 1,758,398 lbs in 1861. This season's shipments, viz., from Nov. 1 to Jan. 5, according to Messrs Moran and Co.'s circular, reach 10,790 chests, of which 7,354 chests are to Great Britain, and 2,529 chests to France.

In metals, the chief features are a less buoyant market for tin, Straits being quoted at 89*l* 10s per ton, cash, and a firm trade for spelter at 19*l* 5s per ton on the spot. Oils and tallow are dull.

The commercial news from New York, this week, is by no means important. The demand both for imported goods and for produce for export was much restricted, and as regards gold prices, very few changes took place. Financially, the principal movement was in the premium on gold, which at one period was as low as 98, but which subsequently advanced to 119 per cent. The money market was quiet, at 8 to 8½ per cent. for the best short-dated commercial paper. The stock of bullion in the banks on the 21st ult. was 4,042,400*l*.

THE COTTON TRADE.

LIVERPOOL—FEBRUARY 10.

The cotton market opened with animation on Saturday, upon the receipt of advices from New York dispelling the recent rumours of peace negotiations, and prices rapidly advanced, particularly on Monday; but the demand has since fallen off, and the week closed heavily yesterday, the advance having been lost in most cases, and a further decline submitted to.

American has been in improved demand, and advanced about ½d per lb, but during the last few days has receded, and closed with a decline of ¼d to ½d from last week's quotations. Sea Island has been in fair request, at previous rates. In Brazil, Pernam was in extensive demand during the early part of the week, at fully 1d above last week's rates, but the last day or two the recent large imports have been pressed upon the market, and prices have become very heavy and irregular, closing about ½d below last Friday. In Bahia and Maceio, some considerable sales were made in the early part of the week, while Maranham remains neglected, at about ¼d to ½d reduction. The demand for and the value of Egyptian have fluctuated extremely. A fall of about 1d per lb was succeeded by a rise of 2½d, but since Tuesday the prevailing dulness has caused a reduction of quotations to ½d per lb below the level of those of last week. Smyrna has been in good request, and from the depressed rates of last week an advance of 1d per lb must be quoted in the current qualities, sales during the week have, however, been made ½d to ¾d higher than the present quotations. East India has fluctuated much during the week, and after a considerable advance prices have fallen back, and closed with much irregularity. China and Japan have been in fair request, but since Wednesday have declined ½d, except for good and fine qualities.

The transactions "to arrive" have been chiefly in Egyptian, at very irregular prices; the last quotation was yesterday for fair open, January shipment, 21d.

The sales of the week amount to 53,280 bales, including 14,810 on speculation, and 5,390 declared for export, leaving 33,080 bales to the trade. The sales to-day amount to about 3,000 bales.

NEW YORK—JAN. 28.

The cotton trade in the early part of the week was very dull, and middling upland produce sold as low as 84 cents per lb. The market, however, has since presented a firmer appearance, and the quotation for the above-mentioned quality has advanced to 88 cents per lb. The total receipts from Sept. 1 to Jan. 24 amounted to 88,215 bales. The following are the prices now current:—

	New York Classification. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary	69	69	69	69
Middling	88	88	89	89
Good middling	94	94	94	94

LONDON—FEB. 10.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—The market opened flatly, but on receipt on Saturday of the American news, per China, more firmness was exhibited by holders, and on Monday and Tuesday there was an active demand at an advance of 1d per lb; more than half of this has since been lost, the market closing dull and irregular. As compared with last week, prices of Dhollerah are 1d, and other descriptions of Surat ½d per lb higher; good fair Tinnivelly is ½d per lb lower, while the lower grades are ½d dearer; Western Madras is ½d per lb higher, but Coconada, Coimbatore, and Salem are unaltered. The lower qualities of Scinde and Bengal are rather dearer, but the rest are without

Digitized by Google

change; China and Japan are without unchanged; West India and Brazil 1d, and Smyrna and Greek about 1½d per lb higher.

MARKETS IN THE MANUFACTURING DISTRICTS

There has been a full average business doing in goods for the time of year, at full quotations. The stocks on hand still continue very moderate. Iron has commanded more attention, at extreme currencies. Coals have sold briskly, at high rates.

MANCHESTER, Feb. 9.—Notwithstanding the fluctuations of last week, a large business had been effected, and when news arrived on Saturday from America of a less pacific character, and from India of a not unfavourable nature as respects manufactures, our market quickly rose to higher quotations. But the advance has since proved only nominal, the previous transactions having quite sufficed for the wants of buyers. On Tuesday, spinners were asking from 2d to 4d advance on yarn above the low sales of last week, but similar additions to the price of cloths were quite ineffectual, so each successive day has brought a nearer return to the old level. Jacconets and shirtings, which are light in stock in Calcutta, have been inquired for without animation. As the free imports of cotton render some sellers anxious to work to order, those articles which are mostly in demand are run into contracts without bettering the price.

BRADFORD.—Very few sales have taken place in any class of wool, and prices are showing further signs of weakness. Long wools, especially bright-haired, are the most difficult to sell. Noils and shorts are tolerably firm. The yarn market is quiet. The greatest possible caution is practised by all buyers. Trade in pieces is limited. A few small French orders are reported.

LEEDS.—There is no change in the general character of the goods brought to the market, nothing of striking novelty having been produced for the season; but there is better taste displayed both as to pattern and finish in some of the fancy goods than was noticeable last year. Manufacturers, dressers, and finishers keep in nearly full employment, and wages, as well as prices of wool and cloth, are steady.

ROCHDALE.—The market for flannel has again been quiet. Not only is there the smallest possible demand for fancy goods, but the makers of them are now seldom to be met with, though at the same time there is no scarcity of the goods themselves.

BIRMINGHAM.—The trade of this town has been steadily improving; there is no approach to animation in any branch, but manufacturers generally are tolerably well engaged, without having many orders beforehand on their books.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Jan. 28.—Trade in breadstuffs being confined to the immediate and actual wants of buyers, continues depressed, and there is very little business of importance passing for export to Great Britain. The principal shipments are to ports in the West Indies and in South America. The following are the quotations:—Flour—State, superfine brands, $9.20 to to $9.30; State, extra brands, $9.35 to $9.50; State, choice brands, $9.55 to $970; Ohio, common brands, $10 50 to $10.75; Ohio, fancy brands, $10.80 to $10.85; Ohio, good and choice extra bands, $10.90 to $11.60; Michigan, Indiana, Wisconsin, &c., $8.25 to $10; Genesee, extra brands, $10 to $11.75; Missouri, $10.50 to $15; Canada, common, $9 50 to $9.70; Canada, good to choice extra, $9.75 to $11 50 ber barrel. Wheat—Chicago spring, $2.10 to $2.15; Milwaukee Club, $2.05 to $2.23, winter red Western, $2.28; Corn—New Jersy, yellow, $1.77 to $1.78; Western, mixed, $1.87 per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

An unusually small supply of English wheat has arrived up to our market this week, coastwise and by land carriage, in but middling condition. Selected qualities have moved off steadily, at full quotations. In other kinds, next to nothing has been doing, at barely late rates. The imports of foreign wheat have been trifling. Really fine parcels have commanded extreme sales. Otherwise, the trade has ruled heavy, on former terms. There has been much less activity in the sale for malting barley; nevertheless, the currencies have been supported. Grinding and distilling sorts have continued heavy, at full rates. Malt has moved off slowly, at about previous quotations. The supply has been reasonably good. Sound oats have sold at full prices; but inferior kinds have commanded very little attention. Beans have sold steadily. In the quotations, however, no change has taken place. Peas may be considered steady in price. Both English and foreign flour has ruled firm.

The continental markets have continued heavy for wheat, and the quotations have been with difficulty supported. In spring corn, about an average business has been passing, at steady currencies. The exports of produce from America continue on a limited scale.

The country markets have been somewhat heavy for nearly all kinds of produce.

In Scotland, fine wheat, barley, and oats have moved off steadily, at full quotations. Otherwise, the trade has ruled heavy, at late rates.

The Irish markets have been but moderately supplied with all kinds of produce. The trade, however, has been somewhat heavy, at barely stationary prices.

At Mark lane, to-day, fine dry English wheat sold readily, at the full prices current on Monday; but for damp qualities, the trade was dull, on former terms. The foreign wheat trade was very quiet, yet no change took place in prices. Barley met a slow sale; nevertheless, good and fine qualities were held at fully late rates. Oats were firm, and fine samples commanded rather more money. Beans and peas steadily supported previous quotations. In flour, only a moderate business was transacted, at late rates.

Mr George Dornbusch reports the arrival off coast of 8 cargoes of grain, and a fair demand for wheat, at last week's prices. Maize has changed hands slowly. Rye has given way 1s per quarter. In other produce, very little has been passing. Cotton seed is selling at 7l to 7l 3s 9d per ton.

The London averages announced this day are:—

	qrs	s d
Wheat	3130	at 40 10
Barley	656	27 9
Oats	617	21 9

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has been steady during the week, and a fair demand exists from the refiners. A few floating cargoes have sold partly for export, those of Mauritius being rather cheaper. 2,267 casks West India changed hands to yesterday, including some parcels by auction. Grainy Demerara, 32s to 36s; middling to fair Jamaica, 32s to 33s per cwt. Low Gurpatta date Bengal has been in request. The deliveries last week were 4,730 tons, including 886 tons for exportation, and there were 2,348 tons landed, leaving the stock at the close 104,225 tons, against 73,660 tons at the same date in 1863.

Mauritius.—A floating cargo has sold for France, No. 12½, at 24s 9d. One for the United Kingdom, No. 11½, at 23s 9d. 5,415 bags by auction partly met with buyers: brown and yellow, 25s to 31s; grainy and crystallised, 32s to 36s (11s 8d duty); fine crystallised, 37s 6d per cwt.

Madras.—450 bags of native, &c., offered by auction were bought in at 23s 6d to 24s 6d. Privately, 930 bags brown have sold at 24s to 24s 6d per cwt.

Bengal.—1,281 bags offered by auction were about three-fourths taken in. A few lots sold: Gurpatta date, 28s 6d to 30s. The remainder taken in at 31s. White Benares realised 32s 6d to 35s 6d. Privately, considerable business is reported in Gurpatta date at 29s 6d to 32s 3d; white Benares at 35s to 36s per cwt.

Manilla.—3,500 bags clayed Manilla have sold at 27s 9d per cwt.

Natal.—2,324 bags Muscovado sorts have sold at 23s 6d to 33s.

Foreign.—367 casks Porto Rico brought to auction were chiefly taken in and since partly sold at 31s to 32s 6d for low and middling yellow. 520 casks 66 barrels Cuba partly sold from 27s 6d to 31s 6d. 208 boxes Havana partly sold: grey at 31s to 31s 6d; florettes and white, 37s 6d to 39s. A floating cargo of Bahia has sold at 17s 1½d; one of Havana, No. 16½, at 27s 6d; one, No. 13½ to 14, at 25s 3d per cwt., all for near ports.

Refined.—The market is steady, but quiet.

RUM.—Another Government contract for 50,000 gallons is declared, which has had little influence on the market. Berbice, 1s 8½d per proof gallon. No further business reported in East India.

COCOA.—Colonial descriptions are not influenced by the announcement of the Government contract for 400,000 lbs, but the market is firm. Further supplies are declared for public sale.

TEA.—The market continues flat, and the further large arrivals have a depressing influence. This week's business by private contract has been unimportant, and the public sales have gone off at easier rates in many instances. There were 40,473 packages in the catalogues, including 27,886 packages printed without reserve, and 14,265 packages sold, nearly all without reserve.

COFFEE.—A more steady tone has prevailed. 123 casks 2,204 bags native, by auction, chiefly found buyers at rates rather in advance of those current last week: good ordinary to fine, 69s 6d to 73s. A very limited quantity of plantation Ceylon has been submitted, which obtained former rates. 150 bales Mocha chiefly sold at 90s to 95s for mixed to fair long berry. One lot good small berry, 99s 6d. 23 cases 1,927 bags East India chiefly sold: Malabar and Cochin, 69s to 76s 6d; low Mysore, 65s 6d to 66s 6d. A floating cargo of Rio is reported, at 62s per cwt for Copenhagen. A few parcels of native Ceylon, in casks, have sold, privately, at 69s to 69s 6d per cwt.

RICE.—Some parcels of white Bengal have sold privately at full rates, from 11s 7½d to 14s. The market generally is firm, with a steady inquiry. 15,000 bags soft grain are reported privately, chiefly common Necrancie Arracan, at 8s 6d. Of 6,891 bags Rangoon, by auction, the sound portion realised 8s 6d to 9s, sea-damaged in proportion. 8,600 bags Bengal, about three-fourths sold, including middling to good white, at 11s 9d to 13s 3d per cwt.

IMPORTS AND DELIVERIES of RICE to Feb. 4, with STOCKS on hand.

Deliveries last week 293 tons.

BARK, &c.—Current prices:—English, per load of 45 cwt delivered in London, 16*l* to 17*l* 10s; ditto Coppice, 16*l* to 18*l*; Dutch, 5*l* to 6*l*; Hamburg, 5*l* to 6*l*; Antwerp Tree, 6*l* 10s to 7*l* 10s; ditto Coppice, 7*l*, to 8*l*; French, 4*l* to 6*l* 10s; Mimosa, chopped, 10*l* to 11*l* 0s; ditto, ground 11*l* to 12*l* 15s; ditto, long, 8*l* to 9*l*; Cork Tree, Barbary, 6*l* to 6*l* 10s; ditto Sardinian, 8*l* to 8*l* 10s; Valonia, Smyrna, 15*l* to 18*l* 10s; ditto, Camata, 15*l* to 18*l* 0s; ditto, Morea, 13*l* to 15*l* 10s; Divi Divi, 10*l* to 13*l* 10s; Myrabolams, 9*l* 10s to 13*l* 0s per ton; Sumach, Sicily, 16s to 17s 6d per cwt; Terra Japonica, Gambier, in bales, 22*l* 10s to 23*l* 0s; do. free cubes, 23*l* to 24*l*; do. Cutch, 23*l* 0s to 24*l* 0s per ton.

METALS.—The transactions of the week have not been important. Straits tin is rather easier, the latest business being at 90s to 90s 6d cash. The spelter market is firm, and a few sales have been made on the spot at £19 5s to £19 7s 6d; Spring shipment at £19 12s 6d per ton. Other business reported of which no particulars transpire. Copper remains unsettled. Scotch pig iron last sold at 49s 10½d to 50s per ton cash for mixed numbers.

SPIRITS OF TURPENTINE after receding to 66s, is now firmer at 67s 6d per cwt.

OILS.—Olive has been neglected. Fish oils are unaltered. Sperm is in good demand at 80*l* per tun. The market for linseed is stationary at 32s 6d to 32s 9d on the spot. Cocoa-nut has been dull at 39*l* to 39*l* 10s for Ceylon and Cochin. Fine Lagos palm is worth 36*l* 5s to 36*l* 10s. Rape oil sells slowly. Refined, 44*l* to 44*l* 10s. Brown is wanted at 41*l* per ton.

TALLOW.—The market continues inactive. This morning 1st sort new Petersburg Y.C. is worth 41s 6d; March, 41s 6d to 41s 9d; for the last three months, 43s per cwt.

PARTICULARS OF TALLOW.—Monday, January, 30.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market closes quietly, and the very moderate supply brought to auction went slowly at former quotations. 2,381 bags Gurpatta date Bengal partly sold, also 77 casks 197 barrels Jamaica. 2,042 bags Natal obtained the valuations. The week's business in West India sugar amounts to 3,000 casks. 1,800 casks Cuba privately at 29s to 30s 6d per cwt.

COFFEE.—There were not any public sales, but a fair amount of business done privately.

TEA.—5,506 packages sold to-day, leaving 11,000 packages for Monday. Prices were again lower, especially for common to fair red and black leaf Congou.

RICE.—100 tons white Bengal sold at 12s to 12s 1½d per cwt.

SALTPETRE.—1,200 bags Bengal have sold, refraction 4¼ to 4½, 31s; 8½, 29s 6d per cwt, cash.

OILS.—457 casks by auction sold at 34s to 37s 9d. 189 casks palm partly sold at 36s 6d per cwt.

TALLOW.—808 casks 104 barrels American by auction partly sold at 41s to 42s 6d. 116 casks Australian sold at 39s to 42s 9d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues dull, without any alteration worth noting. For export, some few sales have been made in crushed, at 30s 6d in barrels. In Dutch crushed some transactions have taken place for present and forward delivery on easier terms.

GREEN FRUIT.—Market without alteration. Some parcels of oranges from St Michael's, Terceira, Valencia, and Sicily, sold by Keeling and Hunt at public sale without improvement in prices. Lemons of good quality are in request. More inquiry for Seville sours. Barcelona nuts dull. Black Spanish and French walnuts in moderate demand. Almeira grapes mostly in dealers' hands, and met with a fair sale.

DRY FRUIT.—The fruit trade continues dull, and shows no signs of revival; prices are in many instances 1s to 1s 6d lower than at Christmas.

ENGLISH WOOL.—Trade continues very dull, with a downward tendency.

COLONIAL WOOL.—The market is without change.

FLAX.—Market unaltered.

HEMP market very quiet for Russian and Manilla. Prices remain firm.

TOBACCO.—The market has not prevented any change in character. Prices remain firm and steady. Good and fine descriptions are unattainable, unless at full quotations. Sales of common and ordinary qualities have been made at prices in favour of buyers.

METALS.—Our metal markets are generally dull. There has been a little more doing in Australian copper. Burra at 90*l*, and Wallaroo Cube at 87*l*. Tin again has become flat. Straits is now offering at 89*l* 10s. Other metals are unaltered.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	44	3
Fat by ditto	2	2
Yellow Russia	43	0
Melted stuff	32	6
Rough ditto	18	0
Greaves	18	0
Good dregs	7	0

METROPOLITAN CATTLE MARKET.

THURSDAY, Feb. 9.—The show of beasts in to-day's market was limited, and in but middling condition. Most breeds were in fair request, at full prices, the best Scots having realised 5s 6d per 8 lbs. With sheep we were scantily supplied. Downs and half-breds moved off freely, at extreme rates, but other breeds were a slow inquiry. The top figure was 6s 2d per 8 lbs. Calves were in short supply, and fair request, at full prices,—viz., from 4s 4d to 5s 6d per 8 lbs. In pigs, very little was doing, at late quotations. Milch cows were very dull.

Per 8 lbs to sink the offal.

HOP MARKET.

BOROUGH, Monday, Feb. 6.—We have had rather more inquiry, giving a firmer value to all hops of good quality; inferior descriptions move off but slowly.

Digitized by Google

FRIDAY, Feb. 10.—The trade for good and fine hops continue firm, at fully late rates, and there is a fair amount of activity in the demand, both as regards English as well as foreign produce of superior quality. Inferior hops are a dull inquiry, at about previous rates. Mid and East Kents, 110s to 200s; Weald of Kents, 105s to 155s; Sussex, 100s to 140s; Yearlings, 108s to 140s; Bavarian, 110s to 200s; American, 100s to 140s per cwt.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Feb. 6.—The arrivals coastwise have been small, but rather more by rail, and most sorts have made little more money. The following are this day's quotations:—Yorkshire Flukes, 120s to 135s; ditto Regents, 90s to 100s; ditto Rocks, 75s to 80s; Kent and Essex Regents, 80s to 95s; Perth, Forfar, and Fife Regents, 70s to 80s; ditto Rocks, 60s to 70s; French and Belgian whites, 50s to 55s per ton.

FRIDAY, Feb. 10.—These markets are moderately supplied with potatoes, for which there is a steady demand, at rather higher prices for selected produce.—Yorkshire Regents, 80s to 100s; ditto Flukes, 120s to 140s; Kent and Essex Regents, 80s to 100s; Scotch Regents, 70s to 80s; ditto Rocks, 60s to 70s; Dunbar Regents, 90s to 105s; foreign, 55s to 65s per ton.

HAY MARKETS.—THURSDAY, Feb. 9.

SMITHFIELD.—Meadow hay, 4*l* 10s to 5*l* 10s; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 14s per load. A moderate demand.

CUMBERLAND—Meadow hay, 4*l* 10s to 5*l* 10s; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 14s per load. Trade steady.

WHITECHAPEL.—Meadow hay, 4*l* 4s to 5*l* 10s; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 14s per load. Supply moderate.

COAL MARKET.

FRIDAY, Feb. 10.—Wallsend: Haswell 21s—Stewart's 20s 6d—Acorn Close 18s 6d—Belmont 18s 6d—Braddyll's Hetton 19s 9d—Byron 19s—Gosforth 18s 6d—Eden Main 19s 3d—Tunstall 18s 6d—Wharncliffe 18s 6d—Byass's Bebside West Hartley 15s—Cowpen Hartley 15s—Davison's West Hartley 15s—Buddle's West Hartley 15s—Lambert's West Hartley 14s 9d—West Hartley 15s—North Pelton gas 14s 3d—Walker Primrose 12s 6d—Wylam Moor 16s. Ships at market, 80; sold, 20; gas contracts, &c., 57–77; unsold, 3; ships at sea, 25.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 10.—The public sales of miscellaneous wools have been in progress since the 6th inst., and will be brought to a close this evening. A good deal has been withdrawn either for want of sufficient competition, or on account of the reserved prices being apparently beyond the reach of buyers. Anything of a useful description has realised about former rates.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 10.—Thin attendance to-day. Wheat in fair request at late rates. Flour in better demand at full prices. Indian corn 3d dearer; Galatz, 26s to 26s 3d. Beans, oats, and oatmeal flat.

GAZETTE OF LAST NIGHT.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 28th of January, on 11,792 miles, to 568,736*l*, and for the corresponding week of last year, on 11,460 miles, to 569,620*l*, showing an increase of 332 miles, and a decrease of 884*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,293 miles, to 465,629*l*, and for the corresponding week of 1864, on 8,045 miles, to 464,486*l*, showing an increase of 248 miles, and 1,143*l* in the receipts.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Feb. 6.—In the share market great dulness prevailed, but the only material changes of tone were in English railways, banks, and American securities, all of which descriptions closed with a tendency to improvement. Of the English lines, Great Western recovered ¾, Lancashire and Yorkshire and Midland ½ each, North-Western ¼, Metropolitan 1, ditto (new) ⅛, and North Staffordshire ½; and Great Northern and ditto (A stock) declined 1 each, North-Eastern (Berwick) ½, and ditto (Leeds) ¼. In colonial, Eastern Bengal improved ½, and Great Western of Canada, ditto (new), and Grand Trunk of Canada receded ¼ each, and ditto (first preference deferred) 1. In American, Erie shares (paid up) recovered 1, Illinois Central shares ¾, and United States Five Twenties and Virginia (6 per cent.) ½ each. In British mines, Clifford Amalgamated advanced 2; and Nangiles declined 1, Marke Valley ½, and East Carn Brea and North Wheal Bassett ¼ each. In foreign mines, no material alteration occurred.

TUESDAY, Feb. 7.—In the share market to-day there were but few transactions, and English railways and American securities were less buoyant at the close, the other descriptions showing no average alteration of prices. Of the English lines, North Staffordshire further improved ¼; Metropolitan relapsed 1, ditto (new) ⅛, and Great Western, North-Western, and Midland ½ each; Brighton, Manchester, Sheffield, &c., North British (Edinburgh, Perth, &c.), South-Eastern, and North-Eastern (York) declined ½ each, ditto (Berwick) and ditto (Leeds) a further ¼ each, Great Northern a further 1, and ditto (A stock) further 2. In colonial, not a single movement occurred in the closing prices. In foreign, Bahia recovered ¼; Turin and Savona (of both descriptions) advanced 1 each, and Dutch-Rhenish ⅛; and San Paulo receded ½, and Great Luxembourg and Namur and Liege ⅛ each. In British mines, Tin Croft and Wheal Trelawney improved ½ each, and East Granville ¼; and East Bassett declined 3¼. In foreign mines, Cobre Copper declined 2. Of the banks, Australasia (of both descriptions) advanced 1 each, and City a further 1; and English, Scottish, &c., Chartered, Buenos Ayres, and North-Western declined ½ each, and Land Mortgage of India ⅛.

WEDNESDAY, Feb. 8.—In the share market to-day there was no recovery of animation, and English railways and banks showed a tendency to weakness in the closing quotations. Of the English lines, Midland (Birmingham and Derby) declined 1, and ditto (original), Great Western, and South-Eastern a further ½ each, Lancashire and Yorkshire, North-Western, Manchester, Sheffield, &c., North-Eastern (Berwick), and ditto (York), a further ¼ each, Great Northern, and ditto (A stock) further 2 each, Metropolitan a further 1, and ditto (new) a further ½. In colonial, Great Western of Canada (5½ per cent. bonds) advanced 2. In foreign, Turin and Savona (paid up) further improved 1, and Central Argentine receded ½. In American, Erie shares (paid up) recovered ½, and United States (5-20) and Virginia (6 per cent.) further declined ¼ each. In British mines, Stray Park improved 1, East Grenville relapsed ¼, and Great Laxey declined ½, and North Wheal Crofty ¼. In foreign mines, Santa Barbara improved ½.

THURSDAY, Feb. 9.—In the share market, the variations from yesterday's closing prices again showed a lower tendency in English railways and banks, as also, in a less degree, in foreign railways and miscellaneous shares. Of the English lines, South Devon advanced 4; Great Western (Oxford), Brighton, and North Staffordshire declined 1 each; and Great Northern (A stock) further receded 1; Manchester, Sheffield, &c., ¾; North-Western and Metropolitan ½ each, and Lancashire and Yorkshire, Midland, North-Eastern (Berwick), and ditto (York), ¼ each. In colonial railways and British mines, no movements occurred. In foreign railways, Bahia improved ¼; and Lombardo-Venetian declined ⅜, Great Luxembourg ¾, and Dutch-Rhenish ½. In American, the only alteration was a further decline of ¾ in United States Five-Twenties. In foreign mines, Scottish Australian receded ½.

FRIDAY, Feb. 10.—There was not much business in the railway market to-day, yet the tone was rather firmer, and the few variations which occurred in prices were in a favourable direction.

THE PUBLIC SCHOOLS CALENDAR for 1865.

Edited by a Graduate of Oxford.

This Work is intended to furnish annually a fuller and more comprehensive account of our Public and other great Schools, than may be obtained from sources usually available.

It speaks of the Government and Endowments of the Schools; of the course of Study, and the methods of teaching adopted; of the Examinations, Prizes, Scholarships, and Exhibitions, giving lists of University Honours from 1850 inclusive; of the Discipline, Recreations, and Vacations; of Religious Instruction, and Chapel Services. It also gives full particulars of the Charges of each School, specifying the optional Studies, and extra payments.

An Almanack of School Times, &c., is prefixed.

Rivingtons, London, Oxford, and Cambridge.

NEW EDITION.—POST FREE.

INDIA OFFICE,

4th February, 1865.

The following Notification of the Government of India, dated the 18th of November, 1864, No. 3,354, is re-published for general information.

FINANCIAL DEPARTMENT.

NOTIFICATION.

No. 3,354.

Fort William, the 18th November, 1864.

Whereas frequent complaints have been made of the great inconvenience experienced by the holders of 4 per cent. Government Securities of Sicca Rupee Loans, in consequence of the difficulty of negotiating these Securities at their full value, as compared with those of other loans, the Right Honourable the Governor-General of India in Council has determined to offer to the holders of such Securities the option of converting them into 4 per cent. Securities of a loan in the Government Rupee at the intrinsic rate of Rupees 106. 10. 8 Current Government Rupees for every 100 Sicca Rupees.

2. Notice is accordingly hereby given that, from and after the publication of this Notification, and until the 31st December, 1865, Promissory Notes of the 4 per cent. Loans of 1824-25 of 1828-29, and of the 1st May, 1832, and also Stock Receipts of the 4 per cent. Sicca Rupee Book Debt, will be received in Calcutta by the Accountant-General to the Government of India, and in Madras and Bombay by the Deputy-Auditors and Accountants-General of those Presidencies, for conversion into a 4 per cent. Loan in Government Rupees, to be designated the "4 per cent. Transfer Loan of 1st May, 1865."

3. Promissory Notes of the 4 per cent. Transfer Loan will be issued for sums of Rupees 500 and for sums above that amount in even hundreds, and the holders of Securities of the above Sicca Loans, who may present them for conversion, will be allowed to make up by cash payments to the next amount in hundreds above Rupees 500, or to receive payments of the broken amount in cash, at their option.

4. The Accountant-General at Calcutta and the Deputy-Auditors and Accountants-General at Madras and Bombay, are hereby authorised to receive Notes and Stock Receipts of the above-mentioned Sicca Rupee Loans tendered for conversion, and to grant an acknowledgment for the same in the following form:—

I hereby acknowledge that has this day tendered the under-mentioned Government Securities for conversion into the 4 per cent. Transfer Loan of the 1st May, 1865, for which he is entitled to receive a Promissory Note bearing interest from the (1st May or 1st November next, as the case may be) of the tenor and subject to the conditions of the Loan specified in the advertisement published in the "Gazette of India" of the

5. Loan acknowledgments granted at Madras and Bombay, together with the notes in lieu of which they were issued, will be transmitted by the Deputy-Auditors and Accountants-General of those Presidencies to the Accountant-General to the Government of India in Calcutta, who will cause to be issued, free of expense, to the parties entitled thereto, Promissory Notes in the 4 per cent Transfer Loan, in the following form:—

Fort William, 1st May, 1865.

PROMISSORY NOTE AT 4 PER CENT. FOR GOVERNMENT RUPEES.

The Governor-General of India in Council does hereby acknowledge to have received from the sum of Government Rupees as a loan to the Secretary of State in Council for India, and does hereby promise, for and on behalf of the said Secretary of State in Council, to repay the said loan by paying the said sum of Government Rupees to the said his executors or administrators, on his or their order, on demand, at the General Treasury of Fort William, after the expiration of three months' notice of payment, to be given by the Governor-General of India in Council in the "Government Gazette," and to pay the interest accruing on the said sum of Rs. at the rate of 4 per cent. per annum, by half-yearly payments at the General Treasury of Fort William to the said his executors or administrators, on his or their order, until the expiration of three months after such notice of payment as aforesaid, when the amount of interest due will be payable with the principal, and such notice being considered as equivalent to a tender of payment at the period appointed for the discharge of the note) all further interest shall cease.

Signed by the authority of the Governor-General of India in Council,

Secretary to the Government.

6. Upon all notes and Stock receipts received for conversion by the Accountant-General in Calcutta, Madras, and Bombay, interest up to the day preceding the date of tender will be paid in cash, together with anticipation interest on the new note from that date to the close of the half-year then current.

H. USHINGTON,
Secretary to the Government of India.

DUFFERIN.

SIX PER CENT. DEBENTURES.

THE CONTINENTAL UNION GAS COMPANY (Limited) are now prepared to issue a limited amount of Debentures, bearing interest at the rate of Six per cent. per annum, for periods varying from one to ten years.

Full particulars may be obtained on application to the Secretary, at the offices of the Company, 18 St Helen's place, E.C.; or to Messrs Hill, Fawcett, and Hill, 29 Threadneedle street, E.C.

COMMERCIAL UNION ASSURANCE COMPANY.

Notice is hereby given, that the Annual General Meeting of the above Company will be held on Tuesday, the 7th day of March, 1865, at Twelve o'clock at noon precisely, at the London Tavern, Bishopsgate street, London.

The Books for the Registration of Shares will be closed from Monday, the 27th instant, to Tuesday, the 7th day of March, inclusive.—Dated this 8th day of February, 1865.—By order of the Board.

HENRY GHINN, Secretary.

To Iron Shipbuilders, Ironfounders, and others.—Valuable Land on the North Shore of the river Tees.

TO BE SOLD BY TENDER, BY order of the Honourable Charles Alexander Gore, one of the Commissioners of Her Majesty's Woods, Forests, and Land Revenues, either together or in the two following Lots, all those PLOTS and PARCELS of LAND, situate on the North side of the river Tees, in the parish of Billingham, in the county of Durham, and extending from the Billingham lane landing place (constructed under the provisions of the Middlesborough Improvement Act, 1858), to, or near to, Haverton Hill, containing in the whole, by recent estimation, 66a 1r 19p, be the same more or less.

This valuable tract of land is situate nearly opposite the town of Middlesborough, and is within one mile of Port Clarence, and about four miles from Stockton-upon-Tees. It has a frontage of about 2,532 feet to the river Tees, adjoining some of the best deep water shipping berths upon the river; and it is proposed to be intersected by a line of railway to the West Hartlepool Harbour and Railway Company's line, and also by a carriage road 30 feet wide, extending from the Billingham lane landing place to, and communicating with, Haverton Hill, and with an intended road to Port Clarence, and to be bounded on the east by a road 40 feet wide, leading from a proposed landing place upon the river Tees to Haverton Hill.

Tenders may be made for the whole of the land, or for either of the following lots:—

Lot 1. All those plots or parcels of land, containing together 37a 3r 34p, or thereabouts having a frontage of about 940 feet to the river Tees on the south, and being intersected by the said proposed road and railway for the distance of about 928 feet.

This lot abuts partly upon the proposed road from the proposed landing place upon the river to Haverton Hill, and partly upon another parcel of reclaimed land. The quantity, as stated above, is exclusive of the sites of the said road and railway.

Lot 2. All those plots or parcels of land, containing together 28a 1r 25p, or thereabouts, adjoining lot 1 on the west, and having a frontage of about 1,592 feet to the river, and being intersected for the distance of about 422 feet by the proposed road and railway.

This lot abuts for its whole extent on the South-west upon the Billingham lane landing place, and for its whole extent on the East upon lot 1. The quantity, as stated above, is exclusive of the sites of the said road and railway.

Lithographed plans of the land, with printed particulars and conditions of sale, may be obtained at the office of Her Majesty's Woods, Forests, and Land Revenues, 1 Whitehall place, London; or at the offices of Messrs Dodds and Trotter, Solicitors, Stockton Sealed tenders, to be endorsed "Tees Tender," will be received by the Hon. Charles Alexander Gore, White hall place, London, S.W., not later than 11 o'clock a.m. on the 24th day of February next.

THE CONTRACT CORPORATION (Limited).

Notice is hereby given, that the second Ordinary Meeting of the members of this Corporation will be held on Thursday, the 16th day of February instant, at the London Tavern, at Twelve o'clock precisely.

And notice is hereby further given, that at the close of the above-mentioned Ordinary Meeting, an Extraordinary General Meeting of the members of this Corporation will be held at the same place for the following purposes, viz.:—

1. To take into consideration and to confirm a provisional agreement dated 2nd February inst., entered into between John Watson and Company of the one part, and this Corporation of the other part, for the acquisition by the Corporation of the business of John Watson and Company, and

2. To pass a special resolution pursuant to section 50 of "the Companies Act, 1862," making new regulations in lieu of the existing articles of association of the Corporation.

And notice is hereby further given, that the transfer books will be closed on the 2nd inst., and until after the said meeting, pursuant to the articles of association.—By order, J. CHARLES HANDFIELD, Secretary.

No. 31 Threadneedle street, February 3, 1865.

PROPRIETARY SCHOOL, GRAVESEND.

Head Master, Mr M. GUTTERIDGE, B.A.

The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French, and the practice of good Handwriting.

Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.

For terms and prospectuses, apply at the School.

EASTERN EXCHANGE BANK, LIMITED.

Report of the proceedings of the First General Meeting, held February 2nd, 1865.

The First Ordinary Meeting of the Company was held at the Bank, Cook street, on Thursday, February 2nd, Patrick Hunter, Esq. (Deputy-Chairman), presiding, in the absence of Edward Comber, Esq., Chairman of the Company. Amongst the shareholders present were:—Messrs T. Chilton, G. M. Bowen, R. Dirom, A. W. Malcomson, E. Banner, J. Bigham, J. Prowse, W. Radcliffe, I. Gill, Wm. Barry, Wm. Douglas, Swinfen Jordan, O. Earl, David Malcomson, Thomas Comber, J. S. Smythe, F. Bingham, T. Maxwell, Thomas Lapham, Henry Beasley, W. G. Nicholson, J. H. Langenbach, James Johnson, Rogers Waterhouse, W. C. Nicholson, B. Sproule, Wm. Carson, &c., &c.

The Chairman said he must crave the indulgence of the shareholders in filling the chair. He was extremely sorry to say that their respected Chairman was confined at home by serious illness.

The Company's seal having been fixed to the Transfer of Shares,

The notice convening the meeting was read by Mr Andrew McKean, Sub-Manager and Secretary. The report being taken as read,

The Chairman said: Gentlemen, in moving the adoption of this report I have merely a very few remarks to put before you. In the first place, we are quite prepared to hear complaints of overcautiousness, and want of doing business: but I think, when we look at the reports of some of the Liverpool and London banks—establishments of old and experienced management—I think we have been perfectly justified in the course which we have adopted, in waiting until the storm and crisis has blown over; and particularly in starting a new financial scheme,—purely an exchange bank, the first that has been established in Liverpool,—it was the anxious care of the Directors that nothing should be done to impair the confidence of the public in its position for the future. It would have been a very happy state of things to have reported that even this small balance of £5,500 had been made out of actual business of banking; but it has arisen purely out of interest. We confined ourselves entirely to convertible securities, which were taken at a moderate rate of interest, so that at any time, when opportunities arose, we would be in a position at once to convert them into cash if called upon, and commence the operations of the bank. At the time of our formation, as will be in the memory of most of you, the mania for banks and financial schemes got to such a height in India, and particularly in Bombay, that the demand for managers was so great as to induce the ordinary staffs to remain there instead of coming to England. Great inducements being offered to them to remain there on the one hand, and salaries being increased at home, had we at once selected a manager, we should have entailed a very heavy annual expense upon the bank; but through the assistance of our Chairman and his friends in London, we in the course of time met with our present Manager, Mr Etheridge, and I am happy to say that the Directors are perfectly satisfied with the gentleman whom we have selected to undertake the management of this concern.—(Hear, hear.) He is at present in Egypt; he was delegated by the board to proceed there to open a branch in Alexandria, and to place Mr Baker, who has had some considerable experience at Calcutta, Bombay, and Kurrachee, as the Manager at Alexandria. From the advices which we have received from both these gentlemen, we have every reason to anticipate a large and profitable business there. We shall immediately appoint agents in the East, in Australia, and elsewhere, and as soon as we have sufficient capital we hope to have our own branches in these places. I don't know, gentlemen, that there is anything else for me to say. The accounts are all very plain and explicit, but if any one wishes to ask questions with regard to them, I shall be very happy to answer, for the Directors have nothing whatever to keep back. There is one item perhaps a shade which the shareholders may require some additional information namely, the £6,000 for "preliminary expenses." I may state how that amount is made up:—Stationery, printing, postage, &c., £1,249; brokerage, £1,275; advertising, £2,547; solicitors' expenses, £1,050. I may here state, in justice to our solicitor, that the charges are very much heavier than they would have been but for the precaution the Directors took in issuing separate share certificates, a step which they considered a safeguard against fraud. That has also increased the printing expenses. The advertising is a large amount certainly, but you must remember that during the very week in which we invited applications for shares the Bank of England rate was raised to 9 per cent., and had we not advertised well up and down the country we certainly might have had a difficulty in floating the Company. But we were well repaid for the trouble, as there were immense numbers of applications, much more than we had reason to expect, and from the confidence which has been expressed by many of the shareholders we have every reason to hope that this will be a successful concern in future years.—(Hear, hear, and cheers.) It will take time. I may mention, however, that every day business is gradually coming in to us, and now that we have a branch in Egypt we are prepared to do business there, and also through our different agencies in the East and in Australia. I have therefore much pleasure in moving the adoption of the report.—(Applause.)

Mr Wm. Barry: I rise with much pleasure for the purpose of seconding the adoption of this report, and I think we may with great propriety compliment the Chairman and Directors of the Company for the great caution which they have exercised. By the exercise of that caution they have kept their capital intact, and cleared a gross profit equal to 9 per cent. per annum for the short period during which the bank has been in existence. They must also, I think, have great confidence in the future prospects of the bank, because they propose to divide amongst the shareholders all the profits hitherto made. I have no doubt that they will exercise that economical management upon which the prospects of the bank so much depends to secure our future dividends. I have much pleasure in seconding the adoption of the report.

The resolution was then put and carried unanimously.

Mr Chilton: Mr Chairman, I have much pleasure in proposing

That Mr Patrick Hunter, Mr G. M. Bowen, and Mr A. Malcomson be re-elected Directors of this Bank.

Mr Hunter has been practically our Chairman almost since the formation of the bank, because, unfortunately, Mr Comber has been in exceedingly bad health, which I trust will not continue. It gives me the opportunity of saying, however, that the attention which Mr Hunter has devoted to the interests of the shareholders has been such as, I am sure, will merit at their hands, the continuance of their utmost confidence. Mr Bowen and Mr Malcomson have not been less interested in the welfare of the Bank as ordinary Directors, and I feel quite sure, if it is the pleasure of the shareholders again to elect them to this position, they will devote the utmost service they can give to their interest. I beg to move that these gentlemen be re-elected Directors.—(Applause.)

Mr Bigham: I beg to second that resolution; and, as I am pretty well known in town as an habitual grumbler, perhaps it would be well if I occupied the time of the meeting for two or three minutes in commenting upon one or two things. In the first place, these accounts are given in an explicit and perfectly satisfactory and understandable manner; and, as you said, the only items to which any exception could be taken in the preliminary expenses have been explained and detailed in a way that cannot but be satisfactory to all those persons who have read the reports of similar companies which have been established during the past two or three years, and which have been read at recent meetings. Not having had much experience of balance sheets I can only judge of this by its contrast with others, and it stands out prominently as a most favourable one for the Directors who have had the management of the concern, and is a satisfactory one to the shareholders. One item in contrast with others of a similar kind is especially small—I mean the £1,050 to the solicitors. That I am not at all surprised at, because everything that appears to have gone through the hands of the solicitors seems to have been of the same satisfactory character. I have had occasion during the last month or two to read the deeds of at least thirty or forty companies, and I can safely say this, that with no exception this deed stands eminently forward as one of the most remarkable and just to the shareholders which I have read. It is drawn up with credit by the eminent firm who are the authors of it, and it is certainly satisfactory to find that the Directors have sanctioned it, for it warrants us in giving our confidence to them for the future. I will contrast one single clause in the deed with that which you have heard of in others—viz., Clause 78—which says that "the Directors shall be entitled to set apart and receive for their remuneration in each and several year, commencing from the incorporation of the Company, such a sum of money as shall be voted to them by the resolution of the shareholders in the annual general meeting"—(Hear, hear.) How have the Directors acted upon this occasion? First of all they have given us the accounts, without any remuneration being specified, or an intimation expressed of their expectations, and I believe it is not their intention even to receive it through the legitimate course, namely, the vote of the shareholders on this occasion, upon the ground that they have not done any banking business, and therefore will not take the allowance.—(Hear, hear.) I could mention two other clauses equally creditable to all concerned connected with this deed, but I am so unaccustomed to speak in laudatory terms of anybody that I feel rather a difficulty in pursuing the subject—(laughter and cheers)—though, no doubt, praise is more valuable coming from me—particularly as I have no personal knowledge of any of the Directors except the Chairman, and as I have no interest in the Company except that of a shareholder. I am perfectly satisfied with what has been done, and perfectly hopeful of what is to come.—(Cheers). I beg to second the resolution.

The resolution was then put and carried unanimously.

The Chairman, after acknowledging the re-election on his own part and that of his colleagues, said the Directors had not the slightest wish or intention to receive any fees. They only hoped that at the end of the next 12 months they would be able to lay a satisfactory statement before the shareholders, and then they might receive whatever reward the shareholders approved.—(Hear, hear.)

The Chairman then moved the election of Messrs Harwood, Banner, and Sons, as Auditors of the Company, and that they be paid the sum of £50 for their services in auditing the accounts of the Bank as made up to the 31st December last. The Chairman said he had great pleasure in moving this resolution, having known Mr Banner for a great number of years, in fact, ever since he had been in Liverpool.

Mr G. H. Bigham seconded the resolution, which was put and carried unanimously.

Mr Douglas proposed, "That the cordial thanks of the meeting be given to the Chairman and Board of Directors for the judicious manner in which they have managed the affairs of the bank."

Mr Williams seconded the resolution, which was unanimously adopted.

The Chairman, in reply, said that the Directors were very much obliged to the shareholders, and it would be their constant endeavour to deserve the confidence which were reposed in them.

The Chairman: I have now the very pleasing duty to propose a vote of thanks to the Manager, Sub-Manager, and other officers of the bank. When the idea of forming a branch in Egypt arose it was intimated to Mr Etheridge, the manager, that it would be very desirable that either he, or the sub-manager, should visit Alexandria to make himself thoroughly master of the nature of the business. Mr Etheridge being a married man, and having a family, it was rather a delicate thing to ask him to go out, but he at once, and without the slightest hesitation, placed himself in the hands of the Chairman and the Board of Directors, and proceeded at an immediate notice. It is very satisfactory that he has done so, for although we have the advantage of a gentleman at the Board who is connected with Egypt, Mr Etheridge's visit there has made him completely master of the trade in that country, and we hope on his return that we shall be able to extend very considerably our business there. Therefore, I have great pleasure in moving a vote of thanks to the officers of the Company.

Mr Maxwell, seconded the resolution, which was carried unanimously.

EXTRAORDINARY MEETING.

The Chairman: That ends the ordinary meeting, and we now form ourselves into an extraordinary general meeting for the purpose of altering two clauses in the deed.

Mr McKean then read the notice, to the effect that the meeting was held for the "purpose of taking into consideration the provisions in the articles of association, as to the mode of investing the funds of the Company, and the time for making up the statement of accounts, and the advisability of amending the same, and to make such alteration in the articles of association as may be necessary therein."

The Chairman: The reason, gentlemen, for altering the first clause of the articles of association is to satisfy the requirements of the Stock Exchange, that we should not be able to purchase or deal in the shares of the Company, which I have no doubt the whole of the shareholders will quite approve of. We had to give a letter to the effect that the Board would bring it before the shareholders at the first general meeting, otherwise we could not have obtained a day of settlement on the Stock Exchange. That I have not the slightest doubt will be confirmed. The other is a clause to alter the time of making up our accounts. At present it states two months before the meeting, but if we go to India, Australia, or elsewhere, there would not be time to make up the accounts; therefore, we have taken the usual time of other exchange banks, viz., four months. I therefore beg to move:—

That the 15th section of 98th regulation of the articles of association shall be and the same is hereby repealed, and in lieu thereof the following shall be substituted, that is to say:—"They may invest such parts of the funds of the Company as they shall think fit in or upon any Government stocks or funds or Exchequer bills, or upon such other investments or securities, whether British, Irish, foreign, or colonial (except the shares or stock of the Company), as they may think expedient, and may from time to time vary such securities and convert the same as occasion shall require or as they deem expedient."

Mr Dirom: I second that resolution.

The resolution was unanimously carried.

The Chairman next moved, and Mr Dirom seconded the following resolution:—

That the 110th regulation of the articles of association shall be and the same is hereby repealed, and in lieu thereof the following shall be substituted, that is to say:—

"At every ordinary meeting the Directors shall lay before the meeting a statement of accounts of the Company made up to a date not more than four months before the meeting from the time when the last preceding statement was made; or, in case of the first statement, from the commencement of the Company; and every statement shall be accompanied by a report of the Directors as to the state and condition of the Company, and as to the amount which they recommend to be paid out of the profits by way of dividend or bonus to the shareholders, and the amount (if any) which they recommend to be retained for the formation of a reserve fund."

It was also resolved:—

That a General Meeting of the Company be held on Thursday, the 16th day of February, 1865, at Twelve o'clock noon, for the purpose of confirming the above resolutions.

On the motion of Mr Bigham, seconded by Mr Prowse, a vote of thanks was passed to the Chairman, and the proceedings closed.

THE SOUTH-EASTERN BANKING COMPANY (Limited).

Report presented to the Shareholders at the First General Meeting, held 6th February, 1865.

The Directors have much pleasure in presenting to the shareholders their first report, together with a statement of accounts to the 31st December, 1864.

On the formation of the Bank the business of Messrs Mangles—The West Surrey Bank—established 1836, and carried on at Guildford and six other places, was taken as a nucleus, and shortly afterwards the Bank took over the business of Messrs Burgess and Canham, the Ramsgate Bank.

The result of these purchases has proved highly satisfactory.

Fifteen new branches and three agencies have since been opened, making in all twenty-six places where the Bank is now carrying on business.

By the annexed statement it will be seen that the gross profit up to the 31st December, 1864, was £14,117 13s 8d. After deducting interest paid to customers on deposit and current accounts, current expenses, rebate on bills discounted not yet due, and providing for a loss of £216 5s 1d in transit through the post, there remains a net profit of £4,845 6s 3d.

The Directors recommend the payment of a dividend at the rate of £6 per cent. per annum (free of income tax) on the paid-up capital, which will absorb £2,387 13s 4d: that £367 15s be written off the preliminary expenses—£1,112 18s off the purchase of the old banks, being at the rate of £10 per cent. per annum—and that the sum of £500 be appropriated to a reserve fund.

This will leave £476 19s 11d, together with rebate calculated at £6 per cent., £1,030 8s 11d, making the sum of £1,507 8s 10d to be carried forward to new profit and loss account.

Under the provisions of the Articles of Association the Directors all retire, and, being eligible, offer themselves for re-election.

The Auditors, Charles Fitch Kemp, Esq., and Robert Smith Esq., vacate their offices, and being eligible, offer themselves for re-election.

The dividend will be payable on and after the 7th instant.

SOUTH-EASTERN BANKING COMPANY (Limited).

CHARLES F. KEMP,
R. SMITH, } Auditors.

The notice convening the meeting was read by the secretary.

The register of transfers having been sealed, and the above report read, it was

Resolved.—That the report and balance sheet be received and adopted.

That a dividend at the rate of six per cent. per annum (free of income tax), on the paid-up capital be declared, and that the same be payable on and after the 7th instant.

That the Directors who under the articles of association retire from office be all re-elected.

That C. F. Kemp, Esq., and Robert Smith, Esq., be re-elected auditors, and that the remuneration to each be twenty guineas per audit.

That the best thanks of the shareholders be given to the Chairman and Directors, and to S. G. Finney, Esq., the General Manager, for their past services.—(Signed),

A. LAWRIE, Chairman.

Extracted from the Minutes,
WM. WALTER, Secretary.

NATIONAL BANK OF SCOTLAND.

(Established 1825.)
Incorporated by Royal Charter 1831.

An OFFICE of the Bank has been OPENED at No. 21 FINCH LANE, E.C.

W. J. DUNCAN, Manager.
July 8, 1864. JAS. MILLN, Agent.

THE CONTINENTAL BANK CORPORATION (Limited).

Head Office—9 King's Arms yard, Moorgate street, London, E.C.
Branch Offices—18 Rue de la Chaussee d'Antin, Paris.
